RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, May 15, 1869.

Stock Exchange and Money Market.

Money has been more freely offered, through the past week, both on bank and private account, and rates have been more favorable to the leading borrowers, the range having been from 5@7, generally 6@7 per cent. on call, and 7@10 per cent. per annum on strictly choice to good grades of commercial paper. There has been an active inquiry for accommodation especially from speculative sources, but it has been promptly met at the ruling prices. The U. S. Sub Treasury added $1,281,890 to its cash reserve, during the week, chiefly in the currency form, and for the most part, by the sale of a million of gold, Thursday the 6th inst., for greenbacks, which led to a reduction in the legal tender reserve of the city banks. The banks closed the week with $55,109,573 of lawful money, against $56,495,722 the preceding week, showing a decrease, in this item, of $1,386,149. On the other hand the banks gained $6,813,854 of specie, mainly from the Sub Treasury coin interest disbursements of $4,974,315 and the sale of Treasury gold, to the extent of one million. There were $9,944,572 added to the aggregate of the bank deposits, an important gain. The banks increased their loans, $8,051,212 and their circulation, $14,102. The Philadelphia banks also augmented their deposits $976,721; their specie reserve, $68,767; their legal tender hoard, and $403,432; while they enlarged their loans $425,548, and their circulation $619. On Wednesday, the local money market closed decidedly easy, on a very full offering of capital. The main call for aid was from Stock and Gold operations, and for speculative purposes. Private lenders were more liberal of accommodation than even the banks, and on better terms for the borrowing interest.

The specie reserve of the city banks is now $16,081,489, against $21,286,910 same time last year. The city bank deposits are now $193,893,187, against $199,276,568 week ending May 9, 1868 The legal tender reserve amounts to $55,109,573, against $57,541,837 same time last year. The circulation now stands at $33,986,160, against $24,205,409 same time last year. The loans are now $268,486,372, against $265,755,883 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $150,195,763 a day, against a daily average of $127,294,725 the preceding week, and $125,484,300 the week ending with April 21, 1869. The current week's exchanges average about $143,000,000 a day. The city banks, last week, reported a gain of $6,813,854 of specie, and $9,944,572 of deposits, with a decrease of $1,386,149 of legal tender notes. They increased their loans, $8,051,212; and increased their circulation, $14,102.

National Bank notes to the amount of $129,320 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $314,641,041, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $14,834,576, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,806,465. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,749,800; and for the public deposits, $30,155,850—making a total of $372,905,150. The Treasury Department last week redeemed and destroyed $656,500 of worn and mutilated fractional currency, and issued $396,800 of new. The outstanding amount of fractional currency on the 1st of May, was $35,330,323, against $36,719,912 on the 1st of April, $36,781,548 on March 1, $35,511,127 on February 1, and $34,215,716 on the 1st of January.

The U. S. Sub-Treasury receipts, week ending with May 8, were $21,115,463, including $2,525,718 from customs duties; payments, $19,833,572, including $4,974,315 of coin interest; balance at the close of the week, $83,267,280, against $81,985,389, at the close of the preceding week, showing an increase of $1,281,890. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $1,600,384, including $441,000 from customs; payments, $1,159 002, including $388,393 of coin interest. On Tuesday, receipts $1,147,090, including $537,000 from customs and payments $1,828,964, including $539,761 of coin interest. The balance at the close of business on Tuesday

stood at $83,526,788, against $81,056,651 a week previous; and $87,215,358 on April 28, 1869. The aggregate receipts of the office in April were $32,771,148, including $10,936,268 from customs, aggregate payments, $36,711,819, including $4,655,460 of coin interest.

The outstanding amount of coin certificates on the 1st of May, was $16,307,200, against $21,672,500, April 1, $28,775,560, March 1; $32,659,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $4,649,000, and retired $2,411,718 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during April, reached $1,625,580.

Government revenues have been on a somewhat more liberal scale, since our last, both in forms of customs and excises. The excises, last week, yielded about four millions; customs at the port of New York, $2,525,718 and at the outports about $850,000 (in coin) more, making the grand total income for the week equal to about $3,642,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 129 millions, according to the latest Washington advices.

Gold has been very actively dealt in, most of the week, at a further notable rise in the ruling prices. Early in the week, the speculative operations for an advance were aided by financial reports from London, unfavorable to our credit and interest in that market, through a sudden marking up of the Bank of England rate, and an equally sudden and unexplained increase in the pressure for monetary accommodation at that point, which circumstance checked the dealings in American securities, and seriously depressed prices. The Government sale of Gold here on the first day of the week under review made little impression on the market, which was unusually brisk and excited, up to the close of business on Saturday last, on which day, the Gold Exchange Bank reported clearances of $253,782,000 and resulting balances of $3,556,447 in coin, and $5,762,895 in currency. During the last half of the week, under review, the dealings have been somewhat less extensive, yet on a generally strong and confident basis. The range of the price during the week was from 135⅞@139⅛; and the closing quotation on Wednesday was 137⅞. Secretary Boutwell at the close of last week, formally authorized the U. S. Assistant Treaserer at this port, to publicly invite proposals for the sale to the Government of one million of dollars of six per cent. Five-twenty bonds, which was accordingly done. This was regarded as the formal beginning of the enforcement of the sinking fund law of Feb. 25, 1862, which provided that the customs revenues of the Government (always in coin) should be set apart, and applied as follows: *First*—To the payment of the interest on the bonds and notes of the United States. *Second*—To the purchase or payment of one per centum of the entire debt of the United States, to be made within each fiscal year, after the first day of July, 1862, which is to be set apart as a sinking fund, and the interest on which shall in like manner be applied to the purchase or payment of the public debt, as the Secretary shall from time to time direct. Under this law, it has been calculated that the arrearages in coin, due to the sinking fund, to the 30th June, 1869, sum up thus:

Customs during the war		$265,304,054
Gold interest, 1863-'65	$125,000,000	
Demand notes paid off	60,000,000	
Loan of 1842 paid off	2,800,000	
Texas Indemnity paid off	3,200,000	
Total	$191,000,000	
Due sink'g fund 1863-'65	55,219,765	
		246,219,765
Excess, after sinking fund		$19,084,289
Customs since close of war		$699,928,500
Gold interest, 1866-'69	$381,714,651	
Loans 1847-'8 paid off	18,500,000	
Due sink'g fund 1866-'69	101,628,000	
		501,842,651
Leaving after sinking fund		$198,085,849
Add war surplus		19,084,289
For general use of Treasury		$217,170,138

The business public seemed to regard the action of Secretary Boutwell, in this instance, as advantage to the business interests of the country, and to the credit and uprightness of the Government. The customs call for coin keeps up to a full average. The export drain last week did not exceed $425,890. The exports of specie on Tuesday were $112,000 to Hamburg; 765,000 francs in specie were received by the *Westphalia* from Brest on the same day.

On Wednesday, the U. S. Sub-Treasury disbursed $522,387 of coin interest.

The Gold Exchange Bank clearances on Wednesday, were $98,843,000, and the resulting balances $2,095,077 in coin, and $2,759,867 in currency.

The customs demand for Gold last week, averaged $420,953 a day; thus far, this week, it has averaged $489,000 a day, or equal to a weekly aggregate of $2,934,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $148,803, and since Jan. 1, $8,463,145, against $2,817,142 same time in 1868. The receipts from California, last week, were $359,322. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $108,790,376, against $98,314,621 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to April, 25th 1869, $2,449,365, against $2,664,238 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $18,380,699, against $29,667,077 same time in fiscal year 1867-'68, showing a decrease in the current fiscal year, of $11,286,378. The exports of specie, from this port, last week, were $425,890, against $3,686,394 same week last year; total, since July 1, 1868, $33,117,744, against $53,063,761 in 1867-'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $4,974,315; since July 1, 1868, $79,607,551, against $65,603,261 same time in 1867-'68. The specie exports from San Francisco, from Jan. 1, to April 25, 1869, were $12,264,553, against $12,226,116 same time in 1868.

Foreign Exchange has been in fair demand, most of the week, but the offerings have been liberal, and rates shown less firmness, in most instances. Bankers' prime sixty day bills on London closed on Wednesday at 109⅛@109⅜, and on Paris to 5.21¼@5.16¼; sight bills on London to 109⅞@110⅛, and on Paris to 5.15c.@5.13¾. The offering of produce bills has been quite heavy this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,622,424, against $3,434,538 same week last year; total, since July 1, 1868, $142,925,432, against $157,403,172 same time in preceding fiscal year of 1867-'68.

The dealings in the public funds have been on an extensive scale, opening at reduced and irregular prices; but rallying promptly, under a brisk call from buyers of round lots, partly on speculative account. On the announcement that Government was about to begin the purchase of bonds, under the Sinking Fund Law, of Feb. 1862, as already noticed, the demand for the coin-bearing bonds increased perceptibly leading to a further improvement in values, and adding much to the confidence of the public in the stability and buoyancy of prices. The accepted offers were:—$600,000 coupon 64's at 115.50, $200,000 registered 62's at 115.52, $25,000 registered 64's at 115.53, $100,000 registered 62's at 115.50 and $75,000 coupon 64's at 115.53.

U. S. sixes of 1881 closed here on Wednesday at 119⅞@120; U. S. Five-twenties of 1862, ex-coupon, 119⅜@119½; U.S. Five-twenties of 1864 at 115⅜@115½; U. S. Five-twenties of 1865 at 116⅛@116⅜; U. S. Five-twenties of 1865, consolidated, 117⅛@117⅜; U. S. Five-twenties of 1867, 117⅜@117½; U. S. Five-twenties of 1868, 117⅜@117½; U. S. Ten-forties at 108½@108⅝; U. S. Six per cent. currency bonds, 106⅜@106½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 28.	May 5.	May 12.
Consols	93⅝@¾	93⅜	92⅝@⅞
U.S. 5-20's of 1862	80⅝	80⅛	79
Erie	21¾	19⅛	20½
Ill. Central	98½	98⅛	96
Atl. and Gt. Western.	24	24½	....

After protracted negotiations, the consolidation of the old New York Stock Exchange Board, dating nearly sixty years back, and the Open Board of Brokers, (established in 1863,) has been consummated. The consolidated New York Stock Exchange has elected Mr. W. H. Neilson President, and Messrs. M. A. Wheelock and B. O. White, first and second Vice-Presidents, for the ensuing year.

Business in Stocks has been on an extensive scale all through the week at much firmer prices, as a whole, though there have been frequent fluctuations.

With the completion of the great Pacific Railroad enterprise, the inauguration of the policy of buying in Government securities on the part and for the benefit of the National Treasury, and the consolidation of the Stock Exchanges, business people have regarded the week as a very memorable one.

There has been a fair inquiry most of the week, for the leading kinds of domestic produce, but at generally less satisfactory prices. Cotton, corn, oats, pork, and petroleum closed heavily. Middling upland cotton closed weak on Wednesday at 28½@28¾ cts. per lb. The stock of cotton

now here is estimated at about 82,500 bales. The receipts at the port this week, have averaged about 1,850 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,087,000 bales, against 2,121,000 bales same time in 1867–'8; exports, same time 1,228,000 bales, against 1,524,000 bales same time in 1867–'8; stock on hand at latest dates, 270,000 bales, against 201,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 8,848 pkgs., against 9,169 pkgs., same time last year. From Boston, 3,574 pkgs., against 5,059 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been in fair demand but closed dull, ranging from 10@16½c., per lb.; week's receipts, 7,918. Milch cows, in less request at $40@$110 each, receipts, 67. Veal calves, inactive at from 5@10½c. per lb.; receipts, 1,109. Sheep and lambs have been in good demand at from 5½@8½c., per lb.,; receipts, 16,806. Swine, more active at 9½@10c. per lb., all live weight; receipts, 22,227.

Foreign merchandise has been moderately inquired for at less buoyant prices as rule. The total imports of foreign dry goods, last week, were $1,485,736, and the total amount marketed $1,612,249. The value of foreign merchandise imported last week, was $6,187,113—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $7,672,849, against $4,216,906 same week last year; total since July 1, 1868, $246,268,493, against $205,272,742 in 1867–'8. Ocean freights have shown more activity and firmness, but closed weaker, on a better supply of room. For Liverpool we quote flour at 9d. by sail, and 1s. by steamer, per bbl.; grain at 2½d. by sail, and 3d.@3¼d. by steamer, per bushel; cotton at ⅛d. by sail, and $\frac{5}{32}$@$\frac{3}{16}$d. by steamer, per lb.; and heavy goods 10s.@25s. by sail, and 10s.@25s. by steamer, per ton. Total number of vessels in port on Wednesday, 569.

The imports for the week ending May 8, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,125,659	$1,485,736
Gen. merchandise	3,091,247	6,187,113
Total for the week	$4,216,906	$7,672,849
Previously reported	81,463,497	108,497,526
Since January 1	$85,680,403	$116,170,375

The New York exports, exclusive of specie, for the week ending May 11, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,434,538	$4,622,424
Prev. reported	61,677,926	55,570,842
Since January 1	$65,112,464	$60,193,266

The balance in the Sub-Treasury on Wednesday was $84,088,480 73.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Louisiana 6s, Levee bonds, 70; do., 8s, Levee bonds, 89½; Georgia 6s, 83; do., 7s, 96; Alabama 8s, 102; California 7s, 128¼; New York State 7s Bounty Loan coupon, 110¼; do., 6s, 1873, 102½; Brooklyn 6s, Water Loan, 95½; Milwaukee and St. Paul 1st mort., Iowa Div., 90; Col., Chi. and Ind. Central 2d mort. 80¾; N. Y. and N. H., 130; do., 6s, 94; Am. Completion of the Pacific Railroad.

The last rail connecting the Central and Union Pacific Railroads was laid with imposing ceremonies at Promontory Point, Utah, on Monday, the 10th inst., making, with the existing roads, a continuous line of railway from the Atlantic to the Pacific. The event was celebrated by jubilant demonstrations in various cities of the Union. All things considered, this enterprise may justly be regarded as the great accomplishment of the age—magnificent in its conception, wonderful in its rapid progress, and destined in its benificent influences, to be one of the great civilizing and commercial levers of the world.

☞ Our attention has been called to the "Patent Forged Crucible Cast Steel Reversible Frog," as manufactured by Messrs. Armstrong & Co., of Rotherham, England. The Frog complete is one solid forging drawn from the ingot under the hammer, it is reversible, the material of which it is composed renders its durability almost indefinite, and for climates subjected to severe frosts it is essentially suitable. In Russia, England, and many parts of the European continent it is laid down in large numbers, and four years of constant use shows no perceptible wear. Mr. W. C. Oastler, 43 Exchange Place, N. Y., is the agent in this country for Messrs. Armstrong's Railway equipment.

Financial and Commercial.

Under this broad and comprehensive heading the condition of the country requires that we should do something else than quote the prices of gold, public securities, bonds, stocks and bank assets, prices current, or exchanges. It behooves us to look at the supply, through production, that gives the financial capacity and commercial elements that may or may not enable us to carry on the Governments and business of the country with success.

The products of the United States, resulting from all our industries, are estimated at about $4,000,430,000 in currency. These products are obliged to pay—first, the cost of production, second, the expenses of supporting the industrial masses through whose labor they are derived.

Third—the amount of indebtedness of the General Government, the 36 State Governments, municipal Governments, county and town indebtedness amount in the aggregate to about three thousand and two hundred millions, the annual interest on which, in currency, is not far from $256,000,000.

Fourth—the annual expenses and appropriations for the General, State, territorial and municipal Governments, including county and town may be approximately estimated at $275,000,000, making the aggregate of the yearly exactions for interest and expenses about $531,000,000. This sum, be it more or less, is paid from the net profit of *producing capital and labor.*

In addition to the above exactions there is a large amount of income over and above the interest on the public securities held by Banks, Insurance Companies, and others, and which is in excess of the ordinary interest on their capital, variously estimated at from one to two hundred millions of dollars. This again, whatever it may be, is drawn from the net profit on production. We shall get a better idea of this, as well as of the general state of things when we contemplate the vast army of non-producers connected with non-producing employment, and contriving in some way to live off of the fruits of industrial capital and labor.

The picture would not be complete without the important item of *Railway fiction*, whereby the industries of the country are compelled to pay income on false capitalization, or inflation of cost, amounting in the aggregate to something over $600,000,000. In a late number of the *North American Review*, by Charles Francis Adams, of Mass., the amount of false capitalization, treated under the head of "inflation of railway capital," in the railways between Boston and Chicago, was set down, from *data* collected, at over $45,000,000, which, were the statement correct, would be sufficient, if put in cash, to construct a cheap-freight railway for the whole distance.

Congressional Legislation on the subject of railways, thus far, has seemed to proceed in the beaten track of enomities that have always been perpetrated against the producing industries. The Pacific Railway enterprise in its inception was characterized by an item of account brought in by one of the Vice Presidents, allowed, as it is said, by the company, and placed to construction account. It was expressed thus—"*Five Hundred Thousand Dollars expended in Washington in a confidential way to secure the passage of the Bill.*" This is, however, but a small amount, and hardly worth mentioning except as an illustration of the influences resorted to in the debauchment of legislation.

Somewhat analogous to this was the late Broadway Railroad bill where the charter was so arranged in its provisions that the franchise for a few miles of city road was worth, in case of passage, $2,000,000 in money, its commercial value being estimated upon the ability of the machine to rob the people of that amount. Such has grown to be the general character of railway legislation in this country; but, were it a consolation to know that American folly had companionship, it would be found in the stupidity of the British Parliament. It is now maintained in England that the railways of the realm could be duplicated at 50 *per cent.* of their nominal cost with 100 per cent. added to their inefficiency as aids to invigorate production. Whether, owing to the comparatively limited resources of the British Islands, this may, or may not be true in England; it is easily demonstrated that such results are attainable in this country.

Our financial and commercial questions, when traced to the foundation of what lies at the bottom of all, are mere questions of production, its diminution or increase. The management of Banks like the management of the railway may be made to assist the producing industries or become their worst enemy. Our Banking capital is composed of the Government securities drawing an average of eight *per cent.* in currency on the investment. Their currency is oftentimes employed to add to their stock of Government securities the interest on which is preferred to the usual interest on loans and discounts. Preference is given in Bank accommodations to borrowers who can put up Stocks, Bonds, or Government securities, by reason of which, most of the accommodations from the actual resources of the Bank are drawn into the business of stock jobbing, while the classes connected with the vocations of industry, trade and commerce are accommodated but little beyond the average line of their deposits: in other words, are permitted to borrow their own money, paying the Banks interest on deposits in addition to the two-fold income on their capital and currency before mentioned.

Had the ingenuity of man been taxed to the uttermost to devise a Banking system more utterly at war with the whole industrial avocations of the country, it could not have better succeeded. Of all the contrivances to make exactions on producing capital and labor, the Banks, *as now managed*, are the worst. The great point of justice in the business relations of the country has been overlooked, while Savings Banks, Life Insurance Companies, and other institutions whose capital is based on Government securities are also managing to make enormous income on their capital, treble and quadruple the rates of the average income on producing capital, or that which is engaged in the business of production. The Government virtually said to the bondholding class—"take the bonds which will yield eight *per cent.* in currency, and the processes shall be provided by law by which you shall be enabled to double or treble the income." What is all this but a tax on production, multiplied in amount by the contrivances created to aggravate the burden?

Take the aggregate of our industries for a run of thirty years from 1830 to 1860, including agriculture, manufactures, mining, the mechanic arts, and embrace with them trade and commerce, and the net income on the capital invested would fall short of an average of four *per cent.* No instance can be pointed out where the wealth of any Nation, from production alone, has increased beyond this ratio. While production is obliged to bear its own expenses and burdens, every other expense, burden and exaction that society is heir to are also heaped upon it. The most deplorable part in the contemplation of the subject is, that most of the disparagements are inflicted by fraud, and unwise and false ideas of public or political economy.

Cuba, under the dominion of Spain, though bled to gratify the insatiate avarice of the home Government, never visited production with such degree of exactions, as are now being made on the industries of the United States. The Government of Spain lacked the ingenuity to contrive them. Spain's exactions on Cuba merely came in a more odious form. They were direct and wanton, could be seen, appreciated and felt, but still the industries of Cuba could thrive somewhat and stand up. Ours, under the present regime cannot. The processes are too exhaustive.

In getting at the condition of the country there is an item of much magnitude which it may be proper to state. The war expenses of the Union Government were five thousand millions. Those of the Confederate, including devastations on property, were something over three thousand millions, not including slave property. The property of the whole United States in 1860 was estimated on a gold basis at sixteen thousand millions. Of these eight thousand millions, war expenses, two thousand and five hundred millions remain in the form of bonds drawing interest, while five thousand and five hundred millions of the people's substance have been wiped out.

The question comes up not only financially and commercially, but also industrially, how are we to meet the emergencies under this condition of the country? We are obliged to face the question. There is no security in trying to dodge it, and much less in giving way to gloom or despair, or committing those foolish extravagances that people sometimes do in a storm at sea, or when the house is on fire. Although the last season was fruitful, yet trade and commerce, real estate in the cities, manufacturing, mechanical enterprises and other industries begin to feel in reality the growing depression. Notwithstanding the condition of the country and the depressions on business, there is yet an available remedy, a quick remedy, and a permanent remedy against panics, convulsions, suspensions, and possible repudiation that might follow in the wake of the others.

WHAT IS THAT REMEDY?

In general terms it is embraced in few words, *Cheap Freights by rail, and low rates of interest on money.* Without these no effective panacea will be found. It will not be found in a return to specie payments, nor in the conflicting doctrines of "high tariff," or "free trade," for nothing short of a general policy, certain to effect the cheapening of production and distribution on a wide and general scale, can accomplish the results that must be attained in order to avert the

impending calamity. The Banks and Railways of the United States have it in their power to change the whole complexion of affairs, not only from gloom to animated hope, but from anticipated trouble to assured prosperity in less than six months. We not only see clearly that it is in their power to do this, but maintain that it can be done on principles that will be as certain to promote their true and substantial interests, as it will be to promote their common welfare.

Banks are now drawing an interest in currency of eight *per cent.* on their capital composed of Government securities. They can well afford to loan their currency and deposits at interest of three per cent., and after defraying all reasonable expenses of banking, would be enabled to obtain rates of income twice as high as the net profit on producing capital. In connection with the arrangement for lower interest, by throwing their accommodations in the right direction, by careful loans on long time, they could bring the monetary system of the country to the aid of producing enterprises, and effectually turn non-producing into producing capital. Could this arrangement be effected, and the rates of interest brought down to the European standard, or below, the effect on production in the United States would outrun the most sanguine calculations. It is not our public debt or the interest on it that makes the main burden on industry. Give to the industries a monetary system that will facilitate production and increase their ability to pay, and the people will meet it with animated cheerfulness, and our bonds will rise to premiums in proportion to the content of the industrial population. There is a basis of fair reciprocity that must be inaugurated and maintained. In case the initiative is taken voluntarily by the classes that have it in their power to do so, the change from a false to a sound system of political economy may be immediate and effective, otherwise, we may be compelled to build up anew on the ruins of a system that cannot endure, and amidst the distractions of a more disordered state of society.

Our views on the subject of reform in railway management are too well known to require repetition. We are the unqualified advocate of the plan or scheme recommended by the "National Cheap Freight Railway League." We have assumed that under the system recommended by the League, from 25 to 50 per cent. can be added to the financial value of railway property on the average, while the advantages to the country would be trebled. While others, connected with railway management, are advocating the substantial features of the scheme, we take it as a whole, embracing as it does in our judgment, the most carefully considered combination of economies, and all blended in symmetrical proportions to make the proposed system complete. One of the favorable features of the plan is, that any of our double track roads can be put on its plan of management immediately. It would require no new fashion road bed or rolling stock. It would change at once the whole of our present railway policy from high charges on meagre commerce to low charges on multiplied patronage. We need not discuss the effect which such a change in railway policy would produce on the development of our resources, the stimulations on industry, or the new creation of taxable property that would result from it. We close our paragraphs by saying, it will need every interest of the country in combination, carefully directed in its aims to assist the whole on principles of just reciprocity, to carry us through our emergencies without convulsions. We have stated the plan and policy, which it seems to us might be made effective. It is based wholly on the idea of bringing every influence and power possible to the aid of production. If there be any other effective remedy to repair the damages of war, to meet the public debt, and at the same time to make the country prosper, we do not know it, and would be slow to comprehend it.

Illinois Central Railroad.

The statement of this Company for the month ending April 30, 1869, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	6,922.11 for	$66,425 06
Acres Int. Fund Lands sold	361.60 for	3,800 44
Acres Free Lands sold	1,163.54 for	17,280 26
Total sales during month of April, 1869	8,447.25 for	$87,505 76
To which add Town Lot Sales		295 00
Total of all	8,447.25 for	$87,800 76
Cash collected in April		$186,521 38

TRAFFIC DEPARTMENT.

Receipts from Freight		$272,983 00
do.	Passengers	135,069 70
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	90,000 00
Total Receipts in April, 1869		$508,411 03
Total Receipts in April, 1868		$444,814 62
Estimated earnings in the month of April, on the D. & S. C. R. R., not included above		$86,944 40
Corresponding month of 1868		$70,822 68

New York Railroad Consolidation Act.

Section 1. It shall and may be lawful for any railroad company or other corporation organized under the laws of this State, or of this State and any other State, and operating a railroad or bridge, either wholly within or partly within and partly without this State, to merge and consolidate its capital stock, franchises, and property of any other railroad company or companies organized under the laws of this State, or under the laws of this State and any other State, or under the laws of any other State or States, whenever the two or more railroads of the companies or corporations so to be consolidated shall or may form a continuous line of railroad with each other, or by the means of an intervening bridge or ferry.

Sec. 2. Said consolidation shall be made under the conditions, provisions, and restrictions, and with the powers hereinafter in this act mentioned and contained, that is to say:

1. The directors of the railroad companies proposing to consolidate may enter into a joint agreement, under the corporation seal of each company, for the consolidation of said companies and railroads, and prescribing the terms and conditions thereof, the mode of carrying the same into effect, the name of the new corporation, the number and names of the directors and other officers thereof, and who shall be the first directors and officers, and their places of residence, the number of shares of the capital stock, the amount or par value of each share, and the manner of converting the capital stock of each of the said companies into that of the new corporation, and how and when directors and officers shall be chosen, with such other details as they shall deem necessary to perfect such new organization and the consolidation of said companies or railroads.

2. Said agreement shall be submitted to the stockholders of each of the said companies or corporations at a meeting thereof called separately for the purpose of taking the same into consideration; due notice of the time and place of holding said meeting, and the object thereof, shall be given by each company to its stockholders by written or printed notices addressed to each of the persons in whose names the capital stock of such company stands on the books thereof, and delivered to such persons respectively or sent to them by mail, when their post office address is known to the company, at least thirty days before the time of holding such meeting, and also by a general notice published daily for at least four weeks in some newspaper printed in the city, town or county where such company has its principal office or place of business; and at the said meeting of stockholders the agreement of the said directors shall be considered, and a vote by ballot taken for the adoption or rejection of the same, each share entitling the holder thereof to one vote, and said ballots shall be cast in person or by proxy, and if two-thirds of all the votes of all the stockholders shall be for the adoption of said agreement, then that fact shall be certified thereon by the secretaries of the respective companies under the seal thereof, and the agreement so adopted, or a certified copy thereof, shall be filed in the office of the Secretary of State, and shall from thence be deemed and taken to be the agreement and act of consolidation of the said companies; and a copy of the said agreement and act of consolidation, duly certified by the Secretary of State under his official seal, shall be evidence in all Courts and places of existence of said new corporation, and that the foregoing provisions of this act have been fully observed and complied with.

Sec. 3. Upon making and perfecting such agreement and act of consolidation as herein before provided, and filing the same or a copy thereof in the office of the Secretary of State as aforesaid, the said corporation parties thereto shall be deemed and taken to be one corporation by the name provided in said agreement and act; but such act of consolidation shall not release such new corporation from any of the restrictions, disabilities or duties of the several corporations so consolidated, but nothing in this act contained shall allow any rate of fare for way passengers greater than two cents per mile to be charged or taken over the track or tracks of that railroad now known as the New York Central Railroad Company, and the rate of fare for way passengers over the track or tracks now operated by the said New York Central Railroad Company shall continue to be two cents per mile, and no more, wherever it is now restricted to that rate of fare, but nothing herein contained shall apply to street railroads.

Sec. 4. Upon the consummation of said act of consolidation, as aforesaid, all and singular the rights, privileges, exemptions and franchises of each of said corporations parties to the same, and all the property, real, personal and mixed, and all debts due on whatever account to either of said corporations, as well as all stock subscriptions and other things in action belonging to either of said corporations, shall be taken and deemed to be transferred to and vested in such new corporation, without further act or deed; and all claims, demand, property, rights of way, and every other interest, shall be as effectually the property of the new corporation as they were of the former corporations, parties to the said agreement and act; and the title to all real estate, taken by deed or otherwise, under the laws of this State, vested in either of such corporations, parties to said agreement and act, shall not be deemed to revert or be in any way impaired by reason of this act, or anything done by virtue thereof, but shall be vested in the new corporation by virtue of such act of consolidation.

Sec. 5. The rights of all creditors of and all liens upon the property of either of said corpor-

ations parties to said agreement and act shall be preserved unimpaired, and the respective corporations shall be deemed to continue in existence to preserve the same, and all debts and liabilities incurred by either of said corporations except mortgages, and duties of either of said corporations shall thenceforth attach to such new corporation, and be enforced against it and its property to the same extent as if said debts, liabilities and duties had been incurred or contracted by it. No suit, action or other proceeding now pending before any court or tribunal, in which either of said railroad companies is a party, shall be deemed to have been abated or been discontinued by the agreement and act of consolidation as aforesaid, but the same may be conducted in the name of the existing corporations to final judgment, or such new corporation may be, by order of the Court, on motion, substituted as a party. Suits may be brought and maintained against such new corporation in the Courts of this State, for all causes of action, in the same manner as against other railroad corporations therein.

SEC. 6. The real estate of such new corporation, situate within this State, shall be assessed and taxed in the several towns and cities where the same shall be situated in like manner as the real estate of other railroad corporations is, or may be taxed and assessed, and such proportion of the capital stock and personal property of such new corporation shall in like manner be assessed and taxed in this State, as the number of miles of its railroad situate in this State bears to the number of miles of its railroad situate in the other State or States.

SEC. 7. Nothing in this act contained shall be so construed as to allow such consolidated company to charge a higher rate of fare per passenger per mile for any part or portion of such consolidated line than is now allowed by law to be charged by each existing company respectively; nor shall this act apply to street railroads, and nothing in this act contained shall be so construed as to effect and impair in any way the validity of any contract now existing between the Buffalo and State Line Railroad Company and the New York Railway Company.

SEC. 8. All the provisions of the act entitled "An act to authorize the formation of railroad corporations, and to regulate the same," passed April 2, 1850, and of the several acts amendatory thereof or in addition thereto, shall be applicable to the new corporation so to be formed as aforesaid so far as the same are now applicable to the railroad companies of this State, which may be consolidated with any other companies by virtue of this act.

SEC. 9. No companies or corporations of this State, whose railroad run on parallel or competing lines, shall be authorized by this act to merge or consolidate.

SEC. 10. This act shall take effect immediately.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JANUARY 31, 1869.

The receipts on capital account remained unchanged, the total amount received being £5,260,829, as in last report. The aggregate expenditure to January 31, 1869, amounted to £5,388,103, leaving a balance of £127,274 at the debit of capital account. The outlay on capital account during the half-year, after deducting sales of surplus lands, has been £5,509. This expenditure is specified in the engineer's report, and includes the proportion of the cost of forming an embankment behind the abutments of St. George's bridge, near Paris, the cost of building four wooden bulverts under the railway enbankment near Prairie siding to provide increased waterway, the final proportion of the cost of building in stone the bridge over the 20 mile creek at Jordan, cost of extending sidings at Suspension bridge, London, Copetown, and Lynden, and laying down a third rail in sidings at Beamsville, Komoka, and London, the balance of the payment on account of the new freight house at Detroit, and the building of a windmill pump, and water tank at Belle River. The receipts and expenditures on revenue account were as follows:

Gross receipts		£423,312
Working expenses, including renewals		209,752
		£213,559
From which there has to be deducted—		
Interest on bonds, loan, &c.	£52,536	
Loss on conversion of American funds	70,362	
Loss on working Erie & Niagara Railway	1,453	
Detroit fire claims	1,158	
Amount set aside for renewal of ferry steamers	3,000	
		128,509
		85,051
Add surplus from last half-year		1,129
Proportion of half-year's dividend on Detroit and Milwaukee preference shares		5,311
Profit on working Galt and Guelph railway		211
Available for dividend		£91,702

From this amount the Directors recommend a dividend at the rate of 5 per cent. per annum, payable in London on May 12, free of income-tax, which will absorb £89,124, and leave a surplus of £2,578 to be carried to the credit of next half-year. The renewal fund for the ferry steamers now amounts, with interest, to £10,303. The amount charged for Detroit fire claims is caused by writing off as a bad debt entire claims in suit against certain insurance companies, although a portion may hereafter be collected. The loss on conversion of American currency for the half-year amounts to £70,362, as compared with £66,612 for the corresponding half-year in 1868. The average rate of conversions made during the half-year was 138½, the average price of gold for the same period having been 140½. The unconverted American funds in hand and outstanding traffic payable in that currency at January 31, 1869, show a decrease of $18,838 20, compared with the amount at the end of last half-year. The following table exhibits the receipts and expenses for seven corresponding half-years:

RECEIPTS.

Half-year ending.	Passengers mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
Jan. 31, 1863	122,627	186,099	579	309,305
" 1864	129,684	171,329	621	301,634
" 1865	154,125	157,874	730	312,730
" 1866	205,131	181,071	837	387,039
" 1867	168,986	161,254	1,273	331,513
" 1868	186,537	213,476	800	400,813
" 1869	183,703	238,764	846	423,312

EXPENSES.

	Including renewals. £	Per cent. of gross. receipts.
Jan. 31, 1863	172,568	55.79
" 1864	171,336	56.80
" 1865	168,577	53.91
" 1866	170,003	43.93
" 1867	166,632	50.26
" 1868	193,667	48.31
" 1869	209,752	49.55

The total traffic receipts show an increase of £22,453, as compared with the corresponding half-year. This increase arises as follows:

Increase in local passenger traffic		£6,455
" through freight and live stock		26,659
		£33,114
Decrease in through pass. traffic	£570	
" emigrant	997	
" express freight & sundries	7,722	
" local freight & live stock	1,371	
		10,661
Total increase		£22,453

The low tariff of rates and and fares referred to in the last half-yearly report, arising from the competition of other lines, has continued, hence the per centage of working expenses is somewhat higher than at the corresponding period of 1868; but, notwithstanding this, the percentage of working expenses compares favorably with the average of the six preceding corresponding half-years, as will be seen by the above table. The cost of ordinary working expenses per train mile in the last and four previous corresponding half-years was:

Jan. 31, 1865	5s. 1½d.	sterling.
" 1866	4s. 6¼d.	"
" 1867	4s. 7½d.	"
" 1868	4s. 5½d.	"
" 1869	4s. 3¼d.	"

The usual detailed reports of the engineer and mechanical superintendent are appended, and there is also a special certificate from each of these officers, in the form prescribed for English railways. The mechanical superintendent's report mentions that a new passenger engine has been completed during the past half-year, and set to work, the cost being defrayed out of revenue. On the 22d of January last a special meeting of shareholders was held in London, to consider a definite communication from the Government of the Dominion of Canada, for the settlement of the Provincial advance and arrears of interest on the following basis, viz.: that the principal sum of £573,688 should be repaid by four equal annual instalments commencing from 1st January, 1870, and that for the arrears of interest, a sum should be fixed equivalent to placing the Government, as regards interest, on about an equal footing with the shareholders of the company, since the company ceased in 1860 to make the half-yearly interest payments to the government. The proprietors concurred with the directors that such a settlement would be desirable. In consequence thereof the honorable William McMaster, chairman of the Executive Committee, with the officers of the company in Canada, after several conferences at Ottawa, with the Minister of Finance and the Auditor General, came to a final adjustment of figures, and agreed that the principal sum (representing the government advance), with the accrued interest up to the 1st of January, 1869, less money due from government for mail and military transport services, should be commuted for a total sum of £668,815, payable by annual instalments, the unliquidated balance, year by year, to bear interest at the rate of 4 per cent. per annum, instead of 6 per cent., as at present. The remission of interest which has been already charged against revenue, together with the further advantage resulting from the diminished rate of interest on the unpaid balance, amount in the aggregate to upwards of £180,000. The first stipulation of the government was the payment in Canada of £100,000 on 10th February, and this has been complied with. It is expected that the government will bring the terms of this settlement under the notice of the legislature, which meets on 15th April, by message from the Governor General, on which resolutions of the House of Commons will have to be passed, and a bill introduced to carry them into effect. It is hoped that intelligence of the Parliamentary confirmation of these terms will be received previous to the general meeting, in which event the meeting will be made special, to ratify the same, and to submit a plan for raising the necessary funds. The proprietors are aware that in 1864, and again in 1868, a deputation from the English board visited Canada, and upon both occasions rendered most essential services to the company. To the mission in 1868 must be mainly attributed the settlement now happily arrived at with the Canadian Government. The actual expenses incurred on these occasions have been paid by the company. The board, however, trust that the proprietors will readily acquiesce with them in thinking that important services of this nature call for some special recognition, and they ask permission to appropriate for this purpose the sum of 1,500

guineas, which will provide an acknowledgement for the two gentlemen who formed the deputation. The directors are glad to announce that a Canadian Company are about to construct an extension of the Galt and Guelph branch northwards, across the fertile agricultural country beyond Guelph, a district hitherto without railway communication. This line is called the Wellington Grey and Bruce railway, and it is intended ultimately to be extended to the shores of Lake Huron. The Great Western Railway Company have agreed to supply rolling stock, and work the first section of 16 miles, when completed as far as the town of Fergus, at 70 per cent. of the gross earnings. Further, it is agreed that an account shall be kept of the railway traffic exchanged between the Great Western railway and the new line, and that 20 per cent. of this traffic shall be set aside annually and appropriated to redeem the capital cost of the line, so that in the course of years the branch will gradually become a part of the Great Western system. The directors have the satisfaction of stating that the net revenue of the Detroit and Milwaukee Company for the half-year ended 31st December, 1868, has, as was anticipated in the last report, permitted of a payment on accounnt of arrears of dividend on the $2,095,000 preference shares of that company (being the securities representing the loan of £250,000 with accrued interest) at the rate of 7 per cent. per annum, amounting to $73,325, which, after deducting United States internal revenue tax and cost of conversion, has produced in gold £10,622. The directors, as will be seen by the net revenue account No. 3, have placed one-half of this amount to the credit of revenue, and the remaining portion has been applied in part liquidation of the old Detroit and Milwaukee interest account standing in the balance sheet, which latter is now reduced to £9,957. The receipts and expenditure of the Detroit and Milwaukee railroad for the year ending 31st December, 1868, have been satisfactory, and show the following results:—Gross earnings, £353,033; working expenses, £208,281; net, £144,752. The Detroit and Milwaukee Company is progressing very satisfactorily, and the receipts show an increase over the corresponding period up to March 25th of £8,204, or upwards of 15 per cent.

On behalf of the board of Directors,
THOMAS DAKIN, President.
London, April, 14, 1869.

☞ During the past year the debt of the State of Connecticut has been reduced $349,244, leaving it April 1, $6,974,992. There are war claims still outstanding against the General Government amounting to $200,000. The school fund is $2,046,108. The total receipts for school purposes during the year were $1,043,086, showing a deficiency of $60,000 to be provided by future taxation.

☞ The contract for building the link of the Nashville and Montgomery Railroad between Decatur and Montgomery, Alabama, has been awarded to Samuel Tate and others. They agree to finish the link for five million and fourteen thousand dollars.

A FOREIGN YOUNG MAN, HAVING A THOROUGH knowledge of Civil and Mechanical Engineering, acquired in France, Germany and Holland, desires an appointment. Salary no object. Apply to A. R., Room 46, No. 176 Bleecker st., New York. 2t20

EAST RIVER SCREW BOLT WORKS.
RYLANCE & CASKELL,
Manufacturers of Screw Bolts,
No. 433 EAST 25th ST., N. Y.

To Railway Contractors.
THE Graduation and Masonry of the FREDERICK AND PENNSYLVANIA LINE RAILWAY, embracing twenty-eight sections of more than one mile each, are advertised for contract, and PROPOSALS for the same will be received at the Company's office in the city of Frederick, Md., up to the 25TH DAY OF MAY, inclusive. Specifications, plans and profiles of the work will be ready for inspection at the office of the Company in Frederick, and at the office of the Western Maryland Railroad, in Baltimore, from the 15th day of May, where contractors will obtain all necessary information to enable them to examine the line. The Company reserves the right to reject all or a part of each bid.
4t18 JOHN LOATS, President.

Blue Ridge Railroad.
THE attention of Contractors is invited to the work of completing the Blue Ridge Railroad, in South Carolina, from Anderson, South Carolina, to Knoxville, Tennessee—a distance of one hundred and fifty-two miles to build.
The Executive Committee of the Board of Directors is prepared to enter into negotiations with responsible persons, who may desire to undertake the work.
Payments will be made in first mortgage (7) per cent. currency bonds of the company, secured by the guarantee of the State of South Carolina, for the punctual payment of both principal and interest. The mortgage covers unencumbered property of the company, which cost three and a quarter millions of dollars in gold, and embraces fifty miles of road complete and in running order.
Detailed Estimates, Plans, Profiles and Specifications, will be ready for inspection by JUNE 1, 1869. Meanwhile, approximate quantities and other information concerning the work may be obtained by application to Col. James P. Low, the Chief Engineer of the Company, or to the undersigned, at Columbia, South Carolina.
R. K. SCOTT,
5t18 Chairman of Executive Committee.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY. NEW-YORK, April 28, 1869.
THE ANNUAL MEETING OF THE STOCKholders of the Illinois Central Railroad Company, for the election of directors and the transaction of other business, will be held at the office of the Company, in the City of Chicago, on WEDENSDAY, the 26th day of May, proximo, at 3 o'clock P. M.
The transfer books of the Company will be closed at the close of business on the 15th proximo, and re-opened on the 1st day of June, following.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

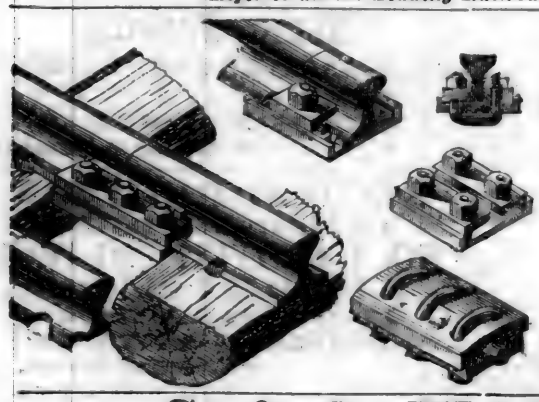
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT

New York Saturday, May 22, 1869.

Lehigh Coal and Navigation Co.

The annual meeting of the stockholders of this company was held in Philadelphia on the 4th inst. Caleb Cope, Esq., was called to the chair, and E. Mitchell, Esq., acted as secretary. The minutes of the last meeting were read and approved. The secretary then read the report of the managers for the year 1868, which we publish entire in this week's issue.

After the reading of the regular report, the following supplementary report was presented and read by the secretary:

The fiscal year of the company closes with the current year, and during the four months intervening between the end of the year and the annual meeting of the company events of interest often transpire which are of sufficient importance to the stockholders to form part of the report to be submitted. Several such matters seem to require this year a short supplementary report. The experiment tried the past winter of mining coal and sending it to market was a success to the extent of realizing from the sales nearly enough to pay for all the dead work done at the mines during the winter, enabling us to start in the spring with but a small balance against coal account. Heretofore there has been a large balance at that date to be worked out during the year. The mines appear to be in equally as good a condition as last year, and the full difference in accounts to be a gain to the company.

	Tons.
The product from January 1 to April 30, inclusive, has been in 1869.....	99,944 17
Product for same time in 1868.....	30,901 12
Increase from company's mines...	69,043 05
The first shipment on the canal was on 26th March, and the total shipments to April 30, inclusive	124,067 01
Against same date last year	68,032 04
Increased tonnage on canal.....	56,034 17
Coal tonnage on railroad, exclusive of amount to Canal, Lehigh Valley Railroad and Lackawanna & Bloomsburg Railroad, from January 1 to April 30, inclusive....	272,149 16
Do., as above, for 1868....	88,030 00
Increased coal tonnage on railroad....	184,119 16

There has been also, a steady and satisfactory growth in miscellaneous freight, and the proportion of local to through business is increasing The profits realized by the company between January 1 and May 1 this year cannot fall very far short of the interest charge due to that portion of the year, against no profit whatever during the same period last year, The company has disposed of 2,266 shares Nesquehoning Valley Rail road stock since 1st January, leaving 3,613 shares still held. The Sinking Fund of the five-year loan has retired $10,000 of the loan, and sales of real estate have been made to the extent of about $50,-000 since the opening of the year, and the company is about closing sales to the aggregate amount of $50,000 additional, and all the proceeds must go into the five-year loan, the price of which has been advanced to 93½ and interest. The work of rebuilding the Wilkesbarre planes has progressed very satisfactorily, and they will probably be completed by 1st August. The coal trade has been so brisk since the opening of navigation that all of our rolling stock has been kept occupied, and we are already feeling the want of more coal cars. The stockholders can do nothing better in the furthering of their interests than in subscribing and procuring subscriptions to the Car Trust stock. In addition to the equipments reported as on the road on 1st January belonging to the Car Trust, there have been received 1,044 coal cars and 5 locomotives since that date.

Work on the Nesquehoning Valley Railroad has been let and rapid progress will be made during the summer. We shall probably not be disappointed in our expectation of its completion to a connection with the Catawissa Railroad before the end of the year, Great interest is felt among both producers and transporters of coal in the rumors of an approaching strike of the miners and laborers. Notice has been served at many colleries that work will be suspended at the close of this week. When work is resumed we look for an active market and remunerative rates of transportation, and good prices for our coal, to continue for the remainder of the year. We desire a regular and steady market and not the excessive prices of last November. The companies who are best supplied with equipment will profit most largely by the activity of trade.

A resolution to approve the foregoing report was carried.

On motion, Mr. Rockwell—a gentleman who had made a survey of the company's land—read a report, and then maps prepared from his survey were distributed to the stockholders.

After the adoption of resolutions of thanks to the old officers of the company, an election was held with the following result:

President.—E. W. Clark.

Managers.—S. M. Felton, Francis B. Cope, Francis C. Yarnall, Fisher Hazard, Charles Parrish, George F. Tyler, Phillip C. Garrett, Charles Wheeler, George Whitney, Alexander Biddle, John Leisenring.

Great Western Railway of Canada.

The Canadian Parliament has confirmed the arrangement between the Government and the Company for the settlement of the Government Loan.

In reference to this important measure the following resolution was passed at the meeting on Wednesday last—

"That the settlement of the Government Loan and interest made with the Canadian Parliament be confirmed; and that to provide means for its completion and for other purposes the proposed issue of £1,018,200 sterling of five per cent. preference stock, with the option of conversion into ordinary shares until 1st January, 1880, be authorized."

The new preference stock is to be allotted amongst the shareholders, giving them £6 of that stock for each ordinary share. At 80 the preference stock would pay 6¼ per cent. per annum, and therefore no doubt all the shareholders will take up their allotments.—*Herapath, May* 1.

☞ The Board of Railroad Commissioners of the State of Arkansas have awarded the aid of the State to the Little Rock and Fort Smith Railroad to the extent of 150 miles, at the rate of $10,000 per mile.

Marietta and Cincinnati Railroad.

The earnings of this road for the year ending December 31, 1868, were as follows:

From passengers		$369,373 46
" freight		844,529 25
" mail		23,737 44
" express		42,718 49
" telegraph		7,728 48
		$1,288,087 12

Expenditures, viz:

Repairs of road	$328,847 98

Loss and damage	7,971 75	
Miscellaneous	15,703 61	
		1,117,617 35
Net earnings		$170,469 77

Compared with the previous year the gross earnings show an increase of $7,572 45; with an increase in expenses of $135,911 76—making a decrease in net earnings of $128,339 31. The report says:

During the year the Baltimore and Ohio Company has placed upon the through route 150 and the Indianapolis, Cincinnati and Lafayette Company has contributed 100 new first class house cars arranged to run through from all Western points to Baltimore, without breaking bulk. Large quantities of produce, particularly grain in bulk, which heretofore found other outlets, have been secured by these facilities. The advantage of sending the property directly through without change at transfer points, thus saving time and handling, is appreciated by shippers, and has placed the line in a position which compares most favorably with the best organized fast freight lines in the country.

It is the intention of those companies to extend these facilities to meet the demands of the trade.

In view of its financial condition, no portion of this equipment has yet been furnished by this company, but it is hoped that it will be able to meet this requirement during 1869.

The Baltimore and Ohio Company has also furnished, at times, broad-tread flat cars for the transportation of iron and similar freight, from Baltimore to Cincinnati and Indianapolis, without unloading at the Ohio River. Similar arrangements for through traffic could be made to St. Louis if the Ohio and Mississippi Company prosecute their design heretofore announced of changing their line from a broad to a narrow guage.

The route from St. Louis *via* the Ohio and Mississippi and Marietta and Cincinnati and Baltimore and Ohio roads *is the shortest to the seaboard*, and the only obstacle to a large and remunerative traffic is the break of bulk now required at Cincinnati.

It was decided, until the road could be placed in better condition and the tunnels on the Parkersburg Branch of the Baltimore and Ohio road arched, to discontinue the heavy expenditures heretofore incurred to obtain through passengers, and the increase of through travel under these circumstances is particularly interesting and gratifying.

The Baltimore and Ohio Company, after expending $1,250,000 in arching the 23 tunnels on the Branch from Grafton to Parkersburg, has completed that most important work. First class, wide cars, precisely similar to those run upon the main stem of that road, as soon as the tunnels were widened, were placed upon that portion of the line, and the through passengers furnished with the same facilities as by the Benwood route. The difference in distance to the southwest, in favor of the Marietta and Cincinnati line over all competitors, will command a large passenger traffic, and the Board has concluded to incur increased expenditure in presenting these advantages to the public, which, it is believed, will produce profitable results.

BRIDGE AT PARKERSBURG.

This important structure is progressing under the management of the Baltimore and Ohio Company as rapidly, in view of the difficulties encountered, as could reasonably be expected. That company has expended about $250,000, and, in addition to a large amount of shore work, partially built three piers in the Ohio River. The cost of the bridge under a contract between the Baltimore and Ohio and Marietta and Cincinnati Companies, was to be assumed two-thirds by the former and one-third by the latter company. This company has been unable to furnish *any* portion of the capital, and the Baltimore and Ohio Company has therefore advanced the necessary means, with the understanding that the Marietta and Cincinnati would, whenever able, fulfill its engagements.

It is confidently anticipated this bridge will be completed in 1870, and the value of the property of this company will, from this cause, greatly improve, as large additions to its traffic may then be expected. Its importance to Cincinnati cannot be overestimated, as completing the most direct and certainly the most economical route from that city to the seaboard.

GALLIPOLIS AND POMEROY BRANCH.

On the 3d of September, 1867, the Board resolved upon the construction of the Gallipolis and Pomeroy Branch, and to enable the company to construct this road, authorized the issue of $1,000,000 of the company's bonds, bearing interest at 7 per cent., and secured by a mortgage on this branch; and also authorized the Vice President of the company to contract in the name of the company for the building of the whole or any part of said branch road, but no contract for such construction should be made "until at least the sum of $700,000 of the bonds aforesaid should be subscribed for, sold, or otherwise negotiated."

Upon this authority, the Vice President proceeded in the survey and location of the line, and obtained the right of way for nearly its entire length, solicited subscriptions and obtained them to an amount between $300,000 and $400,000.

The Vice President then, on the 25th of December, 1867, made a contract with Messrs. Dodge, Lord & Co., which was in substance as follows:

The contractors were to furnish the necessary materials and to purchase the iron rails for tracks and sidings. The work and material were to be paid for by the company monthly, and for iron the company was to pay one half cash and to give its notes at not less than 12, 16 and 20 months for the other half. Dodge, Lord & Co., were to receive the bonds at sixty per cent., and one-half of the receipts of the road, as it was completed, as collateral security for their advances and obligations; and as compensation for their services in building the road and for purchasing materials, including the iron rails, fourteen per cent. upon the cost of such work, materials and iron rails. The requirements of the Board that $700,000 of the Gallipolis and Pomeroy Branch bonds should be subscribed, sold or otherwise negotiated, not having been conformed to, it was necessary to submit the contract with Dodge, Lord & Co. to the Board for ratification. It was well ascertained that nearly all the subscriptions had been secured which it was possible to obtain.

It was evident the expenditures for building the road would be very heavy, after paying the contractors a profit of fourteen per cent., and the result of such an expenditure was not sufficiently assured, in the judgment of the Board, to justify an additional burthen of probably $500,000 to the heavy floating debt under which the company was then struggling.

The second mortgage bonds were selling at over seventy per cent., and it was feared if the Gallipolis and Pomeroy bonds were placed upon the market, a depressing effect upon the securities of this company would occur.

The Board therefore determined to abandon the enterprise, and make a settlement with Dodge, Lord & Co., for material furnished and labor performed, and $2,600 additional for damages.

It is to be hoped that the people of Gallia, Meigs and Jackson Counties, can, at some period not remote, obtain sufficient means to build this road, from their own resources, in which case, doubtless, a mutually satisfactory contract could be made to operate the line, with the equipments of this company.

THE CINCINNATI AND BALTIMORE RAILWAY CO.

The "Cincinnati Extension," commenced in 1864, with the view of dispensing with the use of the track of the Little Miami Company from Loveland, and involving an annual rental of $60,000, was not finished, and the company was obliged, after completing eighteen miles of road, and reaching a point seven miles from the city, to make a contract with the Cincinnati, Hamilton and Dayton, and Indianapolis and Cincinnati Companies, differing only in the reduction of one-half the rental, and securing a greatly improved location for the transaction of its business in the western, instead of the eastern part of the city of Cincinnati. In February, 1871, the contract with the Cincinnati, Hamilton and Dayton Railroad Company, at $25,000 per annum, will expire by limitation. The contract with the Indianapolis and Cincinnati Company is perpetual, at $5,000 per annum for the use of tracks and a proportion settled by contract for the joint use of the passenger depot.

The fact that the entire traffic, local and through of the Marietta and Cincinnati road and branches, depended for its entrance to Cincinnati upon another, and, in many respects, a company with different interests, was a subject of great embarrassment, and presented the gravest questions to the Board for its consideration.

It was not deemed judicious for the Marietta and Cincinnati Company to undertake this improvement, as it would involve the issue of third mortgage bonds, which could not be expected at present to command satisfactory rates. The plan which promised the most successful result, required the organization of a separate company which might in itself present such advantages as would enlist the aid and encouragement of the friends of the company and capitalists generally.

The Cincinnati and Baltimore Railway Company was therefore organized, with an authorized capital of $500,000.

A proposition to aid that company by a subscription to its capital stock by the Marietta and Cincinnati Company, and securing to the latter an entrance into the city over the road of the former, on most favorable terms, has been submitted to, and adopted by the directors of the two companies, and only awaits the ratification of the stockholders, to become binding in law. [This contract was ratified by unanimous vote of the stockholders, at the annual meeting, February 17th, 1869.] It is confidently expected that the Marietta and Cincinnati Company can readily realize a sufficient sum to pay its proposed subscription, by the sale of real estate secured by it some years ago, and which may now be sold at a large advance on its cost. The Baltimore and Ohio Railroad Company, to aid the enterprise, has subscribed $50,000 to the stock of the new company, and indi-

cated a willingness to subscribe $50,000 more if it should become necessary; and it is believed that the advantages presented to capitalists, and particularly to the friends of the Marietta and Cincinnati road, will secure the means to complete the work prior to the expiration of the contract with the Cincinnati, Hamilton and Dayton Railroad Company. The letting of the masonry and grading have already been advertised.

The present surveyed route runs mainly along the banks of Millcreek, over ground subject to overflow from the Ohio River. This line, if adopted, will necessarily be very expensive, embracing over 1,000,000 yards of embankment and 7,000 yards of masonry, and will cost probably over $700,000.

It is to be hoped that a cheaper route can be located, and with that view the necessary surveys are in progress.

GENERAL REMARKS.

The difficulties caused by the embarrassed financial condition which has to a greater or less extent attended the company during its history, have to a considerable degree been overcome. The machinery and equipment are in excellent condition, and will probably compare favorably with those of any road in Ohio. The increase in rolling power, by rebuilding the four engines, heretofore referred to, will enable the company to transport promptly any amount of traffic which can be reasonably expected at present.

One hundred flat, and fifty stock cars are needed to meet the demand for freight transportation which occurs during the autumn months, when the movements of iron, coal and live stock are most pressing. If the same amount of new and re-rolled rails (2,168 tons) be placed in the track in 1869, as was laid in 1868, the road in this respect will be in safe and good condition.

A great amount of work in surfacing and ditching has been done, and a relatively small expense will maintain the road in this regard at its present excellent standard; additional ballasting which can only be done advantageously after the road bed is prepared for it, remains to be completed.

To move the trains with promptness and economy, it will be requisite to lengthen some of the sidings, and build others, making in all an aggregate of two and a half miles.

If the line is permanently maintained upon the existing route, very heavy expenditures must be incurred in filling the trestles east of Athens. The local resources of the road are great and increasing; the through business is steadily improving, and it is hoped that with good crops, the receipts of 1869 will exceed any former year. The condition of the company requires the most rigidly economical and careful management, which the Board will endeavor to practice.

PROFIT AND LOSS ACCOUNT, 1868.

The Fuel Question.

One of the most important questions to the people of the United States, present and future, is connected with the production, distribution and cheapening of coal. With coal fields in the United States, almost unlimited, we are mining but about 28 million tons, as against 104 million tons in Great Britain. The necessity of cheapening coal is apparent to all consumers. In the amount coming from the anthracite region alone, more than $40,000,000 annually, could be saved to consumers were the owners of coal lands placed in a condition to give the supply unembarrassed by the arrangements that now exist amounting to a monopoly of transport. We are rejoiced to see our cotemporary of the *Stockholder* coming to the aid of our oft-repeated suggestions and fortifying our views on this most important subject. While we hail it as an ally in the benificent work of cheapening fuel, we commend the following sensible and tersely written article from its columns to the notice of the public:

OCEAN STEAM TRANSPORTATION.

In the late report of the President of the Baltimore and Ohio Railroad Co., Mr. Garrett has made allusion to a very important item of expense appertaining to ocean steamers. It is well known that the European line of steamers from Baltimore is mainly owned by the Baltimore and Ohio Railroad Company. The success of this line, traversing as it does a greater distance than the New York steamers, has been almost a riddle, and probably the wise men of New York and Boston would have been slow to find it out, but for a few words dropped by Mr. Garrett. He says: "The progress of our steamship enterprise has continued very satisfactory. The economy in the price of coal at $2 50 per ton, as compared with New York, adds largely in the success of this enterprise."

Let it be remembered that this very coal is transported from the Cumberland mines to Baltimore, the distance being 200 miles, yet it can be laid down at less than one-half what the steamships purchase it for in New York. In allusion to the coal supply of London, Mr. John Galt, one of the leading public economists of England, says:

"We can buy coal at the pit's mouth and transport it to the metropolis for seven or eight shillings ($2) per ton; but, as a general rule we pay four times that price in London. The price the poor pay for small quantities they are able to purchase at a time during a severe winter, the extent to which they are cheated, and the sufferings they in consequence endure are matters every one are well acquainted with. Monopoly charges them three or four hundred per cent. in ordinary times, and in extraordinary, as much as it can lay on."

It has been maintained by Mr. Sherwood, author of the plan for a cheap-freight railway system, that coal can be laid down on the Jersey shore or dumped into vessels in the rough at $2 75 per ton. We entertain no question but that this result could be easily accomplished on his plan, and which is embraced in the bill now pending in Congress for the establishment of a coal thoroughfare from the mines of Pennsylvania to the Jersey shore.

Were we to compute the fuel requirements of the navy, the ocean steam marine, steamboats and railroads, mechanical industries operated by steam machinery, and add to all this the household wants of some five or six millions of people in New York, New Jersey and the New England States, the subject swells into a degree of importance much greater than that of all the net profits on foreign merchandise brought to New York. When fuel costs the people far more than their bread, and the expense of it half paralyzes the business and commerce of the whole country, the question cannot be much longer deferred. Instead of going to Congress for steamship subsidies it will be far better to take the more effective method for permanent competition on the ocean, at the same time to carry out the principle of public economy on an enlarged and sensible scale.

Memphis and Little Rock Railroad.

The Arkansas *Gazette* says that the bridge across the St. Francis river on the line of this road has been completed, tested, and accepted by Chief Engineer Meigs. Track laying is rapidly progressing west of Madison. One mile of the ties and rails have been laid, and sufficient have already been placed on the road to finish it to L'Anguille. The cars will be running to that point by the 1st of July, leaving but 30 miles of staging. By the 1st of September it will be completed to the military road, and pushed beyond that point as rapidly as possible.

☞ The Wheeling *Intelligencer* says that at a meeting of the stockholders of the Central Ohio Railroad, the lease of the Sandusky, Mansfield and Newark Railroad was confirmed by a vote of over two millions of Central Ohio stock, also a modification of the lease to the Baltimore and Ohio Railroad was sustained. This vote fixes the period of both leases to twenty years, less the time elapsed.

☞ The Houston, Texas, *Telegraph* says that freight trains are now running to Hearne's Station, 20 miles above Bryan, as that the remaining 10 miles to Calvert will soon be completed. Steps are soon to be taken to extend the Hearne Station and Belton Branch Railroad to Port Sullivan

Lehigh Coal and Navigation Company.

ANNUAL REPORT OF THE DIRECTORS.

The Board of Managers, in the discharge of its duty to the stockholders, respectfully submits the following report for the year 1868:

The water was let into the canals by the 1st of April; regular shipments of coal commenced at Mauch Chunk on the 6th, at Coal Port on the 7th, and at east Mauch Chunk on the 9th of April, and closed on the 7th of December.

The only interruption to navigation on the Lehigh Canal was owing to the giving way of an aqueduct at Lehigh Gap from the effects of a freshet in June, thus causing a delay of about two weeks. In the month of May navigation on the Delaware Division for boats passing through the outlet at New Hope, and destined for the Delaware and Raritan Canal, was suspended for eight days by high water in the Delaware river preventing ferriage, and in June an aqueduct at Yardleyville gave way, stopping operations below New Hope for about a week.

Shipments of coal mined by the company were stopped from the 9th of July till the 5th of August by a strike of the miners for increased wages and diminished hours of labor.

The total amount of freight carried both ways on the Lehigh Canal during the year was 1,202,698 tons, against 1,257,946 tons in 1867, being a decrease 55,248 tons, and on the Delaware Division the total was 901,623 tons, against 901,584 in 1867, showing a decrease of 321 tons.

The following statements show in a condensed form the results of the business of the year, and attention is called to the tables at the end of this report giving more detailed information.

The profits of the year from all sources were:

Net profit on railroad, including car service	$485,032 21
Net profits on Lehigh Canal	312,493 52
Net profit on coal	325,702 31
Net profit on real estate sold	57,687 23
Net profit on rents	25,168 63
	$1,156,083 90
Less,	
General expenses and taxes	$141,981 86
Balance of interest account for 1868	987,373 88
Loss on Delaware Division Canal	19,735 61
	$1,149,091 35
Surplus to credit of profit and loss account	$6,992 55

Included in the above expenses are credits to the following accounts to cover depreciation:

Coal improvements	$23,939 30
Lehigh and Susquehanna Railroad equipment	23,600 00
Canal boats	16,045 81
	$63,585 11

The amounts for construction and equipment purposes expended during the year were:

Lehigh and Susquehanna Railroad construction	$803,376 03
Lehigh and Susquehanna Railroad equipment	1,075,119 85
Lehigh and Lackawanna Railroad construction	29,289 58
Shipping improvements	26,855 69
	$1,934,641 15

The coal tonnage on the railroad, compared with 1867, was as follows:

	1868. Tons. cwt.	1867. Tons. cwt.
From Wyoming Region	519,279 19	387,409 17
" Upper Lehigh "	141,499 06	80,152 06
" Hazleton "	532,817 06	337,394 07
" Lehigh Coal and Navigation Co.'s mines.	49,086 15	.....
Total	1,042,683 06	804,956 10

	1868. Tons. cwt.	1867. Tons. cwt.
Distribut'd to the Lehigh Valley Railroad	62,804 05	266,140 10
Distributed to the Lehigh Canal	480,467 68	516,010 08
Distributed to the connecting railroads	386,889 02	19,274 11
Consum'd along the line	112,522 11	3,531 01
Total	1,042,683 06	804,956 10

The coal tonnage on the canal, as compared with that of 1867, was derived as follows:

	1868. Tons. cwt.	1867. Tons. cwt.
Lehigh & Susquehanna Railroad—		
Wyoming Region	189,581 11	167,474 09
Upper Lehigh "	19,740 15	16,252 17
Hazleton "	277,156 01	332,396 19
Lehigh Valley R. R.—		
Beaver Meadow Region.	117,086 16	96,892 18
Mahanoy	4,711 13	18,269 18
Lehigh Coal and Navigation Co.'s mines	377,930 09	363,022 04
From sundry shippers	3,740 00	12,295 12
Total	989,947 05	1,006,604 17

	1868. Tons. cwt.	1867. Tons. cwt.
Which was consumed on the line of the Lehigh Navigation	66,581 06	67,339 15
Passed into the Morris Canal	161,828 00	171,266 14
Consumed on the line of the Delaware Division Canal	85,286 12	43,764 08
Passed into the Delaware and Raritan Feeder	433,005 11	472,751 00
Passed through to Bristol	293,245 16	251,483 00
Total	989,947 05	1,006,604 17

The production of the company's mines was as follows:

	1868. Tons. cwt.	1867. Tons. cwt.
Panther Creek mines	375,395 06	370,556 18
Room Run "	56,140 10	1,313 02
Mined by Greenw'd Coal Company, under lease.	22,285 16	17,538 02
Total	453,821 12	389,408 02

The results of the business of the past year give good grounds to hope for an early resumption of dividends on the stock, as the profits were realized almost entirely after the 1st of August, and the revenue of five months paid the interest charge of twelve months.

The canal business was very unsatisfactory during the first half of the boating season, owing to the lateness of the spring, dullness of trade, the break and the strike. For the same reasons we realized no profit on coal until after the 1st of August, and until that date the business on our railroad was confined principally to local tonnage. The connection with the Morris and Essex Railroad was not made until March 14th, and with the Central Railroad of New Jersey until 1st of May, while with the Belvidere Delaware Railroad and Morris Canal we had no connection until after July 1st, when the strike interrupted business until after 1st August. It was impossible, during a period of severe competition, when other coal carrying companies were deriving little or no advantage from the transportation of a large tonnage, to make more than the running expenses on the road, whilst still unfinished, with connections imperfect and trade undeveloped. A charge to construction account of interest during the first seven months of the year on the several millions expended on the road from Mauch Chunk to Philipsburg would have been entirely justifiable, but no such charge was made. All disbursements for interest, whether on funded or floating debt, were charged to interest account, and appear in the balance of that account, charged against the revenue of the year. Looking at the reported profit of $485,032 21, derived from operating the road and use of cars, as the result of five months' business, the stockholders cannot fail to be encouraged for the future, when trade shall be more regular and better organized. This result was achieved, notwithstanding the violation of a contract entered into with the Hazleton Railroad Company, from which the managers had every reason to anticipate large advantages to our company. The contract was made for the purpose of increasing the trade on our railroad, and if it had been faithfully performed, the increase would have amounted to about 10,000 tons per week after the 1st of August, without reducing the trade of the canal. But almost immediately after the contract was made, the merger of the Hazleton Company with the Lehigh Valley Railroad Company was agreed upon. The latter company failed to perform the contract of the Hazleton Company with us, by withdrawing from our road the promised trade, and this failure resulted in serious damages to the business of our company, for which a claim is now pending before referees.

About the 1st of July an arrangement was made with the Fidelity Insurance, Trust and Safe Deposit Company to secure an increase of our railroad equipment. That company organized the "Railroad Car Trust of Philadelphia," under which they act as trustees, subject to the direction of a board of three managers, Messrs. H. C. Wood, John Welsh and Charles L. Borie. The capital stock amounts to $750,000, divided into shares of one thousand dollars each, and the only business of the association is to contract for the construction of cars and locomotives, and to lease them to the Lehigh Coal and Navigation Company on terms that will pay expenses, taxes, ten per cent. dividend to the stockholders of the Car Trust, and repay the purchase money in about eleven years, when the cars and engines will become the property of the Lehigh Coal and Navigation Company. A very considerable portion of the stock has been sold, and there are now on the road 1 locomotive, 50 flat cars, 501 coal cars, and under contract 7 locomotives and 1,274 coal cars. The security to the stockholders of the Car Trust is ample, and will increase from year to year as the stock is retired by the sinking fund, and the liberal rate of dividend ought to secure a ready sale for the unissued portion of the stock. Contracts with connecting roads were made toward the close of the year which have given us the use of a considerable number of coal cars, and we are likely to have a tolerably full equipment during the first half of the coming year. We shall need from one to two thousand coal cars after the first of September to meet the requirements of our customers, and stockholders are earnestly urged to subscribe to the Car Trust stock.

WILKESBARRE PLANES.

The old road from Wilkesbarre to White Haven, constructed over 35 years ago, left the Wyoming Valley by a series of inclined planes, reaching the summit three miles from the point at which the ascent commenced, surmounting an elevation of one thousand and six feet. In 1865 and 1866 a graded road or back track of thirteen miles was constructed from the foot of the planes to the summit. In 1867 the rebuilding of the middle plane was commenced, and it was completed in June 1868. The new machinery has proved entirely satisfactory, and the company has offers to raise coal to the summit and return the empty cars by the back track, and keep the planes, machinery and back track in repair at one-quarter the present cost of taking it up the back track by locomotives, provided we will rebuild the two planes with a capacity equal to the middle plane. With the almost certainty of saving in less than two years the entire outlay, we have felt justified in contracting for the rebuilding of the two remaining planes, and expect to have them in operation early in August next.

NESQUEHONING VALLEY RAILROAD.

The contract and agreement and the lease of

the Nesquehoning Valley Railroad, authorized at the stockholders' meeting, on the 20th day of October last, were executed on the 4th of November following.

The amount of stock at present is $500,000, in 10,000 shares of $50 each, and under the provisions of the lease the Lehigh Coal and Navigation Company will pay a rental which will secure the payment of dividends of five per cent. semi-annually, with the right to purchase the stock at par at the end of ten years. Of the 10,000 shares of stock this company owned 5010 shares previous to the lease, and subscribed on November 4th for the 3431 shares remaining at that time unissued, making in all 8441 shares. This stock was offered on November 7th to the stockholders by circular, but very few of them at that time availed of the right to subscribe. Sales to a considerable extent have since been made to stockholders and others, and there now remains 5879, shares, of which sales are made from time to time on application at our office. This stock has not as yet been offered publicly, and if it should be necessary to offer it for sale there will probably be no difficulty in finding purchasers at par. It is probable that besides giving a greatly improved outlet from our coal property and being a valuable feeder to our canals and main line of railroad, this road will earn on its own line more than all its cost in expenses and dividends. The road will no doubt be completed to a connection with the Catawissa Railroad during this year, and the tunnel to Panther creek valley will probably be finished during next year. Parties desiring to purchase stock can pay at the rate of $5 a month or in full and receive a dividend at the rate of ten per cent. from the time of payment.

CANAL.

The results of the business of the past year on the canals have been satisfactory, considering the dull state of the coal market early in the season, and the break and strike later. The line of boats referred to in the last report was run by an energetic firm, who did not allow losses in the early part of the year to prevent their continuing to the end of the season. Their success during the fall induced two other parties to start lines, and it is expected that all of them will commence work at the opening of navigation in 1869. We look for a reduced cost of transportation and increased tonnage from their efforts. This plan is considered an improvement on the old system, but there ought to be a very considerable further saving in freight charges, and the attention of the Board has been directed to the means to be used to effect this saving. Their efforts will probably result in the introduction of a greatly improved system, but whether it will be found best to use steam as a motive power or to effect a more perfect organization and control of animal power, is at present uncertain.

The Lehigh Canal is large enough throughout its length to pass boats carrying 175 to 200 tons. The Delaware and Raritan Canal has even greater capacity, but the Delaware Division Canal will pass no larger boats than those carrying 100 tons, and the enlargement of the portion of that work, say 84 miles, which forms the connecting link between the Lehigh Canal and Delaware and Raritan feeder, is deemed very desirable. An expenditure of $500,000 on this work would largely increase the capacity of the canal and reduce freight charges. The gain to the company would, in two or three years, entirely repay the whole cost of the work. With the Wilkesbarre planes rebuilt, and the Delaware Division Canal enlarged, this company could deliver coal in New York harbor and at points on and near Long Island sound, from any point in Wyoming Valley within five miles of the foot of the planes, at a less cost than it could be transported between the same points by any other company.

COAL.

At the commencement of the season arrangements were made with prominent coal houses in this city and New York for the sale to them, at monthly prices, of all the company's production of coal beyond the amount sold directly to consumers. The arrangement proved a good one, and perhaps the best attainable at the time, and our mines were fully worked during the season, with a certainty of a market for their product. The Managers desire in the future to sell our coal through the company's own agents, instead of through commission houses, and to accomplish this, arrangements have been made to secure an office in New York early the coming season, and Mr. W. H. Tillinghast, Treasurer of the Wilkesbarre Coal and Iron Company, has been appointed selling agent in that market. It is our desire and expectation to take shortly the prominent position among coal companies that the quantity and quality of our coal entitles us to. Our own product, added to that of the Wilkesbarre Coal and Iron Company, amounted during the year to 865,502.11 tons, and an increase of 25 per cent. is expected in 1869. For the portion of our coal that goes to the New York market by rail favorable transportation arrangements have been made with the three New Jersey Companies. A contract was entered into with the Morris and Essex Railroad Company in September last, by which that company granted us satisfactory terms for transportation, and agreed to give us the exclusive use of a new pier, then in the course of construction at Hoboken, and also to put into the trade 1,000 coal cars. We have since taken possession of the wharf, and many of the coal cars are now running between Wilkesbarre and Hoboken. The nearness to market of our own coal, and its superior quality, will enable us at all times to compete on favorable terms, on the line and in New York, with the product of other regions, and this contract enables us to put the Wilkesbarre Coal and Iron Company's coal in the New York market on terms as favorable as those secured by the three large northern coal companies, and, as already stated, there will be a further saving in the cost of transportation after August next, when the planes are rebuilt.

No accurate survey or geological examination having theretofore been made of the company's coal property in Panther Creek Valley, the managers engaged in April last, the services of Mr. R. P. Rothwell, a mining engineer of high reputation, to make a critical examination, survey, map and report. The report is submitted herewith, and the map is now ready for distribution to the stockholders.

FINANCES.

It will be noticed that the aggregate of the balance sheet is reduced $361,537 56 from that rendered last year. A reduction on the credit side appears in several of the items. The funded debt shows a diminution of $229,563 42 in the 1870 loan, which has been purchased at par, and securities held by the Trustees sold to a corresponding amount. The convertible loan has been increased $25,200, and the amount of five-year loan is shown to be $87,750. The aggregate reduction in funded debt is $116,613 42. The items of floating liability, which were $1,634,712 23 last year, are now $1,501,911 38, showing a reduction of $132,800 85, and profit and loss is less by the amount of $130,416 44, due principally to a charge of $120,000 estimated loss in 1867 and previously on suspended debt, which was referred to in the supplementary report submitted in May last. The other side of the account shows an increase of $1,878,495 88 in Lehigh and Susquehanna Railroad and equipment, with some charges in other items; the cash resources, consisting of bank balances, amounts due on loans sold at the close of the year, &c., have been reduced about $2,100,000. The expenditures for construction account were principally in closing up contracts of 1867, and the equipment purchases were reported at the last annual meeting and consummated during the year. The funds to meet the payments were derived principally from sales of gold and convertible loans made at the close of 1867. At the commencement of the year it was estimated that about $750,000 would be needed to meet the company's engagements beyond the proceeds of the gold and convertible loans. For the purpose of meeting these engagements authority was asked and granted at the meeting in May to pledge real and personal property to secure a loan of $1,500,000. Under this authority the five year loan, interest 6 per cent. in gold, free from United States and State taxes, was issued and offered to the stockholders at 92½ and interest. But a small amount was applied for, and no considerable effort has since then been made to sell. It has proved, however, an acceptable collateral security with the notes of the company, and is thus used when funds are needed. The security is real and personal property valued at $2,350,623 33, deposited with and mortgaged to the Fidelity Insurance, Trust and Safe Deposit Company. The loan was made payable in five years because it was thought that within that time large sales of the securities and property pledged would be made. About $150,000 will be realized next year from proceeds of sales already made, and loan to a corresponding amount will be retired. Other offers are under consideration, in many cases at prices considerably above the appraisement. It is not deemed desirable to sell largely of the loan, as the Managers hope to realize funds enough from other negotiations to provide for the wants of the company, but stockholders can procure a moderate amount at a price equivalent to that at which it was offered in August, on application to the Treasurer.

After deducting the available resources from the $1,501,911 38 floating liabilities that appear in the balance sheet, there will remain about $900,000 due, and to meet this the company holds $300,000 Union Coal Company bonds, for which 85 is bid, and $1,412,250 five year loan. In conclusion, the Board takes pleasure in stating that steady progress has been made in organizing the company's business, that its relations with connecting lines are improving, and the promise of gain in all departments has not for a long time been so flattering as now. Besides endeavoring to secure a regular increase of coal and general freight business on the canal and railroad, they have directed their efforts to an increased production of coal, at a reduced cost, by the introduction of improved machinery and a careful organization and oversight of labor; also, to a saving in transportation expenses on gravity roads, planes, canal, Lehigh and Susquehanna Railroad, and on connecting roads, and in handling at terminal points. The vast resources of the company are being carefully studied and gradually developed, and but little more time should be required to bring all departments to that degree of efficient working and harmonious co-operation which cannot fail to give great productive value to the property represented in the company's assets.

By order of the Board of Managers.

E. W. CLARK, President.

☞ The following gentlemen have been elected officers of the Hanover Branch Railroad Company for the ensuing year: President, Captain A. W. Eichelberger, (for many years the energetic president of the company); directors, David M. Myers, Henry C. Schriver, Joseph Dellone, Reuben Young, David Wortz, and Henry Wirt.

☞ The Decatur and East St. Louis Railroad Company has been reorganized by the election of Warren Colburn of New York as President, Charles H. Pearce Treasurer and Transfer Agent, and W. B. Corneall Secretary and Assistant Treasurer. Wm. S. Lincoln is Chief Engineer.

☞ The Des Moines Valley Road is pushing toward Fort Dodge, and will have, by the 1st of July, 250 miles in working order.

☞ Messrs. Reynolds, Saulpaugh & Co., have taken the contract for building the Fort Madison branch of the Chicago, Burlington and Quincy Railroad.

American Railroad Journal.

Saturday, May 22, 1869.

Stock Exchange and Money Market.

A very full offering of Money has been reported, since our last, chiefly on private account, though the city banks, with a further gain of strength, have evinced more disposition to make advances to the leading borrowers both on call, and for mercantile purposes. The activity in Gold, Government securities and stocks has stimulated the speculative demand for aid, but it has been promptly met at from 6@7, generally at 6@7 per cent. on call. Choice to good commercial paper has found a readier market within a range of from 7@10 per cent. per annum. The failure of a prominent Exchange Place firm, on Monday, resulting mainly from adverse speculations in gold and Government securities, seriously distributed confidence for awhile, and checked business negotiations. The liabilities of the firm have been estimated at from $600,000 to a million dollars. The failure seriously embarrassed a number of other houses, but all of them struggled against their difficulties, and made satisfactory arrangements as far as was made known to the public. The city banks gained nearly 5½ millions of deposits, and over 1⅜ millions of legal tender notes, while they reported a loss of about three-fourths of a million of specie, as the result of the past week's business. They added a million to their loan averages, while they slightly reduced their circulation. The U. S. Sub-Treasury added nearly $1,300,000 to its cash balances, last week. Its business was on a less extensive scale, the receipts from all sources having been a little over nine millions, while its disbursements on all accounts were less than eight millions. The latest dealings in money on Wednesday showed rather more activity, with 7 per cent. as the more general rate on call.

The specie reserve of the city banks is now $15,374,769, against $20,939,142 same time last year The city bank deposits are now $199,392,449, against $201,313,305 week ending May 16, 1868 The legal tender reserve amounts to $56,501,856, against $57,613,095 same time last year. The circulation now stands at $33,977,794, against $34,193,249 same time last year. The loans are now $269,498,897, against $267,724,783 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $143,453,480 a day, against a daily average of $150,195,763 the preceding week, and $127,294,725 the week ending with April 28, 1869. The current week's exchanges average about $135,500,000 a day. The city banks, last week, reported a loss of $706,720 of specie, with a gain of $5,499,312 of deposits, and of $1,391,783 of legal tender notes. They increased their loans, $1,012,525; and reduced their circulation, $8,366.

The city bank exchanges on Wednesday were $131,941,395, and the resulting balances, $3,151,000.

National Bank notes to the amount of $177,020 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $314,808,061, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $14,998,876, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,810,185. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,749,496; and for the public deposits, $30,055,350—making a total of $372,804,846. The Treasury Department last week redeemed and destroyed $354,200 of worn and mutilated fractional currency, and issued $634,496 of new. The outstanding amount of fractional currency on the 1st of May, was $35,330,323, against $36,719,912 on the 1st of April, $36,781,548 on March 1, $35,511,127 on February 1, and $34,215,716 on the 1st of January.

The U. S. Sub-Treasury receipts, week ending with May 15, were $9,145,255, including $2,541,536 from customs duties; payments, $7,849,953, including $2,618,676 of coin interest; balance at the close of the week, $84,562,582, against $83,267,280 at the close of the preceding week, showing an increase of $1,295,302. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $1,069,813, including $329,000 from customs; payments, $769,958, including $211,240 of coin interest. On Tuesday, receipts, $1,482,231,

including $402,000 from customs and payments $1,458,432, including $180,360 of coin interest. The balance at the close of business on Tuesday stood at $84,886,237, against $83,583,788 a week previous; and $81,056,651 on May 5, 1869. The aggregate receipts of the office in April were $32,771,148, including $10,936,268 from customs, aggregate payments, $36,711,819, including $4,655,460 of coin interest.

The outstanding amount of coin certificates on the 1st of May, was $16,307,200, against $21,672,500, April 1, $28,775,560; March 1; $32,659,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week; coin certificates to the amount of $1,623,000, and retired $2,440,535 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during April, reached $1,625,580.

Government revenues yielded comparatively liberally, last week. The annual income tax is now generally payable throughout the country, and will soon add largely to the weekly receipts from excises. The excises, last week, yielded about 4¼ millions; customs at the port of New York, $2,541,536 and at the outports about $865,000 (in coin) more, making the grand total income for the week equal to about $9,020,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 133 millions, according to the latest Washington advices.

The Gold speculation has been very brisk, since our last, and on a decidedly more confident basis. The range of the week has been from 137⅞@144⅛, and the closing quotation 144. The heavy failure in Exchange Place, announced on Monday, stimulated purchases for a rise, and a prompt and sharp advance was the consequence. There have been frequent fluctuations in the price, since Monday, but the general tendency has been toward higher figures. The customs demand was fairly active, all through the week. The export drain was a little more extensive.

On Wednesday, the U. S. Sub-Treasury disbursed $188,974 of coin interest.

The following shows the average business at the Gold Exchange Bank, during the past week, average amount of loans and discounts, $1,555,063 93; average amount of specie, $688,357 37; average amount of deposits, $1,662,541 70.

The customs demand for Gold last week, averaged $423,589 a day; thus far, this week, it has averaged $365,500 a day, or equal to a weekly aggregate of $2,193,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $147,196, and since Jan. 1, $8,610,341, against $2,826,330 same time in 1868. The receipts from California, last week, were none. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $111,379,973, against $100,781,621 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to May 8th, 1869, $2,604,267, against $2,877,866 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $18,380,699, against $30,837,348 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $12,456,649. The exports of specie, from this port, last week, were $622,236, against $3,150,457 same week last year; total, since July 1, 1868, $33,739,980, against $56,214,218 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,618,676; since July 1, 1868, $82,226,227, against $68,013,261 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to May 8, 1869, were $14,594,386, against $13,742,698 same time in 1868.

Foreign Exchange has been held with more firmness, on a very moderate offering, though the demand has not been active. Bankers' prime sixty day bills on London closed on Wednesday at 109¼@109⅝, and on Paris to 5.20@5.16¼; sight bills on London to 110@110⅜, and on Paris to 5.16⅝c.@5.13⅛. The offering of produce bills has been this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,871,328, against $4,035,781 same week last year; total, since July 1, 1868, $146,796,760, against $161,438,953 same time in preceding fiscal year of 1867–'68.

Government securities have further advanced in price materially, on a very light offering, and a brisk demand, largely for investment purposes. The export purchases of the coin bearing bonds have been on an extensive scale even at the advanced figures, which have been the highest ever made on all the issues. Official notice was given on Saturday, May 15, for further proposals, to be received on Wednesday, May 19, and each successive Wednesday till further notice, at the Sub-Treasury, for the sale of a million of 5-20 bonds to the Government, specifically for the sinking fund, the price to be named in each proposal, to be for the principal of the bond, the accrued coin interest on which, from the last interest day, will be separately paid off by the Sub-Treasury on the accepted bonds in coin. On Wednesday morning the Assistant Treasurer received offers for the sale of $1,000,000 Five-twenty bonds under the new proposals. The total amount of bonds offered was $4,146,000, at figures ranging from 116.74 @117.55, the prices being exclusive of the accrued interest, which the Government pays to the sellers in coin. The accepted offers were as follows: Fisk & Hatch, $704,000 '67s, coup., 116.83; $150,000 '65s, reg., 116.78; $50,000 '64s, reg., 116.75. F. W. Clark & Co., $46,000 '62s, reg., 116.74. Turner Bros. $50,000 '64s, reg., 116⅞.

The latest dealings on Wednesday showed a partial decline of ⅜@⅝ per cent. from the highest figures of that day, which were the very highest ever made.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 5.	May 12.	May 19.
Consols	93⅜	92⅝@⅞	92⅝
U. S. 5-20's of 1862	80⅛	79	78⅛
Erie	19⅛	20½	19½
Ill. Central	98½	96	96
Atl. and Gt. Western	24½	....	....

U. S. sixes of 1881 closed here on Wednesday at 122¾@123; U. S. Five-twenties of 1862, ex-coupon, 122⅛@122¼; U.S. Five twenties of 1864 at 117¼@117⅜; U. S. Five-twenties of 1865 at 118⅝@118⅞; U. S. Five-twenties of 1865, consolidated, 119⅞@120; U. S. Five-twenties of 1867, 119⅞@120; U. S. Five-twenties of 1868, 119⅞@120; U. S. Ten-forties at 109⅝@109⅞; U. S. Six per cent. currency bonds, 107⅜@107⅝.

Railway and miscellaneous stocks have been very freely dealt in at much higher though irregular figures, the fluctuations through the week having been frequent and marked, closing generally quite buoyantly.

General business has been moderately active, but prices of the leading kinds of produce have been unsettled. Flour, Wheat, Pork, and Lard closed in favor of sellers. Corn, Oats, Petroleum and Cotton left off languidly. Middling upland cotton closed heavily on Wednesday at 28½@28¾ cts. per lb. The stock of cotton now here is estimated at about 67,500 bales. The receipts at the port this week, have averaged about 1,450 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,141,000 bales, against 2,191,000 bales same time in 1867–8; exports, same time 1,281,000 bales, against 1,573,000 bales same time in 1867–'8; stock on hand at latest dates, 248,000 bales, against 191,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 9,875 pkgs., against 9,719 pkgs., same time last year. From Boston, 3,624 pkgs., against 5,250 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been in less demand ranging from 10@16½c., per lb.; week's receipts, 6,273. Milch cows, in limited request at $40@$110 each, receipts, 58. Veal calves, heavy at from 4@10½c. per lb.; receipts, 3,251. Sheep and lambs have been in slack demand at from 5½@8½c., per lb.,; receipts, 20,081. Swine, fairly active at 10@10½c. per lb., all live weight; receipts, 20,603.

The imports for the week ending May 15, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,332,005	$1,402,998
Gen. merchandise	4,441,246	4,185,326
Total for the week	$5,773,251	$5,588,324
Previously reported	85,680,403	116,170,375
Since January 1	$91,453,654	$121,758,699

The New York exports, exclusive of specie, for the week ending May 18, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$4,035,781	$3,871,328
Prev. reported	65,112,464	60,193,266
Since January 1	$69,148,245	$64,064,594

The balance in the Sub-Treasury on Wednesday was $84,967,659 72.

Foreign merchandise has been less active, and notwithstanding the rise in gold, values have been irregular. The total imports of foreign dry goods, last week, were $1,402,998, and the total amount marketed $1,178,766. The value of foreign merchandise imported last week, was $4,185,326—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,588,324, against $5,773,251 same week last year; total since July 1, 1868, $251,856,817, against $211,046,193 in 1867–'8. Freights have been fairly active, but lower and irregular. For

Liverpool we quote flour at 9d. by sail, and 1s. by steamer, per bbl.; grain at 2d.@2½ by sail, and 3d. by steamer, per bushel; cotton at ⅛d. by sail, and 5/32@3/16d. by steamer, per lb.; and heavy goods 10s.@25s. by sail, and 10s.@25s. by steamer, per ton. Total number of vessels in port on Wednesday, 561.

☞ The Dutchess and Columbia Railroad has been leased for ninety-nine years by the Boston, Hartford and Erie Railroad Company.

Pacific Railroad.

Messrs. Paine, Tuttle and Sherman, Pacific Railroad Commissioners in California, have made a report to the Secretary of the Interior, in accordance with law, of the completion and equipment of one hundred miles of the Central Pacific Railroad from the 570th to the 670 mile post, and recommend the acceptance of the road, and that the bonds and land patents be issued.

The same board make a similar report upon the second twenty miles of the Western Pacific Railroad with the same recommendation.

☞ The Pittsburg *Chronicle* says that at a recent meeting of the directors of the Monongahela Valley Railroad, the Engineer, Mr. Loew, reported having surveyed from the Pan Handle Railroad bridge to Williamsburg, a distance of a little more than two and a half miles, and also of having surveyed a proposed lateral road from Williamsburg up Beck's Run into the coal region of about the same distance. A resolution was passed by the Board, instructing the engineer to proceed at once to locate the remainder of the road up to Brownsville, following the river.

☞ Articles of association have been filed in the office of the Secretary of State of the State of Indiana, of the Raccoon Valley Railroad Company, with a capital of $200,000. The road is to run from a point on the Louisville, New Albany and Chicago Railroad, at or near Ladoga, to Valley City on the Indianapolis, Crawfordsville and Danville Railroad. The officers are: O. B. Wilson, president; D. C. Stone, secretary, and O. H. Fuller, treasurer.

☞ The location of the Belfast and Moosehead Lake Railroad has been changed from Newport to Kendall's Mills, and the narrow gauge adopted. A lease has been effected with the Portland and Kennebec Railroad for fifty years at five per cent. for the first five years, and thereafter at six per cent. on the cost of $1,000,000.

☞ Cars on the fast railway line between Liverpool and London can now be driven at the rate of fifty miles an hour, and the whole distance (200 miles) accomplished in four hours. There is no stopping for water, this being scooped up from troughs between the tracks while the train is running at full speed.

☞ The Monongahela Valley *Republican* says that the surveying party of Sigismund Leow, Civil Engineer of the Monongahela Valley Railroad Company, has reached that borough on their way up the river: and that the directors intend to have specifications prepared, and will put ten miles under contract immediately.

☞ Mr. L. D. Rucker has been appointed General Superintendent of the Erie Railway in place of Mr. Riddle, resigned. Mr. J. W. Guppy has been appointed Assistant General Superintendent, and Mr. George S. Redington has been appointed Superintendent of the Delaware Division.

☞ The Washington (Pa.) *Examiner* says that the engineers of the Chartiers Valley Railroad, having finished the survey and location of the road to Cannonsburg, in Washington ounty, have been drawn off with the intention of preparing for immediately putting the road under contract to that point.

Commerce of New York.

The foreign imports at New York for the month of April, 1868 and 1869, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$9,652,649	$13,836,593
Do. for warehousing	10,780,668	16,497,691
Free goods	964,488	1,202,080
Specie and bullion	871,079	4,818,287
Total entered at port	$22,268,884	$36,354,651
Withdrawn fr. wareh'use	10,140,834	8,954,512

The foreign imports at New York for the four months from January 1, were:

	1868.	1869.
Entered for consumpt'n.	$39,894,052	$57,630,879
Do. for warehousing	39,118,127	47,854,038
Free goods	3,283,243	5,338,845
Specie and bullion	2,723,304	8,693,988
Total entered at port	$85,018,726	$119,517,750
Withdrawn fr. wareh'se.	36,217,921	37,002,977

The foreign imports at New York for the ten months ending April 30, were:

	1868.	1869.
Six months	$116,072,182	$123,552,971
January	15,418,571	22,542,529
February	20,818,337	25,827,280
March	26,512,934	34,793,290
April	22,268,884	36,354,651
Total for 10 months	$201,090,908	$243,070,721
Deduct specie	4,472,947	11,740,477
Total mdse	$196,617,961	$231,330,244

The duties received at New York for ten months ending with April, were:

	1868.	1869.
Six mos.	$54,731,301 44	$57,845,963 97
Jan.	7,133,428 42	9,615,894 48
Feb	9,696,752 39	11,996,628 46
March	11,195,861 33	13,027,672 02
April	10,023,029 37	10,727,099 86
Total 10 months.	$92,780,372 95	$103,213,258 74

The exports from New York to foreign ports in the month of April, were:

	1868.	1869.
Domestic produce	$13,976,761	$14,671,026
Foreign free goods	113,489	4,600
Do. dutiable	648,960	733,461
Specie and bullion	6,095,179	1,767,601
Total exports	$20,834,389	$17,176,688
Do. exclusive of specie.	14,739,210	15,409,087

The exports from New York to foreign ports for four months from January 1, were:

	1868.	1869.
Domestic produce	$54,169,739	$49,793 563
Foreign free goods	187,317	48,608
Do. dutiable	2,415,520	2,133,640

☞ The Iron Mountain Railroad has been opened to Knob Lick station, ninety-five miles from St. Louis. Forty-five miles of rails remain to be laid, which will be done and the road opened through to Belmont during the month of July.

Michigan Railroad Law.

The following is the text of the Bill which was passed at the last session of the Michigan Legislature, authorizing townships or cities and villages to aid in the construction of railroads

Section 1. *The People of the State of Michigan enact*, That it shall be lawful for any township or city to pledge its aid to any railroad company now chartered or organized, or that may be hereafter organized, under and by virtue of the laws of the State of Michigan, in the construction of its road, by loan or donation, with or without conditions, for such sum or sums not exceeding ten per centum of the assessed valuation then last made, of the real and personal property in such township or city, as a majority of the electors of such township or city voting, shall, at a meeting or meetings called for that purpose, determine: *Provided*, That the total amount of outstanding indebtedness, exclusive of interest thereon, of any such township or city, incurred for any and all railroads shall not exceed ten per cent. of the assessed valuation of the same at any one time: *Provided*, That the amount, exclusive of interest thereon, which shall become due or collectable in one year, shall not exceed two per centum of the assessed valuation of such township or city, at the time of issuing the same: *And provided further*, That the total amount which the city of Detroit may raise for such purposes shall not exceed five per centum of the assessed valuation of the real and personal property of said city.

Sec. 2. It shall be the duty of the Supervisor of any township, and the Mayor of any city to call a meeting or meetings, of the electors of their respective township or city whenever a request in writing to do shall be made by thirty tax-paying electors of such township or city, and to give public notice thereof, at least twenty days previous to holding such meeting, by posting the same in not less than five of the most public places in such township or city, and by the advertisement of the same in some newspaper, published in the county wherein such township or city shall be: *Provided*, In the case of cities or townships in which a daily or weekly newspaper shall be published, such publication shall be made in such newspaper, at least once in each week for three successive weeks next previous to the holding of such meeting: *And provided*, In the case of the city of Detroit, such notice shall be published in at least three daily newspapers for ten consecutive days previous to the holding of such meeting. Such request and notice shall specify the amount of aid, the conditions, rate of interest, the time of payment and manner of executing the bonds, and other particulars in regard to such aid not otherwise provided herein: *And provided further*, That no township or city shall under the provisions of this act, hold more than two meetings in any one year, unless a majority of the tax-paying electors of such city or township shall sign such request in writing therefor.

Sec. 3. At such meeting or meetings the township, city or ward inspectors of election shall act as inspectors of election; the electors shall vote by ballot (such ballot to contain the words "aid to railroad—yes," or "aid to railroad—no," as the case may be) and shall be subject to challenge as at other township or city elections; and the proceedings at such meetings to be held under the provisions of this act, shall, in the case of townships, be governed, so far as they may be applicable, by the general laws of this State, relating to township elections, and, in the case of cities, by the laws regulating their respective municipal elections, and illegal and fraudulent voting shall be punishable in the same manner and to the same extent as at other township or city elections. A copy of the request, and also of the notice required by the provisions of section 2 of this act, shall be entered at large upon the records of the township or city, together with a statement of the result and other essential particulars, and a certified copy of such record shall be in all courts and places *prima facie* evidence of the facts therein set forth.

SEC. 4. Any township or city that may avail itself of the benefits of this act by voting aid to any railroad company, as provided herein, shall, within 60 days after the question of aid is determined by a vote of the electors of such township or city, as provided in section 3 of this act, issue its coupon bonds for the amount so determined to be granted, which bonds shall be in sums not less than $100 each, and not more than $1,000 each, and shall be payable at any time as determined upon by the electors of such township or city, not exceeding twenty years from the date thereof. Such bonds shall bear interest at a rate not exceeding ten per cent. per annum, and shall have attached thereto the necessary and usual interest coupons, corresponding in dates and numbers with the bonds to which they are attached, which shall be signed by written signatures by the same person or persons executing such bonds. Such bonds shall, if issued by a city, be executed by the Mayor and Clerk or Recorder thereof, as the case may be, under the the seal of said city, and if issued by a township, they shall be executed by the Supervisor and clerk thereof, and if any city or township issuing such bonds shall have a seal, the same shall be impressed upon each of said bonds. The bonds and coupons attached thereto shall be payable at the office of the Treasurer of the county in which such township or city may be situate.

SEC. 5. Whenever any such bonds as provided by the provisions of this act shall have been issued as therein specified, the same shall be delivered by the person, persons or officers having charge of the same to the Treasurer of this State, who shall give a receipt therefor, and holding the same as a trustee for the municipality issuing the same, and for the railroad company for which they were issued, and to be disposed of by said Treasurer in discharge of his trust as hereinafter provided.

SEC. 6. Upon the receipt of any such bonds from any township or city, in aid of any such railroad company, the Treasurer of this State shall immediately register or record the same in a book or books to be kept by him for that purpose, in his office, which record shall show the amount, date and number of each bond, the rate of interest which it bears, by what township or city issued, to the benefit of what railroad company the same are issued, and the time when payable, which record shall be always open for the inspection of any citizen of this State, or other interested person. Such bonds shall be safely kept by said Treasurer, for the benefit of the parties interested, and be disposed of by him in the following manner: That is to say, whenever any railroad company, in aid of which any such bonds may have been issued, shall present to said Treasurer a certificate from the Governor of this State that such railroad company has in all respects complied with the provisions of this act, and is thereby entitled to such bonds, the same, or such of said bonds as said company shall be entitled to receive, shall be delivered to said company, the Treasurer first cutting therefrom, cancelling and returning to the municipality the past due coupons. The Treasurer shall endorse upon each of said bonds the date of such delivery, and to whom the same was delivered, and the same shall draw interest only from the time when so delivered, the treasurer shall notify the clerk of the township or recorder or clerk of the city issuing the same of the date of delivery of its bonds to such railroad company. The railroad company so receiving such bonds shall pay the State Treasurer one-tenth of one per centum of the par value of such bonds so delivered, which shall be received by him in full payment of all fees and charges, for the custody, recording, endorsing and delivery of said bonds, which money shall be paid into the State Treasury. And in case any bond so delivered to said treasurer by any such township or city shall not within three years from the time when the same were received by him, be demanded, in compliance with the terms of this act, the same shall be canceled by said treasurer, and returned to the proper officers of the township or city issuing the same.

SEC. 7. In case of any city or township issuing bonds as heretofore provided in this act, shall fail to pay the bonds or interest coupons, or to deposit with the treasurer of the county in which such township or city is situated, a sufficient sum of money to pay the bonds or the coupons, which it may have issued aforesaid, which may then be due, as by the terms of said bonds or coupons, the county treasurer of such county shall certify the same to the clerk of the Board of Supervisors of such county, or in case of the city of Detroit, to the Assessor thereof, stating the amount so due and unpaid by such townships or city, whereupon the board of supervisors of such county, or such assessor, as the case may be, shall cause the same to be assessed, levied and collected from such townships or city, with other county or city taxes, and in like manner, adding to the amount thereof, interest at the rate specified in said bond, for one year, and the same shall be paid to the county treasurer by the treasurer of such township or city, and upon the receipt of such money, the county treasurer shall pay to the holders thereof the principal or interest for which such money may have been collected, with the interest thereon, and cancel and return such bonds or coupons to the township or city to which the same may belong.

SEC. 8. In case any township or city shall avail itself of the benefits of this act, by the issue of bonds or other evidence of debt, in aid of any railroad company, as by this act provided, such township or city shall, each year, by its proper authorities, after receiving the notice as herein provided, from the State Treasury, of the delivery of its bonds to the proper railroad company, so long as such bonds or evidence of debt remain unpaid, levy, assess and collect upon the taxable property of such township or city, a sufficient sum of money to pay all bonds or interest upon the same, as either the bonds or interest thereon shall become due; and the full faith and credit of any township or city so issuing any such bonds or other evidence of debt is hereby pledged for the full payment of both principal and interests thereon; and the same are made hereby, a valid and legal charge upon the taxable property of the township or city issuing the same.

SEC. 9. No such bonds or other evidences of indebtedness shall be delivered to such company until it shall have complied with the conditions voted and completed its road bed and ironed its road with the usual T, or such other rail as may be used by first-class railroads, through the municipality issuing the same, or to the termination thereof, if said road shall terminate therein; nor until said company shall have completed their road as aforesaid, through such municipality, or from the termination of said road if it terminates therein, to some connecting line of railroad duly completed and in full operation, or to the initial or starting point of such road. And in case such bonds shall have been issued by a municipality not upon the line of such road, the same shall not be delivered until said road shall be completed and ironed, as aforesaid, through the municipality adjoining; *Provided*, that in the case of the voting of aid by any township or city, located six miles or more from any part of said railroad, no such bonds shall be delivered until at least 20 miles of said road-bed and railroad shall have been completed and ironed, as aforesaid, from the terminus of said railroad nearest to such aiding city or township: *And provided further*, That in the case of the termination of said railroad, or the making of such crossing or intersection of another railroad, within the limits of any such aiding municipality, such bonds may be delivered when the said road-bed and railroad shall have been completed and ironed, as aforesaid, for the distance of six miles from such terminus or point of intersection.

SEC. 10. The provisions of this act are hereby extended so as to authorize any incorporated village to vote aid to the extent, in the manner, and subject to the conditions and provisions of this act in relation to cities. In case any township has not voted such aid, any village formed in whole or in part from such township may vote such aid, and when any such village has voted such aid, it shall not be liable for a further tax for that purpose by a vote of the township, and it shall be the duty of the President of any village to call a meeting or meetings of the electors of his village as provided in section number 2 of this act for cities and townships. The bonds contemplated in this act, if issued by a village, shall be executed by the President and Clerk and Recorder thereof, as the case may be, as provided for cities and townships in section number 4 of this act. *Provided*, That whenever a village has not voted aid to the full extent of the provisions of this act, a further aid by township or village may be granted to an amount equal to the difference between the aid already granted and the full amount permitted by the provisions of this act.

Alexandria and Nebraska City Railroad.

At the annual meeting of the stockholders of this company at Alexandria, Mo., on the 3d inst., the following gentlemen were elected directors for the ensuing year: J. T. Thomas, John Fallon, Philadelphia, Pa.; William S. Woods, Carlisle, Pa.; I. Bowen Hussey, New York; James Fitz Henry, Enoch Hinckly, Alexandria, Mo., George M. Ochiltree, Waterloo, Mo.; Peter W. Plantz, E. Pratt Buell, Warsaw, Ills.

At a subsequent meeting of the directors the following officers were elected: E. Pratt Buell, President, Chief Engineer and General Superintendent; G. M. Ochiltree, Vice President; P. H. Hitt, Treasurer; P. W. Plantz, Secretary.

☞ The Detroit, Adrian and St. Louis Railroad Company has been organized with the following named gentlemen as directors: D. M. Richardson, J. J. Bagley, A. Sheley, W. C. Duncan and W. H. Tefft, of Detroit, R. R. Beecher, Henry Hart, and Henry E. Angell, of Adrian, and James P. Cawley, of Morenci. The capital stock of the company is $650,000, of which $80,000 has been paid in. The road will be 80 miles long, running from Detroit through Adrian, to connect with a road which is to be built through Eel River Valley to Logansport.

☞ The city of Detroit, Michigan, has voted aid to the extent of $950,000, to be appropriated among four enterprises, to wit: The Detroit, Howell and Lansing road, $250,000; the Detroit and Bay City road, $250 000; the Detroit, Adrian and St. Louis road, $250,000, and the Detroit, Ann Arbor and Jonesville road, $200,000.

☞ The extension of the Indianapolis, Peru and Chicago Railroad from Peru to Plymouth, *via* Rochester has been completed. At Plymouth the new road connects with the Pittsburg, Ft. Wayne and Chicago Railway, and at Laporte with the Michigan Southern and Northern Indiana Railroad.

☞ Marblehead, Mass., has voted to appropriate $50,000 for the purchase of five hundred shares of the capital stock of the Marblehead and Lynn Railroad Company. It is expected that this assistance will secure the building of the road.

☞ The Georgia Railroad Convention, now in session at Augusta, has instructed the directors to extend the Athens Branch to Knoxville, so as to meet the Southern road from Cincinnati.

☞ The Memphis *Avalanche* says that the Cairo and Fulton Railroad has been sold out to Kenneth McRae, a wealthy English banker, for $600,000.

Journal of Railroad Law.

COMMON CARRIER OF GOODS—WHAT IS NOT EVIDENCE OF THE REGULAR COURSE OF BUSINESS.

The late action of Stephenson *vs.* United States Express Company (21 Wis., 405) was one for damages to a chest of carpenter's tools, &c., carried for plaintiff by defendant from Madison in said county, to the city of Chicago, Illinois.

The goods were sent on the 16th, and arrived at Chicago on the 17 of March, 1864; were not called for by plaintiff until the 23d of that month; and were injured by an accidental fire while in defendant's possession. The plaintiff was a stranger and transient person in Chicago, having no residence or place of business there, and his name was not in the city directory. The defendant proved that it was its custom, and that of all express companies in such cases, to have a notice of the arrival of the property, the charges for transportation, &c., deposited in the city post-office, at the close of the day on which the goods arrived. One Wickham testified that he was clerk in the Chicago office of defendant during all the month of March, 1864; that it was his business to make up such notices; and one Wygart took them to the post office; that he made out notices every evening to all strangers and transient persons to whose address goods had arrived during the day, which had not been called for; that he did not intend to omit any, and did not, as he believed; he also gave the form of the notice, which stated, among other things, that goods held after date would be at the owner's risk. On cross examination, he said that he had no personal knowledge or recollection that he wrote such a notice for plaintiff, of the arrival of his chest, prepaid the same, and caused it to be mailed; and that there was no memorandum or note in any book or paper in said office showing such notice to have been written or mailed, and it was not their custom to make any such memoranda. Wygatt testified in a similar manner in regard to the prepayment and deposit of such notice. Plaintiff testified that he never received any such letter. He was also permitted against defendant's objection, to testify that from the 17th to the 23d of said month of March, he inquired twice a day at the Chicago post office for any letters addressed to him, and was told that there were none. Plaintiff's testimony also tended to show that he was not aware that the goods had been sent to him by express until about the time he called for them. He testified also that he was not aware of any custom of the express company in regard to notifying consignees.

The jury were instructed that if the testimony established a general custom in Chicago for common carriers to notify strangers and transient persons by letter dropped into the post office, of the arrival of goods consigned to them, and if defendant delivered such a letter at the post office, it made no difference whether the plaintiff received it or not.

The opinion of the court was delivered by

DIXON, C. J.—If it be conceded, where the consignee has no known place of residence or business at the place of destination, and cannot, after reasonable diligence, be found, so that delivery of the goods may be made to him in person, that a common carrier may by law or by custom of the particular place, absolve himself from liability as such, and assume the character and responsibilities of a warehouseman, by depositing a notice in the post office addressed to the consignee, still we are of opinion that no sufficient evidence was given at the trial that the notice was made out and deposited in the post office as alleged in the answer of the defendant. This question is strictly analogous to that which has several times been presented to the courts, as to the sufficiency of evidence of the making and posting of notice of the dishonor of a bill of exchange or promissory note, so as to charge the drawer or indorser, and should, we think, be governed by the same rules. It is sufficient to refer to two or three of the cases cited by counsel for the plaintiff. In Hawks *vs.* Salter 4 Bing., 715 (15 E. C. L., 125) one of the clerks of the plaintiffs, who were the holders of a bill of exchange, stated that a letter from the plaintiffs which the witness had copied, giving the defendant notice of the dishonor of the bill, was sent by the post, but he had no recollection whether it was put in by himself or by another clerk. It was objected that there was not sufficient evidence that the letter had been put into the post, and so held by the court. In Hetherington *vs.* Kemp (4 Campb.,193,) the plaintiff proved that he wrote a letter addressed to the defendant, stating that a bill of exchange had been dishonored; that this letter was put down on a table, where, according to the usage of his counting house, letters for the post were always deposited; and that a porter carried them from thence to the post office. Lord Ellenborough said that this was insufficient; that some evidence ought to have been given that the letter was taken from the table in the counting house, and put into the post office. Had the porter been called, and stated that although he had no recollection of the letter in question, he he invariably carried to the post office all letters found upon the table, that might have done; but he could not hold this general evidence of the course of business in the plaintiff's counting house to be sufficient. Flack *vs.* Green, (3 Gill and Johns., 474,) is to the same effect. Proof by sundry witnesses, that it was the invariable and uniform practice of a counting house, to forward such notices immediately upon receipt of them, and that they had no doubt, from the course of their business that they had forwarded the particular notice in question, but that they had no recollection upon the subject, was held inadmissible.

In this case the evidence goes merely to the course of business in the defendant's office at Chicago. Wickham, a clerk in the money delivery department of the company, and whose business it also was to make out, every evening, notices of the arrivals of the goods during the day, consigned to persons who had no known place of business or abode in the city, and to address them to the consignees through the post office, testifies that he has no knowledge or recollection on the subject of the notice to the plaintiff, and that there is no note or memorandum in any book or paper in the office by which he can verify the fact that such a notice was made out. The proof in this respect falls short of that given in the cases above cited. In those the making of the notice was established by competent evidence, that the notice was made out. Had the witness made some entry or memorandum of the making of the notice, to the correctness of which he could have testified, then, although he had no recollection of the notice, that, together with the testimony of Wygart that he invariably carried and deposited all such notices in the post office, might have sufficed. As it is, the witnesses having no knowledge or recollection of the notice, and testifying only to their general course of business in the office, we must hold the evidence insufficient, and affirm the judgment.

By the Court.—Judgment affirmed

Steel Rails.

The following statement in reference to Steel Rails is attributed to Mr. Hinckley, President of the Philadelphia, Wilmington and Baltimore Railroad Company:

The first steel rail imported has already worn out sixteen iron rails, and we have not now any reason to suppose that the latter invoices are of an inferior quality. But there is great fear on my part that railroad companies will themselves tempt steel-makers to send a poor article by buying the cheapest—first cost only considered—as they did with the iron masters. It rests with railroad men to keep steel rails good by buying no poor ones.

We try steel with the chisel for hardness, with the trip hammer for toughness, and for strength with the 2,240 pound drop fifteen feet, and the rail resting on supporters three feet apart. Rigid inspection, make no holes, or, at all events, no punched holes, in the rails. Punching is bad enough for iron, but death to steel.

We, on Friday last, dropped our 2,240 pound "trip" twenty feet upon a steel rail resting on supporters three feet apart. The rail was merely bent. I have in my office a steel rail twisted cold, into a regular spiral of one entire turn to two feet in length, without crack or flaw.

Steel Rails.

Steel rails, it is reported, are to be laid on the entire length of the railroad from Paris to Marseilles. The change from iron to steel will require 137,000 tons of steel. From experiment made by the company, it has been calculated that in the vicinity of the stations iron rails will not last over eight or ten years. The steel rails, it is believed, will last thirty or forty years. The bridges are to be constructed of steel as soon as iron ores suited to the manufacture can be obtained in sufficient quantity.

☞ Twenty additional miles of the Macon and Brunswick (Ga.) Railroad have been completed, and the trains are now running over it daily.

Worcester (Md.) Railroad.

Messrs. Pratt and Kimball, contractors of the Vineland Railroad, Bridgeton, N. J., propose to visit us in a few weeks with a view to getting the contract. They are willing to take from $15,000 to $20,000 in stock, and as much more in bond; to furnish rolling stock, &c., and to take the contract for running the road for 20 or 30 years. The short railroad which these gentlemen have built in New Jersey, about the same length as the Worcester road, cost from two to three times as much as our road is estimated to cost, and was expected to be dead stock, but to the agreeable surprise of the stockholders, has proved a paying and valuable investment. If figures do not lie, such will be the result if promptly built.—*Snow Hill Messenger.*

Iron Rails.

In a recent English work on the tensile strength of iron and steel, it is announced as the result of an extended series of experiments, that for such iron as is usually employed for rails in France, Belgium and Wales the breaking strain, as tested by sudden blows or shocks, is considerably influenced by cold. Such iron exhibits, at 10 degrees Fahrenheit, only from one-third to one-fourth the strength which it possesses at 84 degrees. The conclusion is drawn from these experiments that the only practical way to prevent railway accidents during severe frosts and winter weather is to slacken speed, or to give the rolling stock more elasticity by the employment of India rubber springs.

Kent County Railroad.

Hon. George Vickers was elected President of the Kent County Railroad last week, and also a new Board of Directors. The Chestertown *News* says:

The road has made but little progress since the annual election one year ago, and the people of the county look to the present Board for active measures. We hope one of their first measures will be to complete some portion of the upper end of the line, and thereby reduce their operations to some practical value.

☞ The Secretary of the Treasury has decided that the tariff, as well as commercial usage, recognizes a distinction between wrought iron tubes and wrought iron flues, and that the former are liable on importation into the United States to a duty of 3½ cents per pound, and the latter of 2½ cents per pound, under existing laws.

☞ Mr. Wm. H. Ijams has been elected Secretary and Treasurer of the Baltimore and Ohio Railroad Company, vice Joshua I. Atkinson, deceased.

☞ E. Pratt Buell, Esq., of Warsaw, Ills., has been elected president, and Robert Black treasurer of the Warsaw and Eastern Air Line Railway.

☞ The Sun Prairie Railroad has been completed. This reduces the distance between Milwaukee and Madison 17 miles.

To Railroad Contractors.

OFFICE MAYSVILLE & LEXINGTON R. R. Co., N. D. }
MAYSVILLE, KY., MAY 11, 1869. }

ON and after Tuesday, June 1st 1869, this company will be ready to exhibit profiles and specifications for the construction of the Railroad from Maysville to Paris, at least as far as Carlisle, thirty three miles, and will receive bids by sealed proposals in such form and for such portions of the work as contractors may propose, either by the section or for the whole road, until Thursday, June 24th, 1869. Cross-ties and iron will be required for about half the road during the present season, and the whole to be completed as rapidly as practicable. The subscriptions of stock justify the assurance that the Company can promptly comply with their contracts.

J. BARBOUR, Vice Pres't.
THOMPSON PARKS, }
W. H. McGRANAGHAN, } Com.
THOS. J. GLENN, Chief Engineer. 3t21

Notice to Contractors.

PROPOSALS will be received at the office of the undersigned, in Steubenville, Ohio, until Saturday May 29, 1869, for the Grading, Bridging and Ballasting of 14 miles of the Chartiers Railway between Mansfield and Canonsburgh. Profile and statement of quantities can be seen, and detailed information will be given at the Engineer's office, in Steubenville, Ohio, after Saturday, 15th instant.

M. J. BECKER, Engineer.
STEUBENVILLE, May 10, 1869.

To Railway Contractors.

THE Graduation and Masonry of the FREDERICK AND PENNSYLVANIA LINE RAILWAY, embracing twenty-eight sections of more than one mile each, are advertised for contract, and PROPOSALS for the same will be received at the Company's office in the city of Frederick, Md., up to the 25TH DAY OF MAY, inclusive. Specifications, plans and profiles of the work will be ready for inspection at the office of the Company in Frederick, and at the office of the Western Maryland Railroad, in Baltimore, from the 15th day of May, where contractors will obtain all necessary information to enable them to examine the line. The Company reserves the right to reject all or a part of each bid.

4t18 JOHN LOATS, President.

Blue Ridge Railroad.

THE attention of Contractors is invited to the work of completing the Blue Ridge Railroad, in South Carolina, from Anderson, South Carolina, to Knoxville, Tennessee—a distance of one hundred and fifty-two miles to build.

The Executive Committee of the Board of Directors is prepared to enter into negotiations with responsible persons, who may desire to undertake the work.

Payments will be made in first mortgage (7) per cent. currency bonds of the company, secured by the guarantee of the State of South Carolina, for the punctual payment of both principal and interest. The mortgage covers unencumbered property of the company, which cost three and a quarter millions of dollars in gold, and embraces fifty miles of road complete and in running order.

Detailed Estimates, Plans, Profiles and Specifications, will be ready for inspection by JUNE 1, 1869. Meanwhile, approximate quantities and other information concerning the work may be obtained by application to Col. James P. Low, the Chief Engineer of the Company, or to the undersigned, at Columbia, South Carolina.

R. K. SCOTT,
5t18 Chairman of Executive Committee.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD }
COMPANY, NEW-YORK, April 28, 1869. }

THE ANNUAL MEETING OF THE SHAREholders of the Illinois Central Railroad Company, for the election of directors and the tranraction of other business, will be held at the office of the Company, in the City of Chicago, on WEDENSDAY, the 26th day of May, proximo, at 3 o'clock P. M.

The transfer books of the Company will be closed at the close of business on the 15th proximo, and re-opened on the 1st day of June, following.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

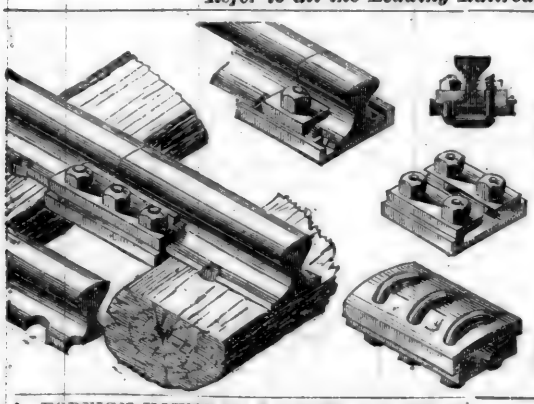
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT
Wrought Iron
RAIL JOINTS,
MADE BY
FISHER & NORRIS,
TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

New York Saturday, May 29, 1869.

Memphis and Little Rock Railroad.

We reported a short time ago that the energetic contractors who have undertaken to build the stonework of the railroad bridge over White river, at Devall's Bluff, were then purchasing flat boats to take stone and other material to that place. These boats with their contents are now on their way down the river as fast as steam can take them. The parties who have this work in hand have the confidence of every one who knows them, and when the iron reaches Devall's Bluff, the bridge will be ready for it. The bridge over the St. Francis river, we have great satisfaction in stating, is completed. The weather last month was unfavorable to operations in grading between Madison and Devall's Bluff; but now bright skies smile on us, a heavy force will be put to work, and the grading, which is light, will proceed with speed, and the iron will quickly follow, as the track is prepared for it. The finances of the company have assumed a more encouraging appearance and, from this time we have every reason to believe the affairs of this important road will go on satisfactorily.—*Memphis Avalanche.*

Maryland Central Railroad.

At a meeting of the citizens of Hartford County, Md., at Bel Air, on the 15th inst. a committee was appointed to confer with any and all parties who may desire to aid in the construction of an independent road between Baltimore and Philadelphia. On motion the following heading was placed upon the subscription papers:

We, the undersigned agree to subscribe for the shares of stock in the Maryland Central Railroad Company opposite our names, on the following terms and conditions, viz:

1st. These subscriptions not to be binding unless $500,000 worth of stock be *bona fide* taken or agreed to be taken before the first day of January next.

2d. That after the payment of the two dollars per share required by the charter to be paid at the time of subscription, those who subscribe under this agreement shall not be required to pay on the residue of their subscription a larger installment or at shorter times than ten per cent. of each share, at ninety days thereafter, and ten per at successive periods of ninety days interval, until the whole is paid; and thirty days' notice, by public advertisements by the President and Directors, to be given before the times for payment of each installment.

3d. That no expenses or liabilities of the company be incurred until after the above stock shall have been subscribed and an election of Directors held by the stockholders.

4th. That the whole road between the Susquehanna river and Baltimore city shall be put under contract at the same time, or an equal amount of money expended, *pari passu*, on each end, or as nearly so as is practicable.

Chicago, Danville and Vincennes Railroad.

Track laying was commenced upon this road on the 21st inst. and the contracts require it to be laid to Momence (about 29 miles from Dalton on the Columbus, Chicago and Indianapolis Railroad, and 50 miles from Chicago) by the first of August. The whole line is under contract, and the Company expect to complete the entire road this year.

☞ The work on the railroad between Woodbury and Swedesboro', in Gloucester county, N. J., is progressing so rapidly that, it is alleged, the road will be in running order by the Fouth of July next.

☞ A survey is soon to be made of the line of the proposed railroad between Wiscasset and Augusta, Maine.

Pacific Railroad Fares.

The fare has been fixed over this road, from New York to Sacramento, the total distance being 3,377 miles, at $190 35; from New York to Omaha the fare is $42; from Omaha to Promontory, the terminus of the Union Pacific Railroad, 1,086 miles, the fare at 7 cents per mile, is $76 02; from Promontory to Sacramento, being on the Central Pacific, a distance of 695 miles, the fare is $82 33. Just at this point comes in a nice question of pro rating on fares—why should the Central Pacific with only 695 miles charge as *its* proportion $82 33, while the Union Pacific over *its* line of 1,086 miles, charges but $76 02? We learn that this discrepancy is one of the principal points of disagreement between the two corporations, and that the Union Pacific claims that the Congressional ring has operated to favor the Central Pacific. If the fare is insisted upon at the present tariff, the bulk of travel will go by steamer. The New York parties are in favor of reducing the fare to less than $150, and with such a reduction and an equable arrangement between the two corporations travel will be turned overland.—*Boston Traveller.*

Philadelphia and Baltimore Central R. R.

The Baltimore County *Union*, referring to the action of the Baltimore City Council in giving the Baltimore and Potomac Railroad the right of way through the city, and the proposed aid to be given to the Western Maryland, approves of both measures, and says:

There is another road, however, in which our county people should take a greater interest than they do. The Philadelphia and Baltimore Central road is nearly completed to the Susquehanna line, and our Harford friends are moving vigorously to build it through their county to the timore County line. It will reach that the course of a year or two, and must address itself to our people the county line be the end of enjoy the benefits of this time that steps were t material aid to bu should also s to their cit duce w whi l

Rail. Erie R. by way New Jers pany.

Pittsburg and Connellsville Railroad.

The earnings of this road for the years ending October 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$174,680 32	$163,456 48
" freights	312,931 53	337,621 19
" mails	3,650 00	3,650 00
" miscellaneous	6,969 05	3,898 25
	$498,180 90	$508,625 92
Expenses, viz:		
Conducting transp.	$71,349 91	$80,113 16
Repairs of motive power	99,240 42	104,950 84
Maintenance of cars	28,975 23	26,363 75
Maintenance of road	107,653 64	100,275 01
General expenses	17,989 05	15,858 29
	$325,208 25	$327,560 55
Leaving net earnings	$172,972 65	$181,065 37

Compared with the previous year, the gross earnings of 1868, show an increase of $10,445 02, with an increase in expenses of $2,352 30—making the increase in net earnings, $8,092 72. The net earnings are 35.60 per cent.; in 1867 they were 34.73 per cent. The gross earnings are subdivided as follows:

	1867.	1868.
Main Division	$329,114 56	$350,784 17
Turtle Creek Division	130,670 82	128,909 48
Fayette Co. road	38,395 52	28,932 27
Total, as above	$498,180 90	$508,625 92

The net earnings have been appropriated approximately as follows:

Locomotive engines—balance	$23,975 52
Passenger, baggage, freight and repair cars	7,721 21
Coke and coal yards, etc.	7,204 27
New track east of Connellsville, etc.	3,262 61
Graduation—work at Sand Patch tunnel and filling trestles	14,693 27
Masonry	4,290 02
Machine shops and machinery	1,465 68
Coupons Turtle Creek div. bonds	17,997 35
Right of way and real estate	13,157 18
Engineering—surveys of Cross Line	236 10
U. S. taxes	10,868 42
Rent of Fayette County road	9,000 00
Bridge and road superstructure	3,668 37
New water stations, insurance, etc.	3,286 72
Amount in hands of Treasurer and agents, and other items of floating debt paid	55,043 70
Total	$181,065 37

The floating debt at the close of the last fiscal year, was $74,862 97, making proper deductions for assets and counter claims its real amount was estimated at $36,995 79. This year its amount is nominally the same, but omitting interest due city of Baltimore and upon stock, the company have available assets to pay the whole amount.

The company have 15 locomotives. The total number of miles run by passenger and freight trains, was 358,738, and by construction trains, 15,810, a total of 374,548. Number of passengers carried, 422,739. Average distance each passenger was carried, 10.6 miles; equivalent to 68,049 over the whole road, or 4,899,494 one mile. Number of passengers carried eastward, 253,494; do., westward, 169,245. Freight transportation was 398,502 tons of 2,000 lbs., 32,934 passing eastward, and 365,569 westward. The average distance was 31.6 miles, equal to 174,841 over the whole road, or 12,588,534 tons one mile. The work of the previous year was 339,804 miles run by trains, carrying 411,116 passengers an average distance of 11.6 miles, equivalent to 66,335 over the whole road, or 4,776,155 one mile; and 374,965 tons of freight, an average distance of 26.9 miles, equal to 140,005 tons over the whole road, or 10,080,344 tons one mile.

The transportation of coal and coke has increased about six per cent. Groceries shipped eastward from Pittsburg have exceeded 3¼ millions of pounds, an increase of about 30 per cent. over last year, and of nearly 100 per cent. over the year 1866. In rolled and hammered iron, directly connected with the trade of Pittsburg, the increase has been over 2,300,000 lbs. The increase in the transportation of pig metal has been still greater. In queensware and glassware the increase has been very large, in glass, sand, fire-clay, etc., the increase has reached nearly 10,000,000 lbs. The President in his report says:

The past year has witnessed the restoration of the franchises, the negotiation of a large proportion of the money necessary to complete the road, and the actual letting of the heaviest part of the unfinished work to substantial contractors. Seldom has a triumph been more complete.

In January of the present year the *quo warranto* case, so called, was tried in the Supreme Court of Pennsylvania. The suit was "in the nature of a writ filed by the Attorney General, calling upon the company—the defendants—to show by what warrant they claim to have and use the following franchises: To be a corporation by the name of the Pittsburg and Connellsville Railroad Company—to maintain and operate the road from Pittsburg to Connellsville—to extend the road beyond Connellsville to Smithfield, or any other point on the waters of the Youghiogheny, and within the limits of this Commonwealth; and to extend the road to any point they may select in Bedford and Somerset Counties, so as to form a connection with the Chambersburg and Allegheny Railroad, or any other railroad that may be constructed." Thus, the whole existence of the company was assailed, including the completed portion from Pittsburg to Connellsville, the right to extend to the State Line, and to connect with the Baltimore and Ohio road.

The parties assailing you under the wing of the Attorney General alleged:

1st. That the charter in Pennsylvania was forfeited by the act of procuring a charter from the State of Maryland.

2d. By using the Maryland charter to attack the constitutionality of a Pennsylvania statute.

Both these points were declared untenable.

3d. That the charter was forfeited by the intent and effort upon the part of the company to construct an extension for the purpose of connecting with the railroad of the Baltimore and Ohio Company.

The Court decided—"Upon the proper construction of the various Acts of Assembly, authorising these defendants to extend their road South and East of Connellsville, we are of opinion that they are licensed by the Legislature to form a connection with the Railroad of the Baltimore and Ohio Company." * * * * "We do not therefore doubt that the defendants were expressly licensed by the Legislature to connect with a railroad in Maryland at the State Line."

4th. The last position assailing the company was, that by the Act of Assembly passed August 19th, 1864, "all the rights, powers, franchises and privileges conferred, for and in respect to all that portion of the lines of railway southwardly and eastwardly from Connellsville were resumed, revoked, repealed, and put an end to." This was what was commonly called the "Repealing Act," and many points were urged upon the part of the Attorney General to sustain its constitutionality. The Court say—"We have given to all the points presented by the Commonwealth the most careful consideration, and on the whole are of opinion that they have not been sustained." "Judgment for the defendants." We have quoted liberally from the language of the decision of Judge Sharswood, wishing to preserve in this form the record of the points of attack, and the completeness of the victory.

The clear and wonderfully lucid argument of that learned judge is exhaustive, not only placing our franchises beyond all attack, but establishing broad and general principles for the guidance of corporations, and also of the legislative powers creating them. On the 30th day of the same month, the Legislature of this State, by an almost unanimous vote, *repealed* the iniquitous law of 1864, by an Act in the following words:

"Section First—Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania, in General Assembly met, and it is hereby enacted by the authority of the same, that the Act of Assembly of August 19th, 1864, entitled an Act relative to the Pittsburg and Connellsville Railroad Company, be and the same is hereby repealed, and the said company is required to commence the said road within six months, and to build and complete the same to the State Line within three years from the date hereof."

Thus terminated a most gigantic scheme of oppression. The boldness of its conception favored its accomplishment, and the disturbed state of the times gave pliant tools for the task. Grown bold by impunity, feeling secure in a position which seemed to protect from punishment, the authors of the original wrong contended fiercely in the Courts and in the Legislature for its perpetuation. Your charter—the subsequent laws explaining or extending its privileges—your Acts as a corporation—the management of your various boards of direction—all and each, down to the minutest point have been examined and assailed, but in each and all you have been triumphantly vindicated. The franchises now possess the rare merit of a complete adjudication. Your securities are, by this, greatly increased as to intrinsic value, and their negotiation much facilitated, a consequence certainly unforeseen by those who inflicted the injury.

Immediately upon this success the Board began preparation for resumption of the long delayed work of construction.

The City of Baltimore held a first mortgage upon the road for one million of dollars, and upon this, about seven hundred thousand dollars of interest had accrued and remained unpaid. It was resolved to ask of the city that this lien, with its accumulated interest, should be retired to the place of a second mortgage; and further, that no interest should be required to be paid until January, 1871, at which time it was hoped the work would be completed.

An ordinance embodying the above points was prepared and passed by the Council on the 18th day of March, 1868, but having been vetoed by the Mayor it was again passed by a nine-tenths vote, and was presented to, and accepted by, you at a called meeting on the 15th day of May, of the current year.

During the long canvass of this subject before the City Council of Baltimore, most efficient aid was rendered by members of the Board of the Baltimore and Ohio road, who had been deputed for this purpose by that Directory.

At the May meeting before alluded to, it was decided to execute a new first mortgage for four millions of dollars, and to issue bonds based thereon for that amount, bearing seven per cent. interest.

The ordinance of the City of Baltimore required that two millions of these bonds should be negotiated before the retirement of the city's lien could take place. The Baltimore and Ohio road at once subscribed for one million; Johns Hopkins, Esq., sixty thousand; President Garrett, thirty thousand; A. Schumacher, Esq., one of the principal promoters of the Bremen Line of steamers, twenty thousand; and many of the principal citizens of Baltimore and Pittsburg for large amounts. Hon. A. Stewart, of Uniontown, has taken twenty thousand.

In August we had thus obtained $1,550,000, when the Baltimore and Ohio road, to enable us to fulfill the conditions of the ordinance, and to

permit the work to be begun, made an additional subscription of $450,000. This does not more evince the interest of that company than the whole consistent course of its managers, and may well serve to silence the cavilings of all doubters, and fully re-assure our friends. The most common and frequent assertion of our enemies has been, that the Baltimore and Ohio road would *not* extend its aid. These subscriptions are the best practical refutation, and afford guaranty of payment of interest to those who may purchase bonds, as the business which that road can and would give in protection of its own investment will of itself be sufficient to provide the means. Probably no better evidence can be given of the value of your securities than the large investment by this company, marked perhaps more than any other to-day by skill and prudence in its financial management.

Your Board had deemed it advisable early in June to resume operations at Sand Patch Tunnel. On the 10th day of August a letting of all the more difficult work was advertised, and by diligent effort such competition was excited as has resulted in securing first class contractors upon most favorable terms, saving for the company, as compared with the prices in 1864, nearly $254,000.

The number of the new first mortgage bonds that have been delivered are 391, which, at 90 cents on the dollar,

Amount to	$351,900 00
And interest accrued from July 1, 1868, to the date of the delivery of the bonds	3,814 48
Total	$355,714 48

There has been expended for—

Engineering	$2,114 30	
Sand Patch Tunnel	2,925 61	
Stamps on new mortgage	3,809 52	
		8,849 43
Leaving		$346,865 05

which is placed in the hands of the Baltimore and Ohio road, and for which you are receiving six per cent.

Your bonds are rising rapidly in the estimation of capitalists, and are being sought as a safe and permanent investment for the money of Trust Estates, by Insurance Companies, and by all similar classes.

The net earnings of the completed portion of the road for the past year will reach nearly two-thirds of the interest upon the entire mortgage. This is from purely local trade. The connection with Baltimore and the development of the resources, as yet untouched, of a large part of Fayette and all of Somerset and Bedford Counties, entirely independent of through trade, if in the same proportion, will pay interest upon the entire debt and afford besides a remunerative dividend to the stockholders.

As before stated, all the heavy work upon the line between Connellsville and Cumberland has been put under contract, and arrangements have been already made for letting the remainder. The entire road will be finished before October, 1870.

It is difficult to avoid language of extravagance in depicting the results to flow from the completion of this great enterprise. Pittsburgh, its western terminus, is surely destined to become the greatest manufacturing City of the Continent. That which has served more than all else to retard its progress, has been the lack of competing Railways Eastward. A late computation of its population reaches 290,000. Here converge from the West, North and Northwest, many of the most important railway lines of the country. It is, to a considerable extent, the head and concentring point of all the river navigation of the West, besides receiving large tribute from the chain of great Northern Lakes. The growth of her manufactures is rapid almost beyond precedent. The Eastern terminus, Baltimore, has already obtained a position in the front rank of commercial cities, is indeed second only to New York, and daily advancing in power and wealth. Her magnificent natural harbor justly entitles the city to a precedence which the enterprise of her citizens, in establishing and supporting numerous lines of steamers, both to Europe and to every principal point upon this continent, will go far to maintain. With a population of over 300,000, steadily increasing, eager, active, and shrewdly engergetic, she looks anxiously for the completion of this work with confident belief in its immense value.

Your line connecting these two cities will be taxed to its utmost capacity. Its natural advantages have often been described.—For the first eighty-four miles from Pittsburgh, its maximum grade will be 26 4-10 feet to the mile, and even this for a very short distance—thence for four miles, it will be 52 8-10 feet to the mile—thence upon a level to within six miles of the summit of the Alleghenies, which is crossed with the grade last mentioned, 52 8-10 feet. Your Chief Engineer, Mr. Latrobe, whose large reputation and experience give great weight to his words, in the report published herewith, upon this point says: "It may then be confidently confirmed that no other road of *equal directness*, between Pittsburgh and the seaboard, can exhibit a capacity approaching that which the system of grades above described will confer upon the Pittsburgh and Connellsville road." From Cumberland eastward, the wise foresight of the Baltimore and Ohio Road has already provided a double track, and can supply every other facility requisite for any probable additional amount of business.

It is not yours to be compelled to await impatiently the slow process of the growth and development of the business to pass over your Road. Already, at both its termini, a large traffic eagerly awaits the completion of the work. At Pittsburgh it is even now beyond the capacity of the only completed eastern line, and more will naturally tend to that point so soon as facilities and competition are known to exist. A very large amount will be at once diverted from the Baltimore and Ohio Road at Cumberland. The local trade will also be of immense proportions; for one hundred and thirteen miles of its length, it traverses the best beds of bituminous coal at present known to commerce. Iron ore, fire clay, limestone, and marble, are practically exhaustless. The forests of white pine and the harder woods alone would afford a large and profitable business to the Company.

Thus traversing a country so rich in natural resources, so populous and already so largely developed, connecting two large and growing cities, conveying to the ocean the products of the interior, and the commerce of the Ohio and the Lakes, the last link in the chain of roads forming the shortest and best route from the Northwest to the Atlantic States—your Road may well be said to have already passed into importance truly national.

Queen Anne's County Railroad.

The *Crumptonian* (Queen Anne's Co.) says the work of laying the track on the branch railroad from Townsend to Massey's is making satisfactory progress. About six miles have been laid, and as the force employed has been laying one-fourth of a mile per day, there is little doubt but the track to Massey's will be finished early in June. The laying of rails from Massey's downward by the Queen Anne Railroad contractor, will be commenced without delay, so that in a few weeks Sudlersville will be reached. This is probably as far as it will get in time to be available for carrying the peach crop to market this season. The Delaware Railroad Company offer to put on engines and cars, and thus open the finished portion of the line without unnecessary delay, charging sixteen per cent. on the value of the rolling stock used as rent, for which they will keep them in good order.

Arkansas Railroad Convention.

A railroad convention was held at Pine Bluff, Arkansas, on the 17th inst. The Little Rock *Gazette* says the line heretofore spoken of as the Little Rock, Pine Bluff and New Orleans Railroad received the hearty endorsement of the meeting, and the people all along the route expressed a willingness to contribute to its success. A branch of the Memphis and Little Rock road, from Devall's Bluff to Pine Bluff was also decided on, and it will be rapidly pushed forward on the completion of the Memphis road.

☞ A company has been organized in the Neosho Valley to construct a railroad from Emporia, Kansas to Holden, Missouri, which will put Southern Kansas in connection with St. Louis by a route 150 miles shorter than the railroad connection of the same region with Chicago. From Emporia, southwest, the contemplated road will pass through the Osage Indian lands to Albuquerque, New Mexico.

☞ It is confidently expected that the two iron Railroad Bridges over the Cape Fear River at Wilmington, N. C., will be completed and turned over by the contractors on the first of July next, after which time there will be no change of cars or baggage on the route.

Western Maryland Railroad.

The Joint Standing Committee on Ways and Means of the Baltimore City Council, to whom was referred the communication of the Mayor to the Council, inclosing the memorial of this company asking the aid of the city to enable it to complete its road to Williamsport, Maryland, have reported as follows:

That the committee, under the authority for this purpose given them by both Branches of the City Council of Baltimore, employed a competent person to examine into the present financial condition of the Western Maryland Railroad Company, and also employed Mr. Charles P. Manning, an engineer well know to the citizens of Baltimore from his connection with the construction of the existing Water Works of the city of Baltimore, and who is at present in charge of the construction of the Pittsburg and Connellsville Railroad, to inform the committee what sum of money is required to complete the Western Maryland Railroad to the town of Williamsport, in the State of Maryland (situate on the Chesapeake and Ohio Canal), and to equip the same.

The committee hereto annex as a part of this their report the statements made to them by Mr. Manning, the Engineer, and by Mr. H. P. Mowinkel; the statement of Mr. Manning showing the amount necessary to complete the said railroad to Williamsport and the statement of Mr. Mowinkel showing the present financial condition of the company.

The committee do not hesitate to affirm that in their judgment the report of Mr. Manning shows very conclusively that the Railroad can be completed to Williamsport and thoroughly equipped for an active transportation for one million of dollars.

It will be observed that the estimate of Mr. Manning is even less than that of Mr. Bollman, the President. Neither of these estimates seem to the committee to under estimate the cost of the completion of the road.

If the committee are correct in these conclusions, they are firmly convinced that the interests of the city, looking as well to what has been already invested by the city in this road as to the increase of the trade and commerce of the city, consequent upon the completion of this railroad, would be immensely subserved by the completion of this railroad.

The committee in company with his Honor the Mayor have, within the last ten days, passed over the whole line of the Railroad, and carefully inspected the road, as well that part actually finished and in operation as that part not yet completed and in operation. During this visit and inspection the committee were impressed with the accuracy of the report as made to the committee by Mr. Manning as to the condition of the railroad, and as to what remains to be done upon it; and they beg the attention of the members of the Council to this report.

The committee were moreover strongly impressed with the fertile and magnificent character of the country through which this railroad passes; the committee do not exaggerate when they say that it seems to us that every mile of country through which this railroad passes, from the point to which it is now finished to Williamsport, will prove tributary, either in agricultural products or in minerals, to the trade and commerce of Baltimore.

If the railroad is completed to Williamsport, the Council are aware that here the Chesapeake and Ohio Canal is tapped; and from this source a great and profitable addition to the coal trade of Baltimore must as a matter of course arise. With this coal trade, and the transportation of the agricultural and mineral products of Frederick and Washington counties, which now go elsewhere or over other roads, there can be little doubt that the Western Maryland Railroad will be a profitable and remunerative road, and add much to the commerce, trade and prosperity of Baltimore.

REPORT OF MR. MANNING.

The report of Mr. Manning, referred to in the report of the committee, says that the length of the road now remaining unfinished is thirty-five miles. Between Big Pipe Creek and Mechanicstown, a distance of eight miles, the road bed is finished and ready to receive the track, except for a distance of about 300 yards. For this distance the sum of $35,000 is required to build the road. Between Mechanicstown and the eastern slope of the South Mountain the road bed is finished for a mile and a-half, and considerable intervals of grading have been accomplished along the whole line to the summit of the mountain. This division embraces the largest amount of grading yet required to be done, and the Engineer's estimates have provided the large sum of $115,000 for its accomplishment, which will be sufficient. From the summit to Smithsburg the road descends the western slope of the mountain, and is prepared for the track to all points except section No. 26, where several thousand yards of excavation remain to be done, and on section No. 31, where a bridge of 150 feet span is required. For this section $48,000 will be required. From Smithsburg to Hagerstown the road bed is fully prepared for the track, except a small amount of grading on one section, and the usual amount of repairs of finished cuts and embankments, together with the construction of a bridge of 150 feet span, across the Antietam river. The Engineer makes provision of $13,000 to meet the cost of preparing this portion of the line for the reception of the track. Believing from the evidences of personal examination that the estimates of the amount of work yet to be done are approximately correct, and knowing from experience that the prices applied by the Engineer are the highest rates demanded for the various kinds of work, I unhesitatingly assume that the total cost of preparing the entire thirty-five miles of the unfinished road bed for the reception of the track between Big Pipe Creek and Hagerstown will not be likely to exceed the estimates of the Chief Engineer, which, as herein stated, amount to $211,000, and that the estimate of the President, which adds some $20,000 to this amount, should be sufficient for all probable contingencies. In regard to the cost of laying down and ballasting the road to Hagerstown, I am of the opinion that the President's estimate of $427,000 is sufficient, and I also think his estimates for the necessary equipment to open and operate the road for the first six or twelve months are ample. As to the length of time required for accomplishing the work, my opinion is that four months will do for the portions between Big Pipe Creek and Mechanicstown, and (coming eastward) between Hagerstown and section No. 26, and that six months of the most active operations must be allowed for the accomplishment of the grading between sections 15 and 25. In reference to the estimated cost of extending the road from Hagerstown westward to an intersection with the Chesapeake and Ohio Canal at Williamsport, I can only now express an opinion based upon a general knowledge of the features of the country to be traversed and the distance between the points named. I am of the opinion that $175,000 (the estimate of President Bollman) will accomplish the construction of that part of the road; indeed I do not think that it should cost that sum exclusive of the right of way question.

FINANCIAL CONDITION.

The following are the results exhibited in the different statements made by Mr. Mowinkel of the financial condition of the Company referred to above:

The stock debt of the Western Maryland Railroad Company prior to the extension of the road from Union Bridge to Hagerstown was $849,700, which has since been increased by mortgage bonds $1,200,000, and by 8,374 shares of stock issued upon city and county subscriptions, (less 660 shares forfeited for non-compliance of contract), making the new issue 7,714 shares for $385,710, and the total stock debt $2,435,410.

The following recapitulation of the statement shows how the bonds and city stocks have been disposed of, what amount has been realized therefrom, and the amount paid for discount, commission and interest: Second mortgage bonds, city endorsement, $300,000; received, $263,555-66; discount, &c., $36,444 34. Second mortgage bonds, Washington county endorsement, $300,000; received, $240,944 18; discount, &c., $54,555 82. Preferred bonds, $600,000; received, $365,378 34; discount, &c., $87,025. City 1867 stocks, $200,000; received $195,313 81; discount, &c., $4,686 19. Washington county bonds, $150,000; received, $131,923 82; discount, &c., $18,076 18. Total amount of receipts from bonds, &c., $1,197,115 81; total amount paid for discount, commission, &c., $200,787 53. Received from stock subscriptions in Baltimore, $38,420; from subscriptions in Frederick, Carroll and Washington counties, $24,390 67. Total amount received, $1,259,926 48.

The above total receipts, $1,259,956 48, have been expended as follows: Construction account, $958,198 11; engineering $43,857 36; right of way $43,236 98; equipments $71,600; machine shop $3,253 68; motive power $1,954 75; maintenance of way $2,584 07; coupon interest paid $93,019 43; sinking fund $30,000; interest $8,422 08; lawyers' fees, stamps, &c., $8,950 77; damages for killing Mr. Spurrier $1,266; Union Railroad subscription $2,500; due on sundry accounts $2,763 66; cash on hand, March 6th. $4,159 23—total $1,275,466 12; credit due to sundry open accounts $15,539 64—balance $1,259,926-48.

The total liabilities of the company are $2,632,527 42; total assets $333,492 89; liabilities over assets $2,299,034 53. The unpaid amount due by subscribers for the extension of the road is expected to realize from $50,000 to $60,000, which will go towards building the road.

New York City Central Underground Railway.

The following is a copy of the bill amending the charter of the New York City Central Underground Railway, as passed by the Legislature on the 11th inst., and signed by the Governor:

SECTION 1. Section four of the act entitled "An act to incorporate the New York City Central Underground Railway Company, and to authorize the said company to construct and operate a certain underground railway in the City of New York, passed April 17, 1868, is hereby amended so as to read as follows:

The tunnel and railway hereby authorized to be constructed and enjoyed by said Corporation shall follow as nearly as possible the line of the streets, avenues, courses, and places named, as follows: Commencing at a point on the easterly line of Broadway, in the City Hall Park, thence easterly and underground, passing in front of the old City Hall, and thence to Centre st.; thence under and across said Centre st. to City Hall place; thence through said City Hall place, by tunnel, or on a line east or west f City Hall place, by tunnel or open cut, to Pearl st.; thence in like manner across said Pearl st., north-easterly in a curved line to or near Mulberry st., at a point in said street between Bayard and Park sts.; thence northerly through said Mulberry st. by tunnel, or east or west thereof in the same general direction, by tunnel or open cut, to Bleecker st.; thence northerly under and across Bleecker st., in a straight line, as near as practicable, by tunnel or open cut to Lafayette place; thence northerly under said Lafayette place to Astor place; thence under and across said Astor place and Eighth st., to the northerly side of said Eighth st.; thence under and across the block between Eighth st. and Ninth st., and easterly of St. Ann's Church on said Eighth st., to Fourth ave.; thence northerly under the said Fourth ave., to Fourteenth st.; thence under and across said Fourteenth st. and said Fourth ave., to Union square; thence northerly, under said Union square, to Seventeenth st.; and thence under and across said Seventeenth st., and thence to Twen-

ty-third st., either through the blocks between Broadway and Fourth ave., as near as practicable, in a direct line by tunnel or open cut, or through to Madison ave., as it may hereafter be extended southerly; thence northerly under said Madison ave., as it would be if projected southerly; thence under Madison square and Madison ave. to Twenty-sixth st.; then northerly under and across said Twenty-sixth st. to Madison ave.; thence under said Madison ave. as now opened, or east of said avenue, in whole or in part by open cut or tunnel, to Eighty-sixth st.; thence under said Madison ave., as now declared by chapter 403 of the laws of the State of New York of 1867 to One hundred and Twentieth st., thence north-easterly, continuing the same line to Harlem River, thence easterly and westerly along said Harlem river, and connecting with the Harlem Bridge at the terminus of Third ave. And in case the lowness of the surface at any point of Ninety-ninth st. is such as to render the construction of a tunnel undesirable, said main line may be constructed and operated by an elevated railway on or near said Madison ave., from said Ninety-ninth st. to and along said Harlem river or near it. The said corporation may make, on the route aforesaid, the necessary connections, turn-outs, switches, and other conveniences for the proper working and accommodation of said railway; and returning from Centre st., may pass in the rear of the City Hall, and may make connections with any steam or horse railroads in such manner as may be deemed best by said corporation. The said company may also construct and use a branch from the said main line to the Central Park, and, with the approval of the Commissioners of the Central Park, into and under the said Park.

Sec. 2. Section 5 is hereby amended so as to read as follows: For the purpose of making, constructing, and operating the said tunnel and railway, said corporation is hereby authorized and empowered to enter upon and underneath the several streets, avenues, squares, public places, and lands hereinbefore specified, and into and upon the soil of the same, to construct and maintain said tunnel and railway along the route and to the points herein specified and contemplated; such tunnel and railway to be constructed in the most thorough manner, and upon the most approved plans for lighting, ventilating, and draining, and of sufficient dimensions and number of tracks for the purpose of said railway, and for the convenience of the public travel, and at such depth below the surface, and in such manner as effectually to prevent any interference with the surface of said streets, avenues, squares, or grounds, or the use of the same, with such exceptions as are provided for in this act; and except also that during the progress of construction it shall be lawful to make such excavations and openings in said streets, avenues, squares, and grounds under which said tunnel and railway shall be constructed, or over which said railway tracks shall be laid, as shall be necessary from time to time; and in all cases the surface and pavement of said streets, avenues, squares, and grounds over said tunnel and railway shall be restored to the condition in which they were before such excavations were made, as near as possible; and if practicable one-half the width of said street shall always be kept open for public travel; but where excavations for the full width of such street or avenue shall be made they shall not be oftener at any one time nor more than one in each quarter mile of said road, nor shall they be more than 250 feet in length in any one place; nor shall they be kept open longer than for a period of 60 days in any one place, except by the consent, in writing, of the Street Commissioner of the City of New York; and it shall be lawful for the said corporation to make, construct, and maintain openings for ventilation or light, extending from said tunnel to the outer edge of the sidewalks of the streets or avenues and to the surface of the squares in which said tunnel shall be constructed. And said openings shall not exceed two feet in width except in public squares and parks, when said openings may be four feet in width by eight in length at any one point; said openings for ventilation in said parks and squares shall be covered with an iron grating which shall not extend more than six inches above the surface of said squares or parks. It is hereby provided however that the said corporation shall be liable to the owner or lessee of any building or property along the route of said tunnel, for any damages which he or they shall sustain by reason of any direct injury caused thereto by the construction of such railway and tunnel.

Sec. 3. Section 11 is hereby amended so as to read as follows: The said corporation shall commence the construction of its tunnel and railway within two years from the passage of this act and shall have three years thereafter to complete the same to Forty second st., and five years thereafter to complete the same to and along the Harlem River, necessary and unavoidable delays from the pendency of legal proceedings against said corporation excepted, and no omission to construct any portion shall work a forfeiture of the franchise in respect to any section of said tunnel and railway which may have been commenced or completed.

Sec. 4. Section 12 is hereby amended so as ro read as follows: The said Company may if it so elects construct its road or tunnel on any line between the said Madison ave. and the said Fourth ave., north of Forty-sixth st. The Street Commissioners of the City of New York may, upon application of said Company, in the discretion of the Common Council of the City of New York, and pursuant to its direction, change the grade of any street or avenue, through, across, or under which said Company is authorized to construct its road, and conform the grades of intersecting streets thereto. The expenses of any such change of grade to be paid by said Company, or said company may do the work necessary to effect such change of grade at its own expense, but the same shall be done to the satisfaction of said Street Commissioner. But whenever the change of grade of any street caused by the construction of this road shall injure any property of private owners they shall be entitled to such damages, to be paid for by said Railroad Company, as shall be awarded by Commissioners appointed by the Supreme Court of the First Judicial District. And if the width of any street or avenue along the route of said railway shall be deemed by said Company inadequate for the construction of a railway sufficient to accommodate public travel, they are hereby authorized to acquire title to and hold such adjacent real estate as shall be necessary for that purpose, in the manner provided in this act.

Sec. 5. Any Railroad Company or Companies incorporated by the laws of this or any other State may subscribe to the capital stock of this said company in such amounts as they may respectively determine, but no such action shall be had by any such Railroad Company until the assent in writing thereto of at least a majority of the stockholders thereof has been obtained and filed in the office of such company.

Sec. 6. Nothing contained in this Act shall be held to authorize the said company to use locomotives or any description of steam carriages upon and along any street or avenue in the City of New York. The tunnel mentioned in this Act, hereby amended, may be a single or double tunnel, or sub-ways, as said corporation may determine.

Sec. 7. All acts and parts of acts inconsistent with the provisions of this act are hereby repealed; and no powers, rights, privileges, or advantages should be deemed to have been forfeited, waived or lost by reason of the non-compliance heretofore by said Company with any of the provisions of the act hereby amended.

Sec. 8. Marshal O. Roberts, Origen Vandenbergh, and William A. Whitbeck are hereby added to the directors of the said corporation, and the whole number of directors is hereby increased accordingly to 16.

Sec. 9. This act shall take effect immediately.

The officers of the Road as now constituted, consist of the following gentlemen: President, the Hon. William B. Ogden; Vice-President, Andrew H. Greene; Directors, W. Butler Duncan, George Griswold, James Boorman Johnston, William E. Dodge, Lewis B. Brown, Clarence S. Brown, George W. McLean, Henry Smith, Augustus Schell, William D. Bishop, Marshall O. Roberts, Origen Vandenbergh, William A. Whitbeck; Treasurer, Charles J. Canda; Secretary, James M. Coggeshall.

The Lakes and the Seaboard.

The stockholders of the Sandusky, Mansfield and Newark railroad have voted on the question of confirming the lease of that road to the Central Ohio (the latter having already leased the former to the Baltimore and Ohio railroad.) The stockholders present represented seventy-five per cent. of the original stock of the Sandusky, Mansfield and Newark railroad, and the vote upon confirming the lease was *unanimous*. This event is one which will prove in due time, of considerable importance to Detroit. It gives the Baltimore and Ohio road what that corporation has so long desired, an outlet to the shores of the great lakes, and opens up another direct channel of communication between the lakes and the seaboard. The following is a table of the distances by this channel:

Detroit to Sandusky, miles	75
Sandusky to Newark	116
Newark to Belair	104
Belair to Baltimore	375
Total	670

Notwithstanding the fact that Baltimore is located a considerable distance south of New York, it will be seen that we are actually a trifle nearer to the former, the distance between Detroit and New York via the New York and Erie, being 673 miles. Freight has already been received here from Baltimore via Sandusky in four days, and arrangements are now in progress which will insure its transmission in still better time.

The Baltimore and Ohio Railroad Company is an enterprising corporation, and its management is marked by consummate ability. Having leased a new route, it is the most reasonable thing in the world to expect that the company will use their best influence towards providing it with business. The entire route from the lakes to the seaboard is through one of the most interesting sections of the United States. Probably no other railroad line taps a region of greater agricultural and mineral wealth. Coal is so plentiful along the line of the Baltimore and Ohio railroad as to render the expenses of fuel lighter than those of any other road in the United States.

The rates of freight from Detroit to Baltimore are no higher than to New York, and so far as concerns some specialities of merchandise, a marked increase in the traffic of the new route is quite probable. A few years since, holders of large stocks of coffee in the New York bonded warehouses caused them to be transferred to Baltimore in consequence of the rates of transportation being lower from that city to the great western centres of trade than from New York.—*Detroit Post.*

☞ The following gentlemen have been elected directors of the New York and Harlem Railroad Company for the ensuing year: Cornelius Vanderbilt, William H. Vanderbilt, Horace F. Clark, Augustus Schell, W. C. Wetmore, A. B. Baylis, James H. Banker, John M. Tobin, John B. Dutcher, William A. Kissam, Oliver Charlick, Joseph Harker, Cornelius Vanderbilt, Jr. Cornelius Vanderbilt was re-elected President, William H. Vanderbilt, Vice President, Cornelius Vanderbilt, Jr., Treasurer, and Robert J. Niven, Secretary.

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *"Italics."* State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, May 29, 1869.

Stock Exchange and Money Market.

There has been a very ample offering of Money all the week to the leading borrowers, who have not been in as urgent need of aid, as the speculative dealings in Gold, Funds, and Stocks have been, as a rule, on a less extensive scale, particularly in Gold and Funds. The mercantile inquiry has been fairly active, but has been more promptly responded to and at rates more favorable to the borrowing interest. Call loans have been quoted at from 5@7, generally at 6@7; discounts, at 7@10, chiefly at 7@8 per cent. per annum, on prime names. The city banks have made a further addition of nearly 1⅜ millions to their legal tender reserve, and added a little to their deposit and specie averages. They have increased their loans about three-fourths of a million, and reduced their circulation some $50,000. They now hold over 57¾ millions of legal tender notes, against less than 48½ millions on the 3d of April. Their specie reserve is now 15½ millions, against less than 7⅞ millions on the 17th of April. Their deposits are up to 199½ millions, against 171½ millions seven weeks ago. They have enlarged their loan and discount average from 255½ millions on April 17th, to 270¼ millions on May 22d. Their circulation now stands at $33,927,386, against $34,816,916 on the 3d of April. The U. S. Sub Treasury has added over a million to its cash balances, and is yet gaining in this line. Washington advices state that the Treasury Department held on Monday a coin reserve of 114 millions including 23 millions to the credit of private depositors.

The specie reserve of the city banks according to the latest return is $15,429,404, against $20,476,947 same time last year. The city bank deposits are now $199,414,869, against $202,507,550 week ending May 23, 1868. The legal tender reserve amounts to $57,838,298, against $62,233,002 same time last year. The circulation now stands at $33,927,386, against $34,183,038 same time last year. The loans are now $270,275,952, against $267,381,279 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $131,457,975 a day, against a daily average of $143,453,480 the preceding week, and $150,195,763 the week ending with May 5, 1869. The current week's exchanges average about $135,672,000 a day. The city banks, last week, reported a gain of $54,635 of specie, $22,420 of deposits, and of $1,336,942 of legal tender notes. They increased their loans, $777,055; and reduced their circulation, $50,408.

The city bank exchanges on Wednesday were $128,705,448 and the resulting balances, $3,671,105.

National Bank notes to the amount of $215,070 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $315,023,131, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $15,157,376, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,865,755. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,807,800; and for the public deposits, $29,390,350—making a total of $372,198,150. The Treasury Department last week redeemed and destroyed $278,700 of worn and mutilated fractional currency, and issued $431,860 of new. The outstanding amount of fractional currency on the 1st of May, was $35,330,323, against $36,719,912 on the 1st of April, $36,781,548 on March 1, $35,511,127 on February 1, and $34,215,716 on the 1st of January. Washington advices state that the "reason for reducing the number of depositories of the public monies is, there are too many of them; about four hundred banks have been acting in that capacity. Only $13,000 are now on deposit in the banks of the cities of New York and Brooklyn combined, while yesterday securities to the amount $2,000,000 were in the hands of the Treasurer of the United States. The Bank of Commerce, however, has just withdrawn $500,000 of such securities."

The U. S. Sub-Treasury receipts, week ending with May 22, were $7,342,817, including $1,846,036 from customs duties; payments, $6,280,835, including $1,436,353 of coin interest; balance at the close of the week, $85,624,565, against $84,562,582 at the close of the preceding week,

showing an increase of $683,000. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $2,167,231, including $321,454 from customs; payments, $3,078,893, including $195,193 of coin interest. On Tuesday, receipts, $2,842,665, including $319,393 from customs and payments $1,649,503, including $107,613 of coin interest. The balance at the close of business on Tuesday stood at $85,897,063, against $84,886,237 a week previous; and $83,583,788 on May 12, 1869. The aggregate receipts of the office in April were $32,771,148, including $10,936,268 from customs, aggregate payments, $36,711,819, including $4,655,460 of coin interest.

The outstanding amount of coin certificates on the 1st of May, was $16,307,200, against $21,672,500, April 1, $28,775,560, March 1; $32,659,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $683,000, and retired $1,751,036 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during April, reached $1,625,580.

Government revenues have been unusually prolific in the line of excises, since our last, and have been up to a moderate average, in the yield of customs. The excises, last week, yielded about seven millions; customs at the port of New York, $1,846,036 and at the outports about $650,000 (in coin) more, making the grand total income for the week equal to about $10,485,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 140 millions, according to the latest Washington advices.

The Gold market has been less active, the speculative demand having been on a less confident basis, while the customs inquiry has been quite moderate, and the export drain, insignificant. The increase of a million in the weekly offerings of Government Gold has tended to depress the price, and check the call from operators for a rise. At the Sub Treasury, on Monday, the bids for the government gold reached an aggregate of $2,050,000, at from 141.90@142.32. The award of a million was made at from 142.01@142.32. Government held control of a coin reserve in the Treasury vaults on that day of some 114 millions, including about 23 millions to the credit of private depositors. The range of the price in the open market here through the week has been from 139¼ to 144¾, and the latest quotation on Wednesday was 139¾.

On Wednesday, the U. S. Sub-Treasury disbursed $184,864 of coin interest.

The following shows the average business at the Gold Exchange Bank, during the past week, average amount of loans and discounts, $1,492,412; average amount of specie, $758,373; average amount of deposits, $1,445,531.

The customs demand for Gold last week, averaged $307,673 a day; thus far, this week, it has averaged $320,423 a day, or equal to a weekly aggregate of $1,922,538. The arrivals of pecie from Europe, Havana and other foreign ports, during the week were $34,283, and since Jan. 1, $8,644,624, against $3,064,855 same time in 1868. The receipts from California, since our last, have been $590,868. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $113,298,867, against $103,111,621 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to May 8th, 1869, $2,604,267, against $2,877,866 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $18,971,567, against $32,014,844 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $13,043,277. The exports of specie, from this port, last week, were $232,258, against $3,947,637 same week last year; total, since July 1, 1868, $34,130,930, against $61,264,243 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,436,353; since July 1, 1868, $83,662,575, against $70,054,261 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to May 8, 1869, were $14,594,386, against $13,742,698 same time in 1868.

There has been an enlarged offering of bond and produce bills of foreign exchange, which has operated against the interests of drawers and rates have yielded a fraction, closing heavily, on a less confident demand. Bankers' prime sixty day bills on London closed on Wednesday at 108⅞@108¼, and on Paris to 5.25@5.16¼; sight bills on London to 109¾@110⅛, and on Paris to 5.16¼c.@5.13¾. The offering of produce bills has been liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,853,146, against $3,657,521 same week last year; total, since July 1, 1868, $150,649,906, against $165,096,474 same time in preceding fiscal year of 1867–'68.

Government securities have been less sought after by local purchasers, as well, as by foreign and home investment buyers, and having been rather more freely offered, have declined slightly. The principal holders, however, have not been eager to sell at the going rates, as they have been anticipating an early rally. The aggregate proposals to sell Five-twenties to the sub-treasury, on Wednesday were $3,356,000. The whole million taken was from Messrs. Jay Cooke & Co., including $635,000 registered 1862's at from 115.31 to 115.37; $40,000 registered at 1864's 115.38; $100,000 registered 1865's at 115.39; and $225,000 coupon 1866's at 115.46.

U. S. sixes of 1881 closed here on Wednesday at 120¾@121; U. S. Five-twenties of 1862, ex-coupon, 121⅛@121¼; U.S. Five twenties of 1864 at 115¾@115⅞; U. S. Five-twenties of 1865 at 117⅜@117⅝; U. S. Five-twenties of 1865, consolidated, 118⅝@118¾; U. S. Five-twenties of 1867, 118¾@118⅞; U. S. Five-twenties of 1868, 118⅜@118⅞; U. S. Ten-forties at 108½@108¾; U. S. Six per cent. currency bonds, 106⅛@106½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 12.	May 19.	May 26.
Consols	92⅝@⅞	92⅝	93¾
U.S. 5-20's of 1862	79	78½	79½
Erie	20½	19½	19
Ill. Central	96	96	95¼
Atl. and Gt. Western.	....	....	25¼

Railway and miscellaneous share property has been generally in lively demand; but prices have fluctuated widely, closing heavily and irregularly on Wednesday.

The general markets have been fairly active for domestic produce, but at variable and generally less satisfactory prices. Middling upland cotton closed heavily on Wednesday at 28½@28¾ cts. per lb. The stock of cotton now here is estimated at about 71,000 bales. The receipts at the port this week, have averaged about 1,300 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,195,500 bales, against 2,223,000 bales same time in 1867–8; exports, same time 1,319,000 bales, against 1,607,000 bales same time in 1867–'8; stock on hand at latest dates, 218,000 bales, against 159,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 9,705 pkgs., against 10,643 pkgs., same time last year. From Boston, 3,676 pkgs., against 5,447 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been in better supply, closing dull and heavy, at from 10@16½c., per lb.; week's receipts, 6,795. Milch cows, quiet at from $40@$110 each, receipts, 64. Veal calves, in moderate request at from 6@11½c. per lb.; receipts, 4,126. Sheep and lambs, dull at 4½@8c., per lb.,; receipts, 19,020. Swine, quiet and weak at from 10@10½c. per lb.,; receipts, 20,361.

Foreign merchandise has been in less request and quoted less firm as a rule. The total imports of foreign dry goods, last week, were $1,612,207, and the total amount marketed $1,553,950. The value of foreign merchandise imported last week, was $5,461,883—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $7,074,090, against $3,469,371 same week last year; total since July 1, 1868, $261,359,459, against $215,472,694 in 1867–'8. Freights have been more active, and firmer. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 6d.@1s. 9d. by steamer, per bbl.; grain at 5d.@5¾ by sail, and 6d.@6½d. by steamer, per bushel; cotton at ⅛d.@$\frac{5}{32}$d by sail, and $\frac{3}{16}$d.@¼d. by steamer, per lb.; and heavy goods 12s.6d.@25s. by sail, and 17s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 504.

The New York exports, exclusive of specie, for the week ending May 25, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,657,521	$3,853,146
Prev. reported	69,148,245	64,064,594
Since January 1	$72,805,766	$67,917,740

The imports for the week ending May 22, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,135,908	$1,612,207
Gen. merchandise	2,333,463	5,461,883
Total for the week	$3,469,371	$8,074,090
Previously reported	91,453,654	121,758,699
Since January 1	$94,923,025	$128,832,789

The balance in the Sub-Treasury on Wednesday was $79,565,108 13.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Union Pacific Railroad.

At a meeting of the stockholders of this company in Boston on the 25th inst., the following gentlemen were elected directors for the ensuing year: Oliver Ames of Massachusetts, Benjamin E. Bates of Massachusetts, Sidney Dillon of New York, John Duff of Massachusetts, Cyrus H. Mc Cormick of New York, William T. Glidden of Massachusetts, Rowland G. Hazard of Rhode Island, F. Gordon Dexter of Massachusetts, Charles A. Lambard of New York, Elisha Atkins of Massachusetts, Cornelius S. Bushnell of Connecticut, Frederick Nickerson of Massachusetts, Ezra H. Baker of Massachusetts, O. S. Chapman of Massachusetts, Greenville M. Dodge of Iowa. At a meeting of the directors on the 26th inst., the following officers were chosen: Oliver Ames of Massachusetts, President; John Duff of Massachusetts, Vice President; John M. S. Williams, of Massachusetts, Treasurer; E. H. Rollins of New Hampshire, Secretary and Assistant Treasurer.

N. O. Opelousas and Gt. Western Railroad.

This road was sold at public auction, in New Orleans on the 25th inst., by virtue of an order from the United States Circuit Court. The principal interests represented were the Illinois Central Railroad, the Mobile and Chattanooga Railroad, the bondholders of the road, and Charles Morgan. The first bid was $1,000,000; the next $1,500,000. The bids then proceeded by hundreds of thousands to $2,000,000 which was bid by Paul Blanc on behalf of the bondholders of the road, to which amount he was limited. C. A. Whiting, representing Charles Morgan, bid $2,050,000, at which amount it was knocked down after a moment's pause, and $75,000 immediately paid as a guarantee. Mr. Whitney announced that it was the intention of Mr. Morgan, who was present in person, to set immediately about extending the road to the Sabine. The actual sale occupied barely ten minutes.

Hanover (Pa.) Branch Railroad.

The seventeenth annual report of the Hanover Branch Railroad Company is published. From it we learn that the earnings of the Hanover Branch proper last year amounted to $62,061 35; to which add for working Gettysburg Railroad $12,599 60, and for working Littlestown Railroad $2,298 92; making a total of $76,659 81, being an increase of $6,364 69 over last year, due mainly to the iron ore trade. The operating expenses, and expenditures for maintenance of road, motive power and cars, have been $43,113 20, about 56 per cent. of the gross receipts, leaving as ne earnings $33,546 79.

☞ A dispatch dated Allentown, Pa., May 22, says Robt. H. Sayre, of the Lehigh Valley R. R. Co., with a number of prominent iron manufacturers, are making preparations for a trip to England for the purpose of studying the process of manufacturing steel rails. They sail on the 22d of June. On their return they will establish a manufactory of this kind at Bethlehem, the construction of which has already begun.

☞ The auditors of the several counties of Ohio through which the Central Ohio Railroad runs, have fixed the valuation of the track, roadbed and rolling stock of the road at $1,600,000, the same valuation as fixed last year. The Pittsburg, Cincinnati and St. Louis railway was assessed at $2,000,000.

☞ The Erie Railway Company has leased the Southern Central of New York, which extends from Owego, a station on the Erie, to Little Sodus Bay, Lake Ontario, fourteen miles westerly of Owego. It is expected that the road will be completed during the present year.

☞ The first ground of the Utah Central Railroad was broken near Weber river, immediately below Ogden City, on the 17th inst. It is expected that the road will be completed to Salt Lake City by October next.

☞ The receipts of the European and North American railway in April 1869, were $12,379 46; in April 1868, $10,434 68—an increase of $1,944 78.

Journal of Railroad Law.

WHEN LIABILITY OF COMMON CARRIERS CEASES AND THAT OF WHARFINGERS BEGINS—PUBLIC POLICY—USAGE BETWEEN CONTRACTING PARTIES—WHEN NOTICE TO CONSIGNEE IS EXCUSED.

The very recent action of Ely *vs.* The New Haven Steamboat Co. just decided, as yet unreported, will be found to beof uncommon interest. The action was brought against the defendants, as common carriers, to recover for the loss of certain leather received by them for transportation from New Haven to New York. The plaintiffs were the agents of the tanneries of Homer Ely and Cotton Ely, of Ashleyville, Massachusetts, the consignors of the property, and sued as their assignees. The leather was delivered at Springfield, Mass., to the Hartford and New Haven Railroad Company, and by that Company delivered at New Haven, on the 3d July, 1866, to defendants' steamer *Continental*, which arrived at her pier in New York at her usual hour early in the morning of July 4. The cargo of the vessel, including this leather, was all put on the wharf by 8 o'clock, A. M., ready to be taken away by the various consignees, and persons were in attendance during the day to make deliveries of goods. No one called for the leather, and about 2 A. M., of July 5, an accidental fire destroyed the cargo left upon the pier. The leather was marked and addressed, "H. G. Ely & Sanger, No. 2 Jacob street, New York." There was no bill of lading or shipping receipt given. The plaintiffs had been in the habit of receiving leather from these tanneries by defendants' line, for some years, as often as once a week, and generally received from the consignors advices by mail of the shipments. The letters advising of the shipments in question were mailed at Ashleyville, where the consignors resided, instead of Springfield, where the goods were put on the cars, and did not reach plaintiffs till after the fire. The plaintiffs kept a cartman, who was in the habit of calling at the pier of defendants, and taking away the leather when it arrived, but he was not on duty at all on the 4th of July. There was some discrepancy in the evidence as to the practice of notifying the consignees, the plaintiff claiming that the defendants had always sent notice of the arrival of goods, and that he then sent his cartman for them; while the defendants claimed that notices were not sent to parties in New York who were in the habit of sending for their goods except sometimes at the request of the cartmen and for their convenience, and these notices, when given, were given by Low & Roberts, licensed cartmen in New York, who had an office on defendants' pier, and who, on the arrival of the boats, received the whole freight list, assorted the cargo and carted such of it as was addressed to parties in the city not in the habit of sending for their goods. Such as was to go to some connecting line they carted, unless it was addressed to the care of other cartmen. Upon these facts the defendants moved to dismiss the complaint, on the ground that their extrordinary liability as carriers had ceased at the time of the fire, and that no negligence had been shown. The court so held, and the complaint was dismissed and judgment rendered for the defendants, from which the plaintiffs appealed to the General Term, where, after argument, the following opinion was delivered by Justice GILBERT:

is apparent that the circumstances in which the harsh and rigid rules of the common law governing the liability of common carriers had their origin have greatly changed, and that some amelioration of these rules has became necessary since the introduction of steamboats, railroads and the electric telegraph. Courts have not been unmindful of this necessity, and have gradually modified these rules in accordance with the views of public policy and individual right. The precise nature and extent of this modification, however, is still very uncertain, and it would be a fruitless task to attempt to reconcile the conflicting decisions on this subject. If it were necessary, we should be inclined to hold that, independently of the usage proved in this case, the extraordinary liability of the defendants, as common carriers, ceased when the goods were landed on the wharf and were ready for delivery; that henceforth they were liable only for ordinary care, and that the law does not require from the class of carrriers to which the defendants belong a notice to consignees of the arrival of the goods carried. Such rule we think best accords with sound public policy, and with the intention of the parties in making the contract, and it is sustained by the more judicious of the recent decisions of the courts on this subject. (Norway Plains Co. *vs.* Boston, &c., R. R. Co., 1 Gray, 263; Thomas *vs.* The Same, 10 Met. 472; Lamb *vs.* West. R. R. Co., 1 Allen, 98; Northrop *vs.* Syracuse, &c., R. R. Co., Court of Appeals, March 1867.) But we are of opinion that the evidence clearly establishes a course of business between the parties, in relation to the mode of delivering goods, which must govern the liability of defendants in this case. The plaintiffs had been accustomed for many years to receive goods by the defendants' boats, as often as once a week. These boats arrived in New York each day at stated hours, morning and evening. Upon the arrival of the boat each trip the goods were landed on the defendants' wharf, and placed in charge of trustworthy persons employed by them to take care of and deliver the goods to the consignees and collect the freight. The plaintiffs always sent their own cartman to the wharf for their goods soon after the arrival of the boat, and there received them from the persons so employed by the defendants. A delivery upon the wharf, therefore, in the usual way, and the lapse of a reasonable time for the plaintiffs to take away or reject the goods, terminated the extraordinary liability of the defendants as common carriers, for the reason that their contract had been performed by a carriage of the goods safely to the point of ultimate destination, and a delivery thereof at the appointed place of delivery. After these acts the defendants must be deemed to have renounced their liability as carriers and assumed that of wharfingers, and they could be held liable only for actual negligence. Hyde *vs.* Trent, Nav. Co., 5 T. R. 397, per Buller, J; Gatliffe *vs.* Bowne, 4 Bing., N. C., 314, S. C.; 1 Scott N. R. 1, and 8 *id*, 604; Abb. on shipping, 5 A. M., Ed. 463; Gibson *vs.* Culver, 17 Wend, 305; Gould *vs.* Chapin, 20 N. Y. R. 259, per Strong, J.; Hathorn *vs.* Ely, 28 *id*. 78.) It is not contended by the plaintiffs that there was any negligence on the part of defendants. It is, however, urged by the learned counsel for the plaintiffs, that the defendants' liability as common carriers continued until after the loss of the goods, because, according to the course of business referred to, a notice should have been given to the plaintiffs of the arrival of the goods. As before intimated, where the contract in terms, or as affected by the usage of trade, is to deliver the goods at the wharf, notice is not necessary. It is not itself an act of delivery, or equivalent, or even a kin to it. It is a substitute for it, arbitrarily created. There was, perhaps, enough evidence that the duty of sending a notice to the plaintiffs' store of the arrival of their goods formed a part of the usage in this case, to require the submission of that question to the jury, if it had been material to the determination of the case. But we are of opinion that if the fact were so, the plaintiffs' store having been closed the whole of the day on which the goods arrived, and until after the goods had been destroyed, the defendants were excused from giving the notice. Absence of the consignee dispenses with notice. (Fisk *vs.* Newton, 1 Den. 45; Northrup *vs.* Syracuse Railroad Company, Supra.) The defendants were under no obligation to go beyond the usage alleged, and seek the plaintiffs elsewhere than at there store. The 4th of July was not a holiday in any sense which affects this case. The judgment should be affirmed.

Memphis and Little Rock Railroad.

EXTRACT FROM THE REPORT OF THE DIRECTORS.

It is to be regretted that your Board cannot report much progress in the work of constructing this road since the last annual meeting. That want of progress is attributable to causes which were not within the control of the Board of Directors. The want of money and credit had compelled the Board, in its eagerness to push the work ahead, to accept propositions from parties who have failed to comply with their undertakings. Notwithstanding all these difficulties and delays, the Board has the gratification to announce a great improvement of the credit and general confidence in the enterprise. The bonds of the company have advanced about one hundred per cent. in value within the past twelve months, and are becoming quite a favorite security among many shrewd capitalists who have taken the pains to inform themselves of the value and reliability of these securities. The day is not distant when the bonds of the Memphis and Little Rock Railroad will rank as a first-class security in any market of this country.

The Western Division of the road, from Little Rock to Duvall's Bluff, on the west bank of White River, a distance of 47 miles, is complete in all its departments, and operated regularly, and, as shown by the Superintendent's report, profitably. It will be seen, by reference to that report, that the net earnings of that division amount to $47,-310 14, or a little more than one thousand dollars per mile of road. The Middle Division of the road, extending from White river to the St. Francis, remains very nearly in the condition it was at the last annual report. The Eastern Division of the road has been so far repaired, from the St. Francis to the Mississippi River, as to be safely operated, and is now earning satisfactory profits. The work of repair of this division is still progressing and will soon be complete.

The debt due Geo. Peabody & Co., which has hung like an incubus upon the company since the termination of our civil war, has been satisfactorily arranged since your last annual meeting, and the company is now comparatively free from due debt, with a better credit than it has ever had.

A contract has been entered into with a competent and reliable bridge builder to erect a good and substantial Howe truss bridge across the St. Francis River, at Madison, which is to be completed on or before the 15th day of January, 1869. Iron has been purchased, and has already been delivered at Hopefield for the extension of the road from Madison to Forrest City, a distance of five miles.

The law of the State of Arkansas, passed at the last session of the Legislature, granting a subsidy of ten thousand dollars per mile, by a loan of the bonds of the State to this company, has recently been ratified by a vote of the people of the State, and your company is now entitled to receive these bonds to the amount of ten thousand dollars per mile for each mile of your finished road, and also for all that is graded and ready for the iron, and will be entitled to a like amount for the remainder of the road as fast as graded and prepared for the iron rails. With these advantages there is no reason to entertain a doubt that the road will be completed from Memphis to Little Rock during the year 1869.

The work done on the Eastern division by Mr. E. Denmead, under his contracts of July 25, 1867, and January 27, 1868, has been as follows: Cross ties furnished, 51,221; track relaid, 31 79-100 miles; track repaired, 3 481-1000 miles; trestlework rebuilt, 1392 lineal feet; open drains repaired, 1013 lineal feet; cost of this work, $54,720 12.

The eastern terminus of the division is at a point on the Mississippi River, three fourths of a mile north of Hopefield. The water here is deep at all stages of the river, and the company have a wharf boat moored adjacent to an inclined plane laid down the slope of the river bank, by which means freight can be conveniently transferred from the boat to the cars.

The superstructure of the St. Francis River bridge has been contracted for, to be finished by January 15, 1869. The abutments and piers of this bridge are built of brick, and, though injured by the fire which destroyed the bridge superstructure during the war, they can be repaired without great difficulty. The bridge will be 665 feet long, including a pivot drawbridge 200 feet long.

The submerging of about 35 miles of the Eastern Division by the overflow of the Mississippi River into the St. Francis bottom, and the consequent entire suspension of the working of this part of the road at such times, for a period of six or eight weeks, are two of the most serious difficulties with which the company have to contend. A very general misapprehension, among the friends of the road, in regard to the means of protection against overflow, designed to be adopted, makes it proper to allude to the subject again, in addition to what was said in the last annual report.

The reclaiming of the St. Francis bottom, and, with this, the protection of the Memphis and Little Rock Railroad from the great overflows of the Mississippi River, are proposed to be effected by the construction of a levee railroad from a point on the St. Louis and Iron Mountain Railroad extension, about 18 miles west of Cape Girardeau, to the highlands near Helena, Arkansas. This is the project of the Memphis and St. Louis Railroad Company. They have a liberal charter from the State of Arkansas to build a road from Memphis to the Arkansas and Missouri State line, and a bill is pending before Congress giving them extended powers, and authorizing an endorsement, by Government, of the company's bonds, to the amount of $20,000 per mile. This bill has passed two readings in the Lower House, and has been unanimously recommended by the committee to whom it was referred for final passage. The friends of the measure are confident of its success.

The examinations of the levees of the Mississippi River (alluded to in our last report), made by Gen. A. A. Humphreys, Chief of Engineers U. S. A., under the direction of the War Department, and detailed in his letter to the Secretary of War, of May 31, 1866, point out precisely the breaks and gaps in the levees between Cape Girardeau and Memphis, through which the streams of overflow pass into the St. Francis bottom, and make known the deficiencies of the levees from Hopefield, apposite Memphis, to Helena. In Missouri the principal stream of overflow into the St. Francis bottom runs out between Cape Girardeau and Commerce. In Arkansas there are only ten gaps and breaks from the Missouri line to Hopefield, of which only two are very wide. It is through these openings that the vast volumes of water are discharged into the St. Francis bottom, which submerge the country; for the district south of the Memphis and Little Rock Railroad is not so much injured by overflow from the river in front of it as by the great northern floods conveyed into the bottom through the openings north of Memphis.

The water from all these gaps and breaks will be shut out of the bottom by the embankments of the proposed levee railroad from Cape Girardeau to Helena, and this fine country, with all its roads of every description, will be protected and opened to settlement and cultivation. This mode of protecting our road is preferred to the plan of raising the road bed above flood mark upon trestlework, and upon embankments higher than those built, inasmuch as the embankments of the levee road will not only protect us, but will at the same time reclaim the whole St. Francis valley for cultivation and settlement, and thus create, in future, a great local business.

The earth work required on the first twelve miles of the Middle Division was nearly completed by Messrs. Forrest and McCreanor. The contract made on the 1st of October, 1867, with Willis Gaylord, Esq., for the completion of the Middle Division, required the work to be commenced in in November, 1867, and to be completed by October 1, 1869. More than one half of the time stipulated has elapsed, and but little more than one per cent. of the earthwork has been done.

From what has been said above, it will be seen that the work now remaining to be done on the Middle Division is not materially less than was shown in the statement of the last year's report. The estimate of last year was based on prices payable in bonds, rated at 80 cents in the dollar; a revision of that estimate, however, at present cash prices, will reduce the estimated total cost of the work yet to be done from $1,235,089 to $925 870.

Mr. Denmead's work on the Western Division comprised the renewal of 21,547 cross-ties, rebuilding 1848 lineal feet of trestlework, and the repair of 1403 lineal feet of open drains, at a cost of $39,470 78. The trestle bridges on this portion of the road have been renewed, and parties are at work putting 10,000 new ties in the track. The road is operated carefully, and with safety and regularity.

The road, after struggling for many years through great difficulties, has at last gained the attention of the public. The rails have been laid on 86 miles of main track, and on 3 miles of sidings, over which trains are running regularly, and the earthwork has been done on 12 of the remaining 46 miles of the road. Much interest is, therefore, now felt in its completion and future business.

The country immediately along the line is too sparsely populated to justify us in anticipating a large local business upon the opening of the road. Madison and Duvall's Bluff, however, will certainly be important receiving and distributing depots for the upper St. Francis and upper White River regions. Wittsburg, Jonesboro, Pocahontas, Batesville, Jacksonport, Augusta, Des Arc and Clardendon are growing towns, situated on these rivers, and the produce and travel sent thence over the road will be considerable. In like manner Forrest City and Cache depots will receive the produce and distribute the supplies of the rich and well settled districts bordering Crowley's Ridge, and lying between White and Cache rivers, respectively.

But we may justly expect a large and valuable through business as soon as Little Rock—a growing city of 8,000 inhabitants—shall be connected with Memphis by daily freight and passenger trains. Here will be the centre of a vast business growing out of the wants of the people of the fertile country composing Western Arkansas and the Indian territory. That the travel will be considerable cannot be doubted, when it is considered that the road will be the only reliable regular means of communicating with the East, for such towns as Little Rock, Lewisburg, Dardanelle, Ozark, Clarksville, Van Buren, Fayetteville, Fort Smith, Washington, Arkadelphia, Camden and Hot Springs.

The line of roads from Memphis *via* Little Rock to Fort Smith will intercept every herd of cattle driven from the immense grazing districts of Texas to market in the States north of the Ohio River, and the drover's interest will induce him to send forward his cattle by rail, rather than to continue the long and exhausting journey to the Mississippi River on foot. One hundred thousand cattle transported annually from Little Rock to Memphis will alone pay a good per centage on the entire cost of the road.

The travel already directed to that wonderful collection of curative waters—the Hot Springs, of Arkansas, situated 60 miles southwest of Little Rock—would furnish no inconsiderable revenue to the road, were it in daily operation from Memphis to Little Rock. What this travel is destined to become when the improvements projected by capitalists shall be made at the Springs for the accommodation of invalids resorting to these waters, can now scarcely be foreseen.

It is clear that this region will soon be penetrated by St. Louis, through the Southwestern Pacific Read, and by Chicago, through the Cairo and Fulton road, and that if Memphis would establish a paramount, and an invaluable influence in this inviting field of enterprise, it must be done by the speedy completion of the Memphis and Little Rock Road.

Pacific Railroad Equipment.

The number of locomotives, cars, etc., required for the operation of this road will be very great, and a small army of men will find employment in constructing, repairing and running them. Some idea of the extent of these appurtenances may be obtained from the number already in use by the Central Pacific, or California branch of the great road. The company employ at their workshops in Sacramento alone about one thousand men, in making and repairing rolling stock. They have now running 150 locomotives, 1,400 platform cars, 360 box cars, 17 mail and baggage cars, 123 hand cars, 53 track cars, 101 section cars, and 14 passenger cars, to which numbers large additions are made every week. All, except the locomotives, were made by the company. Their sleeping cars will come from the East, and will be kept on those sections where night traveling is done. In the morning the passengers will go back to the day cars, and the sleeping car will be dropped, to be picked up by the next train traveling at night in the opposite direction. The road, for convenience in working, is divided into several divisions, each of which will have one or more engine houses and repair shops.

☞ The Toledo, Wabash and Western Railroad Company have notified the Stock Exchange, that in consequence of their consolidation some months since with the Decatur (Illinois) and St. Louis road, their common capital is to be increased $1,612,500 on this account, and also $2,387,500 for new construction, equipment and grain elevators, (the latter at Toledo,) so that the capital, exclusive of a small amount of original preferred stock, is to be increased to $9,500,000.

☞ Dr. Hovey, of Dallas County, Mo., has been elected President of the Fort Scott and Laclede Railroad. This road will be 120 miles in length, commencing at Fort Scott, Kansas, and running directly east, passing through the counties of Vernon, Cedar, Polk, Dallas and into Laclede. The estimated cost, including rolling stock, is $3,000,000.

New York and New Haven Railroad.

The annual meeting of the stockholders of this company was held in New Haven on the 20th inst., for the purpose of electing a Board of Directors for the ensuing year. The attendance represented 53,127 shares of stock, a little over half the entire amount. One share of the new stock was allotted to each two shares of the old stock. While the vote was being counted, Gen. Phelps of Litchfield County alluded to the defalcation of the former Treasurer, and desired to know what the prospects were of obtaining any of the $88,000 due to the Company. Mr. Bishop, President, replied that the matter was now before a referee, and before the sureties could be called upon, the efforts to obtain it from Mr. Bement or his effects must be exhausted. Gen. Phelps thought that if the Auditor would vouch for the correctness of the accounts kept by Bement when there was in fact a deficiency of over $80,000, there might be a similar leakage hereafter. President Bishop in reply stated that a financial committee now examined the accounts of the Treasurer once in each month, and the auditor once in six months. Mr. White, the auditor, in response to some remarks relative to the defalcation, stated that he had not examined the amount of cash on hand, nor had the auditing of the accounts been made on the 30th of March, the close of the fiscal year. After some discussion as to the propriety of requiring the Board, or a committee thereof, to conduct the auditing of the Treasurer's accounts on motion of Mr. Howe, it was voted to authorize Mr. White to audit the accounts of the Treasurer, and examine the elements of cash in his hands. Mr. Bishop said, in reference to detecting defalcations, that every railroad man in the country knew that if they had a scoundrel in their employ he would develop his rascality, however closely watched. His remedy is to get good men to fill the different positions of trust, and then keep them there.

The result of the election was then announced, to the effect that 53,127 votes had been unanimously cast for the present incumbents as follows: William D. Bishop, of Bridgeport, George B. Cabart, George N. Miller, Abraham R. Van Nest, James J. Roosevelt, and Wilson G. Hunt, of New York; William W. Boardman, and Ezekiel H. Trowbridge, of New Haven; Jonathan Godfrey, of Southport; Nathan A. Baldwin, of Milford. The meeting then adjourned to the third Thursday of May, 1870.

☞ The Delaware, Lackawanna and Western Railroad Company have in contemplation the cutting of another tunnel through Bergen Hill for their road, instead of using the Erie tunnels as at present. The Paterson *Press* says surveys have been made for running their road (Morris and Essex Division) to Hackensack River in a straight line across the Erie track, entering the Hill at a point two or three hundred yards north of the present tunnel, coming out on the east side at the Hundred Steps. The route proposed is a straight line from the Hackensack River to Hoboken, saving two or three miles in distance.

☞ The Detroit *Tribune* says the programme of operations of the Lake Survey Corps for the season of 1869 has just been completed, and the work, with the exception of the river gauging by Assistant D. F. Henry, will be carried on entirely in Lake Superior. Operations, as usual, will be under the general charge of General W. F. Raynolds, and Lieutenant J. F. Gregory, of the Engineer Corps, will have the immediate direction of the parties.

Bridge over the Ohio River at Paducah.

The following is a copy of the joint resolution adopted by Congress, authorizing the building of a Railroad Bridge over the Ohio River at Paducah, Kentucky.

Be it resolved, etc., That the consent of Congress be, and the same is hereby, given to the erection of a railroad bridge over the Ohio River from the city of Paducah, Kentucky, to the State of Illinois, by the Paducah and Gulf Railroad Company and such others as may associate with them for that purpose under the laws of the States of Kentucky and Illinois: *Provided*, That said bridge is built with an unbroken or continuous span of not less than four hundred feet in the clear, from pier to pier, over the main channel of the river, and is built in all other respects in accordance with the conditions and limitations of an act entitled "An act to establish certain post roads," approved July fourteenth, eighteen hundred and sixty-two; that said bridge, when completed in the manner specified in this resolution, shall be deemed and taken to be a legal structure, and shall be a post road for the transmission of the mails of the United States; but Congress reserves the right to withdraw the assent hereby given in case the free navigation of said river shall at any time be substantially and materially obstructed by any bridge to be erected under the authority of this resolution, or to direct the necessary modifications and alterations of said bridge.

Approved April 7, 1869.

The Directors Bill.

The following is a copy of "An Act amending an act in relation to the Erie, New York Central, Hudson River, and Harlem Railway Companies," passed at the recent session of the New York State Legislature, and signed by the Governor on the 20th inst.:

SECTION 1. Section three of the act entitled "An act in relation to the Erie, New York Central, Hudson River, and Harlem Railway Companies," passed April 21, 1868, is hereby amended so as to read as follows: No stockholder, director, or officer on either the New York Central Railroad Company, the Hudson River Railroad Company, or the Harlem Railroad Company, shall be a director or officer of the Erie Railway Company; and no stockholder, director, or officer of the latter company shall be a director or officer of either of the three first named companies. The Board of Directors in each of the said companies shall so classify the members of such Board, by lot or otherwise, that, as nearly as may be, one-fifth of their number shall go out of office at each annual election; and at the next election of directors in each of the said companies, directors shall be voted for only in place of those whose term shall then expire under the classification aforesaid.

The Central Scrip Bill.

The following is a copy of "An Act authorizing the increase of the stock of the New York Central Railroad Company," passed at the recent session of the New York Legislature, and signed by the Governor on the 20th inst.:

SEC. 1. The New York Central Railroad Company is hereby authorized, with the concurrence of two-thirds in amount of all its stockholders, procured in the mode provided for by section nine of the act entitled "An Act to authorize the formation of railroad corporations and to regulate the same," passed April 2, 1850, to increase its capital stock to the amount of 80 per cent. of its present capital.

SEC. 2. The increase of capital stock authorized by the first section of this act shall be used only in exchanging the same for the interest certificates of said company authorized by the directors of said company at their meeting held Dec. 19, 1868.

SEC. 3. This act shall take effect immediately.

Queenstown and Harrington Railroad.

The Denton (Md.) *Union* says that a meeting of the directors of this company was held at Ridgely on the 14th of May; that two extensive capitalists of Pennsylvania have undertaken to construct the road on terms accepted by the company; that the engineers are already upon the route, and that the work is to go ahead; and then adds:

The importance of this route we have repeatedly ventilated. The Peninsula must be spanned by a road of iron. The bays must be united by the agency of steam. Annapolis and the Breakwater are too near together; their geographical relationship and the interests dependent thereupon are too important to permit them to remain much longer strangers to each other. A pleasant and cheap route from New York to Washington; a rapid transit for the great caravans of Western immigration; a direct route for the transportation of coal from the great coal fields of Maryland to its market in the East; a convenient and economical mode of shipment for our fruits; a direct intercommunication between the Peninsula and Baltimore; a short summer route from Baltimore to Cape May; a convenient connection between Baltimore and the fine harbor of the Breakwater; these and other advantages combine to render this route one of the important short routes in the Union. We think that under proper management it must be a success.

Atlantic Cable Messages.

On the 1st of June the tariff on Atlantic cable messages will be reduced from £3 7s. 6d. for 10 words, and 6s. 9d. for each additional word, to £2 for 10 words, charging for address and signature, and 4s. for each additional word; an important reduction will also be made for newspaper press messages, and all political and general news will be conveyed from either side of the Atlantic at half rates, which will practically reduce press messages from 6s. 9d. to 2s. a word. The Company mention:

"It will be remembered that the Anglo-American Telegraph Company started on the 28th of July, 1866, less than three years ago, with a tariff of £20 a message, producing an average of 29 messages a day, and yielding £505. On the 1st of November following, after three months trial of the £20 tariff, the price was reduced to £10, and under it the daily average number of messages was increased to 64, and the average amount earned per day £579. The tariff was maintained until the daily average amount earned under it exceeded that under the £20 tariff, and on the 1st of December, 1867, the Directors seeing the benefits derived from the reduction to £10, again reduced the price of messages to £5 5s., and this sum was charged until the 31st of August, 1868, exactly nine months, and the number of messages received under it more than doubled the number received under the £10 tariff, and increased the daily earnings to £635. The price of messages was again reduced on the 1st of September last to £3 7s. 6d., when the average number of messages increased to 216 a day, and the earnings to £645, or £10 a day higher than the sum earned under the £5 5s. tariff."—*Herapath.*

☞ We stated a short time since that the drawings and plans for the bridges over the Schuylkill River at Fairmount and at South street, Philadelphia, had been completed. We learn that the 1st premium for the plan of the Bridge at Fairmount was awarded to J. H. Linville; the 2d to J. W. Murphy; and the 3d to Charles E. Lyon.

☞ The Hartford and New Haven Haven Railroad Company has secured Legislative authority to increase its capital stock three millions of dollars by the issue of new stock. It is stated that a million and a half will be expended in repairs, and over a million in taking up outstanding bonds.

Railroad Survey in New Brunswick.

The Moncton (N. B.) *Times* says that Mr. Crowsdale, C. E., assisted by Messrs. McCready of Sussex and W. L. Nixon of Ontario, have commenced an exploratory survey of the country between Moncton and the Richibucto River. They will probably be met by a party from Miramichi under charge of Mr. Buck. At the same time Mr. McLeod will survey the proposed route from Richibucto to Shediac, passing as closely to Richibucto as possible. It may be hoped that these surveys will demonstrate clearly the most suitable route for the road, and that such route will be adopted.

☞ We learn from Ottawa that Mr. Dawson's report on the Red river route has been laid before the Department of Public Works. He recommends the opening of communication at once between Lake Superior and the Red river settlement, in such a way as would admit of the route being immediately used and then to proceed with further works until a first class line of communication be completed. The cost of the preliminary line to be about $250,000, and the probable ultimate cost of the railroad and continuous navigation about $5,800.000.

☞ E. N. Winslow, Esq., superintendent of the Cape Cod Railroad, has applied to one of the cars on that road an invention of his own, for the protection of passengers against dust and cinders. It is attached to the window on the outside of the car, forming an angle of about forty-five degrees from the side of the window; thus the cinders and sand striking, are thrown one side, on the same principle as snow on a snow-plough. On the train's going in reverse direction, the protection is shifted to the opposite side of the window by means of a lever.

☞ The Winchester (Va.) *Times* says: "It is understood that both corps of engineers engaged in running experimental lines for the Alexandria, Loudoun and Hampshire railroad across the Blue Ridge have completed their work and submitted their reports. It is said that Snicker's Gap has been selected as the point of crossing, though this is perhaps not fully settled. We understand that the citizens of the upper part of Loudoun are taking active measures to secure material aid for the prosecution of the road westward.

☞ The Harrisburg Car Manufacturing Company is now doing an immense business. Over five hundred and thirty names are on the pay rolls, and the establishment is turning out eight cars a day, or at the rate of about 2,500 cars a year. This is not all: the business of the company is increasing so rapidly that there is serious talk on the part of the managers of increasing the capacity of the shop, so that in a few days twelve cars a day can be run out fully ready for any railroad company's use.

☞ The Snow Hill (Md.) *Shield* says that at a meeting of the corporators of the Worcester Railroad at that place on the 18th inst., T. D. Purnell, treasurer, reported a subscription of $57,000 to the stock, and $5,010 of the installment paid in, whereupon it was resolved that a meeting of stockholders be called to assemble in Snow Hill, on Tuesday, the 1st of June next, for the purpose of organizing and electing officers.

☞ The Northern Central Railway Company have lately been adding to their rolling stock. Within a year [illegible] sand cars have been built, and several [illegible]e now being built for the road.

WHIP.
PATENT CARR SEAT.

The undersigned respectfully notify managers of railroads and others, that they will promptly prosecute all infringements of the above patent.

Having been informed that one Carr has been manufacturing this seat, and that he is offering it for sale to railroad companies, we hereby notify them that said Carr has no authority from us to manufacture or sell these seats, and all purchasers from him or any person, not an authorized agent of this Company will be prosecuted to the full extent of the law.

IS PROVISIONALLY LOCATED AT
5t21 **23 BROAD STREET.**

Blue Ridge Railroad.

THE attention of Contractors is invited to the work of completing the Blue Ridge Railroad, in South Carolina, from Anderson, South Carolina, to Knoxville, Tennessee—a distance of one hundred and fifty-two miles to build.

The Executive Committee of the Board of Directors is prepared to enter into negotiations with responsible persons, who may desire to undertake the work.

Payments will be made in first mortgage (7) per cent. currency bonds of the company, secured by the guarantee of the State of South Carolina, for the punctual payment of both principal and interest. The mortgage covers unencumbered property of the company, which cost three and a quarter millions of dollars in gold, and embraces fifty miles of road complete and in running order.

Detailed Estimates, Plans, Profiles and Specifications, will be ready for inspection by JUNE 1, 1869. Meanwhile, approximate quantities and other information concerning the work may be obtained by application to Col. James P. Low, the Chief Engineer of the Company, or to the undersigned, at Columbia, South Carolina.

R. K. SCOTT,
5t18 Chairman of Executive Committee.

To Railroad Contractors.

OFFICE MAYSVILLE & LEXINGTON R. R. Co., N. D. } MAYSVILLE, KY., MAY 11, 1869. }

ON and after Tuesday, June 1st 1869, this company will be ready to exhibit profiles and specifications for the construction of the Railroad from Maysville to Paris, at least as far as Carlisle, thirty three miles, and will receive bids by sealed proposals in such form and for such portions of the work as contractors may propose, either by the section or for the whole road, until Thursday, June 24th, 1869. Cross-ties and iron will be required for about half the road during the present season, and the whole to be completed as rapidly as practicable. The subscriptions of stock justify the assurance that the Company can promptly comply with their contracts.

J. BARBOUR, Vice Pres't.
THOMPSON PARKS, } Com.
W. H. McGRANAGHAN, }

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

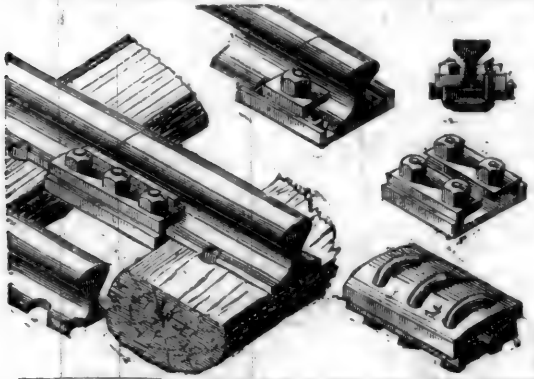
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

EXTRACT FROM CHARTER.

SECTION 6. The drivers of each vehicle belonging to said Corporation shall be entitled to demand and receive for the hire of such cab the fares here prescribed, as follows:

1. For any distance within and not exceeding one mile, for a single passenger, thirty cents; and for two persons, forty cents.

2. For any distance additional to one mile, for each mile and fractional part of a mile, for a single passenger, thirty cents; and for two persons, forty cents.

3. For any time within and not exceeding one hour, for a single passenger, seventy-five cents; for two persons, one dollar; and for any time additional, for each hour and fractional part of an hour, for a single person, seventy-five cents; and for two passengers, one dollar.

4. In addition to said fares, as here set forth, the said drivers are authorized to demand and receive one-half of the same in addition, when the passenger or passengers are so conveyed by them between the hours of twelve o'clock in the evening and six o'clock in the morning.

SEC. 7. No driver of a cab belonging to said Corporation, who is stationed at or near a railway station, steamboat landing, or ferry, shall leave the seat of the cab on the arrival of the cars, steamboats, or ferryboats, nor shall he leave his stand till he shall be engaged by a passenger, or some person authorized by a passenger.

The bove rates of fare cannot be increased; but the Directors, in the interest of the public at large and shareholders, intend reducing the price as soon as practicable to 20 cents per mile for one, and 25 cents for two persons; and 50 cents per hour for one, and 60 cents for two persons; the intention being to give the inhabitants of New York and Brooklyn the benefit of good, commodious and quick traveling, at rates which will place the vehicles within the reach of all.

ESTIMATE OF PROFITS ON FIFTY CARS.

50 hansoms, at $700 each	$35,000
100 horses, at $250 each	25,000
50 sets of harness, at $100 each	5,000
Total	$65,000

PROFITS.

50 cabs, with use of two horses per day, working 22 hours, at $7 per day	$127,400
Expenses	49,800
Balance	$77,600
75 per cent. on $65,000	48,750
Balance for incidental expenses	$28,850

EXPENSES.

Feed and stabling for 100 horses, at $24 per month each	$28,800
Wear and tear of horses, 10 per cent	2,500
Wear and tear of cabs, 10 per cent	3,500
Salaries of Working Manager, Secretary, Superintendent, Foreman of Yard and men	15,000
Total	$49,800

The above estimate for fifty cabs is merely to show what profit can be made; and it is but natural that an increase of the number of vehicles will considerably diminish the working expenses in proportion. The Company purposes to have 2,000 hansoms and cabs running by the end of the present year.

Wisconsin Railroads.

We are happy to know that the citizens of Milwaukee are waking up. Some days ago their Chamber of Commerce held a meeting and appointed a Committee to draw up an address for the people on the subject of their railroad interests. The address will place the following projects before the people:

First—The construction of a railway from this city to Burlington, on the Western Union Road.

Second—The extension of a road from Monroe to Dubuque, Iowa.

Third—The extension of the road to Fond du Lac, and

Fourth—Extending aid to the West Wisconsin Railroad to complete the line between Black River Falls and St. Paul.

What we are most interested in is the extension of the road from Monroe to Dubuque. Let the committie bring in a favorable report and they will find Dubuque ready to meet them half way.—*Dubuque (Iowa) Times.*

Milwaukee and St. Paul Railway.

The railway of this company embraces the following lines: Milwaukee to Prairie du Chien, 193 miles; Prairie du Chien to St. Paul and Minneapolis, 215 miles; Milwaukee to La Crosse *via* Watertown, 196 miles; Milwaukee to Portage *via* Horicon, 95 miles; Horicon to Berlin and Winneconne, (5 miles of which, from Omro to Winneconne, was finished in November, 1868,) 58 miles; Watertown to Sun Prairie, 26 miles; Milton to Monroe, 42 miles—total length, 825 miles. In 1867, the road, for 10 months was 740 miles; for the other 2 months, 820 miles. In 1868, for 10 months, 820 miles; and for the other 2 months, 825 miles. The following is a comparative statement of the earnings and operating expenses for the years ending December 31, 1867 and 1868:

Earnings:	1867.	1868.
From Freight	$3,791,114 31	$4,266,283 89
" passengers	1,421,410 22	1,695,295 72
" mails, express, etc	471,084 06	556,066 10
	$5,683,638 59	$6,517,645 71
Operating expenses:		
Repairs of track	$543,470 59	$591,804 31
" bridges	42,737 06	51,796 89
" fences	5,744 92	4,848 37
" buildings	85,929 10	81,718 04
" locomotives	282,300 90	253,946 66
" cars	365,281 08	365,390 94
" tools, etc	44,778 23	41,085 38
Management and general office	99,507 82	111,743 06
Foreign agency and advertising	25,541 39	26,952 62
Station service	304,773 80	381,901 48
Conductors, etc	144,976 98	173,100 80
Engineers, etc	208,070 50	222,263 55
Train and station supplies	92,753 14	92,530 31
Fuel consumed	365,818 74	432,380 75
Oil and waste	45,694 05	53,274 04
Personal injuries	14,532 44	6,689 48
Damage to property	15,528 53	17,914 72
Loss and damage of freight and baggage	14,244 46	16,123 91
Legal expenses	50,102 28	44,686 86
N. Y. office expenses	10,354 28	14,297 94
Taxes, State and local	151,852 25	75,467 19
Insurance	17,093 35	26,839 89
Miscellaneous exp	11,938 60	18,282 89
Car service	15,383 75	8,272 91
Extraordinary exp	707,279 58	919,728 50
	$3,665,685 82	$4,033,040 99
Net earnings	$2,017,922 77	$2,484,604 72

The gross earnings show an increase of $834,037 12, the expenses an increase of $367,355 17, and the net earnings an increase of $466,681 95 over those of the previous year. The revenue from passengers shows an increase over last year of $273,885 50—being an increase of $52,951 44 on through, and $220,934 66 on local travel. The revenue from freight shows an increase over last year of $475,169 58—being an increase of $143,002 33 on through, and $332,167 25 on local business. The mail, rents and express earnings show an increase of $84,982 04 over last year, which is due to the increase of the mail and express service on the through line between Milwaukee and Minneapolis. The operating expenses for 1867 were 65 per cent., and for the year 1868, 62 per cent. of the gross earnings. The extraordinary expenses included in operating expenses were as follows:

	1867.	1868.
Renewal of track	$246,434 10	$391,697 93
New bridges	63,708 87	38,016 59
New fences	36,617 18	47,793 57
New buildings	79,319 36	52,431 01
New locomotives	20,609 15	16,705 50
New cars	190,386 71	269,451 89
New tools & machinery	12,852 14	16,479 80
U. S. Government taxes	46,586 94	49,606 44
Rents	5,393 81	.....
Interest and exchange	4,220 66	7,109 35
Telegraph	121 16	.....
Furniture	80 00	.....
Expenses Elevator A	.....	20,272 70
" B	.....	10,163 72
Patents	950 00	.....
Total, as above	$707,279 58	$919,728 50

The following is a statement of all expenditures not charged to operating expenses in 1868:

Purchase of road and payment of claims against same	$63,425 17
Construction of road (P. du C. Cut-off, etc	17,472 28
Omro Extension	82,618 47
Sun Prairie Extension	43,810 28
St. Paul Branch	12,107 58
Decorah Branch	3,376 93
Purchase of Elevator D. (Nor. Div.)	71,487 00
Purchase of Elevator B. & C. (P. du C. Div.) part payment on same	200,000 00
Equipment purchased (9 locomotives)	102,572 00
Right of way	44,951 44
Real estate	4,521 45
Milwaukee depot grounds	63,259 34
St. Paul "	9,533 26
Minneapolis "	14,759 64
Survey for P. du C. Bridge	818 00
Survey of Monroe and Dubuque R.R.	578 33
Sinking Fund Second Mortgage bonds (cancelled during the year)	66,000 00
Total	$801,291 17

The earnings and expenses by Divisions for the year 1868, were as follows:

	Earnings.	Expenses.
La Crosse Division	$2,843,516 47	$1,412,096 58
Northern Division	700,120 29	440,750 98
Prairie du Chien Div.	2,129,092 67	1,368,044 40
Iowa and Minnesota Division	1,344,916 28	812,149 03
Total	$6,517,645 71	$1,033,040 99

The cost of the property represented by bonds and shares, December 31st, 1867 and 1868, is as follows:

	1867.	1868.
Mortgage debt	$16,796,500	$16,613,000
Increased since Jan. 1, for purchase of Elevators, building roads, &c	.....	600,000
Preferred stock	8,050,892	8,188,272
Common stock	5,406,883	5,554,599
Common stock dividend Feb. 15, 1869	.....	1,596,470
Total cost of road	$30,254,225	$32,552,341

A portion of the debt outstanding December 31, 1867, against the Prairie du Chien Company was held for the benefit of the St. Paul Company, which was merged in 1868, when the St. Paul Company acquired the Prairie du Chien road.

In pursuance of the authority of the stockholders, conferred January 1, 1869, the Directors declared a dividend of $7 per share, cash, and $10 per share, in common stock, on the preferred stock, from the net earnings of the road for 1867 and 1868; and $14 per share in common stock on the common stock, from the earnings of 1866, 1867 and 1868.

During the year 1868 they have purchased additional property, not charged to operating account, to the amount of $801,291 17.

The company have no floating debt which they are not prepared to pay at sight.

Since our last Annual report we have perfected our purchase of the Milwaukee and Prairie du Chien Railway, and that line of road is now owned in fee by this company.

At the time of the purchase of the Milwaukee and Prairie du Chien Railway, Messrs. Angus Smith & Co. owned the Elevator Buildings, standing on the railway company's lands, in Milwaukee, paying no rent therefor, or if any rent, a nominal amount. The railway company had the option to purchase the Elevators, which expired on the 1st day of December, 1868. The Milwaukee and St. Paul Railway Company have availed themselves of this option, and purchased the Elevators for $300,000, which they have leased for five years to Messrs. Angus Smith & Co., at a price which will give the railway company a fair profit on the purchase. The rent to be paid is not a fixed sum, but is dependent upon the amount of business done by the Elevators. Our future reports will show the workings of this lease.

We completed the line of road from Omro to Winneconne, about five miles, in November of the past year, at a cost of $82,600. This line of road was purchased by this company in 1863. At that time it was built and in operation from Ripon to Omro, and mostly graded to Winneconne. The right of way and depot grounds were either purchased by us at that time or have since been donated to the company. The iron upon this branch is forty-five pounds to the lineal yard. Upon our main lines it is fifty-six and sixty pounds. It has not been completed a sufficient length of time to enable us to say whether or not it will bring the large increased business expected from the Wolf River and country adjacent.

The company are now engaged in the construction of the line of road from Sun Prairie to Madison, about twelve miles. This is an extension of our present Watertown line of road, to the city of Madison, and there connects with the present Madison line, and will shorten the distance to Madison, Prairie du Chien, St. Paul, Minneapolis, and intermediate points, about 17 miles, and reduce the cost of haulage of trains pro rata to the shortened distance.

NEW CONNECTIONS.

McGregor and Sioux City Railway.—The stockholders unanimously authorized the Directors to purchase this line of road, as proposed in the Circular of November 28th, 1868.

The Directors regard the acquisition of the McGregor and Sioux City Railway as of the utmost importance for the welfare of the company. The Sioux City Railway Company propose to build in sections of about 60 miles per annum, their line of road from Calmar, on line of our road westerly, on or near the 43d parallel of latitude to the Missouri River; the proposed line runs through as good an agricultural country as can be found in the United States; it reaches the Missouri River about 100 miles north of any other line of railroad now built or soon likely to be, and about 1,700 miles south of Fort Benton, the head of steamboat navigation on the Missouri River; thus giving them the first chance at the business of that immense region of country; embracing Dakota and Montana Territories, the latter of which is now sending to New York large quantities of gold, silver, &c. The trade of this section of country is immense. Twenty-three steamboats left St. Louis alone, for Fort Benton, in the month of April, 1868. There are also regular lines of steamboats from Omaha and Sioux City to Fort Benton. We believe that a large portion of this

trade can be had by our company, with great advantage to the public, and to the company. In addition to the large through business expected to be obtained, this route will have as good a local business as any railroad running through a magnificent agricultural country.

The directors have agreed to purchase or consolidate with the McGregor and Sioux City Railway, from Calmar to Charles City, about 50 miles, which is to be paid for in the St. Paul 1st mortgage bonds, to be secured by a mortgage on the line of road to be acquired by purchase or consolidation, and with the shares of the St. Paul Company; it is expected that this will be consummated before the harvest of 1869. The Directors felt that your interest required them to do this—first, because it will be a very valuable route for railroad traffic of itself, giving us an opportunity to carry the lumber of Minnesota to the Prairies of Iowa, and to bring back coal from the rich mines of Middle and Southern Iowa to Northern Iowa and Minnesota; thus giving employment to our equipment at seasons of the year when otherwise a considerable portion of it would be unemployed; and second, because another very rich and powerful railway corporation, by their extensions were flanking us, they having already reached Charles City, which is 50 miles west of our line of road, and under contract to construct to the State line connecting with the railroad at Austin: thus our line not being extended westerly as proposed, must enable that railway company to divert the new business to be derived from the proposed line of the McGregor and Sioux City Railway from your railroad.

The Directors venture the prediction that, in the event of our company acquiring the whole of said McGregor and Sioux City Railway, and o its completion to the Missouri River, in a very few years thereafter, perhaps five years, the best part of the company's railway property will be the line of road westerly from McGregor to the Missouri River.

The West Wisconsin Railway Company are building their line of railroad from Tomah on the La Crosse Division of our line of road northwesterly, with a view of going ultimately to St. Paul. They completed it to Black River Falls, about thirty miles from Tomah, in December last. We now operate this road for the company building the same, as lessees; either party can terminate the lease at pleasure. Although at present it brings us no new business, or any which we would not get without it; yet running as it proposes to, through a sparsely settled portion of the State, it will materially develop that section of country and ultimately bring a valuable traffic to our railroad.

The Southern Minnesota Railroad starts from La Crescent on the Mississippi River opposite La Crosse. It is now built westerly to Lanesboro, about fifty miles. They propose to rest at the last named placed for the present, and apply all their means and force to building west, from at, or near Austin: to this end the St. Paul Railway Company is to aid them by transportation of material at cost. The S. M. R. R. runs through a rich productive country, and will henceforth prove a valuable tributary to our line of railroad.

The Hastings and Dakota Railroad is built from Hastings westerly to Farmington, about seventeen miles. They expect to continue it westerly to the Missouri River, at or near the mouth of Washtee or Good River. In no section of the country would a railway be of greater benefit to the locality than that of this proposed extension. Congress has aided them by one of the best land grants ever made by that body. The extension of this road westerly is equivalent in traffic brought to us, to an extension of our own road through those vast, and at present mostly unoccupied, regions. Every shareholder in our company must feel a lively interest in the construction of this road,

The Minnesota Valley Railroad is now in operation from St. Paul to Mankato, about one hundred miles, with a fair prospect of rapid extension much further up that very rich valley. It is a very important connection and feeder of the road of our company.

The St. Paul and Pacific Railroad extends northwesterly from St. Paul about sixty miles, with a view of ultimately reaching the Pacific Ocean some where in the vicinity of Astoria, in Oregon. It is understood that a highly respectable party of capitalists of Amsterdam, Holland, have this project in hand. This road is also equivalent to an extension of our line of railway from Minneapolis northwesterly. It will be a very valuable tributary to our line of road.

The Lake Superior and Mississippi River Railroad extends from St. Paul towards Lake Superior, about 30 miles, and promises to reach a point on that lake during the present year. It runs through a most valuable lumber region, and will add largely to our traffic in lumber, which we will be required to carry down to the prairies of Southern Minnesota and of Iowa, bringing back from Iowa coal and provisions: and when proper facilities are furnished, for about four months in the year, it will afford water communication with Buffalo by the use of 150 miles of railway. It is to be regretted that the navigation of Lake Superior closes so early in the season as to be useless to farmers, producers and dealers unless they can hold their crop over from October to the following June. It is hoped that within a few years they will be able to hold their crops over, that they may, if they desire, have the advantage of the markets for two seasons, and of this line of communication. This road for at least eight or nine months in each year will be a most valuable tributary to our line of railroad.

We urge upon our Stockholders the propriety of their going West and seeing their property, both present and prospective. The officers of the Company will at all times do all they can to facilitate their visiting the property, and help to make the trip as pleasant and agreeable as they can. The Directors feel a laudable pride in the development of the property, which they know would be shared by the Stockholders if they would but make a personal visit and examination of their property.

We call your attention to an act of the Legislature of Wisconsin, published with this report, classifying the Directors of the Company, and thereafter electing one-third of the number for three years, instead of electing the whole Board each year, as heretofore; the same act also authorizes the holders of the Company's bonds to vote in the election of Directors. The act will be submitted to you for your action thereon, at the next meeting of the Stockholders.

The Directors feel under particular obligations to S. S. Merrill, their General Manager, for his untiring industry, capacity and fidelity, in the management of their property, and also to all the officers, agents and employes of the Company who co-operate heartily with him in his efforts to develop this great enterprize, and promote the interest of the Shareholders.

The company own 135 locomotives, 64 first class, and 10 second class passenger cars, 6 sleeping cars, 53 baggage, mail and express cars, 2,070 box freight cars, and 430 flat and stock cars. The number of miles run by passenger trains, was 857,412; by freight trains, 1,539,875; by wood and gravel trains, 324,604—total miles run, 2,721,891. Tons of freight carried eastward, 740,352; do., westward, 894,213—total, 1,134,565. Total number of tons carried one mile, 120,046,055. Passengers carried eastward, 367,885; do., westward, 426,698—total, 794,583. Number of passengers carried one mile, 43,576,677. Earnings per mile run on freight, $2 77; do., on passengers, $2 47. Expenses per mile run, $1 68. Amount received per ton per mile, 3.5 cents; do., per passenger per mile, 3.8 cents. Gross earnings per mile of road, $7,900 18; net earnings per mile of road, $3,011 64.

GENERAL ACCOUNT, December 31, 1868.

President.—ALEX. MITCHELL.

Vice President.—RUSSELL SAGE.

Directors.—Alexander Mitchell, Milwaukee; Russell Sage, Fred. P. James, N. A. Cowdrey, New York; Selah Chamberlain, Minnesota; Walter S. Gurnee, New York; S. S. Merrill, Milwaukee; E. B. Wesley, Julius Wadsworth, Joseph Rudd, James G. Garner, Henry Keep, James Buell, New York.

Gen'l Manager.—S. S. MERRILL.

Secretary and Treasurer.—ALANSON CARY.

The Railroad to Fond du Lac.

Yesterday we spoke of the necessity of making the connection *via* Burlington with the Western Union Railroad, which now reaches the coal fields of Rock Island. The necessity of that thirty miles of railroad is so obvious that it requires no argument. But we have another connection on our north, from Mayville to Fond du Lac, which should be made. The Iron Ridge Railroad will be extended to Mayville during the ensuing autumn. Thence it is only twenty-one miles to Fond du Lac. If the road can be built, the St. Paul Company will equip and run it.

Fond du Lac has become one of the largest business centers in the State; its trade with Milwaukee is now light; it might be rendered large by this Railway connection. We believe that Fond du Lac city would extend aid to the amount of $100,000, and if Milwaukee would raise $150,000, we think that the St. Paul Railway Company would readily agree to finish the road. Here is 51 miles of railway, acting as it were, like two arms, north and south of our body, which would secure an immeasurable degree of strength to our future growth and prosperity.

Railroads can be constructed much cheaper now than they could one year ago, as labor can be obtained at least twenty-five per cent. less Our city could borrow on as advantageous termh as last year, because our credit is good, though the money for our purpose is absolutely wortmore. If Milwaukee can obtain the railway connection with the Western Union R. R. and its extended line into southern Illinois, and also secure the completion of the road to Fond du Lac, we think that it would be the best $300,000 ever expended by our citizens.—*Mil. Wis., May* 29.

☞ Glasgow (Ky.) has subscribed $25,000 to the capital stock of the Glasgow Railroad.

Railroads of the State of New York.

A tabular statement of their Capital, Bonds, &c., Length and Cost, Earnings, Expenses, Dividends, &c., for the year ending September 30, 1868.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, June 5, 1869.

Stock Exchange and Money Market.

Money has been more active, in the speculative line, the calls from the Stock and Gold operators for aid having been more extensive and urgent. The supply, however, has been quite liberal, and the wants of responsible borrowers have been readily met at 6@7, generally at 7 per cent. In discounts, there has been rather more animation, strictly prime to good grades of mercantile paper passing at 7@9 per cent. per annum. The U. S. Sub-Treasury reduced its cash balances last week, nearly 9¾ millions. It held of coin and currency, May 31, $76,888,478, against $83,754,775 at the close of April. The city banks, on their last weekly return showed a gain of $3,640,731 in deposits, and $2,441,826 in specie, while they reported a loss of $27,925 of legal tender notes. They added $4,659,509 to their loan and discount averages. Washington advices state that the aggregate currency balances of the U. S. Treasury Department on the 1st inst., were about twenty millions, and the coin reserves, about eighty-two millions, exclusive of the private deposits represented by the outstanding coin certificates. The Treasury receipts in currency in May were about twenty millions from internal revenue, and eight and a half millions from gold sale, &c., and in gold fifteen millions from customs. The payments in currency were about twenty millions for the public service and nearly five millions for debt purchased, and in gold about twenty-four millions for interest.

The specie reserve of the city banks according to the latest return is $17,871,230, against $17,861,088 same time last year The city bank deposits are now $203,055,650, against $204,746,964 week ending May 30, 1868. The legal tender reserve amounts to $57,810,373, against $65,633,753 same time last year. The circulation now stands at $33,920,865, against $24 145,606 same time last year. The loans are now $274,935,461, against $268,177,490 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $130,274,748 a day, against a daily average of $131,457,975 the preceding week, and $143,453,480 the week ending with May 12, 1869. The current week's exchanges average about $128,381,000 a day. The city banks, last week, reported a gain of $2,441,826 of specie, $3,640,731 of deposits, a loss of $27,925 of legal tender notes. They increased their loans, $4,659,509; and reduced their circulation, $6,521.

The city bank exchanges on Wednesday were $145,596,456, and the resulting balances, $5,956,914.

National Bank notes to the amount of $176,000 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $315,023,131, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $15,157,376, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931;) an actual circulation at this date, of $299,865,755. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,807,800; and for the public deposits, $29,390,350—making a total of $372,198,150. The Treasury Department last week redeemed and destroyed $184,000 of worn and mutilated fractional currency, and issued $365,000 of new. The outstanding amount of fractional currency on the 1st of May, was $35,330,323, against $36,719,912 on the 1st of April, $36,781,548 on March 1, $35,511,127 on February 1, and $34,215,716 on the 1st of January.

The U. S. Sub-Treasury receipts, week ending with May 29, were $12,071,978, including $2,029,992 from customs duties; payments, $21,805,496, including $1,114,656 of coin interest; balance at the close of the week, $75,891,046, against $85,624,565 at the close of the preceding week, showing a decrease of $9,733,518. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $1,784,764, including $354,612 from customs; payments, $787,333, including $164,000 of coin interest. On Tuesday, receipts, $2,945,217, including $381,428 from customs and payments $1,367,219, including $88 111 of coin interest. The balance at the close of business on Tuesday stood at $78,466,476, against $85,897,063 a week previous; and $84,886,237 on May 19, 1869. The aggregate receipts of the office in May wer

$53,236,435, including $10,034,613 from customs, aggregate payments, $60,202,733, including $13,-681,439 of coin interest.

The outstanding amount of coin certificates on the 1st of May, was $16,307,200, against $21,672,-500, April 1, $28,775,560, March 1; $32,659,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $2,497,-000, and retired $1,931,992 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during May, reached $10,-606,080.

Government revenues yielded more liberally, last week. The excises, last week, yielded about nine millions; customs at the port of New York, $2,029,992 and at the outports about $700,-000 (in coin) more, making the grand total income for the week equal to about $12,822,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 141,000,000, according to the latest Washington advices. The customs yielded, same time, about 166 millions in gold. From Washington, we learn that the warrants issued by the Treasury Department during May to meet the requirements of the Government amounted to, in round numbers, the following sums, namely:

Civil, miscellaneous and foreign intercourse	$3,554,600
Interest on public debt	19,831,000
War department	4,180,000
Navy department	1,163,000
Interior department—Territory and Indians	1,638 000
Total	$30,366,600

The warrants issued for redemption of the public debt are not included in the above.

Gold has been more freely offered, and has been less confidently dealt in, at from 138¼@141, closing heavily on Wednesday at 138⅜. The offerings of a million Government coin on Monday were taken at 138.53@138,60. Washington advices state that Secretary Boutwell contemplates increasing his weekly sales of gold to 2½ millions. The Customs demand keeps to an average of nearly three millions a week. The coin reserve of the Treasury on the 1st inst., was $81,-839,469, exclusive of $23,340,720 deposited on private account, and represented by outstanding coin certificates. The export drain has been limited, since our last.

On Wednesday, the U. S. Sub-Treasury disbursed $53,538 of coin interest.

The following shows the average business at the Gold Exchange Bank, during the past week, average amount of loans and discounts, $1,540,680; average amount of specie, $836,783; average amount of deposits, $1,589,858.

The customs demand for Gold last week, averaged $334,999 a day; thus far, this week, it has averaged $379,214 a day, or equal to a weekly aggregate of $2,375,284. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $12,882, and since Jan. 1, $8,657,506, against $3,113,123 same time in 1868. The receipts from California, since our last, have been $184,459. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $115,461,058, against $105,-323,794 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to May 18th, 1869, $2,774,653, against $3,061,826 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $19,156,022, against $32,841,884 same time in fiscal year 1867–'68, showing a decrease in the current fiscal year, of $13,685,862. The exports of specie, from this port, last week, were $921,519, against $4,211,-723 same week last year; total, since July 1, 1868, $35,052,449, against $65,475,966 in 1867–'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,114,656; since July 1, 1868, $84 777,231, against $71,705,637 same time in 1867–'68. The specie exports from San Francisco, from Jan. 1, to May 18, 1869, were $15,224,497, against $14,750,518 same time in 1868.

Foreign Exchange has been in better supply and less request at drooping rates. Bankers' prime sixty day bills on London closed on Wednesday at 108⅞@109¼, and on Paris to 5.25@5.16¼; sight bills on London to 109¾@110⅛, and on Paris to 5.16¼c.@5.13¾. The offering of produce bills has been again quite liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,676,437, against $2,692,824 same week last year; total, since July 1, 1868, $154,326,343, against $167,789,298 same time in preceding fiscal year of 1867–'68.

Government securities have been less active, since our last, and prices have been variable closing less buoyantly. The speculative and export inquiries have been less extensive. Some of the speculative holders have been realizing at the going rates, a circumstance which has operated against values. The U. S. Sub Treaturer on Wednesday reported the aggregate offerings of 5 20 bonds to the U. S. Sub-Treasury on that day were $4,145,000. The accepted offers were from Messrs. Fisk & Hatch, $100,000 U. S. 5 20s of 1862, registered, at 116.37, $220,000 registered 1865s at 115.95@116.45; from Messrs. Vermilye & Co., $125,000 conpon 1868s at 116.49; $200,000 coupon 1867s at 116.49; $50,000 registered 1865s at 116.36@116.49; $75,000 registered 1862s at 116.37; $50,000 registered 1867s at 116.49; and from Frank & Gaus, $80,000 1862s, registered, at 116.50; $35,000 coupon 1864s at 116.50; and $65,000 coupon 1867s at 116.56. The public debt statement to June 1, made public late on Wednesday, was a very favorable one, indicating as it did, a net reduction of the debt, during the month of May, of $13,384,778, making the total reduction, since March 1, $20,050,647.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 19.	May 26.	June 2.
Consols	92⅝	93¾	92⅝
U. S. 5-20's of 1862	78½	79½	80½
Erie	19½	19	19¼
Ill. Central	96	95¼	96

U. S. sixes of 1881 closed here on Wednesday at 122@122⅛; U. S. Five-twenties of 1862, ex-coupon, 122¼@122⅜; U.S. Five twenties of 1864 at 117⅛@117¼; U. S. Five-twenties of 1865 at 118⅝@118¾; U. S. Five-twenties of 1865, consolidated, 119⅞@120; U. S. Five-twenties of 1867, 119¾@120; U. S. Five-twenties of 1868, 119¾@120; U. S. Ten-forties at 109¼@109⅜; U. S. Six per cent. currency bonds, 107¼@107½.

Railway and miscellaneous stocks have been unusually brisk at rising, though widely fluctuating, prices closing less buoyantly.

There has been a more active movement in domestic produce, particularly in Breadstuffs, Provisions, Petroleum and Cotton, but at irregular prices. Middling upland cotton closed rather buoyantly on Wednesday at 29¾ cts. per lb. The stock of cotton now here is estimated at about 74,-000 bales. The receipts at the port this week, have averaged about 1,450 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,195,-500 bales, against 2,223,000 bales same time in 1867–8; exports, same time 1,336,600 bales, against 1,627,000 bales same time in 1867–'8; stock on hand at latest dates, 185,000 bales, against 137,000 bales same date 1868. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 10,066 pkgs., against 10,813 pkgs., same time last year. From Boston, 3,890 pkgs., against 5,494 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been firm and moderately active, at from 12@16½c., per lb.; week's receipts, 5,832. Milch cows, dull at from $40@$110 each, receipts, 58. Veal calves plenty and slow of sale at from 5@11c. per lb.; receipts, 3,-248. Sheep and lambs moderately inquired for at from 4½@7½c., per lb.,; receipts, 16,373. Swine in less demand at from 9@9⅜c. per lb.,; receipts, 23,776.

Foreign merchandise has attracted less attention at generally drooping rates. The total imports of foreign dry goods, last week, were $1,230,236, and the total amount marketed $963,745. The value of foreign merchandise imported last week, was $4,842,749—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $6,072,985, against $6,820,770 same week last year; total since July 1, 1868, $267,432,444, against $222,293,464 in 1867–'8. Ocean freights have been more active and firmer. For Liverpool we quote flour at 1s. 9d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 6d. @6½ by sail, and 7d.@7½d. by steamer, per bushel; cotton at ⅛d.@$\frac{5}{32}$d by sail, and $\frac{3}{16}$d.@¼d. by steamer, per lb.; and heavy goods 15s. @25s. by sail, and 17s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 524.

The New York exports, exclusive of specie, for the week ending June 1, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2,692,824	$3,676,437
Prev. reported	72,805,766	67,917,740
Since January 1	$75,498,590	$71,594,177

The imports for the week ending May 29, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,185,203	$1,230,236
Gen. merchandise	5,635,567	4,842,749
Total for the week	$6,820,770	$6,072,985
Previously reported	94,923,025	128,832,789
Since January 1	$101,743,795	$134,905,774

The balance in the Sub-Treasury on Wednesday was $78,446,319 65.

☞ We invite attention to the Advertisement of Messrs. Robert Merrill & Sons, in another column. These gentlemen are manufacturers of Surveyors' and Engineers' instruments, marine, opera and field glasses, sextants, quadrants and spy glasses, ship's compasses, Binnacles, logs, etc. Removed from their old established stand, No. 156 Water street, (where they were nine years) to 141 Water street, N. Y.

☞ The stockholders of the Cheshire Railroad Company have voted to aid the proposed Monadnock Railroad, between Winchenden, Mass., and Peterboro', to the amount of $20,000.

☞ The work on the rolling mill to be erected by the Baltimore and Ohio Railroad Company at Cumberland has been commenced.

The Hansom Cab Co.

This company was incorporated on the 6th of May, 1869, by the Legislature of the State of New York. The capital of the company is $250,000 in 5,000 share of $50 each, with power to increase. Subscribers will be required to pay $12 50 per share on subscribing, the balance to be paid at the call of the directors, of which due notice will be given, which notice shall in no instance be under thirty days. The directors comprise some of our most enterprising and influential citizens, with Edward W. Brandon, Esq., as President, Hon. James W. Husted, and James Stuart Pears, Esq., Vice Presidents, S. P. Slater, Esq., (with Messrs. Duncan, Sherman & Co.) Treasurer, Charles H. Pease, Esq., Secretary, Henry Howard Brandon, Esq., Superiniendent, and Jerome Buck, Esq., Attorney and Counsel. Bankers, Messrs. Duncan, Sherman & Co. We give elsewhere the statement of this company, embracing extracts from the charter, estimates of cost, earnings, expenses, profits, etc., from which it appears that the first cost of 50 Cabs, 100 horses and 50 harnesses will amount to $65,000. The receipts per annum will amount to $127,400; expenses, $49,800—leaving a balance of $77,600, which is $12,600 in excess of the original cost.

The President of this company, Edward W. Brandon, Esq., has already invested largely in the stock, as has also Messrs. Dabney, Morgan & Co., Jay Cooke & Co., Fisk & Hatch, Turner Brothers, Duncan, Sherman & Co., Leland, Brothers & Co., J. & J. Stuart, and other well known capitalists.

Taking into consideration the discomfort and inconvenience experienced daily by a majority of our citizens, owing to the over crowded condition of the cars and omnibuses, the frequent insolence of the conductors and drivers, the offensiveness of many of the passengers, and other crying evils, there is no doubt that these Cabs will be handsomely patronized, and that the company will be enabled, as they propose, to have 2,000 running by the close of the present year.

To Mr. Brandon, the originator of this enterprise, and one of its largest stockholders, great credit is due for the energy and perseverance displayed by him since its first inception. It is to be hoped that he will reap a large reward.

☞ Track laying was commenced upon the Chicago, Danville and Vincennes Railroad on the 21st ult., and the contracts require it to be laid to Momence (about 29 miles from Dalton on the Columbus, Chicago and Indianapolis Central Railroad and 50 miles, from Chicago) by the first of August.

☞ The Directors of the Junction and Breakwater Railroad Company have made a contract for the completion of their road from Georgetown to Lewes, in Sussex Co., Delaware, by July 1st, and for the erection of a pier there by the 1st of August.

☞ The work of laying the track upon the Boston, Concord and Montreal Railroad from Littleton, its present terminus, to a connection with the Grand Trunk Railway at Northumberland, N. H., a distance of about 34 miles, now in progress.

☞ The Savannah and Charleston Railroad has been put under contract, and will be completed in a few months

Report of the Pacific Railroad Commission

Some statements of leading points of the report of May 20 of the commission of February 15, 1869, to examine the Pacific Railroad, have already been made public. We are now enabled to publish the most important portions of the document. The Commissioners say that at the time of their examination " The Central Pacific Company's track was found about 551 miles from Sacramento, and that of the U nion Pacific Company about two miles west of Ogden. Neither of these points is common to the lines of both companies, the end of the Central Pacific track on the line of that company being about one and a half mile distant from the nearest point of the line of the Union Pacific Company, and the end of the Union Pacific track, about one-fourth of a mile from the nearest point of the line of the Central Pacific Company. Practically, the two lines may be considered common at Ogden, a few miles east of the point at which we found the end of the Union Pacific track." The Commissioners all agree in giving the preference, for the portion then unconstructed, to the route of the Union Pacific Company. The detailed report on the condition of the two roads is signed by General Warren and Mr. Blickensderfer only. We quote the following extracts from it:

THE CENTRAL PACIFIC RAILROAD.

Whatever may be said in reference to the general route of the Central Pacific Road (and there is no doubt that it is admirable, with possibly, the single exception of the part across the Sierra Nevada), it is not fortunate in the details of its location, and the advantages afforded by the route have not always been realized. The curvature is excessive and needlessly sharp, and throughout a large portion the ascents and descents are multiplied over and over without necessity. The tangents are not directed towards the controlling points of the valleys, thus involving a loss of distance, an increase of curvature, and of probable ascents and descents. A proper effort has not been made to secure low ruling grades, and thereby at once diminish the demand for motive power and cheapen the cost of operating the road. Grades of 70 to 80 feet per mile are often introduced, where one of 53 feet per mile would have been ample, and grades of 53 feet per mile where not more than half that rate of ascent was required. The most striking instance is in the Humboldt Valley, between Humboldt Lake and Humboldt Wells, the difference of elevation of which is 1,111 feet; but in overcoming this the ascents and descents amount to 6,232 feet, involving, in a distance of 290 miles of road in this most practicable valley, a loss of elevation greater than that of the summit of the Allegheny Mountains above the Atlantic seaboard, and requiring trains to be hauled up an aggregate of ascents more than equal to that on the principal lines between the eastern coast of the Ohio River valley.

There is no doubt that a careful and judicious location of the line would reduce the length from 10 to 20 miles, diminish the sum of its deflection by a very large amount, very much improve the character of the curves, avoid several thousand feet of ascents and descents, and furnish a road which could be operated at a greatly diminished cost. It would materially reduce the time within which trains could pass over the road with safety, permit an increase of from 30 to 50 per cent. in the loads which engines could haul over the greater part of the distance, and in every way enhance the commercial value of the road. It may be supposed such a location would involve heavy work and excessive cost. But this is not the case; for an examination of the official profiles will show that in the Humboldt Valley, where the greatest changes would occur, the work is exceedingly light. Even in the Sierra Nevada, where the work is expensive, many ameliorations can be secured with comparatively small outlays.

The tunnels on the road are 15 in number, of which ten are excavated in solid rock and require no arching. The remaining five are partially or altogether excavated in conglomerate and soft granite, liable to disintegration from exposure to the atmosphere, and will require artificial support to sustain the roof and sides. They are in all cases excavated for single track only, but those requiring artificial support, at present lined with timber, are of sufficient height and width to receive masonry inside the present wood work, and yet retain proper dimensions for single track. This masonry should be supplied, and its cost is included in our estimate.

The track-laying has generally been done in a careful and workmanlike manner, but owing to the rapidity with which the road has been constructed, the track when first laid is not so firm and permanent as it would otherwise be, and the surfacing requires more attention. Without exception the track has been laid on the bare roading, the latter having in no case been previously prepared by a covering of ballast, and nearly always been done with material thrown up from the sides of the embankments or obtained from the sides of the excavations themselves. There has been but a moderate amount of ballast distributed by trains, and that is confined almost exclusively to the line west of Truckee. East of Truckee Station, and especially in Humboldt Valley, the road for almost its entire length is wholly without ballast. The rails are apparently of good quality, generally 28 feet long, and of American manufacture. There are several patterns, all of which are good, varying in weight from about 56 to 66 pounds per lineal yard, the heaviest being used on the mountain division of the road. They appear to wear well, unless an exception exists in the case of that portion of about 16 miles laid between Rose Creek and Tule, which gives indications of being of an inferior quality. Of these rails, we understand about 1,400 tons were formerly laid on the Western Pacific Railroad, f om which they were afterwards removed.

The deep snows of the higher portions of the Sierra Nevada, varying from 10 to 40 feet, exposed the track to such serious obstructions that it became necessary to provide a protection against them. Accordinly extensive structures for this purpose have been erected, entirely covering the track through a great portion of the heavy snow belt, embracing a distance of between 40 and 50 miles. These structures consist of galleries and snow sheds. The former are sloped coverings, extending over the road to the mountain side above, of sufficient strength and so constructed as to carry snow slides over the railway, which, otherwise falling upon the road bed, would effectually obstruct the passage of trains. Great strength and much care in construction were required to enable these galleries to resist the sudden concussions to which they a re liable. The snow sheds are built over such portions of the road as are not liable to snow slides. They are required to sustain no more than the weight of the snow which may from time to time accumulate upon them, and do not require that strength or care, in their construction demanded by the others. Walls are also built in some cases as a defence against snow. The aggregate length of track covered or housed in is about 30 miles, embracing all the through and side hill cuts and many embankments within the upper portion of the snow belt. Whether additional outlay will be required to protect the track against accumulations of snow, it is difficult, without further experience, to decide. Up to the time we examined the road, in the latter part of February, the company was continually increasing these structures, and it is probable the ultimate limit of the requirement of them in the Sierra Nevada has nearly been reached. These protections against the snow, though made of wood are of as permanent a character as the case justifies; considering what future experience may suggest as the best material and design. They at present answer their purpose well, and render communications almost certain where, without them, the road could not be worked during the winter season. The engineers deserve commendation for the manner in which they have grappled and overcome the difficulty.

Estimates for supplying deficiencies on the Central Pacific Railroad between Sacramento and the 551st mile.

Correcting errors of location, reducing curvature, lengthening radii of curves, reducing grades and obviating loss of elevations	$1,600,000
Completing excavations and embankments to full width and increasing height of embankments	152,000
Completing the grading of side tracks.	11,000
17,500 additional ties for sidings, including spikes and laying, at $1	17,500
5,255 yards bridge masonry, including preparation of foundations and materials therefor, at $16	84,080
1,200 lineal feet Howe truss, Sac. & B. C., at $35	42,090
Supplying 192 short openings of trestle work in Humboldt Valley, with permanent works of masonry and girders, including pavement, $400	76,800
Supplying 56 larger openings of trestle work in Humboldt Valley, with permanent works of masonry and girders, $800	44,800
Probable expenditure for additional water-ways at points not provided for, and renewing badly-built culverts	30,000
504,000 yards embankments filling trestle works and approaches to bridges at 40 cents	201,600
Arching 1,705 lineal feet tunnels, at $100	170,500
Ballasting including transportation, lifting track, placing material, surfacing and readjusting track, and curving rails where necessary, 551 miles	626,800
Thorough repairs of parts of locomotives used in construction on hand when road is opened for through business, say 20, at $3,000	60,000
Forty-eight new passenger cars for through trade, at $6,000	288,000
Twenty baggage, mail and express cars, $3,800.	76,000
Three hundred box cars, $900	270,000
Transforming 800 platform cars, part of stock on hand, into box cars, at $150	120,000
Engine houses or locomotive stalls, shops and tools with turn tables at Colfax, Summit, Truckee, Wadsworth, Argenti, Humboldt Wells, with smaller intermediate engine houses and turn-tables	400,000
Additional water stations and wood and coal houses, & enlarging water tanks	82,600
Additional station buildings, section houses, and other accommodations, for employees	137,500
Total	$4,493,380

The foregoing estimate is confined to the 551 miles of road from Sacramento to the end of the track, and is a statement of the expenditure deemed necessary to complete the construction and equipment of that part of the road ready for the traffic when the line is opened through to connect with the Union Pacific Railroad. It is based on the road and equipments as we found them, and no allowance is made for works in progress or for materials and equipments ordered or reported *in transitu* for delivery, or already delivered, except so far as already placed in position on the structures themselves. It is believed by us that some of the deficiencies are being supplied by the company as rapidly as practicable. The estimate being made with reference to the 551 miles, only it does not afford a criterion of what may be required on that part of the line extending beyond the end of the track as we found it. The portion of the line between the two ends of the track (then about 198 miles) we could only report fully upon after another examination.

THE UNION PACIFIC RAILROAD.

The remarks contained in the report of the Special Commissioners made to the Secretary of the Interior, dated November 23, 1868, in regard to the details of construction, present a sufficiently clear view of the road at that date so far as then built, viz.: to a point 890 miles from Omaha; and we shall confine our present remarks to the line between the 890th mile and Ogden, except so far as may be necessary to note changes or improvements on the line previously described.

The track laying seems to have been properly done, but, owing to its having been mostly laid during the winter on frozen ground and on a new and sometimes imperfectly completed road bed, the track, when we examined it, was very much out of surface and in bad condition. On this part of the road, as well as elsewhere, the track has in all cases been laid on the bare roadway without previous preparation by covering it with ballast, and the surfacing, with slight exceptions, has been done with material taken from the sides of the embankments and cuts. Good material for ballast is, however, abundant, and can be obtained for all parts of the road without incurring the expense of long hauls. It was observed at various places on the line east of the 890th mile that considerable ballast had been distributed along the line and placed under the track since November last, but by far the largest part of the ballasting on the entire road yet remains to done. The rails are of good quality, generally 28 feet long, and of American manufacture. The pattern, though not of the heaviest, is considered sufficiently so. They appear to wear well, showing no defects of consequence.

Snow fences were extensively used on the Black Hills and other places during the past winter, but did not accomplish all that was desirable. They will have to be of a more effective character, or sheds will have to be built instead of them. The places where travel was most interrupted, between Laramie River and the Rattlesnake Hills, were at first without snow fences, as snow drifts had not been apprehended there. It is believed that fences and occasional sheds will prevent these interruptions from recurring. Snow protections will have to be employed where the road crosses the rim of the Great Salt Lake basin and at the head of Echo Canon.

It is believed that with the employment of proper means the working of the road can be maintained free from serious interruptions by snows.

Estimate for supplying deficiencies on the Union Pacific Railroad between Omaha and the 1 035 *mile, near Ogden.*

Restoring line to original location at Evanston, Weber Narrows, Round Valley, Peterson's Point Devil's Gate and Clay Bluffs	$78,000
Changing location to improve line and diminish curvature at Black's Fork, Red Desert, Rawlin's Rock Creek, Red Buttes, Dale Creek, Granite Canon, & Hazard, not including cutting off large bends on Rock Creek	200,000
Completing embankments to full width, filling trestle works and riprapping.	224,000
Completing cuts to grade on Black's Fork, Bitter Creek, rim of basin, &c.	24,000
Reducing grades between Omaha and Elkhorn to conform with condition on which change of line was approved	245,000
Four hundred and fifty cross-ties to replace cotton wood ties, including transportion, removal of old ties, and placing new in track, $1	450,000
Ballasting, including transportation, lifting track, placing material surfacing, and readjusting track and curving rails, 1,035 miles	979,000
Abutment and pier foundations, including excavations, piles, grillage, and securing with rip rap	72,000
Bridge masonry	280,600
Bridge superstructnre	286,710
Supplying 121 openings of trestle-work of 50 feet length and under between Omaha and North Platte, with permanent works of masonry and girders, at $400	48,400
Supplying 254 openings of trestle-work of 50 feet length and under, between North Platte and mouth of Muddy, with permanent works of masonry and girders, at $800	203,200
Suppling 90 openings of trestle-work, between mouth of Muddy and end of track, with permanent works of masonry and girders	31,050
Supplying 184 openings of trestle-work, averaging 103 feet each, with permanent structures of masonry and girders on short trusses, including foundations between Omaha and mouth of Muddy, at $1,500	276,000
Renewing Dale Creek bridge, or replacing same by embankment and arched water-way	100,000
Probable expenditure for additional water ways in Mary's Creek, Bitter Creek and other points not provided for, and renewing and enlarging stone culverts	100,000
Sixty-eight new passenger locomotives for through trade, at $14,000	952,000
Thorough repair of part of locomotives used in construction and on hand on opening the road, say 69 engines at $3,000	207,000
Sixty-eight new pass. cars for through travel, at $6,000	408,000
Thirty-three baggage, express, and mail cars, at $3,800	125,000
Four hundred and eighty box freight cars, at $900	432,000
Seventy additional locomotive stalls at $4,000	280,000
Completing shops at Cheyenne, additional shops at Bryan and West End Road, enlarging shops at Omaha, with additional tools	433,000
Additional water stations, and probable additional expenditures to secure full supply of water	40,000
Additional station buildings	40,000
Additional expenditure for snow protection	100,000
Completing excavations and embankments on main line, head of Echo Canon, including the filling of trestle-works	76,750
Araching tunnel head of Echo Canon	70,000
Completing excavation of tunnel No. 3, Weber Narrows	10,000
Total	$6,771,710

The foregoing estimate is confined to the 1,035 miles of road from Omaha to the end of the track, and is to be taken with the same explanations as that for the Central Pacific line.

With reference to this portion of the report, Lieutenant-Colonel Williamson and Mr. Clement say:

There is no doubt that by an increased expenditure of money a better road could have been built in some cases on a somewhat different location; but our opinion is that the road, as built on the present one, after being completed according to the standard prescribed by law, so that the "road bed, cross ties, track laying, ballasting, rolling stock, repair shops, station buildings, culverts, bridges, turnouts," &c., shall have been brought up to the standard prescribed by law (for all defects in which generous estimates have been made in the body of our report, to which we agree), the road will be one in all respects such as the government should accept as a first-class railroad within the meaning of the law, as we understand it.

In consequence of the haste in which it has been built, the reason for which is generally known, there are minor defects, such as a deficient height of embankment or depth of excavation at certain points, that the companies should hasten to remedy, so as to reduce the grades; but as the present grades and curves are all below the prescribed standard, we do not consider it our duty to do more than report upon them.

With these remarks we conclude by saying that we dissent from the views expressed by the other two Commissioners with regard to a suggested change in the location of the road, nor do we agree with the remarks that have been made by them concerning the present location. With regard to the other portions of the report we assent to them.

R. S. WILLIAMSON, Brevet Lieut. Col. U. S. A.,
S. M. CLEMENT, Civil Engineer.
Members of Special Commission Pacific Railroad.
Washington, D. C., May 20, 1869.

Dutchess and Columbia Railroad.

The first section (13 miles) of this road was finished last week, and on Friday was duly transferred to the lessees, the Connecticut Western Railroad, of Which the Hon. Wm. H. Barnum is President. The company of the Dutchess and Columbia Railroad was organized in 1866, under the general Railroad law of New York, and the road was originally projected to Columbia County. The line, as now marked out, is from Fishkill, near Denning's Point, northeastwardly through Fishkill, East Fishkill, La Grange to Pine Plains, thence eastwardly to Millerton, on the Harlem Railroad, near the Connecticut State line, there to connect with the Connecticut Western. The capital stock of the road is $1,000,000, all subscribed. The work was begun in November, 1867, and is being rapidly pushed forward. The country traversed by the road is about one-tenth wooded, four-tenths grazing land, and five-tenths well cultivated farms. Along several miles of the route are extensive hematite iron ore beds, from which shipments of great quantities of ore will be made to the various furnaces along the Hudson, as well as to those on Lake Champlain, and in Pennsylvania, as it is of a kind which improves the texture of iron made from other ores. The rails for this road were imported from England, and are laid with what is known as the "Fish joint," the safest connection in use. As much of the country traversed by the new road is suitable for dairy purposes, the farmers are turning their attention more than ever to the manufacture of butter and cheese for market, and much of the profit of the road will be derived from the transportation of that class of freight. When completed the Dutchess and Columbia Railroad will connect not only with the Connecticut Western, but with the Harlem, the Hudson River, the Boston, Hartford and Erie, and other lines, thus forming a most important link in the chain of roads between the Hudson and prominent points to the East, affording shippers great advantages. The Southern terminus is well chosen. Fishkill-on-the-Hudson will one day be a great railroad center. It is situated at the month of Fishkill Creek, a stream bordered by the River Hills, which slope so gradually as to admit of a descent from the highlands of the interior by a moderate railroad grade. Ample space is provided for depot facilities by flats and shoal water half a mile wide from the shore line to the river channel which at Denning's Point is wide and deep enough to float the largest vessels. At Millerton begins the line of the Connecticut Western Railroad, which when completed will extend through Salisbury, Canaan, Norfolk, Winchester and other towns, to the State line of Massachusetts in the direction of Springfield, connecting with the Western Railroad of Massachusetts, now called the Boston and Albany road. This makes the distance from Fishkill to Boston 218 miles. The Dutchess and Columbia Railroad will be finished to Pine Plains on the 1st of next August, and to Millerton on or about the first of July, 1770. The President is George H. Brown, who is also a Director in the Connecticut Western. The Chief-Engineer is O. W. Barnes, who holds the same position on the latter road.—*N. Y. Tribune, May* 31.

Journal of Railroad Law.

COMMON CARRIERS—ACTUAL DELIVERY TO BE ESTABLISHED—LIABILITY ATTACHES FROM TIME OF ACTUAL DELIVERY.

The facts in the late case of Grosvenor *vs.* The New York Central Railroad Company (39 N. Y., 34,) just decided by the N. Y. Court of Appeals are clearly stated in the following opinion by

MILLER, J.—I am of the opinion that the Court erred in refusing to non-suit the plaintiff upon the trial. To render a party liable as a common carrier, it must be established that the property was actually delivered to the common carrier or to some person duly authorized to act on his behalf. The responsibility of the carrier does not commence until the delivery is completed. [Angell on Carriers, § 129; Story on Bailments, § 532.] It is not enough that the property is delivered upon the premises, unless the delivery is accompanied by notice to the proper person. [Packard *vs.* Getman, 6 Cow., 757; 2 Kent Com., 604; 1 Pars. on Con., 654.] The liability of the carrier attaches only from the time of the acceptance of the goods by him. [Story on Bailments, § 533; 6 Cow., *Supra.*] To complete the delivery of the property within the rules laid down in the authorities, I think it is also essential that the property should be placed in such a position that it may be taken care of by the agent or person having charge of the business, and under his immediate control. It must be accepted and received by the agent. It appears in the case at bar that the cutter of the plaintiff was placed upon the platform of the defendant's freight house by a servant of the plaintiff, the freight having been previously paid, to be transported to Buffalo. At the time when it was thus left, a baggageman in the defendant's employment, who was then engaged in sweeping out the depot, was notified that there was some freight to go to Buffalo in the noon train. The servant of the plaintiff testifies that he had seen this person receive and put freight on the cars, and at this time he apparently had charge of the depot, although the proof on the part of the defendant shows that another employee was the real freight agent, and the person with whom the contract was made for the carriage of the property, and that the baggageman had no authority to receive it. Upon this state of facts, I am inclined to think that the plaintiff had established sufficient *prima facie* to submit to the jury the question whether the baggageman was authorized to receive the property, and whether the notice to him was of itself sufficient. Persons dealing with railroad corporations, and parties engaged in the transportation of freight, have a right to consider that those usually employed in the business of receiving and forwarding it, have ample authority to deal with them. It is enough to establish a delivery, in the first instance, to prove that a person thus acting received and accepted the property for the purpose of transportation, and even although it subsequently appears that another employee was actually the agent having charge of this department of business, yet the company who sanction the performance of this duty by other persons in their employment, and thus hold out to the world that they are authorized agents, are not at liberty to relieve themselves from responsibility, by repudiating their acts. So far then as this branch of the case is concerned, it was at least a question of fact, to be submitted to the jury under proper instructions, whether the baggageman of the defendant, to whom it is claimed by the plaintiff the cutter was delivered, was the agent of the defendant, duly authorized to receive the same, and whether notice of its delivery was given to him as such agent. But, whether he was such agent, or the duty of receiving freight devolved upon another person, the defendant could not be held liable under any circumstances, without an actual and complete delivery of the property into the possession of the corporation, and under its control. This, I think, was not done. The undisputed testimony shows, that the cutter was placed upon the platform, and that within two or three hours afterward, it was carried away and broken to pieces by a passing train of cars. The fact that it was thus carried away, evinces, that it was carelessly exposed by the plaintiff's servant; that the destruction of the cutter was occasioned by his negligence, and that the delivery was not as perfect and complete as it should have been.

The accident would not have happened had the cutter been placed beyond the reach of passing trains. It was not enough that the agent was notified to make out a valid acceptance and delivery. The place of delivery was important, and it was equally essential that due care should be exercised. Suppose the servant had left the cutter on the track of the railroad, and notified the agent, would the defendant have been responsible? Clearly not, for the apparent reason that there was no delivery upon the premises, no surrender of the property into the possession of the agent. Until it was actually delivered, the agent was under no obligation to take charge of the property, even if notified. It is apparent that the plaintiff was in fault in not delivering the property to the defendant, and in leaving it in an exposed condition, which caused its destruction, and having failed to establish this material part of his case should have been non-suited. As a new trial must be granted for the error stated, it is not important to examine the other questions raised and discussed.

Judgment reversed, and new trial granted, with costs to abide the event.

Railroads in the Northwest.

Work has been resumed upon the unfinished portion of the Minnesota Central Railroad, between Austin and the Iowa line, and it will be completed by the time the Cedar Valley Road is finished to the north line of Iowa, which it is asserted, will be completed in a few months. It is thought the whole line of road will be completed through to Burlington, Iowa, another year.

The extension of the Winona and St. Peter Railroad from Waseca, its present terminus, to Janesville, a distance of fourteen miles, is being rapidly pushed forward to completion. The grading for the whole distance is nearly completed, and track-laying will commence in about two weeks. Mr. DeGraff intends to have the road ready for use on or before the middle of July next. It is probable that a further extension westward toward the Minnesota River will immediately follow the completion of the road to Janesville, though it has not yet been definitely decided upon.

The contract for putting down the iron on the Burlington, Cedar Rapids and Minnesota Railroad has been let. Track-laying will begin at Burlington and Cedar Rapids about the 1st of June, and it is expected to have the whole line (one hundred and sixty miles) completed from Burlington to Waterloo by the 1st day of January next. The company has already purchased 5,000 tons of iron, four locomotives, and a number of flat cars.

The contract for grading, grubbing and placing ties ready for the iron for a distance of fourteen and a quarter miles on the Grand Rapids and Lake Shore Railroad, from Muskegan to Nunica, has been let to a party in Buffalo for the sum of $80,000.

Kankakee county, Ill., votes on the 14th of June, on the question of subscribing $100,000 to the capital stock of the Kankakee and Illinois River Railroad.

When the Marshalltown, Iowa, people found their North and South Railway killed by the Supreme Court ruling, they were promised that upon their raising $32,000 by private subscription, the work should go on. Schools were closed, business suspended, and everybody went to talking railroad; the band was out on the street, and, after a sharp canvass, it was found that $35,000 had been subscribed; and the road is now assured.

The Peoria, Pekin and Jacksonville Railroad will be completed from Peoria to Jacksonville by the 15th of June.

Randolph county, Missouri, has a prospect of of being literally 'cut to pieces' with railroads. First, it has the main line of the North Missouri Railroad (completed); second, the West Branch of the same road (completed); third, the Hannibal and Moberly Railroad (under construction); fourth, the Mississippi and Missouri River Railroad (under construction); fifth, the Tebo and Neosho, which crosses the Missouri river at Booneville, and runs by way of Fayette, Roanoke and Mount Airy to Moberly.

The railroad spirit is fully aroused in Milwaukee. It is evident that a road will be built to Burlington; the Monroe Road will be extended to Dubuque; the Fond du Lac Air Line will be looked after; and other roads receive attention.

At a meeting recently held at Brownville, Neb., a recommendation that the County Commissioners of Nemaha county submit to the legal voters a proposition to issue county bonds to the sum of $150,000 with eight per cent. interest, payable in twenty years, to be issued, used and expended as the work on the Nebraska Trunk Railroad progresses in said county, and to aid such work therein, was adopted unanimously.

The contract for grading the Rockford, Rock Island and St. Louis Railroad, from the bridge across Rock River to Moline, a distance of about thirteen miles, was awarded on the 20th.—*Chicago Tribune.*

A Gorgeous Car.

One of the most elegant silver palace cars we have seen came to the city yesterday from the shops of the Pittsburgh, Fort Wayne and Chicago Railroad Company, at Fort Wayne, Indiana, where it was built. The car is built on the Pullman patent and embraces all the latest improvements. The exterior is finished in magnificent style, painted bright and beautiful, and so highly finished as to faithfully mirror objects about it. The car rests on two staunch six-wheel trucks, supplied with the best of elliptic springs, made out of Pittsburgh steel by the "Pittsburgh Cast Steel Spring Company," for which Mr. A. FRENCH is the agent. The bottom of the car has double flooring of heavy timber and lighter boarding running transversely. The floors are carpeted with the richest moquet in bright light colors, in keeping with the elegant upholstery of the silver armed seats. Along the ceilings are bars of silver the full length of the car, and here and there are ornamental designs in silver to please and relieve the eye. The lamps are all silver, and of fine cut glass. The entire wood work is black oiled walnut, with gold trimmings. The windows are of fine plate glass, and between every pair is an adjustable table which can be set up firmly for writing purposes, reading, card-playing or games between passengers *vis-a vis.* The mirror between the windows is so constructed that by

pushing a spring it disappears and a lamp in a neat little silver cove is brought to view.

The berths are perfectly arranged, and would seem to render a sleepless night impossible. Altogether the car is a gorgeous specimen. Mr. Wm. Wadington, the master builder of the Fort Wayne establishment, designed it, and superintended its construction. It cost about $18,000, and is intended to run on the Pacific Railroad. Another car, similar in every way, was constructed at the same time, and left Chicago yesterday for San Francisco.—*Pittsburgh Chronicle, May* 28.

Railroad from Milwaukee to Burlington.

There is a general and wise conviction in our city, that we need more railroads with the country, particularly where we can obtain connections at comparatively little expense. We have long thought that a direct connection with the Racine and Mississippi railway *via* Burlington, in Racine county, would be one of the most fortunate events for this city. By a short line—merely thirty miles—we obtain the use of a road of 154 miles in length, which has connections with southern Iowa and Nebraska, and which now extends to the coal fields of Rock Island. It would bring to Milwaukee a new and large trade in corn, and there is not thirty miles of road in any direction we could construct which would be of so much advantage to Milwaukee.

Three years ago we raised a sufficient sum to make the connection, but it fell through, and for what cause no one seems to know. So soon as this road is extended from Port Byron to Rock Island, only ten miles, we shall have a direct connection with the Mississippi and Missouri Railroad, which is now completed to Omaha. This would give us a connection with the Union Pacific, and by this route Milwaukee is almost as near to Omaha as Chicago. The distance from Chicago to Rock Island is 182 miles. The distance from Rock Island to Milwaukee *via* the Western Union R. R., that is the Racine and Mississippi, via the new route direct to Burlington, will not exceed 194 miles. At Fulton the Western Union connects with the Chicago, Iowa and Nebraska. Fulton would be 160 miles from Milwaukee. Thus we would have two connections with Omaha by our connection with the Western Union at Burlington.

Open the map and it will be perceived that the Western Union R. R. has one of the shortest routes to the Mississippi of any road west of Lake Michigan. It passes through a country of boundless fertility, and the productions along the line must yearly increase.

The Fond du Lac connection is important; that, too, we must have, but the connection *via* Burlington with the Racine and Mississippi is one of those manifest necessities which surprises us that it has so long been delayed. We make the averment that there were never 30 miles of railway connection so important offered to any city in the United States.—*Mil. Wis., May* 28.

To be Bridged.

At a recent meeting of the freeholders of Burlington, N. J., a resolution was passed appropriating thirty-five thousand dollars for the construction of a bridge across the Rancocas river, connecting Delanco and Riverside. The completion of this structure will make a direct road from Burlington to Philadelphia—a route which will be taken by all the residents along the Dalaware front. Yesterday the committee,consisting of Abraham Perkins, E. B. Marter, William R. Herbert, J. H. Bartlett and Joseph Wills, met at Delanco and examined several plans for the proposed structure. As soon as the proposals have been received, and the plan determine upon, the work will be commenced.—*Phila. News.*

☞ A great effort will be made by the people of Hartford to build the Maryland Central Railroad. Meetings will soon be called along the route proposed for the furtherance of the object, and great interest is manifested, especially by the friends, who are settled through this country.

FOR SALE.

THE JERSEY CITY LOCOMOTIVE WORKS CO —in order eto lose their concern—offer for sale all the Machinery, Tools and Engineering Plant, situated at their Works, corner of Morgan and Steuben Streets, Jersey City.

The machinery was procured from the best Manufacturers and is in perfect order. A descriptive Catalogue, with price list, will be forwarded upon application to the Company's Agent,

WM. S. AUCHINCLOSS,
Jersey City, N. J.

THE OFFICE OF
THE MEMPHIS, EL PASO AND PACIFIC RAILROAD COMPANY
IS PROVISIONALLY LOCATED AT
5t21 **23 BROAD STREET.**

To Contractors.

SEALED PROPOSALS will be received by the undersigned until THURSDAY, July 1st, at the office of the ELIZABETH AND PADUCAH RAILROAD COMPANY, in Elizabeth, Hardin county, Kentucky, for the GRADUATION, TRESTLING, BRIDGE and CULVERT MASONRY, including 5,000 cubic yards of Bridge Masonry at Green river, on 40 miles of said railroad, between the 52d section and the town of Greenville, in Muhlenburg county. The work can be reached by steamboat from the Ohio river, to South Carrollton and Rockport, on Green river, or by rail to Bowling Green, and from thence by steamboat to Rockport. Specifications and profiles of the work can be seen at the Company's office in Elizabethtown on and after June 15th.

GEORGE MACLEOD,
Chief Engineer.

Elizabethtown, Ky., May 29, 1869.

To Railroad Contractors.

OFFICE MAYSVILLE & LEXINGTON R. R. Co., N. D. }
MAYSVILLE, KY., MAY 11, 1869. }

ON and after Tuesday, June 1st 1869, this company will be ready to exhibit profiles and specifications for the construction of the Railroad from Maysville to Paris, at least as far as Carlisle, thirty three miles, and will receive bids by sealed proposals in such form and for such portions of the work as contractors may propose, either by the section or for the whole road, until Thursday, June 24th, 1869. Cross-ties and iron will be required for about half the road during the present season, and the whole to be completed as rapidly as practicable. The subscriptions of stock justify the assurance that the Company can promptly comply with their contracts.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

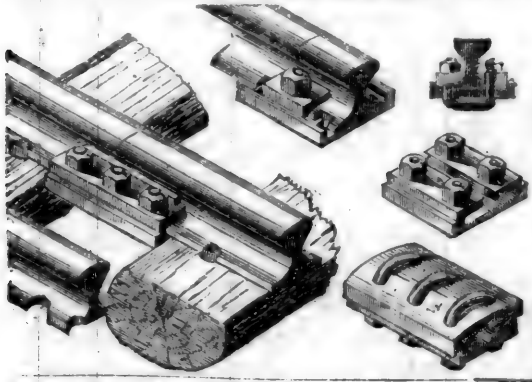
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

FISHER'S PATENT
Wrought Iron
RAIL JOINTS,

MADE BY

FISHER & NORRIS,
TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

A FOREIGN YOUNG MAN, HAVING A THOROUGH knowledge of Civil and Mechanical Engineering, acquired in France, Germany and Holland, desires an appointment. Salary no object. Apply to A. R., Room 46, No. 176 Bleecker st., New York. 2t20

OUR MACHINE-SHOPS.

A recent visit to the establishment of WILLIAM D. ANDREWS & BROTHER, No. 414 Water street, put us in possession of the following facts in relation to their manufactures. Their works were established in 1858, and are devoted exclusively to the manufacture of original patented inventions and the tools used in their construction.

Among their successful inventions are the following:

ANDREWS' PATENT CENTRIFUGAL PUMP.

This Pump, by means of *wings* upon a Conical Revolving Disc, communicates Centrifugal Motion to the water, which is carried through an easy curved passage to the discharge pipe. There being no angles in the passages, no rubbing surfaces in the pumps, and the flow of water being continuous in one direction, they require but very little power to run them, and possess durability far beyond any pumps we have seen. They are especially adapted to irrigating and draining lands, WRECKING, freeing coffer dams, dry docks, &c., as they can pass large quantities of sand, gravel, &c., without injury or derangement. These pumps have a world-wide reputation and are in use in every quarter of the globe. Fourteen sizes are made, of capacities ranging from 90 gals. to 40,000 gals. per minute.

ANDREWS' PATENT OSCILLATING ENGINE.

This engine effectually overcomes the objections to the usual forms, caused by the difficulty of rendering the trunnions steam-tight, and the tendency of the piston to wear the cylinder oval. The piston has no elastic packing, and its rod passing through glands in both cylinder-heads keeps it out of rubbing contact with the cylinder, so that after five years' use the tool-marks are not worn from it.

The trunnions, which are solid, revolve in trunnion-boxes, and are capable of adjustment by set-screws, when required. This firm also make double engines, which having the cylinders set at right angles, are without dead-points, and which can be instantaneously reversed by a simple valve turning the steam into the exhaust pipe, and the exhaust into the steam pipe. The cranks are all bent, so as to leave the fibre of the metal continuous, thus preserving the strength of the shaft. Nearly a thousand engines have been built by this firm within nine years, and they have become well-known and very popular. The cylinders made for these engines are also used as vacuum-pumps.

ANDREWS' PATENT SMOKE-BURNING TUBULAR BOILER.

In this boiler the fire place extends over the entire horizontal area, with the exception of the water-legs, which entirely surround it. The tubes extend the entire length of the boiler in two series; the first being in the water space below, and the return series in the steam space above, the heated gases passing from the fire-place into a breeching in which they are mingled with oxygen admitted from the atmosphere, creating a thorough combustion of the gases, and preventing all smoke; from the breeching the highly heated gases pass in a bright flame through the lower series of tubes in the water space, (extending through the entire length of the boiler,) are received into a second breeching and returned by the second series of tubes in the steam space, again through the boiler, and escape by the smoke pipe at the rear. By this arrangement a large per centage of fuel is saved, the nuisance of smoke avoided, and the steam super-heated to the proper degree for economical use in the engine, while the boiler occupies much less room than the ordinary tubular varieties having the same power.

ANDREWS' PATENT DIFFERENTIAL FRICTION HOISTERS.

These machines are made portable or stationary as required, and are peculiarly valuable in establishments where variable weights are to be raised, as they may be instantaneously changed to run at different velocities without stopping. The drum-shaft, carrying two or more large grooved wheels of different diameters, revolves in bearings in eccentrics at each end, by turning which, either wheel is instantly thrown in or out of gear with one of the smaller grooved wheels or pinions upon the Engine Shaft, each of which gives a different velocity to the drum.

A weight can be raised, lowered or held stationary, even without the use of a brake, (with which each is provided,) by merely changing a lever back and forth, the engine being in continuous motion, and all is accomplished entirely without noise.

These hoisters are made capable of lifting from 1,000 to 25,000 pounds each, and, as arranged with the oscillating engines, are very light and strong, and occupy less room than any other style of the same capacity.

The machines built by this firm have a standard reputation, and it is claimed that for simplicity of design, economy of working, compactness and excellence of workmanship, they are each unequalled for their several purposes.

About one hundred men are employed, and are capable of producing one engine per day, and the other machines in like proportion.

Commerce and Navigation.

From the monthly report of the Bureau of Statistics, just issued, it appears that the imports into the United States during the quarter ending December 31, 1868, amounted to $82,969,913; and the total imports for the year 1868, to $381,336,657. During the same periods the exports amounted to $11,111,840 and $341,347,528; and the re-exports to $4,225,261 and $20,835,802, respectively.

The proportion of the foregoing carried by

American and foreign vessels, during the three months ending Dec. 31, 1868, was as follows:

	American.	Foreign.
Imports	$24,963,657	$58,056,756
Exports	40,917,009	70,194,831
Re-exports	1,954,350	2,227,111

It will thus be seen that over 57 per cent. of our imports, 41½ per cent. of our domestic exports, and 90 per cent. of our re-exports for the period mentioned have been transported in foreign vessels.

The total value of domestic commodities remaining in warehouse Dec. 31, 1868, was $39,722,872.

The number and tonnage of American and foreign vessels entered into and cleared from the United States in the foreign trade during the years 1867 and 1868, was as follows:

Entered—

	—American Vessels.—		—Foreign Vessels.—	
	No.	Tons.	No.	Tons.
1867	9,795	4,028,493	15,956	4,115,575
1868	10,094	3,387,898	17,875	4,812,457

Cleared—

	—American Vessels.—		—Foreign Vessels.—	
	No.	Tons.	No.	Tons.
1867	9,723	4,218,464	16,420	4,369,689
1868	9,858	3,412,209	18,143	5,007,521

Tonnage of vessels engaged in the coastwise trade:

	Entered.	Cleared.
1867	24,013,114	23,365,296
1868	25,937,259	25,108,375

Pacific Railroad of Missouri.

The earnings of this road for the fiscal years ending February 29, 1868, and February 28, 1869, were as follows:

	1868.	1869.
From passengers	$1,264,398 01	$1,302,357 81
" freight	1,584,749 59	1,676,469 16
" express	109,483 79	62,715 32
" mails	45,049 92	45,049 92
	$3,003,681 31	$3,086,591 71
Expenses, viz:		
Repairs of road bed	$60,033 36	$37,525 96
" track	550,656 47	586,463 56

Taxes on passenger receipts	32,652 41	30,417 64
Expenses for trains	30,561 67	20,308 08
All other expenses	37,117 95	58,629 57
	$2,030,626 38	$1,959,653 17
Net earnings	$973,054 93	$1,126,938 54

Compared with the previous year, the gross earnings of 1868-'69 show an increase of $82,910 40, with a decrease in expenses of $70,973 21—making the increase in net earnings $153,883 61. The operating expenses in 1868-'69 were 63.49 per cent. of gross earnings; in 1867-'68 they were 67.60; in 1866-'67, 73.10.

The gross earnings of the Missouri River Railroad, between State Line and Leavenworth, 26 miles, for the year ending Feb. 28, 1869 were: from passengers, $46,999 70; freight, $24,200 32; mails, $2,599 92—total, $73,799 94.

The gross earnings of the Osage Valley and Southern Kansas Railroad, between Tipton and Boonville, for the four months ending Feb. 28, 1869 were: from passengers, $5,283 72; freight, $2,295 71—total, $7,579 43. The president in his report says:

In accordance with the provisions of an act of the General Assembly of the State of Missouri, authorizing the purchase by the Pacific Railroad Company of the claim of the State upon the road to five millions of dollars in State bonds, that amount of bonds has been paid to the State, and a deed dated October 10th, 1868, conveying to the Pacific Railroad Company all claims, title and interest which the State of Missouri had upon said railroad, has been executed by the Governor, and delivered to the railroad.

To provide for this purchase from the State of Missouri, and take up the Dresden bonds as they mature, the company has issued seven millions of dollars in first mortgage gold bonds, payable twenty years from August 1st, 1868, with coupons payable semi-annually, in gold, at six per cent. per annum, free from internal revenue tax.

Only $3,599,000 of the seven millions have been disposed of, and the members of the Finance Committee, to whom these negotiations were intrusted, are still liable, including interest, for some $1,230,000, borrowed by them to purchase Missouri State bonds.

If from the $3,441,000 in first mortgage bonds now unsold, $500,000 should be held to provide for that amount of Dresden bonds maturing April 1st, 1870, and the remaining $2,941,000 sold at the rates heretofore obtained, a sufficient sum would be realized to pay the liabilities incurred by the Finance Committee, also the entire present floating debt of the company, and, except that a change of gauge has become necessary, from the requirement of business as well as the provision of the law under which the purchase of the State claim was made, the company would within two months, probably, be relieved from all liabilities except the funded debt of $7,879,000.

In preparation for the change of gauge contracts have been made for the construction of 46 locomotives, 350 cars, 100 sets of trucks, and 1,500 tons of rails, to cost in the aggregate $1,090,000, to which must be added the expense of changing the present rolling stock, and removing the rail, amounting to $130,000, requiring a total expenditure of $1,220,000, for which some provision must soon be made. Of the same, $320,000 can be realized from the unsold real estate bonds, and probably $300,000 from the earnings of the road; but it will be necessary to provide $600,000 from some other source. From the improved financial condition of the company a more economical operation of the road has become practicable, but there should, if possible, be no floating debt; and if this $600,000 can be funded by the close of the current fiscal year, (with the same prosperity as that of the past,) the railroad will be entirely finished, fully equipped, and earning $1,100,000 net per annum, with no very material liability, except a funded debt of $8,800,000.

Notwithstanding the reduction in rates for transportation of both freights and passengers, the earnings have increased $82,910 40; while the expenses are reduced $70,973 21, making a net increase of $153,883 61; the total earnings for the year being $3,086,591 71; the operating expenses, $1,959,653 17, and the net earnings, $1,126,938 54; the road having been operated at an expense of 63.49 per cent. of the gross earnings.

Besides the amount of $257,527 83 expended upon account of construction, and the expenditures for interest and purchasing the State claim, the floating debt other than that incurred for purchase of Missouri bonds, has been reduced $334,000.

The Osage Valley and Southern Kansas Railroad, extending from Tipton to Boonville, twenty-five miles, was opened for business in November last, and is now operated by this railroad under a lease for the term of thirty years; that company to receive thirty-five per cent. of the gross earnings upon said road.

Surveys and estimates have been made for a railroad from Pleasant Hill to Fort Scott, and new connecting lines will soon be opened from Sedalia to Lexington, and between Leavenworth and Atchison.

As another competing road to Kansas City is now in operation, and several different lines are being constructed which will compete for the business from the Southwest, now controlled by this railroad, it becomes very important that the affairs of this company should be conducted with great energy and enterprise, and every effort made to extend its connections, and to develop and command the business which may otherwise be diverted by rival lines.

It is most especially desirable that roads from our line to Fort Scott, and between Pleasant Hill and Lawrence, or Topeka, should at an early day be either constructed or operated under the control of this railroad.

The road bed, superstructure, rolling stock and property of the company, as well as its business and prospects, are now believed to be in a better and more prosperous condition than at any previous period; and if its Directory shall be enabled to offer favorable terms for leasing the branch roads, now about to be constructed, and extend its connections in Kansas, and with the Kansas Pacific Railroad, it will soon become one of the most important enterprises in the country, rendering it a source of profit to the stockholders, and adding largely to the wealth and prosperity of our city and State.

The company have 20 passenger and 32 freight locomotives; 48 passenger, 6 mail, 20 baggage and express, 185 stock, 268 box, 216 flat, 29 caboose, 1 paymaster's, 2 magazine and 4 tool and wrecking cars. The Sleeping Car Co. have on the road 4 sleeping coaches; and the St. Louis and Pacific Express Freight Line, 60 box cars.

Number of miles run, passenger trains, 581,385; freight and switching, 874,385; gravel and wood, 138,765—total, 1,594,535, at a cost for fuel, oil and waste, engine and firemen, labor and materials for repairs, of $447,771 76. Miles run to cord of wood, 35.4; to ton of coal, 30.6; to pint of oil, 16. Cost per mile run with wood for fuel, 12.51; with coal, 10.26—average, 11.39. Total cost per mile run, 28.39.

The receipts from all sources, and expenditures during the year ending February 28, 1869, were:

Balance March 1, 1868		$147,297 33
Received for county bonds and warrants		30,670 82
Received for land note		230 43
Received for sale of town lots		2,993 52
Received for transp	$3,023,988 58	
Less exp. and repairs	1,959,653 17	
		1,064,335 41
Received for Real Estate Security bonds sold		30,000 00
Received for Pacific Railroad bonds sold	$3,544,000 00

President.—JAS. H. LUCAS.

Vice President.—DANIEL R. GARRISON.

Directors.—Hudson E. Bridge, T. B. Edgar, D. R. Garrison, Jas. Harrison, Oliver A. Hart, R. J. Lackland, Jas. H. Lucas, H. L. Patterson, Chas. H. Peck, Geo. H. Rea, E. O. Stanard, Benj. Stickney, George R. Taylor.

Secretary and Treasurer.—J. C. PORTER.

Chief Engineer and Sup't.—H. C. MOORE.

☞ The Kansas City, Fort Scott and Gulf Railroad has been opened to Paoli, Kansas. It is expected the road will be completed to Fort Scott by the middle of August.

☞ The Cincinnati City Council have voted unanimously to make Chattanooga the terminus of the proposed Southern Railroad; a popular vote is to be taken in the city on the 28th inst.

The Rogers Locomotive and Machine Works.

The first Locomotive, the "Sandusky," was turned out at these Works, at Paterson, New Jersey, in June, 1837, (then under the firm of Rogers, Ketchum and Grosvenor,) after sixteen months of labor. In this engine was first introduced several improvements, among which we may mention the cone in the smoke-pipe, which was curled over at its base, the cone being perforated with small holes in order to distribute the force of the blast equally over the surface of the wire bonnet. The driving-wheels, which were of cast iron with wrought iron tyres, were cast with hollow spokes, rim and hub, except the spokes opposite to the crank, which were cast solid in order to counterbalance the cranks. The engine was also provided with double eccentrics and hooks on the outside of the frame, and altogether was a very neat and tastefully finished locomotive. Mr. Rogers was the first to use expansion braces; he was also among the first, if not the first, to build ten-wheel engines; and also to appreciate and adopt the link motion at a time when it was pronounced by many to be a humbug. It has always been a special feature in the Rogers engines, to give ample boiler, with large steam room, and they have always been noted for their durability and economy of fuel.

In 1856, at the death of Mr. Rogers, these Works had turned out about 800 engines, when the Works passed into the hands of an incorporated company under its present name, and W. S. Hudson, Esq., was chosen Superintendent, and under whose management the Works continue at the present time. The Works have been enlarged, and other extensive additions are still in progress to keep pace with the demand for engines. Mr. Hudson has introduced many valuable improvements in locomotives, among which we may mention the application of cross equalizing levers to four and six wheel engines, so as to make them equivalent in action to a "three-legged stool" or tripod; also a system of equalizing levers between driving and truck wheels, which has been successfully applied to engines with six drivers and one pair of truck wheels, also to engines with four driving wheels, and a single radiating truck at each end, for which Mr. Hudson has procured a patent. Several of these engines have been built, and are in successful operation. We wish to call especial attention to this engine, as filling all the requirements of an engine which will run equally well either end first. We will quote what Mr. Hudson says about it:—"The locomotive is on eight wheels, four driving and four truck wheels. The truck wheels are arranged in two radiating trucks, one at each end of the locomotive; each truck is connected by a combination of levers with each pair of driving wheels. The front truck and driving wheels are equivalent in action to a centre-bearing truck, and the rear truck and driving wheels to a side-bearing truck. With this arrangement all the wheels accommodate themselves to the vertical inequalities of the track, without changing the distribution of the weight, and without interfering with the radiating of the front and rear truck wheels of the engine. The fixed wheel base may be made very short, so that the engine will pass readily and easily around curves of very small radius without that jumping motion which is inseparable from the ordinary four wheel switching engine, and without danger of getting off the track. The wear of the driving wheel flanges will also be much lessened, and the danger of running off on that account will be very much diminished. For these reasons, the engine is especially adapted to switching, construction and branch traffic, running, as it does, equally well either end first. The locomotive is very easy on the track, the dirtribution of the weight and the accommodation to all inequalities of the rail, whether vertical or lateral, being perfect."

Mr. Buckhout, in his report on the New York City Central Underground Railway, recommends the adoption of this style of engine, with some modifications as to condensing the steam, &c., as being better calculated to supply the want for motive power, than any of the plans which had been brought to his notice, and in his report, pages 19 and 20, describes the general design, and comments as follows:—"Gauge, 4 feet, 8½ in. Fuel, anthracite coal or coke. Cylinder, 14 by 22 in., four 56 in. driving wheels, steel tyres, all flanged. Two single axle radiating trucks, one at each end, wheels 30 in. diameter. Furnace of steel; 126 two-inch flues, 10 feet 5 in. long. Tank on each side of engine to contain 1500 gallons. The engine also to be supplied with a blower or steam jet. The engine to be so arranged as to throw the exhaust steam into the tanks so as to condense it, or throw it up the chimney for the purpose of blast for raising steam, and so that the engineer can make the change *instantly* as required. This engine will take 80 tons in addition to its own weight, (68,000 pounds in running order,) with 1500 gallons of water in the tank, and 600 pounds of coal, up grades of 1 in 39, or 38 feet per mile, with a pressure of steam as low as 80 pounds per inch, (if the steam should get so low,) cutting off at 60 per cent. admission, it being intended to carry a maximum of 130 pounds per inch. About 1400 gallons of water will be required for the condensation of the steam for the distance of two miles, consequently it would require changing every four miles, if the steam were condensed for half that distance. The tanks to have a discharge valve, by which the water can be let out quickly, when it requires changing. The fixed wheel base to be 6 feet 9 in., and the whole base including the radiating trucks at each end, to be about 21 feet 9 in. With this arrangement the truck wheels will not require to radiate over 34 inches from a straight line, on curves of 200 feet radius, which is much within the limits of its capability. With equalizing levers, as applied to this description of engine by Mr Hudson, two thirds or more of the weight can be carried on the drivers, and the arrangement is such as to accommodate itself to all the vertical and lateral undulations of the track without varying the distribution of the weight on the wheels; it is also arranged so as to be equivalent in action to a four wheel centre bearing truck at one end, and to a four wheel side bearing truck at the other end. In addition to these properties the engine can be run either end foremost with *great facility and equal safety:* a feature not embraced in any four driving wheel single truck engine. It has therefore special advantages in saving the time usually occupied in turning an engine around so as to run truck foremost. It has another advantage. The trucks do not deviate from the centre line of engine nearly as much as a four driving and four wheel swing truck engine does on the same curve, being some 50 per cent. in favor of the double track.

The Rogers Locomotive Works are adding facilities to enable them to turn out fifteen to twenty locomotives per month; they are now producing 10 or 12 locomotives per month. They have furnished a large number for the Union and Central Pacific roads, and are still building for those lines. Two of their engines, the "Success, No. 156," and the "Excelsior, No. 157," were built for the Central Pacific, to make the first through trip from the Atlantic to the Pacific shores, and their whistles have already been heard sounding through the Sierra Nevada mountains. These Works have also furnished many for South America, to climb over the Andes mountains, over grades of 264 feet per mile. The good working qualities of the Rogers engines are well understood and appreciated by the engineers, with whom they are great favorites; they are tasteful in design, and in finish and ornamentation second to none others. These Works are using steel largely in their engines, both for tyres, axles, boilers, slides, crank pins, and for many other parts.—*Am. R. W. Times.*

☞ The New Jersey Western Railroad, now constructing, will be running from Paterson to Pompton and Bloomingdale this year.

Vicksburg and Meridian Railroad.

The earnings of this road for the fiscal years ending February 29, 1868, and February 28, 1869, were as follows:

	1868.	1869.
From passengers	$164,500 77	$147,555 32
" freight	272,273 70	194,199 55
" mails	10,738 12	12,633 73
" incidentals	25,876 16	36,014 67
	$488,407 02	$390,403 27

The expenses in 1868–'69, were:

Conducting transportat'n	$54,075 83	
Motive power	60,687 54	
Maintenance of way	91,420 80	
" cars	12,532 47	
Contingent expenses	1,253 30	
General salaries	12,160 44	
		232,130 38
Net earnings		$158,272 89

Compared with the previous year the gross earnings show a decrease of $98,403 75, with a decrease in operating expenses of $133,909 55—making the increase in net earnings, $35,505 80. The expenses were 59½ per cent. of gross earnings. In reference to the funded debt of the company the report says:

In the readjustment of the debt of the company early in 1866, it was found necessary to increase the mortgage debt to three millions, two millions having been the previous limit. Consequently a new mortgage for that amount was created, and the original mortgage debt was merged into it—together with the bonds given for arrears of interest, which had accrued between 1861 and 1867, and also all the debts of the company then outstanding having no mortgage security, so far as the holders were willing thus to convert them.

The intention being to consolidate all the debts of the company under one general mortgage, and to issue bonds under the cover of that mortgage, payable in 1890, bearing seven per cent. interest—preserving unimpared the pre-existing liens and priorities of the old bonds, for which they were substituted. With that view four classes of bonds, secured by the three million mortgage, have been issued.

The grade, and security, belonging to each class, is distinguished and expressed by the superscription or endorsement, placed on the back of the new mortgage bonds, and further by the color of the ink, in which the endorsements are printed.

For instance—the first mortgage bonds are endorsed in red ink, giving the name of the Trustees and the date of the original mortgage, indicating the security which belongs to that description of bond, and constitute the first class.

Those of the second mortgage are endorsed in blue ink, with like reference to date and Trustees appertaining to the original second mortgage, and they are the second class.

Those of the third mortgage, in like manner, are distinguished, and they are endorsed in black ink, and are the third class.

The fourth mortgage are the bonds given for arrears of interest and for common debts, then outstanding, and they have no endorsement, and are the fourth class, under the three million mortgage.

The services of the Pennsylvania Co. for the Insurance of Lives, &c., 304 Walnut street, Philadelphia, were engaged by the Trustees of the three million mortgage to make the necessary settlements, and to take up all the old bonds and debts of the company, with the seven per cent. bonds secured under that mortgage placed in their possession for that purpose, and also to safely keep all the bonds and other evidences of debt against the company, together with the collaterals taken up by such conversions and settlements. Up to the last report from that company, the following amount of new seven per cent. bonds have been paid out—including a portion paid out for conversions and settlements, made with the Southern creditors by this company:

First class, red endorsed bonds	$520,500
Second class, blue endorsed bonds	668,000
Third class, black endorsed bonds	106,000
Fourth class, unendorsed	623,900
	$1,918,400

The floating debt of the company at the close of the past fiscal year was as follows:

Bills payable	$161,465 60
Due on back pay rolls	20,784 19
Due on open account	16,765 36
	$199,015 15

WESTERN CONNECTIONS.

The North Louisiana and Texas Railroad formerly known as the Vicksburg, Shreveport and Texas Railroad was completed in 1861 from Vicksburg to Monroe, La, a distance of 75 miles. It was seriously damaged by the war, has also been much impaired by natural decay, and the road has not been used for several years. The present owners are now earnestly at work repairing it, and it is stated by well informed persons, that it will be placed in running order between the Mississippi river and Monroe in time for the fall business of 1869.

The distance from Monroe to Shreveport is also about 75 miles, upon which line but a small amount of work has been done. When built to the latter point it will connect with a railroad in operation between Shreveport and Marshall, in Texas, a distance of about 40 miles.

The State of Texas made munificent grants of land as an inducement to the Government and capitalists to build the line through the State, from Marshall to El Paso. Several millions of acres of the most valuable land in the State were donated for that object.

If this road were built from Vicksburg to Shreveport it would be a powerful lever for reinstating the public interest in behalf of the Southern Pacific Railroad, on the line of the 32d Parallel.

That will be much the shortest, and least costly route to build between the two oceans, decidedly the cheapest line to maintain and operate, and will be greatly preferred by passengers and shippers on account of its passing through a country blessed with a mild and delightful climate at all seasons of the year. In passing through North Louisiana and Texas, it will develope a region of the most fertile lands in the United States—admirably adapted to the production of cotton, wheat, corn, and affording an unlimited supply of cattle, besides which, it would open the way to the rich mineral regions that abound in Arizona. The line, starting from Savannah or Charleston, would intersect the great Father of Waters at Vicksburg, 673 miles from the former, and about 770 from Charleston, thence through the rich alluvial lands of North Louisiana to Shreveport, distance about 160 miles—thence due West through the most productive and populous portion of Texas to El Passo, about 750 miles—and thence to San Diego, in California, about 670 miles.

In a very able Majority Report submitted to the U. S. Senate on the 19th of February, 1869, by Mr. Stewart, chairman of the Committee on the Pacific Railroad, on the policy of extending Government aid to additional railroads between the Atlantic and Pacific, strong grounds are taken in favor of building two additional trunk lines to the Pacific. The Committee contend that one line is insufficient—that with the present population and business of California, Utah, Colorado, Nebraska, Oregon, Nevada and Dacota, the single track railroad from Omaha to San Francisco will be wholly incapable of performing the service that will be required of it; that the local traffic will immediately become so large, and the through traffic so immense, that when to both of these is added the trade from China, Japan and India, it is clear that a single track railroad cannot possibly do the business that will be crowded on it—the road will clog—and what service will be performed will be done under such disadvantages as to damage the character of the new route from India to Europe, discontent shippers, and make wide-spread trouble.

The Committee are sure, that within a year after the Union Pacific is opened, it will be unequal to the traffic that will be crowded upon it. They object, that the gradients and curves of the line at its passage of the Sierra Nevada, presents difficulties of the most serious character, that six locomotives will be required at these points, to do the work of one elsewhere—and a double track cannot be built except at a duplication of the cost of the road.

These engineering obstructions will of themselves and alone necessitate other railway connections with the Pacific. No single track road, that crosses the Sierra Nevada, will be able to do the duty required of a trans-continental Railway—1,100 miles of the line of the Union Pacific have an elevation of 4,000 feet above the sea—and more than 500 miles of it have an elevation of 7,500 feet above the sea. The Report wisely argues, that a single line will be a monopoly, and that with three lines across the continent, there would be a competition that would keep charges at living rates, and fair profits—that the competition would create an effort to make fast time and punctual running and attention would be given to the comfort and safety of passengers, &c.

The report insists that the South is entitled to a line; that the Southern States are in the Union; that they have the same rights that the Middle States or the Northern States have. They have the right of access to the Pacific on their Parallels of latitude—they have a right to their share of the trans-continental commerce between Asia and Europe—that Norfolk, Charleston, Savannah, Mobile and New Orleans can justly complain of a Middle State monopoly, which pours all this intercontinental traffic into New York and Philadelphia.

The Southern States lately engaged in war are ruined, and impoverished. Their peculiar products of sugar, rice, tobacco, &c., are of the utmost value to the nation. It is sound policy to aid the restoration of the annual production of this wealth, which is confined, by the laws of climate, to the South. To the extent that a Southern Pacific Railroad will stimulate the growth of the peculiar Southern agricultural products, the Northern and Middle States have each a large and direct interest in having it constructed, and the prosperity of the foreign commerce of the United States demands that it shall be constructed.

The arguments urged by the Committee apply with equal force in many respects to the lines projected, both on the 32d and 35th Parallel—the first being the Vicksburg, Shreveport and El Passo route, and the second, the Memphis, Little Rock and Albuquerque route. In regard to the survey made by the officers of the United States Government through Texas for the purpose of making the best location of a line of railroad to connect the seaports of the Pacific with those of the Atlantic. The report of Captain, now General, John Pope, of the U. S. Army, then in charge of the survey through Texas to the Rio Grande, says: "This country exhibits the fact, that the vast deserts between the Valley of the Rio Grande and the frontiers of the Western States contract to their least width along the belt of country between the 32d and 34th. Parallel of latitude—the average distance of six hundred and fifty miles over these vast deserts is here reduced to less than three hundred miles, and along a route where the extremes of heat and cold are absolutely unknown.

He states that for 311 miles west of the prairies the belt of country along the 33d parallel presents a remarkable combination of all the favorable circumstances for the establishment of a chain of military posts, affording every facility of wood, water, grass—traversing a region of fertile soil and abundant timber, with a mild and genial climate at every season of the year, avoiding more than one-half the desert country between the Rocky Mountains and the Valley of the Mississippi.

The distance from Vicksburg to San Diego, on the Pacific, on the 32d parallel, is between fifteen and sixteen hundred miles, pronounced to be the shortest line that can be successfully built between the Mississippi and the Pacific—as well as between such prominent seaports as San Diego on the Pacific, and Savannah and Charleston on the Atlantic—all three of those cities being between the 32d and 33d parallel of latitude.

This line is pronounced by eminent Engineers to be the shortest and cheapest that can be built between the two oceans—and one promising to be far the most attractive, on account of the superior advantages it possesses in mildness and uniformity of climate, as well as light grades and easy curves. Passengers would feel that there was more certainty and safety in traveling such a long distance through a mild and pleasant climate, and over a road of light grades and easy curves, than in crossing the Rocky Mountains, exposed to the intense severity of the winters in that region, and the danger of being blocked up for weeks in the mountain passes by immense accumulations of snow.

The route on the 32d parallel possesses such decided engineering and climatic advantages as to make it the great reliable and favorite route across the continent, and must become the most important mail route between the two oceans. The travel and tonnage that it would attract will be only limited by the capacity of the road for their accommodation, and the roads east of Vicksburg, in all directions, would enjoy a portion of the California and Texas business, thus drawn to them.

In addition to the cogent reasons urged by the able report of the Senate Committee, and Major General John Pope, in favor of a Southern Atlantic and Pacific route, the new position of our national misfortunes, and status, makes the speedy completion of that grand national enterprise still more important.

Nothing would so immediately and effectually conduce to the prosperity and strength of the Union as the building of that road. If it were built to Marshall, in Texas, it would there find a road built to meet it, 240 miles west of Vicksburg, and from that point it would penetrate and permeate the principal cotton States of the South—Texas, Louisiana, Mississippi, Alabama, Georgia and South Carolina.

No influence would be so potent as the speedy building of the Southern Pacific Railroad for restoring to our common country the blessings of union, amity and strength, and in developing the vast sources of wealth and prosperity that lie within the easy grasp of a re-united and enterprising people.

EASTERN CONNECTIONS.

In February last the Selma, Rome and Dalton road was completed and put in operation from Selma to Rome, 198 miles, making connections at Kingston, on the Western and Atlantic Railroad, with Atlanta and Chattanooga.

The schedules were promptly changed on our road, in harmony with the connecting roads, to induce Atlanta and Chattanooga travel to patronize that route. It is now the shortest line in operation from Vicksburg, or New Orleans, to Washington and the Northern cities *via* the Tennessee and Virginia roads—as the General Superintendent states in his report in reference to this line—"We cannot immediately expect the pecuniary results to be great as it is a new line, and must become known to the traveling public before we can realize the fruits of a short line, close connections and good accommodations."

But it is an event of great public interest that we now have an unbroken line of railroad running through the heart of the State of Mississippi, from the Mississippi River at Vicksburg to all the Atlantic seaports, and to every city and village in the United States approached by a railroad. Montgomery and Selma will also be connected by rail in November next—and that will unite both Montgomery and Selma with Vicksburg in the iron bonds of fraternity and commerce—the distance from the capital of Alabama, Montgomery, to the Commercial Emporium of Mississippi, Vicksburg, will be 292 miles—45 miles further than from Vicksburg to Selma.

As soon as the railroad connections are completed between the two Alabama cities, a train of cars will be started from Savannah and run through to Vicksburg, by the shortest line of railroad yet built between the Mississippi River and any Atlantic seaport, the distance by rail from Vicksburg to Savannah being 673 miles—and to Charleston 774 *via* Montgomery, Ala.

We have also in prospect another highly important connection with the Chattanooga and Alabama Railroad, formerly known as the N. E. and S. W. Ala. R. R., which, when completed, will extend from Chattanooga to Meridian, 295 miles in length, running diagonally through the State of Alabama, passing through one of the finest mineral regions in the South, as well as a choice agricultural country.

The coal and iron mines that will be developed are said to be unsurpassed in quality, and inexhaustible in quantity—and some of the most valuable mines in the vicinity of Tuscaloosa will be not more than 100 miles distant from Meridian—near enough for transportation to Jackson and Vicksburg. The connection of our road with that, at Meridian, will give us a link of 95 miles, on the shortest through line in operation, from New Orleans to Washington and New York, *via* Jackson, Miss., Meridian, Chattanooga and Lynchburg. By that line, from New Orleans to Washington, it will be 1,197 miles, and to New York 1,425 miles—against 1,276 and 1,504—by the present shortest existing mail route. When the Meridian and Chattanooga route is fairly opened, with such an advantage over other routes in mileage, and with all the facilities and inducements provided for, by which other routes attract travel, there can be no doubt that it will become the great thoroughfare of travel and mail transportation between New Orleans and the North Eastern cities, as well as between Texas and those cities. A company of Boston capitalists have purchased the line between Chattanooga and Meridian, and are now vigorously pressing forward the work of construction, with the avowed intention of completing it as soon as possible, and of making it a first class road in all its appointments—with the legitimate and inevitable advantages which this road will derive from the completion of these valuable and greatly needed lines now confidently anticipated, and which, at no distant period, must be realized—the business of our road will be greatly extended, and with it will follow the disenthrallment of the company from all its financial difficulties.

It would be greatly to the advantage of this company to extend its road to the Mississippi River to secure an easy and economical direct transfer of freight from the steamboats to the cars, and from the cars to steamboats. It would lessen the expense of transfer, and prevent the extra handling of freight, incident to drayage between the river and depot. It would be of great advantage to the lumber trade; would induce the erection of additional saw mills on the line of the road, and create a steady market for our valuable pine lumber, to supply St. Louis and Louisville.

This road being much the shortest, of any road running eastwardly from the Mississippi River, to several important commercial points in South Alabama and Georgia—together with the advantage of cheap river freights charged by regular packets plying between Vicksburg and the principal Western cities for western produce, we think we ought to successfully compete for a fair proportion of that class of business; and for the same reasons, for Eastern merchandise freights, forwarded to Vicksburg for transhipment westward by rail, or to points on the Mississippi river as high as Memphis and as low as New Orleans.

The company have 19 locomotives, 8 passenger, 5 baggage, 4 caboose, 70 box, 58 flat and 1 wrecking cars. Number of passengers carried east, 30,904; do., west 33,230—total, 64,134. Number carried one mile, 2,565,360. Bales of cotton shipped, 23,343. Feet of lumber, 3,478,810.

BALANCE SHEET, February 28, 1869.

Cost of road	$3,020,794 04
Bills receivable	10,667 24
Railroad expenditures for fiscal year	261,783 35

President.—MORRIS EMANUEL.

Directors.—Morris Emanuel, Thomas Rigby, A. B. Reading, Wm. Crutcher, Adelbert Ames, Peter Anderson, Thomas M. Smedes, James R. McDowell, Thomas S. Dabney, D. W. Flowerree, Wm. E. Morris.

Vice President.—THOMAS RIGBY.

Secretary & Treasurer.—N. G. BRYSON.

Gen'l Superintendent.—E. F. RAWORTH.

Changeable Gauge Cars.

A correspondent of the Boston *Commercial Bulletin* writes as follows of the changeable gauge cars now running between Chicago and Portland:

I visited the Lowell Railroad depot, where I saw several of the cars of the line loading with furniture, shoes, and other merchandise, for different points in the West. These cars make quick trips, and work satisfactorily. The change from the New England narrow gauge to the Grand Trunk broad gauge is made at Montreal, with another change at Port Huron, Michigan, from the Grand Trunk, or broad gauge, to the four feet eight and a half inch gauge, which is the general gauge of the Western States. The cars are built and owned by an incorporated company, and are rented to the different railroads forming the through line, at a fixed rate per car, per mile; it thus becomes the interest of the Car Company to see that their cars are kept moving, and hence the freight with which they are laden must have dispatch.

Specie Movement at New York in 1869.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, June 12, 1869.

Stock Exchange and Money Market.

In Money, a more active movement has been noted since our last, especially in the line of temporary loans to the stock houses, whose wants have been apparently more urgent but has been generally met with promptness, by lenders, particularly on private account, at the legal rate of seven per cent. The large dealers in the public funds have been amply accommodated at six per ct., as the rule. In discounts, the business has been on a moderate scale, and rates have been quoted at from 7@10 per cent. per annum, on strictly choice to good mercantile paper. The city banks, have been heavy losers, in the deposit and legal tender lines, during the week, the falling off in the former having been nearly four millions; and in the latter over 4½ millions. The loss has been accounted for by the Treasury sales of Gold in excess of its purchases of 5-20s for the Sinking Fund, and by the free receipts of the week for Internal Taxes, which tell upon the Country Bank balances in New York, without reference to the quarter in which they are originally collected. The specie reserve of the banks showed a gain of $1,179,903. The U. S. Sub Treasury added $3,687,164 to its cash balances, closing the week with a reserve of over 79½ millions, against $75,891,046 the preceding Saturday.

The specie reserve of the city banks according to the latest return is $19,051,133, against $14,328,531 same time last year The city bank deposits are now $199,124,049, against $209,089,655 week ending June 6, 1868. The legal tender reserve amounts to $53,289,429, against $68,822,028 same time last year. The circulation now stands at $33,982,995, against $24,188,159 same time last year. The loans are now $275,919,609, against $273,792,367 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $127,718,504 a day, against a daily average of $130,274,748 the preceding week, and $131,457,975 the week ending with May 19, 1869. The current week's exchanges average about $131,906,119 a day. The city banks, last week, reported a gain of $1,179,903 of specie, with a loss of $3,931,558 of deposits, and $4,520,944 of legal tender notes. They increased their loans, $984,148; and their circulation, $62,130.

The city bank exchanges on Wednesday were $135,050,646, and the resulting balances, $3,375,686.

National Bank notes to the amount of $199,820 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $315,662,038, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $15,819,856, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,842,182. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,891,200; and for the public deposits, $28,786,350—making a total of $371,677,550. The Treasury Department last week redeemed and destroyed $390,400 of worn and mutilated fractional currency, and issued $117,576 of new. The outstanding amount of fractional currency on the 1st of June, was $33,452,523 against $35,330,323, on May 1, $36,719,912 on the 1st of April, $36,781,548 on March 1, $35,511,127 on February 1, and $34,215,716 on the 1st of January.

The U. S. Sub-Treasury receipts, week ending with June 5, were $11,051,404, including $2,137,147 from customs duties; payments, $7,364,241, including $1,041,798 of coin interest; balance at the close of the week, $79,578,210, against $75,891,046 at the close of the preceding week, showing an increase of $3,687,164. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $1,151,179, including $319,258 from customs; payments, $749,607, including $276,918 of coin interest. On Tuesday, receipts, $2,348,170, including $351,860 from customs, and payments $1,821,256, including $199,455 of coin interest. The balance at the close of business on Tuesday stood at $80,506,697, against $78,466,478 a week previous; and $85,897,063 on May 26, 1869. The aggregate receipts of the office in May were $53,236,435, including $10,034,613 from customs, aggregate payments, $60,202,733, including $18,681,439 of coin interest.

The outstanding amount of coin certificates on

the 1st of May, was $16,307,200, against $21,672,500, April 1, $28,775,560, March 1; $32,659,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $2,852,000, and retired $1,917,068 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during May, reached $10,606,080.

Government revenues have been quite liberal, since our last, particularly in the line of excises, which last week, yielded about 7½ millions; customs at the port of New York, $2,137,147 and at the outports about $750,000(in coin) more, making the grand total income for the week equal to abou $11,830,500 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 147,500,000, according to the latest Washington advices. The customs yielded, same time, about 169 millions in gold.

Gold has been more freely offered and has been depressed and variable in price, on a less confident speculative, and quite limited export, demand. The customs inquiry has been up to a fair average. The range of the price through the week has been from 137¾@139⅜; and the closing quotation on Wednesday was 139¼. The award of the million of Government Gold on Monday was made at from 138.63@138.76. The aggregate of the bids was $5,905,000. The latest dealings showed a more active call for Gold, chiefly from speculative sources, leading to a rally in the price from the lowest figures of the week, to 139⅛@139⅜, during the afternoon of Wednesday. The California steamer on Wednesday delivered $75,212.

The customs of the port on Wednesday yielded $424,500. The U. S. Sub-Treasury disbursed $51,367 of coin interest, on that day.

The following shows the average business at the Gold Exchange Bank, during the past week, average amount of loans and discounts, $1,501,264; average amount of specie, $738,262; average amount of deposits, $1,524,170.

The customs demand for Gold last week, averaged $356,196 a day; thus far, this week, it has averaged $337,223 a day, or equal to a weekly aggregate of $2,223,338. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $150,380, and since Jan. 1, $8,807,886, against $3,241,313 same time in 1868. The receipts from California, since our last, have been $75,212. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $117,598,305, against $107,445,794 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to May 28th, 1869, $3,017,414, against $3,323,323 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $19,156,022, against $33,843,804 same time in fiscal year 1867-'68, showing a decrease in the current fiscal year, of $14,687,878. The exports of specie, from this port, last week, were $527,242, against $3,575,594 same week last year; total, since July 1, 1868, $35,589,691, against $69,051,560 in 1867-'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,041,798; since July 1, 1868, $85,819,029, against $72,372,737 same time in 1867-'68. The specie exports from San Francisco, from Jan. 1, to May 28, 1869, were $15,970,194, against $15,623,792 same time in 1868.

Foreign Exchange has been offered less freely, and quoted firmer on a fairly active market. Bankers' prime sixty day bills on London closed on Wednesday at 109⅛@109½, and on Paris to 5.22 @5.16¼; sight bills on London to 110@110⅜, and on Paris to 5.16¼c.@5.13¾. The offering of produce bills has been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,587,763, against $2,546,370 same week last year; total, since July 1, 1868, $157,914,106, against $170,335,668 same time in preceding fiscal year of 1867-'68.

Government securities have been moderately active during the week, on very limited offerings of the coin bearing obligations, at generally well supported prices, though there have been some trifling fluctuations in values, mainly the result of the changes in the Gold quotation. On Wednesday, the market exhibited rather more firmness, on a somewhat livelier inquiry from local and export purchasers. On Wednesday, the offers of U. S. 5 20s to the Sub-Treasury reached an aggregate of $4,950,000. The accepted proposals for the million advertised for were as follows: Jay Cooke & Co., $670,000 coupon 1867s at 116.21, $80,000 coupon 1868s at 116.20, $100,000 registered 1865s at 116.20; Fisk & Hatch, $100,000 coupon 1867s at 116.20; O. A. Dodge, $50,000 registered, 1868s, at 116.

U. S. sixes of 1881 closed here on Wednesday at 121¾@122; U. S. Five-twenties of 1862, ex-coupon, 122⅝@122¾; U.S. Five twenties of 1864 at 117⅜@117½; U. S. Five-twenties of 1865 at 118⅜@118¾; U. S. Five-twenties of 1865, consolidated, 119¾@119⅞; U. S. Five-twenties of 1867, 119¾@119⅞; U. S. Five-twenties of 1868, 119¾@119⅞; U. S. Ten-forties at 108¾@109; U. S. Six per cent. currency bonds, 107@107⅛.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 26.	June 2.	June 9.
Consols	93¾	92⅝	92¾
U.S. 5-20's of 1862	79½	80½	80⅝
Erie	19	19¼	18¾
Ill. Central	95¼	96	94½
At. & Great Western.	..	..	25

Railway and miscellaneous share property has been more eagerly pressed for sale at lower and irregular prices, on a less confident speculative demand. Brooklyn loans have been in more request. Messrs. Jay Cooke & Co., corner of Wall and Nassau streets, are now the fiscal agents of the city and county for the sale of its bonds. They are offering the Prospect Park seven per cent. bonds at 100½, and are marketing them more freely than these bonds have been recently disposed of. This particular loan is a fifty year obligation, bearing interest at the rate of 7 per cent. per annum, payable semi-annually.

Domestic Produce has been moderately active but variable in price. Middling upland cotton closed buoyantly on Wednesday at 31¼@31⅜ cts. per lb. The stock of cotton now here is estimated at about 60,000 bales. The receipts at the port this week, have averaged about 1,050 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,211,000 bales, against 2,265,000 bales same time in 1867-8; exports, same time 1,361,000 bales, against 1,651,000 bales same time in 1867-'8; stock on hand at latest dates, 153,500 bales, against 131,500 bales same date 1868. Total crops of 1867-'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 11,481 pkgs., against 10,926 pkgs., same time last year. From Boston, 4,002 pkgs., against 5,721 pkgs. same time in 1868. At the Live Stock markets, this week, Beeves have been in moderate demand, at from 12@16½c., per lb.; week's receipts, 5,997. Milch cows, dull at from $40@$110 each, receipts, 80. Veal calves in less request at from 5@11c. per lb.; receipts, 3,197. Sheep and lambs more active at from 4½@8c., per lb.,; receipts, 14,671. Swine in limited demand at from 8¾@9⅜c. per lb.,; receipts, 27,214.

Foreign merchandise has been in moderate demand and more firmly held. The total imports of foreign dry goods, last week, were $1,262,530, and the total amount marketed $1,194,324. The value of foreign merchandise imported last week, was $4,169,700—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,432,230, against $4,259,340 same week last year; total since July 1, 1868, $272,864,674, against $226,552,804 in 1867-'8. Ocean freights have been less active and quoted easier. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 6d.@1s. 9d. by steamer, per bbl.; grain at 5d. by sail, and 5½d.@6d. by steamer, per bushel; cotton at ⅛d.@$\frac{5}{32}$d by sail, and $\frac{3}{16}$d.@¼d. by steamer, per lb.; and heavy goods 10s. @25s. by sail, and 17s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 522.

The New York exports, exclusive of specie, for the week ending June 8, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2,546,370	$3,587,763
Prev. reported	75,498,590	71,594,177
Since January 1	$78,044,960	$75,181,940

The imports for the week ending June 5, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,047,219	$1,262,530
Gen. merchandise	3,212,121	4,169,700
Total for the week	$4,259,340	$5,432,230
Previously reported	101,743,795	134,905,774
Since January 1	$106,003,135	$140,338,004

The balance in the Sub-Treasury on Wednesday was $81,702,757 52.

Safety on Railroads.

COMPRESSED AIR APPLIED TO BRAKES.

Recent experiments on the Erie Railway have demonstrated the utility of a newly applied power for stopping trains, which secures highly satisfactory results as a preventive of accidents.

The compressed-air brake places the entire train under the control of the engineer, who is able to bring his train to a full stop within a distance of six hundred feet while going at the rate of twenty-five miles an hour. The services of brakemen are not required; the engine-driver performs the whole service by a simple manipulation of the mechanism of the atmospheric apparatus. Thus, if the engineer sees, or suspects, danger ahead, instead of "whistling down brakes," and waiting for the guards to "break up" the train, he instantly applies the whole power of the air apparatus on the whole train; and by the same movement the engine itself lends its whole power as a brake, without danger of accident to the machinery.

The element of power is simply pure air, which at the will of the engineer is forced into the cylinders, forming a "cushion," which becomes harder with each revolution, and the retarding force is consequently rapidly multiplied. At the same time, while the power of the engine is exerted to oppose the motion of the train, the air is forced into a special reservoir, and the power applied directly to all the brakes throughout the train, by means of a strong india-rubber tube passing under the cars and fitted with double valves at the couplings, so that any number of the cars may be detached and switched off without disarranging the air apparatus of the cars remaining attached to the locomotive. The jarring, grating noises of the ordinary method of putting on the brakes are altogether avoided. There is no strain on the "running gear;" the engine-driver is able at will to regulate and modify the force of the brakes; while, as there is no limit to the amount of power which can be developed, the length or weight of the train are of no importance.

The feature of this novel invention which will receive the largest share of the attention of railway managers is the closing of the exhaust into the smoke arch, or pipe, and the opening of a passage by which pure air, unsoiled with ashes or cinders, is admitted into the steam cylinder, thereby preventing excoriations of the pistons and cylinders, and avoiding injury to the machinery, involving expensive repairs.

The new apparatus can be readily adapted to any locomotive. It is at present to be seen in full operation on the Erie road, on the train which leaves daily at 3:45 P. M. for Middletown.

From the Bridgeton (N. J.) Patriot.

Railroad Improvements in New Jersey.

Within the past nine years South Jersey has made rapid strides in traveling facilities. In 1860 there were but eight miles of railroad between Camden and Cape May and the towns on the Delaware, while now there is one hundred and sixteen in running order, besides the Marl company's road, and the twelve miles between Woodbury and Swedesboro' already graded for the iron. In addition to the above is the Camden and Atlantic of sixty miles, running from Camden to Atlantic City. The Vineland Railroad now under contract will add fifty-five miles more to this District. This road is being rapidly graded between the junction with the West Jersey Railroad and the Delware Bay, a distance of twelve miles and which will be completed during the Summer. We took a look over that portion of the road under contract to Pratt & Kimble, which extends from Sheppard's mill to the Cohansey and found them pushing the work through vigorously. The section they have has the heavy work of the road, some of the cuts being eighteen feet. There are also a number of bridges, among them one over the canal of the nail works, and over the Cohansey Creek. They have been delayed, owing to the failure of getting the right of way, and much of their work is now in the heavy cuts. We understand that they have given satisfaction to the company, and their work is well done. Their work would have been nearly completed had the right of way been secured early in the winter, but owing to this failure it will be August before their section is finished, and it is expected they will take another section which they will push with dispatch, as they understand their business.

The distance between Vineland and Winslow is also under contract, and will be completed before cold weather. The subscribers to the stock should see that their subscriptions are paid in as they become due, so that those having charge of the work will not have to stop for want of funds. Such improvements add much to the value of property, and as this will make a direct route to New York it will no doubt be a paying road from the time of its completion. Mr. C. K. Landis, President of the road has energy, as is evidenced by the success of Vineland, and he is as vigorously pushing the Vineland and New York Railroad.

☞ Work upon the Air Line Railroad, from Atlanta, Ga. to Anderson Court House, S. C., is being energetically pushed forward, and the present prospect is that before Winter sets in the cars will be running over the first twenty miles of the track.

☞ By joint resolution of the National Legislature, approved April 10, 1869, the time for the completion of the Portage Lake and Superior ship canal is extended to the third day of March, eighteen hundred and seventy-one.

From Herapath's Railway Journal.

Railway Economy:—The Locomotive.

The cost of locomotive power forms a very important item in railway expenditure. It may be taken on an average at about double that of maintaining the permanent way on the same line, although this proportion will vary greatly according to circumstances; and as it forms so considerable an item in the accounts, it offers a proportionate field for the exercise of economy. The aggregate expenditure may be divided under two heads—the one embracing the cost of generating the power to draw the trains, and the other the cost of keeping the machine for generating and applying that power in working order. It offers a more intricate field for investigation than that of the permanent way, for this simply involves the question of providing the best and most economical means for supporting the rolling load, in fact an apparatus only required to exercise the passive qualities of support and resistance to the wear and tear imposed on it by the active power of the engine; but the locomotive engine itself is a complicated machine, and its construction in such a manner as to develop economical working requires a large amount of practical experience, technical and scientific attainments of a high order, embracing a considerable knowledge of chemistry, together with mechanical and philosophical engineering.

Notwithstanding the great advance being made by mechanical engineers generally in philosophical knowledge, it is astonishing how far from perfection are their productions generally when chemical operations form part of the means used to mechanical results, and how greatly the actual effect produced falls short of the theoretical. This would indicate that pure mechanical science had arrived at a much more advanced stage of development than the sister science chemical philosophy; for instance, a good mechanical engineer having a given amount of mechanical power at his disposal, derived (say) from a fall of water, a steam engine, or other source, will utilize that power in any way desired by transferring it with the aid of mechanical appliances in such a perfect manner that a very small percentage of it will be lost; but place at his disposal a pound of coal which is known to contain within itself a certain amount of power, and ask him to utilize it in the most economical manner he is acquainted with, and it will be found that the utmost he can do will be to obtain about one-tenth of the theoretical duty, the remaining nine-tenths being lost or dissipated.

That such is the case is known to those who have investigated the subject, and that it is capable of proof is fully admitted. It has been ascertained by careful labratory experiments that 1 lb. of carbon will convert about 12 lbs. of water into into high pressure steam, and it can also be conclusively demonstrated that if that steam be applied in a theoretically perfect manner it will raise in round numbers 10,000,000 lbs. one foot high, but the average duty done by the best Cornish pumping engines is only about 1,000,000 lbs. raised one foot, or about one-tenth of the full theoretical duty, and these are the most economical engines known. But when we descend in the scale we find a much more marked discrepancy; the next engine in rank to the Cornish engine in economical working is the double cylinder, or Wolfe engine, the duty of which in its most improved form, and aided by the mechanical perfection in the working parts which can now be attained, may be taken at about 750,000 foot pounds. The next in order, the improved form of double-acting Boulton and Watt engine, will barely accomplish 500,000 foot pounds, while high pressure non-conducting engines, which class includes the locomotive engine, seldom reach 300,000 foot pounds of duty.

Now when it is known that the same pound of coal or coke which is burnt in the furnace of a locomotive boiler is really capable of performing a duty of 10,000,000 foot pounds, if the means employed for its utilization are in perfect accordance with theoretical deductions, it appears almost incredible that the mechanical appliances for converting the pound of coal into power should be so deficient, and that in the case of the locomotive engine, aye and even in the best type of locomotive, less than one-thirtieth of that power is utilized in drawing the trains, and that the remaining twenty-nine parts cannot be accounted for. This is a matter which deserves grave consideration. It is not only a question for the railway Shareholder to con over in relation to the amount of his dividend, but as the same thing goes on to a more or less extent wherever coal is consumed, it is a question of the highest national importance. Nature in her beneficence has buried in the soil of this country an almost illimitable quantity of power in the shape of that valuable mineral coal. It is known and admitted that the wonderful prosperity to which Great Britain has attained is in a chief measure derived from this scource, in supplying the power requisite to develope her numerous manufactures, drive her steam ships, and drag her railway trains, and yet this power is being wasted as a prodigal wastes his substance, and with the same indifferance as to the future. But is such a course wise, is it consistent with the practical notions which, as a rule, actuate men in this practical country? It would seem as if the general notion with respect to our coal fields is of such an indefinite character as to impart the idea, from their great extent, of their being inexhaustible, but such an idea requires but a moment's consideration to expose its absurdity: granted that our coal-fields are extensive, the impression made on them is only beginning to become apparent, yet extensive though they be, finite they are, and when anything finite is drawn upon unceasingly and at an increasing rate probably as the square of the time, the end will surely arrive, and that probably much sooner than expected. Knowing, then, how greatly the prosperity, nay, perhaps, even the existence of this country as a first-rate power is dependent on our coal, does not the matter deserve our serious attention? ought we to be satisfied in dissipating this mine of wealth and prosperity with which nature has so bountifully provided us, and detroying twenty or thirty pounds of this valuable mineral only to obtain the effect of one? "*Mais revenons a nos moutons*"—let us return to our locomotive.

When the Liverpool and Manchester Railway first commenced working, the amount of coke consumed in drawing one ton a distance of one mile was found to be about ·7lb., but now on the London and South Western Railway, where Mr. Beattie's improved coal burning engines, fitted with his feed-water heating apparatus, are employed, the same duty is accomplished with an expenditure of about ·2 lb. of coal. We quote these engines as being, we believe, the most economical of all the improved varieties lately introduced, although those of several leading locomotive engineers approach them closely; and yet a careful estimate of the work even they perform only gives a duty of under 300,000 foot pounds for one pound of coal, notwithstanding their consumption is less than one-third of the first engines used on the Liverpool and Manchester Railway. Here, then, we have extraordinary progress, and at the same time a result still a long way off from theoretical perfection. It will therefore form a most interesting enquiry to ascertain how this great advance has been obtained, and by what means a still nearer approach to perfection can be brought about.

We have before stated that 1 lb. of carbon is capable of converting about 12 lbs. of water into steam, and that if the steam so obtained be employed in a theoretically perfect manner it will raise 10,000,000 lbs. 1 foot high. Now, if we compare these two standards of duty with the actual, evaporation obtained in the locomotive engine and the amount of work done respectively, we we shall be able to determine under which head the greatest loss occurs. The evaporative power of locomotive boilers as at present made may be taken on an average at from 9 lbs. to 9½ lbs. of water per 1 lb. of coal or coke, which thus amounts to about three-fourths of the theoretical effect, so that of the 29 out of the 30 parts of the theoretical duty lost only about 7 parts, or one-fourth, can be attributed to defective combustion or imperfection in the mechanical means employed in transferring the heat resulting therefrom to the water and converting it into steam, the remaining 22 parts being lost in applying the steam after it has been generated, or in converting that steam into power, that is to say the loss in using the steam is about three times as great as the loss in producing it.

It is therefore evident that there is a larger scope for the exercise of economy in the locomotive in introducing improved means of using and preventing waste of the steam than in the apparatus for producing it; and this also accords with the past history of the locomotive engine, as it is mainly in the construction of the boiler and in the means introduced for burning coal, heating the feed water, &c., that the chief improvements have been made, and it appears to be generally admitted that there is not now room for much greater improvement in this direction.

When we compare the amount of work done by a given quantity of coal in the modern coal burning engine with the duty of the early coke burning engines, and find that in them 1 lb. of good coal now does more than three times the work formerly obtained from 1 lb. of coke, we must admit that very satisfactory progress has been made; and this has been brought about by the able and scientific manner in which the subject has been investigated by our leadiug locomotive engineers, and the increased amount of chemical and philosophical knowledge they have brought to bear in connection with their practical mechanical skill.

Whatever might have been the precise reasons that led the first inventors of the locomotive engine to adopt coke as fuel, it was at that time undoubtedly a judicious selection. No doubt its freedom from smoke had much to do with it, and a notion seemed to prevail in the earlier days that a given weight of good oven coke would evaporate not only a greater quantity of water than the same weight of coal, but even more than the coal from which it was originally produced, and that this was an error has only of late years been demonstrated; but there was one other quality that gave coke the preference over coal for a locomotive boiler which might have had its influence, viz., the much less quantity of oxygen carbon requires than hydrogen to effect perfect combustion.

It has now, however, been satisfactorily ascertained that good coal, if perfectly consumed, will evaporate as much as and even more than an equal weight of oven coke, and consequently as much more than the coke produced from it as is represented by the loss in conversion. That this fact should have remained in doubt so long seems strange, for the very operation of converting the coal into coke evolves a large amount of heat which is lost in the process, and it is clear that if this heat were utilised the total effect produced from it and the coke combined must be more than from the coke alone. This view of the case has no doubt led to the introduction of coal in place of coke as a fuel in locomotives, and means have been devised to increase the supply of oxygen and to maintain the gaseous products of the coal at a sufficiently high temperature to ensure their perfect combustion.

Carbon, or coke which is nearly pure carbon, requires 2.66 times its weight of oxygen, or 1 lb. will require about 138 cubic feet of atmospheric air at 60° to effect perfect combustion, but hydrogen, the most valuable product of the bituminous portion of the coal, requires no less than eight times its weight of oxygen to burn it; but then the quantity of hydrogen contained in coal of average quality does not amount to more than about one-twentieth of the carbon, so that the total quantity of air required for the perfect combustion of 1 lb. of coal is about 150 cubic feet, or only 12 cubic feet more than required for the combustion of the same weight of coke, but the amount of heat generated from the combustion of the hydrogen is about five times as great as that from the same weight of carbon, so that the actual amount of heat derived from the hydrogen, in the coal is about one-fourth that of the carbon,

although the quantity of carbon is twenty times as great.

This will show what a wasteful error has been committed in dissipating the hydrogen, which possesses five times the heat producing powers of the carbon, in order to convert the coal into coke before using it; and what a mistaken notion it is to suppose that the employment of coal in place of coke necessitates a very much larger supply of oxygen; this is not the difficulty that has had to be overcome, the real difficulty lies in the fact that coal is a compound substance, whose component parts have different affinities for oxygen, and that the bituminous portion will distil off into vapor at a less heat than is necessary to effect combustion, whereas coke is a simple substance, which can only be converted into gas at a heat sufficient to burn it when in contact with oxygen; with coke, therefore, it is only necessary to ignite it in the fire box and supply the requisite quantity of air to obtain perfect combustion, but with coal other means have to be resorted to in order to raise the volatile ingredients up to a sufficiently high temperature, and bring them in contact with the requisite supply of oxygen to effect their combustion before they can escape.

It is to effect these objects that the ingenuity, chemical and philosophical knowledge of our locomotive engineers have been taxed in no slight degree, and a large amount of success has attended their efforts. There are now many plans in operation differing much in the details of their construction, but all aiming at carrying out these principles, and by which a large saving in the consumption of fuel has been effected, the expenditure per ton mile having during the last thirty years been reduced from about ·7 lb. of coke to from ·23 to ·30 lb. of coal, while a still further reduction of about 15 per cent. more has been effected by heating the feed-water, which in Mr. Beattie's engines brings the consumption down to about ·2 lb. of coal per ton mile; but even this, as before stated, falls short of theoretical perfection by nearly 25 per cent., so that in this field there is still some room for further improvement, and we cannot yet say that even the most perfect coal-burning engines are entirely free from smoke; and the worst feature in them is that the smoking generally occurs while the engine is at rest at the stations, which is no doubt owing to the supply of air being less than when the engine is at work and the blast is drawing the air into the furnace, but this nuisance is certainly diminishing, and no doubt further improvements combined with good stoking will eventually cure it.

We cannot, however, look forward in future years to as great an advance in the economical production of steam as we have seen accomplished during the last thirty, as that would go beyond the theoretical effect, and therefore if further important economy is to be obtained we must search for it in improving the means of using the steam. Here is a mine open to us which has scarcely yet been touched, nearly 75 per cent. at present lost, and this capable of being regained, perhaps not wholly but certainly to a large extent, if proper means are employed; but we must reserve the examination of the causes of this loss and the principle upon which the remedy should be applied for a future article.

☞ The State Treasurer of North Carolina has delivered to H. S. Cowan, Esq., President of the Wilmington, Charlotte and Rutherford Railroad Company, $1,000,000 of North Carolina State bonds for that road. Mr. Cowan will call a stockholders' meeting on the 28th of July next, to elect officers of the road.

☞ The Raritan and Delaware Bay Railroad is being put in order, so that through trains to Philadelphia can be run. This will be a great accommodation to many localities between Manchester and Philadelphia. New rails are to be laid on the road beyond Manchester.

Statement of the Public Debt, June 1, 1869.

Balance due the United States						$3,344,963 21

Journal of Railroad Law.

COMMON CARRIER—DELIVERY OF GOODS AT A POINT SHORT OF DESTINATION—ESTABLISHED USAGE—NOTICE TO CONSIGNEE.

The late action of Herman *vs.* Goodrich (21 Wisc., 536) was an action against the defendant as a carrier by water from Milwaukee to Port Washington in this State, for the value of a keg of liquor delivered to him by plaintiffs at Milwaukee, and for which defendant gave the following receipt: "Milwaukee July 11, 1865, Received of *Hermann & Hartman*, * * * to be forwarded without delay as directed in the margin.

M. MUELLER, WAUPACCA.

Boat to Port Washington,

One half brl. Whiskey. One keg liquor.

(Stamp.) (Signed.) G. HUSTON, Agent."

The defendant's evidence was to the effect that he was owner of a line of steamers plying between Milwaukee and Port Washington; that the goods above named were received to be carried on one of said boats; that they were sent on the day named in the receipt, and landed, about half past ten that night, at the north pier at Port Washington, and receipted for by one Blake, the owner of the pier, that this pier was the usual place for such vessels to land at that port, the only other pier being used only for lumber vessels; and that Blake, a few days afterward, paid defendant the freight on said goods. Defendant further testified, against objection: "Blake owns the pier at Port Washington to which my boat runs. He has a warehouse on it, and is a general receiver of freight; receives the goods and pays the freight, sometimes before and sometimes after he collects it; that is the end of it; he had no interest in the freight or boat." Plaintiff's evidence tended to show that Mueller, the consignee, on receiving a bill of the goods in question, "inquired five or six times for the missing keg; inquired on Blake's pier at Port Washington; the answer he received was that no such keg ever came there; he (Mueller) generally goes to the piers in Port Washington to get his goods coming from Milwaukee by boat; always settles the freight bills with Blake." This is substantially the whole of the testimony. The opinion of the court was delivered by

DIXON, C. J.—There can be no doubt the defendant was a common carrier of the goods; and the only question is, whether his liability ceased with a delivery to the wharfinger at Port Washington. The receipt may be some evidence to show that the goods were to be carried further; but if they were, and there was public means of transportation beyond Port Washington, it was the duty of the defendant to deliver the goods to some carrier from that place. This was the case of Van Santvoord *vs* St. John, 6 Hill, 157, cited by defendant's counsel, where the goods were delivered to a responsible carrier at the end of the defendant's route. In the absence of proof of an established usage, delivery to a wharfinger, in such case, would be insufficient. But the proof is, that there was no public means of transportation beyond Port Washington, and the delivery of the goods by the defendant to the wharfinger at that place shows that he knew there was no such means. Port Washington was therefore the place of destination, and being the place of destination, it is conceded that the defendant's liability as common carrier was not ended by mere delivery of the goods to the wharfinger, but that he was further required to notify the consignee of their arrival, or to make some reasonable effort to do so. The defendant neither notified nor attempted to notify the consignee, and consequently must be held responsible for the loss.

We see no error in the rulings or instructions of the court, and the judgment must be affirmed.

By the Court.—Judgment affirmed.

THE HANSOM CAB COMPANY,

OF NEW YORK AND BROOKLYN.

INCORPORATED MAY 6, 1869.

Capital, $250,000, in 5,000 shares of $50 each, with power to increase.

President, EDWARD W. BRANDON.

Hon. JAMES W. HUSTED, JAMES STUART PEARS, Vice Presidents.

S. P. SLATER, Treasurer, (with Messrs. Duncan, Sherman & Co.)

CHARLES H. PEASE, Secretary.

HENRY HOWARD BRANDON, Superintendent.

JEROME BUCK, Attorney and Counsel.

Bankers, Messrs. DUNCAN, SHERMAN & CO.

DIRECTORS.

JEROME BUCK, No. 3 Broad st.

J. O. SEYMOUR, No. 89 Liberty st.

EDWARD W. BRANDON, No. 133 Water st.

H. VANDEWATER, City Hall.

THOMAS LANDON, Court of Common Pleas.

JAMES STUART PEARS, No. 103 West 14th st.

WM. J. KERR, Brandreth House.

ALEXANDER WILDER, Evening Post.

Hon. JAMES W. HUSTED, Peekskill, 84 Wall st.

The act to incorporate the above Company having been passed by the Legislature of the State of New York, the undersigned is prepared to receive subscriptions to the capital stock of the company.

Subscription, $50 per share, of which $12 50 per share is paid on subscribing, the balance to be paid at the call of the Directors; they agreeing to give due and proper notice to each subscriber, which notice shall in no instance be under 30 days.

The Company intend commencing operations as soon as 2,000 shares, equal to $100,000 of stock at par, shall have been subscribed for. Respectfully,

S. P. SLATER, Treasurer,

(With Messrs. Duncan, Sherman & Co.)

By order of the Commissioners,

EDWARD W. BRANDON,

JEROME BUCK,

HENRY SPEAR.

Subscription books are also opened with EDWARD W. BRANDON & CO., No. 133 Water st.

J. O. SEYMOUR, KENNARD & HAY, No. 89 Liberty st.

EXTRACT FROM CHARTER.

SECTION 6. The drivers of each vehicle belonging to said Corporation shall be entitled to demand and receive for the hire of such cab the fares here prescribed, as follows:

1. For any distance within and not exceeding one mile, for a single passenger, thirty cents; and for two persons, forty cents.

2. For any distance additional to one mile, for each mile and fractional part of a mile, for a single passenger, thirty cents; and for two persons, forty cents.

3. For any time within and not exceeding one hour, for a single passenger, seventy-five cents; for two persons, one dollar; and for any time additional, for each hour and fractional part of an hour, for a single person, seventy-five cents; and for two passengers, one dollar.

4. In addition to said fares, as here set forth, the said drivers are authorized to demand and receive one-half of the same in addition, when the passenger or passengers are so conveyed by them between the hours of twelve o'clock in the evening and six o'clock in the morning.

SEC. 7. No driver of a cab belonging to said Corporation, who is stationed at or near a railway station, steamboat landing, or ferry, shall leave the seat of the cab on the arrival of the cars, steamboats, or ferryboats, nor shall he leave his stand till he shall be engaged by a passenger, or some person authorized by a passenger.

The bove rates of fare cannot be increased; but the Directors, in the interest of the public at large and shareholders, intend reducing the price as soon as practicable to 20 cents per mile for one, and 25 cents for two persons; and 50 cents per hour for one, and 60 cents for two persons; the intention being to give the inhabitants of New York and Brooklyn the benefit of good, commodious and quick traveling, at rates which will place the vehicles within the reach of all.

ESTIMATE OF PROFITS ON FIFTY CARS.

50 hansoms, at $700 each	$35,000
100 horses, at $250 each	25,000
50 sets of harness, at $100 each	5,000
Total	$65,000

PROFITS.

50 cabs, with use of two horses per day, working 22 hours, at $7 per day	$127,400
Expenses	49,800
Balance	$77,600
75 per cent. on $65,000	48,750
Balance for incidental expenses	$28,850

EXPENSES.

Feed and stabling for 100 horses, at $24 per month each	$28,800
Wear and tear of horses, 10 per cent	2,500
Wear and tear of cabs, 10 per cent	3,500
Salaries of Working Manager, Secretary, Superintendent, Foreman of Yard and men	15,000
Total	$49,800

The above estimate for fifty cabs is merely to show what profit can be made; and it is but natural that an increase of the number of vehicles will considerably diminish the working expenses in proportion. The Company purposes to have 2,000 hansoms and cabs running by the end of the present year.

Western Pacific Railroad.

The San Francisco *Bulletin* says that this road will not only connect the Central Pacific Railroad with the Southern Pacific Railroad, but will also connect the former road with San Francisco. The name, "Western Pacific," will probably soon cease to be recognised. Twenty miles of this road, extending from San Jose to Alameda canon, were completed in 1866. This section was accepted by the government and bonds issued, and public lands were segregated for the same. Although this part of the road has been idle for two years while nothing was done on the other hundred miles, yet there has been no intention of abandoning the idle section, even if it could be done. Workmen are now engaged it in putting in order.

The Alameda *Gazette* says there is some heavy work yet to be done in the vicinity of Livermore Pass. "One tunnel of 1,162 feet, has been driven at each end for a distance of about 331 feet, leaving about 500 feet more to be cut. The rock is a soft slate, which crumbles when exposed to the air, and requires 'timbering' immediately. There is but one longer tunnel than this on the whole line of the Central Pacific. There is also a 'deep cut' 1,400 feet long and 42 feet deep. This cut will not be finished before August, at which

time also the tunnel will be completed. The work is being done in the best possible manner, so that the whole, when completed, will be adapted to fast running. We may count, therefore, upon the extension of the Central Pacific Railroad, by way of Livermore Pass, to this city, practically in August next, or, at the latest, in the beginning of Autumn."

☞ The Worcester County (Md.) Railroad Company has been organized by the election of a board of directors, with George S. Richardson, Esq., as President. Thomas D. Pornell was appointed Secretary and Treasurer.

Queen Anne's Railroad.

The directors of this road, the contractors, and agents of the Deleware Railroad met at Millington on the 3d inst., to make final arrangements for the completion and opening of the road as far as Sudlersville. The branch to Massey's will be ready by the 15th of June, and the Queen Anne's contractor proposes to finish to Sudlersville by the 25th of July, if the directors will furnish the cash.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

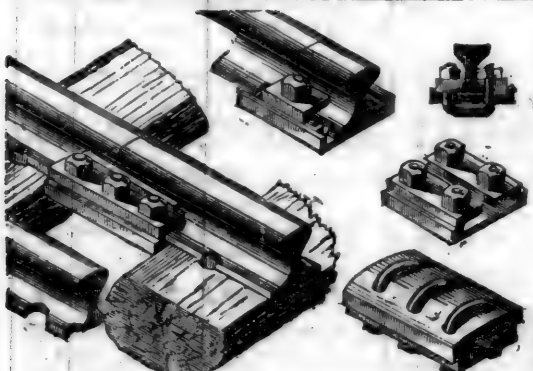
The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.



That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Rollers and Engines—Steam on Common Roads.

A few days since we gave a brief account of the steam road roller, imported by the Central Park Commissioners for use on the roads of the park. This roller weighed fifteen tons, and went up a rise of one foot in twenty with entire ease. It was tried at first on Sixth avenue, over a roadway of dry, fine sand, which, of course, presented the most difficult conditions, as no amount of pressure would compel the particles to adhere to each other.

The trial, therefore, was, in point of fact, no trial at all, except with reference to the power of the engine to propel the roller, of which very satisfactory evidence was given. We have testimony, however, as to the effectiveness of the machine, from England, where it was manufactured, which cannot be questioned. The roller came, as well the one ordered for Prospect Park, from the firm of Aveling & Porter, Rochester, England, whose agent in America is MR. W. CHURCHILL OASTLER, 43 Exchange Place, N. Y. It was tested by them before being sent out, and the following is the account from an English paper:

The engine was purposely tested under the most disadvantageous circumstances, with a view of fully developing its power, for which purpose it was made to ascend Star Hill, the steepest incline in the city, which has a rise of one in twelve. The entire surface of the roadway had previously been thickly covered with stones of the ordinary kinds used on macadamized roads. The steam roller commenced its work soon after ten o'clock and, notwithstanding the increased difficulties it had to surmount, by four o'clock in the afternoon it had made repeated ascents and descents of the hill, the entire surface of which was rolled completely smooth, and fit for the passage over it of the lightest vehicles.

Rollers of this kind have been in use in England for over two years, and have cost almost nothing for repairs. They have also been sent out to Bombay, for use in the construction of roads. They travel at the rate of about two miles per hour, and can be used, with a few moments' labor in changing, for stationary engines, in pumping, driving stone breaking machines, lifting weights, etc. In Sheffield the Borough surveyor reports that he has used the roller (one weighing twenty-eight tons,) to great advantage, both in the construction of new roads and in the crowning of old ones, and in preparing the foundations of streets. This latter fact is of special interest to our citizens. It shows a method by which all our pavements can be more improved than by any patent yet introduced. Even the cobble stone, if the stones were of moderate size, and were laid evenly on a surface well rolled by one of these powerful machines, would be far more comfortable and far more durable than the best stone pavement we now have; while the Nicolson or Scrimshaw, treated in this manner, would preserve their excellent qualities as long as the materials themselves would last. Nor need the process be confined to the preparation of the bed. Its advantages in that stage would be just doubled if it were used to bring the stones, whether cobble or blocks, to an even grade after they are laid. In laying these now, the most skilful laborers leave them subject to uneven support from below. A stone a little larger than its neighbors is driven down to their level, but, when so driven, rests on a harder bed than they, and when the wheel strikes it, it resists more completely, and soon is found projecting above the level, with "pitch holes" commenced on either side of it. Had it been pressed down by a roller of fifteen tons' weight, which at the same time passed over its neighbors, the soil underneath would have received an even packing, and where it was pushed aside, by the larger stones, would have been crowded under the adjoining ones—thus supporting all alike, and causing them to present a uniform and not easily disturbed surface. In this, too, lies the secret of durable Scrimshaw and Nicolson which, thus laid and rolled, would be certain of lasting until the material gave way.

Pavements having been thus prepared, the labor of cleaning and repairing, as well as the expense of using them, become very much lessened. Horses and vehicles last longer; larger loads and less freight become practicable; there is less dust, destructive to property and injurious to health; and, finally, the way is literally paved to the introduction of steam traction engines for the streets, which will make as great a revolution in traffic as did the locomotive.

On this point we subjoin the report of a test of a road traction engine, built for the War Department of England by the firm who are building the Prospect Park steam roller:

The requirements of the War Department were that the engine should be able to draw a load of not less than five tons on an ordinary road up an incline of one in twelve, and when working as a stationary engine, to drive a circular saw 3 ft. in diameter, with other conditions. The weight of the engine, with water, was not to exceed five tons, with fire box to burn either coal or wood. These conditions were fulfilled to the entire satisfaction of the inspecting officer, the engine driving the saw through a log of timber 14 inches square and 20 ft. in length, in a couple of minutes, with a boiler pressure of 35 lbs. to the square inch. The engine also drew a loaded wagon, weighing five tons, with the greatest ease, up Starhill, an incline of one in twelve, for 350 yards, the hill having been just previously covered with a thick coating of stones. The engine was filled with a compensating arrargement upon the driving axle, which enables it to turn sharp curves, either to the right or left, without disconnecting either wheel. During the trials the engine was supplied, driven, and steered entirely by one lad, without any other assistance, and on Saturday the same lad drove the engine alone, from Strood to Brompton Barracks, through the crowded streets of Rochester and Chatham.

We ourselves expect in a few years to see Brooklynites bowling down to the ferries on a patent pavement laid with a steam roller, in carriages drawn by steam engines, at the rate of about eight miles per hour.

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York for five months of the year:

	1868.	1869.
Ashes, bbls.	1,953	4,030
Breadstuffs—		
Wheat flour, bbls.	864,405	898,387

Richmond and Petersburg Railroad.

The receipts from operations of this road for the fiscal years ending September 30, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$70,965 05	$72,068 37
" extra baggage & express freight.	6,466 06	4,879 23
" U. S. mail.	2,315 00	3,675 00
" freight	49,538 31	60,880 32
" miscellaneous.	7,172 29	5,482 12
	$136,456 71	$146,985 04
Expenses, viz:		
Repairs of road	$16,443 47	$16,852 36
" bridges.	824 92	415 47
" depots, etc.	2,172 95	2,267 57
" engines.	5,361 10	6,351 83
" cars.	9,128 99	7,078 75
" tools, etc.	178 04	50 00
Oil, tallow and waste.	1,961 15	1,225 38
Fuel	10,201 75	11,614 47
Train expenses	10,603 62	12,606 06
Depot "	7,168 43	7,031 58
Officers' salaries.	6,750 00	6,750 00
Stationery, etc.	1,991 12	1,739 25
Insurance on buildings.	1,435 39	1,431 55
Taxes.	2,421 77	2,252 40
Loss and damage.	110 50	657 77
Clover Hill transp. exp.	4,485 33	3,800 00
All other expenses.	1,394 56	6,850 09
	$82,633 09	$88,974 53
Net receipts	$53,823 62	$58,010 51

In 1867 the extraordinary expenses, not included in the above, amounted to $14,280 44—making the total expenditure in that year, $96,913 53, and the net earnings, $39,543 18. In 1868, the extraordinary expenses are included, and are as follows:

For new buildings	$550 00
For new freight and coal cars	750 00
For reconstruction	3,356 77
For Petersburg extension	717 36
Total	$5,374 13

Deducting this sum will leave the total ordinary expenses, $83,600 40, against $82,633 09 in 1867; and the total expenses, $88,974 53, against $96,913 53. The gross receipts show an increase as compared with the previous year of $10,528 33. The report says:

This exhibit of the earnings of the road for the past fiscal year, very nearly reaching the annual receipts before the war, while it is not all that could have been wished, yet under the disadvantages we have had to encounter, growing out of the peculiar condition of the country, is better than was expected. The receipts show an increase over the previous fiscal year of $10,528 33, and the expenditures a decrease of $7,939, an improvement in net income of $18,467 33. Moreover, every locomotive, except one now in the workshops for repairs, and which will soon be out, is in good running order; and the roadway and the motive power are in so much better condition than they have been since the close of the war, that we may expect, for some time to come, a still further diminution in the cost of their maintenance. The business of the road, too, since the first of July, has shown a considerable increase.

In order to enable the Clover Hill Railroad Company to compete with coals in other markets, the Board of Directors agreed to a reduction in the charge for transporting coal to the three points, Richmond, Petersburg and Osborne, the reduction to take effect on the 1st of October, 1868. A quantity of coal greater than heretofore is now furnished for transportation; and if the expectation held out as to the quantity which will be raised during the present fiscal year should be realized, it is hoped that both companies will find their advantage in these reduced rates.

The through freights over this road, to and from points south of Petersburg, continue to increase, and must ultimately become a valuable part of its business.

The through travel, also, has been greater this year than last; nor have we reason to anticipate any reduction in that source of income.

The bridge across the Cape Fear River at Wilmington, N. C., is in progress, and it is expected will be completed next Spring. This work when in use will add very greatly to the comfort and speed of that route.

The construction of the railroad between Raleigh, N. C., and Cheraw, S. C., has been resumed, and when finished will shorten the distance materially between Richmond and Augusta, Ga. And should the contemplated road between Cheraw and Columbia, South Carolina, be completed, that line will then furnish the shortest route to Augusta from Washington City; which will ensure to this company its full share of the travel to and from all the Atlantic States south of us.

Shortly after the adjournment of the called meeting of the stockholders in April last, application was made by several of those stockholders residing in the Northern States, whose stock had been sequestered and sold during the war, for the payment to them of the dividends which had accrued on their stock thus sold; which dividends had been paid to the purchasers under the sequestration sale. This question was referred by the board to eminent legal counsel, upon whose advice a settlement was made in accordance with the following resolutions:

Resolved, That for the dividends which accrued between the 30th day of June, 1861, and the 1st day of January, 1865, to any holder of the common stock of this company, who was prevented from collecting the same by being beyond the territorial limits or military control of the Confederate States, the President and Treasurer be, and are hereby authorized to issue to such stockholder, or to his personal representative or assignee, certificates of shares of the common stock of the company at par, computing such unpaid dividends at their value in gold at the dates when they were severally declared, together with the current market premium in Richmond on gold on the 1st day of January, 1867, and giving to such stockholder, as nearly as practicable, one share of such common stock for each hundred dollars of such dividends so computed.

Resolved, That in any case where the amount of such unpaid dividend accrued to any such stockholder shall be less than one hundred dollars, or where, after converting as nearly as practicable the amounts of such dividends into stock there shall remain a balance of the same less than one hundred dollars, the President and Treasurer of the company be, and are hereby authorized and instructed to issue to any such stockholder desiring it, a certificate, expressing on its face that the same shall be convertible at the option of the holder, at any time prior to the 1st day of January, 1877, into the common stock of the company, at par, whenever presented in sums of one hundred dollars, and shall, until so converted, bear from time to time a rate of interest equal to the rate of dividends, which shall, during the same time, be paid on such common stock of this company.

Under this authority, certificates were issued for one hundred and twenty-four shares, out of the shares of the capital stock of this company owned by itself, and bonds, convertible prior to the first day of January, 1877, into stock, were issued to the amount of $1,296 23; thus satisfying every claim for dividends on the part of our Northern stockholders.

In carrying out the views of the stockholders as expressed at their last called meeting, the Board of Directors, under advice of counsel, have called upon all persons, so far as known to them, holding certificates of stock issued in lieu of the stock of non-resident stockholders which was sequestrated and sold by authority of the Government of the Confederate States, to surrender such certificates, that they may be cancelled as null

and void; and have directed a bill in chancery to be filed against those holders who refuse to comply with this demand.

The officers of the company have labored diligently during the year to conduct its business judiciously and economically, and are entitled to commendation for a faithful discharge of their respective duties.

The company have six locomotives, 4 first class and 6 second class passenger cars, 3 baggage and mail, 2 express, 27 freight, 14 platform, and 90 coal cars; besides this company's proportion of 8 first class, and 4 second class passenger, 4 baggage and 4 express and mail cars, owned jointly by the three roads between Acquia Creek and Weldon. Number of miles run, 81,172, at a cost for repairs of about 8 cents per mile run. Number of passengers carried, 54,870, of whom 22,187 were through, 32,095 local, and 588 Clover Hill passengers. Number of passengers carried one mile, 1,154,190. In addition to the above, 4,701 were carried free. Tons of freight transported (including 24,307 tons of coal,) 45,531½.

GENERAL STATEMENT.

Cost of road and property from Richmond to Petersburg, including interest		$922,822 39
Less loss by fire, April 3d, 1865		254,318 30
		$668,504 09

President.—CHARLES ELLIS.

Directors.—R. B. Haxall, T. H. Wynne, Dr. D. W. Lassiter, I. Davenport, Jr., James H. Cox.

Treasurer.—M. W. YARRINGTON.

☞ Mr. Robert Fitz Roy has completed his survey of the Honduras interoceanic railroad. From his report it appears that the total cost of constructing the road, 240 miles in length, will be $1,885,413.

Queenstown, Harrington and Breakwater Railroad.

Messrs. J. M. Barry & Co., who have taken the contract to finish the Junction and Breakwater Railroad to Lewes, have also the contract for grading and building the road from Queenstown to Harrington. They will complete this end of the road by the first of August, and the Queenstown and Harrington road by first of next year. Then we shall have a direct route from New York by water to Lewes across the Peninsula by rail to the Chesapeake and thence to Baltimore, Annapolis and Washington. The prominent men of both States think this road will pay and become the great freight route from New York South. Lewes will be a coal depot from which coal may be shipped by water to any point. The men engaged in this enterprise have the money and intend to push it through. One thing is sure the road will develop a large and productive section of country and give them a cheap and short route to the great markets of the country.—*Sussex (Del.) Journal.*

Dorchester and Delaware Railroad.

A number of gentlemen interested in the early completion of the Dorchester and Delaware Railroad from Seaford, Delaware, to Cambridge, Maryland, met several of the officers and directors of the Philadelphia, Wilmington and Baltimore and Delaware Railroads, in this city, on Wednesday, and entered into negotiations to secure the early completion of the road. The conference was very satisfactory and resulted in an arrangement by which the Delaware Railroad Company, backed by the Philadelphia, Wilmington and Baltimore Company, agree to render such assistance as is necessary for the immediate completion of the railroad to Cambridge in time for the transportation of this year's fruit crop in Dorchester County.—*Wilmington (Del.) Commercial.*

Railways in South America.

The last advices from Bolivia report that eighty miles of the Arequipa Railway are graded, and twenty-five miles of track laid, over which an engine runs regularly, transporting supplies from Mollendu to Cahuintala. There now remains only twenty miles of grading to be done.

The chief engineer of the projected railroad from Iquique to La Noria, in Peru, reports that work on the road has been already begun, and will be pushed forward to completion with all energy possible.

☞ The progress on the Wallkill Valley Railroad is such that its managers announce that it will be opened to New Paltz, by the 1st of September. When it reaches that point it will be within nine miles of Poughkeepsie, on the west side of the Hudson, and where a road of that length over a highly favorable route, will open a direct road from Poughkeepsie to the Pennsylvania coal fields, thus cutting off twenty miles of the distance by way of Newburgh.

☞ A company has been organized at North Adams, Mass., to survey for a railroad from that village to the Boston and Albany Railroad in Hancock, under the style of the Hancock and North Adams Railroad Company.

☞ The Treasurer of the State of Louisiana advertises that all coupons on the bonds of the State, of all classes, will be paid at maturity at the Bank of America, New York.

☞ Thirty thousand dollars have been subscribed to the capital stock of the Sussex Railroad Company, with a view to the completion of the road to Franklin, and its extension to the New York State line.

Signal for Railroad Switches.

A new signal for railroad switches has been patented by Mr. R. Stewart, of Bordentown, Superintendent of Telegraphs of the United Railroad Companies between New York and Philadelphia, and G. M. Phelps, an electrician, of Williamsburg, N. Y. The apparatus consists of a red signal, which is elevated and lowered by an electrical current, passing through the wires connecting with a switch situate nearly a thousand feet from the signal house. Whenever the switch is misplaced the red signal invariably shows itself. The first signal of this patent is in operation in Trenton and it is said to be completely successful.

Virginia State Debt.

From the information we have been able to gather, the Auditor of Public Accounts will not have on hand the funds with which to pay the interest on the State debt on the first of July next. This state of affairs is owing to the interruption of public business by the removal of all the civil officers in the State by act of Congress. The interest will be paid, however, by the first of August. The sum of $625,000 was due the State of Virginia by delinquent sheriffs when Colonel Stanton was appointed auditor *ad interim*. He at once inaugurated steps to collect the money, and has received up to this time about $300,000. Judgments will be obtained in a short time for the balance, and the whole amount will be collected.—*Richmond Enquirer, 8th.*

Tennessee Bonds.

The Nashville *Press* says that the money to pay the semi-annual interest on the Tennessee State bonds this July *will have to be all borrowed.* The semi-annual interest to be provided for is about $1,100,000. The railroads provide about $400,000 of this. The remaining $700,000 must be provided for either by laws or by taxation. Not one railroad in the hands of receivers pays a cent in the Treasury in the way of interest to be provided for; the railroads ought to pay something over $800,000. Instead of this they provide about half that sum.

Worcester (Md.) Railroad.

Captain Robert Irwin, of Baltimore, with his corps of engineers, arrived here to day to survey the Worcester Railroad. This will be happy news for all our people. It is to be hoped that the commencement of the work upon our road next week will be the beginning of the end shortly to be arrived at. We have no doubt those interested will find in the labors of Captain Irwin's surveyors all that they could desire, and will feel the importance of entrusting to him the construction of the road.—*Snow Hill Shield, June 12.*

☞ The Jackson (Mich.) *Patriot* of May 26th, says: Work on the Grand River Valley Railroad, between Hastings and Grand Rapids, is progressing rapidly. Several miles of the road bed are already prepared, and track laying will commence as soon as the iron, which is on its way from New York, arrives. It is the intention of the officers of the company to have the road completed to Grand Rapids before the commencement of the State Fair.

☞ The following gentlemen have been elected directors of the Schoharie Valley Railroad Company: Jacob Vroman, John G. Gebbard, jr., Tobias Bouck, Samuel B. Stevens, William D. Gebbard and Charles Vroman.

☞ The contractors have commenced work on the bridge over the Tallahatchie river at Panola, Miss.

Commerce of New York.

The foreign imports at New York for the month of May, 1868 and 1869, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$10,244,318	$12,514,151
Do. for warehousing	10,541,079	12,876,131
Free goods	887,657	1,256,112
Specie and bullion	477,485	403,267
Total entered at port	$22.150,539	$27,049,661
Withdrawn fr. wareh'use	9,045,251	8,379,918

The foreign imports at New York for the five months from January 1, were:

	1868.	1869.
Entered for consumpt'n.	$50,138,370	$70,145,030
Do. for warehousing	49,659,206	60,730,169
Free goods	4,170,900	6,594,957
Specie and bullion	3,200,789	9,097,255
Total entered at port	$107,169,265	$146,567,411
Withdrawn fr. wareh'se	45,263,272	45,382,895

The foreign imports at New York for the eleven months ending May 31, were:

	1868.	1869.
Six months	$116,072,182	$123,552,971
January	15,418,571	22,542,529
February	20,818,337	25,827,280
March	26,512,934	34,793,290
April	22,268,884	36,354,651
May	22,150,539	27,049,661
Total for 11 months	$223,241.447	$270,120,382
Deduct specie	4,950,432	12,143,744
Total mdse	$218.291,015	$257,976,638

The duties received at New York for eleven months ending with May, were:

	1868.	1869.
Six mos.	$54,731,301 44	$57.845,963 97
Jan.	7,133,428 42	9,615,894 43
Feb	9,696,752 39	11,996,628 46
March	11,195,861 33	13,027,672 02
April	10,023,029 37	10,727,099 86
May	9,723,476 45	9,688,820 84
Total 12 months.	$102,503,849 40	$112,902,079 08

The exports from New York to foreign ports in the month of May, were:

	1868.	1869.
Domestic produce	$14,297,029	$15,443,499
Foreign free goods	183,986	49,261
Do. dutiable	852,544	583,846
Specie and bullion	15,936,231	2,512,330
Total exports	$31,269,790	$18,588,936
Do. exclusive of specie.	15,333,559	16,076,606

The exports from New York to foreign ports for five months from January 1, were:

	1868.	1869.
Domestic produce	$68,466,768	$65,237,062
Foreign free goods	371,303	97,689
Do. dutiable	3,268,064	2,717,486
Specie and bullion	37,279,972	13,116,362
Total exports	$100,386,107	$81,168,779
Do. exclusive of specie	72,106,135	68,052 417

The exports (exclusive of specie) from New York to foreign ports for eleven months ending with May 31, were:

	1868.	1869.
Six months	$91,143,385	$80,651,068
January	14,448,327	13,153,017
February	14,021,589	10,824,812
March	13,563,450	12,588,895
April	14,739,210	15,409,087
May	15,333,559	16,076,606
Total mdse	$163,249,520	$148,703,485
Exp. of specie	64,486,258	34,854,361
Total exports 11 mos.	$227,735,778	$183,557,846

Frederick and Pennsylvania Line R. R.

The contracts for the building of this road have been awarded as follows: Ten sections to Mr. M. McCabe, of Frederick city; seven sections to Messrs. B. B. Gordon & Son, of Lancaster, county, Pa., and nine sections to Mr. Samuel Smith, of Carroll county—26 sections in all, each section embracing a fraction over a mile. The road from the State line to Littlestown will be built by the Littlestown and Hanover Railroad Company. The contractors will enter upon their work about the middle of July, and are obligated to complete the road by May 1870. The expenditure involved for the purchase of the right of way is comparatively small. Three-quarters of the way have already been secured at a very trifling cost, the owners of the land having met the company in a most generous spirit. The right of way to be yet secured lies between Frederick city and Woodsboro'.

Greenville and Columbia Railroad.

The earnings of this road for the year ending December 31, 1868, were as follows:

From freights		$228,726 27
" passage and extra		103,384 35
" government transportation		1,898 35
" mails		11,535 00
		$345,543 97
Expenses, viz:		
Maintenance of way	$71,689 47	
Conducting transportation.	43,885 06	
Motive power	70,105 28	
Maintenance of cars	20,943 02	
General expenses	9,608 39	
		216,231 22
Net earnings		$129,312 75

Included in the above is $20,000 for expenses incurred in building and rebuilding locomotives and cars, rebuilding bridges and trestles, excess of wood purchased and paid for over what was consumed, restoration of property destroyed by the war, and the permanent improvement of the road which formed no part of the ordinary repairs or working expenses.

The net earnings ($129,312 75) are accounted for by the payment of accounts chargeable to maintenance of way and conducting transportation prior to 1868, and in the reduction of the amount of bills payable, and increase of cash on hand as compared with the previous year.

The receipts and disbursements during the year ending December 31, 1868, were as follows:

Receipts:

Balance on hand January 1, 1868	$22,058 86
Income of road	341,365 13
Bills payable	3,277 40
2d mort. certificates of indebtedness	1,740 83
Materials, etc., on hand Jan. 1, 1868.	16,433 67
	$384,825 89

Disbursements:

Bills payable	$27,972 09
Interest, etc.	1,971 06
Profit and loss	1,318 25
Expenses 1868, and prior	286,293 94
Materials, etc. on hand.	17,393 44
Cash on hand December 31, 1868	49,877 11
	$384,825 89

The pay rolls for the year for labor and salaries, have all been paid, and the material used has all been paid for.

The gross earnings show an increase over those of the previous year of $75,756 50; and the expenses an increase of $46,257 32. For the present year the indications are that the earnings of the road will be largely in excess of those for 1868. For the first quarter of 1869, ending March 31, the gross earnings were $120,677 56, while for the corresponding months of 1868 they were $103,772 16—being an increase of $16,905 40. The report says:

Since the 1st of January last, 250 tons of new rail, (fifty pounds to the yard,) have been purchased and is now being laid down, to replace some of the flange rail on the upper end of the line. This has been partly paid for in old iron on hand and to be taken up, and the balance in cash. This will improve that part of the track materially, and, by prudent management, it is believed that much of the worn iron may be replaced in the same way, in a few years, without reducing the net income below a point which will be necessary to meet all expenses and pay all the interest on the bonded debt, when re-adjusted, promptly as it matures.

During the year, there were put into the road 65,262 cross-ties, and stringers, including 8,497 put into the Blue Ridge Road. There were also 995,992 feet of lumber used during the year for the various purposes for which it was required. And it is presumed that an equal amount will be required for the present year.

The Blue Ridge Railroad from Anderson to Walhalla is still being worked by our company, upon the same terms and conditions as at the date of your last annual meeting. It is expected that the Blue Ridge Railroad Company will very soon desire to terminate the lease and commence to work it themselves. The business of that part of the road has about doubled in the amount of its earnings since the commencement of our lease, which is some slight indication of what may be expected when the entire line is completed to Knoxville; an event which we should look anxiously forward to, and which we have reason to believe will be accomplished in a very few years, or as soon as it can be done in the ordinary course of railroad construction.

The road with its branches, is 164¼ miles in length, and cost, with its outfit, depots, real estate and machine shops.	$3,081,213 52
Stocks held in other railroad companies.	80,495 00
Cost of road and property	$3,161,708 52
Capital stock paid in by individuals and the State	1,510,374 54
Cost of road and property over capital stock paid in.	$1,651,333 98

To provide for the difference between the cost of the road and the capital stock paid in, the company issued their bonds, bearing date from January, 1852, to March, 1854, respectively, having ten years to run, for $800,000; and in order to give them a higher market value, on the 18th January, 1854, they executed to Charles M. Furman, as trustee, a mortgage upon their entire property to secure their payment. They subsequently issued their bonds, bearing date July, 1855, and July, 1358, respectively, also having ten years to run, for $600,000. There was no mortgage or other lien executed to secure the payment of this latter class of bonds. By this it will be seen that the original bonded debt of the company contracted exclusively in building the road was $1,400,000. There was, however, a floating debt then due by the company, which was not funded.

In January, 1861, when the bonds secured by mortgage were approaching maturity, the company applied to the Legislature for aid, and on the 28th day of January 1861, an Act was ratified directing the endorsement of the guarantee of the State upon the bonds of the company to the amount of $900,000, providing that the bonds so guaranteed should be used for no other purpose

than for funding a floating debt of the company, then due, of $100,000, and for taking up and retiring the $800,000 of bonds secured by mortgage then approaching maturity. The company commenced at once to re-adjust their mortgage debt in accordance with the provisions of the Act; and there can be no doubt but that they would have succeeded without difficulty but for the war, and the confusion and suspension of all kinds of business caused by it.

At the end of the war, they found their mortgage debt only partly re-adjusted, their debt outside the mortgage rapidly approaching maturity, a large interest account accumulated, their road seriously injured and broken up, their depots and bridges burnt, and the country looked to for patronage prostrated. Under these circumstances, disheartening as they appear, the company went to work to rebuild their road, and again applied to the Legislature for aid. On the 20th December, 1866, an Act was ratified authorizing an additional endorsement of their bonds to the amount of $350,000 to fund the interest on their mortgage and guaranteed debt at par, and $250,000 to re-adjust their bonded debt outside the mortgage of $600,000, with the interest upon it, at the rate of one dollar for three. These two Acts of the Legislature contemplated the guarantee by the State of the bonds of the company to the amount of $1,500,000, which was sufficient at that time to arrange their whole bonded debt, and that hereafter the company would owe but one class of bonds, and those guaranteed by the State; and would have but one mortgage or lien upon their property, and that to the State.

A statutory lien to the State was contained in each Act upon all the property of the company as security for the guarantee. The company again proceeded to fund their interest and re-adjust their bonded debt, with a fair prospect of success, when the Convention, which convened in Charleston to frame a Constitution, passed an Ordinance suspending all Acts of the Legislature passed since December 20th, 1860, lending the name and credit of the State to corporations, until they were re-enacted and and declared of force by a subsequent Legislature. This being the only company whose bonds had been guaranteed under an Act passed subsequent to the date mentioned, it was framed and passed with special reference to them. The operations of the company was again interrupted, and they were forced to suspend the funding of their interest, because, without the endorsement of the State they could not fund it in the same security which the holders then held. Application was then made to the present Legislature, and on the 6th of February, 1869, an Act was ratified, validating and re-enacting the previous Acts, and declaring them of force. The company is again in condition to proceed in the re-adjustment of their debt, with a prospect, it is believed, of not being again interfered with or annoyed. The Board of Directors, at a meeting held on the 4th day of March last, adopted a resolution signifying their acceptance of the Act recently passed and directed that a copy of the resolution be furnished to the Comptroller-General and Secretary of State, in accordance with the requirements of the Act, which was done. Your concurrence in that resolution is respectfully requested.

In the meantime, during all their difficulties, the company has gone steadily forward in the rebuilding and improving of their road and property, whilst their income has been as steadily on the increase. It has certainly ceased to be a question now as to whether they will be able to pay their interest and operate their road successfully; and the holders of their bonds past due are respectfully invited to come forward and renew them, and take others endorsed by the State. They are now paying their six months' interest upon their mortgage and guaranteed debt falling due on the 1st day of January, 1869, and funding all interest maturing previous and up to July 1, 1868, in their bonds guaranteed by the State.

The following is a statement of the bonded debt of the company on the 1st day of January last:

First mortgage bonds outstanding		$320,500 00
Interest on same to January 1, 1869		117,325 00
Coupons outstanding on first mortgage bonds		22,032 50
Interest on same to January 1, 1869		8,357 53
		$468,215 03
Guaranteed bonds issued under Act of 1861	$629,500 00	
Coupons on same to Jan. 1, 1869	86,117 50	
Interest on same to Jan. 1, 1869	10,242 73	
		725,860 23
Guaranteed bonds and certificates of indebtedness issued under Act of 1866	$246,618 52	
Coupons on same to Jan. 1, 1869	17,263 30	
Interest on same to Jan. 1, 1869	604 22	
		264,486 04
Bonds outstanding not secured by mortgage	$485,500 00	
Interest on face of same from maturity to Jan. 1, 1869	73,272 50	
Coupons outstanding on same	120,715 00	
Interest on same to Jan. 1, 1869	29,292 19	
		708,779 69
Bonds and certificates of indebtedness issued under 2d mort.	$50,683 68	
Coupons on same to Jan. 1, 1869	3,547 86	
Interest on same to Jan. 1, 1869	124 17	
		54,355 71
Total amount of bonded debt and interest, January 1, 1869		$2,221,696 70
This will be reduced by the funding of non-mortgage bonds and coupons at one for three		472,519 78
Correct amount of funded debt when re-adjusted		$1,749,176 92

The litigation in reference to the foreclosure of the mortgage, together with that commenced by the guaranteed bondholders for their own protection, and also by the Attorney-General for the protection of the State, remains unchanged since your last annual meeting. It is hoped that the parties who commenced the suit, will see that it is to their interest (as it certainly is) to withdraw it, and accept the terms of the company for the renewal of their bonds, and thereby aid them in the re-adjustment of all their past due debt. This course would relieve all the parties of much annoyance and be to the interest of all concerned, because when that is done, and it is evident that the company will be able to continue the payment of their interest promptly as it matures, which is certainly now clearly demonstrated, the guaranteed bonds will advance in market to a price much above the first mortgage bonds which have not been exchanged.

The length of the main line, from Columbia to Greenville, S. C., is 143¼ miles; Abbeville Branch (Cokesburg to Abbeville) 11½ miles; Anderson Branch (Belton to Andersonville) 9½ miles—total length of road and branches, 164¼ miles. The company also operate, under lease, the Blue Ridge Railroad (from Anderson to Walhalla) 33 miles. The equipment of the road consists of 19 locomotives (of which 13 are effective and 6 to be rebuilt); 6 first class and 5 second class passenger cars, 4 conductors', 4 mail and baggage, 66 box, 26 platform, 7 stock and 11 gravel cars. Miles run by locomotives, 223,044; number of passengers carried, 45,214; number of bales of cotton carried, 45,111—showing an increase in mileage of 89,172; in passengers carried of 13,013; and in bales of cotton transported, 15,828.

BALANCE SHEET.

Capital stock		$1,510,374 54

Auditor.—C. V. CARRINGTON.

Monongahela Valley Railroad.

Chief Engineer Sigismund Lowe and his party, who six weeks ago began the preliminary survey of a route to the State line for the Monongahela Valley Railroad, have returned to the city, having completed their work. The line of grade to Monongahela City, nineteen and a half miles, is the same as that of the Pan Handle road. The entire route to the State line—eighty-seven miles—is of very light grade, and there will be very few cuts and not a tunnel, thus rendering the road easy of construction. In fact, it is pronounced one of the most feasible railroad routes in the country. The route follows the Monongahela river the entire distance, striking the State line at the Vanzant farm.—*Pittsburg Chronicle.*

Coal Shipped Back to Pennsylvania.

We learn on excellent authority that one thousand tons of coal are now being shipped at Newburg, N. Y., to Easton, Pa., it is supposed for the use of the Pennsylvania iron furnaces. Mr. Pardee, an extensive coal miner, residing near Easton, is also shipping a large quantity of coal by the Morris canal from Hoboken to Easton, at a freight of 70 cents per ton, besides the canal tolls, which will amount to about the same sum per ton.

This "carrying coals to Newcastle," contrary to the laws of supply and demand, is but an incident of the outrageous method resorted to by the monopolists to keep the price of coal at extravagant rates.—*Newark Journal, 8th.*

☞ The city of Calais, Me., has voted to grant a subsidy of $15,000 to aid the Houlton Branch Railway. This secures the construction of the road, and also the building of a bridge across St. Croix river, between Calais and St. Stephen, New Brunswick.

American Railroad Journal.

Saturday, June 19, 1869.

Stock Exchange and Money Market.

There has been a notable revival of activity in Money, since our last. The available supply has been materially reduced. The city banks have lost about 5¼ millions of deposits, and about 2½ millions of legal tender notes; and have been obliged to reduce their outstanding loans nearly four millions. Private lenders have been less liberal of accommodation, particularly to the Stock and Gold operators. The U. S. Sub-Treasury has had its cash balances augmented by customs, excises, and the proceeds of the public sales of coin, over four and a half millions, the aggregate on Tuesday having been $85,195,977, against only $80,506,697 the preceding Tuesday. Washington advices report the coin reserved of the Treasury Department at 107 millions, including 25 millions deposited on private account; and the currency balance at 27 millions. On the 1st instant the aggregate of coin in the ownership of Treasury was nearly eighty-two millions, or precisely $81,839,469, and the private coin deposits were $23,340,720. The currency reserve was then about $20,000,000, or precisely $19,984,555, showing a gain in this item, in the last two weeks, of about $7,000,000. Call loans have been quoted here at from 7 per cent. in currency to the most unexceptionable borrowers, to as high as $\frac{1}{16}$@$\frac{1}{8}$ per cent. per day to the more needy of the speculative brokers. Business paper has been less freely sought after, and has been generally rated at from 8@12 per cent. per annum, for the bulk of the marketable grades. The money pressure was most severely felt late on Tuesday, and through the more active hours of Wednesday.

The specie reserve of the city banks according to the latest return is $19 053,580, against $11,-193,631 same time last year. The city bank deposits are now $193,886,905, against $210,-670,765 week ending June 13, 1868. The legal tender reserve amounts to $50,859,258, against $69,202,840 same time last year. The circulation now stands at $34,144,790, against $24 166,846 same time last year. The loans are now $271,-983,785, against $275,142,024 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $142,667,774 a day, against a daily average of $127,713,504 the preceding week, and $130,274,748 the week ending with May 26, 1869. The current week's exchanges average about $142,778,129 a day. The city banks, last week, reported a gain of $2,447 of specie, with a loss of $5,237,137 of deposits, and $2,430,-171 of legal tender notes. They reduced their loans, $3,935,874; and increased their circulation, $161,795.

The city bank exchanges on Wednesday were $143,334,605, and the resulting balances, $4,123,-725.

National Bank notes to the amount of $97,190 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $315,759,228, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $16,016,194, leaving, with the existing 1,626 banks, (having an aggregate capital of $418,858,931,) an actual circulation at this date, of $299,743,034. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,891,-200; and for the public deposits, $28,316,350—making a total of $371,207,550. The Treasury Department last week redeemed and destroyed $282,420 of worn and mutilated fractional currency, and issued $120,669 of new. The outstanding amount of fractional currency on the 1st of June, was $33,452,523 against $35,330,323, on May 1, $36,719,912 on the 1st of April, $36,781,548 on March 1, $35,511,127 on February 1, and $34,-215,716 on the 1st of January.

The U. S. Sub-Treasury receipts, week ending with June 12, were $10,053,206, including $2,042,-338 from customs duties; payments, $7,123,599, including $912,143 of coin interest; balance at the close of the week, $82,507,817, against $79,578,210 at the close of the preceding week, showing an increase of $2,929,607. The business of the Office during the first two business days of the current week, was as follows: On Monday, receipts, $1,779,687, including $341,693 from customs; payments, $1,183,743, including $44,872 of coin interest. On Tuesday, receipts, $4,640,960, including $340,000 from customs, and payments $2,538,734, including $26,058 of coin interest

The balance at the close of business on Tuesday stood at $85,195,977, against $80,506,697 a week previous; and $78,466,478 on June 2, 1869. The aggregate receipts of the office in May were $53,236,485, including $10,034,613 from customs, aggregate payments, $60,202,733, including $13,-681,439 of coin interest.

The outstanding amount of coin certificates on the 1st of May, was $16,307,200, against $21,672,-500, April 1, $28.775,560, March 1; $32,669,520 on Feb. 1, and $27,036,020 on the 1st of Jan., 1869. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,079,-000, and retired $1,943.338 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during May, reached $10,-606,080.

Government revenues have been yielding quite satisfactory of late. The excises, last week, yielded about 8 millions; customs at the port of New York, $2,133,613, and at the outports about $700,000 (in coin) more, making the grand total income for the week equal to about $11,-896,217 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 153,000,000, according to the latest Washington advices. The customs yielded, same time, about 172 millions in gold.

Gold has been less confidently dealt in, owing in the main, to the increased activity in Money, which has operated very sharply against the speculative interest. The customs demand has been fairly active, but has not been much in excess of the public sales of gold by the Treasury Department. The export inquiry has been on a restricted scale, affording no great aid to the operators for a rise. The range of the price during the week has been 137¾@139¾, and the closing quotation on Monday was 138⅛. The million of Government loan was awarded on Monday at from 139.13⅛@139.33. The aggregate of the bids was $2,885,000, and the range 138.90@139.33.

The customs at the port on Wednesday yielded $416,000. The U. S. Sub-Treasury disbursed $34,781 of coin interest, on that day.

The customs demand for Gold last week, averaged $355 602 a day; thus far, this week, it has averaged $340,846 a day, or equal to a weekly aggregate of $2,045,076. The arrivals of specie from Europe, Havana and other foreign ports, during the week were unimportant, and since Jan. 1, $8,807,886, against $3,241,313 same time in 1868. The receipts from California, since our last, have been none. The total customs revenue of the Government, in coin, at this port, from July 1, 1868, to date was $119,731,817, against $109,-206,764 same time in the preceding fiscal year. At San Francisco, from Jan. 1, to June 5th, 1869, $3,129,695, against $3,440,646 same time last year.

The total receipts of California gold at this port, since July 1, 1868, have been $19,231,237, against $34,742,562 same time in fiscal year 1867-'68, showing a decrease in the current fiscal year, of $15,511,325. The exports of specie, from this port, last week, were $403,024, against $2,967,-321 same week last year; total, since July 1, 1868, $35,992,715, against $72,018,881 in 1867-'68. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $912,143; since July 1, 1868, $86,731,172, against $72,992,637 same time in 1867-'68. The specie exports from San Francisco, from Jan. 1, to June 5, 1869, were $16,754,679, against $16,696,090 same time in 1868. It appears that our bankers are now receiving the bulk of their San Francisco remittances in this way, and the last Aspinwall steamer of the Pacific Mail brought only $75,000 for New York. It is by no means certain that the same cause may not, after awhile, affect the receipts of Gold at San Francisco, by diverting the Gold in its crude state from the mines in the interior near the line of the railway to the Philadelphia Mint or New York Assay Office, in place of San Francisco.

Foreign exchange has been in rather better supply, and rather variable in price, on a less active demand. The increasing exports of produce add to the available offerings of bills, and tend to weaken the market. Bankers' prime sixty day bills on London closed on Wednesday at 109¼@109⅝, and on Paris to 5.22@5.16¼; sight bills on London to 109⅞@110⅜, and on Paris to 5.16¼c.@5.13¾. The offering of produce bills has been quite extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,353,482, against $2,359,561 same week last year; total, since July 1, 1868, $162,267 588, against $172,695,229 same time in preceding fiscal year of 1867-'68.

Immigration at this port is now up to a weekly average 11,560 immigrants. At the present rate of emigration from the Old World, we are likely to have material for transforming several of our Western Territories into new States, this year, without diverting the natural increase of population from the old States. It is probable, however, that much the greater portion of the present arrivals, consisting of the hardy people of the North of Europe—Danes, Swedes and Norwegians—as well as the usual proportion of German and Irish will settle in Illinois, Wisconsin, Iowa, Minnesota, &c.

Government securities have been offered rather more liberally, partly in consequence of the stringency in Money; while the demand has been quite moderate, and prices have yielded a little, varying frequently a fraction, and closing on Wednesday rather heavily. The accepted offers of bonds at the Sub-Treasury on that day were as follows: Of Messrs. Jay Cooke, $250,000 coupon 1867 Five-twenties at 115.28, and $250,000 do., 115.30. Of Messrs. Fisk & Hatch, $250,000 do., 115.29, and $250,000 do., 115.31.

U. S. sixes of 1881 closed here on Wednesday at 121@121¼; U. S. Five-twenties of 1862, ex coupon, 122@122¼; U. S. Five-twenties of 1864 at 116¾@117; U. S. Five-twenties of 1865 at 118⅜@118⅝; U. S. Five-twenties of 1865, consolidated, 119⅛@119¼; U. S. Five-twenties of 1867, 119⅛@119¼; U. S. Five-twenties of 1868, 119⅛@119¼; U. S. Ten-forties at 108⅛@108¼; U. S. Six per cent. currency bonds, 106⅜@106½.

The Attorney General of the State of Missouri has decided that the principal and interest of the bonds of that State issued in aid of the Pacific Railroad, the Southwest Branch, Iron Mountain, North Missouri, Cairo and Fulton and Platte County Railroads, are payable in coin, as they become due. The interest will therefore be paid in July, and thereafter in gold.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	June 2.	June 9.	June 16.
Consols	92⅝	92¾	92½
U. S. 5-20's of 1862	80½	80⅝	80⅞
Erie	19¼	18¾	19¾
Ill. Central	96	94½	95
At. & Great Western.	..	25	....

Railway and miscellaneous stocks have been unusually variable in price, on freer offerings, influenced by the Money pinch, which has operated against a buoyant, or even steady market. The dealings have been extensive but on the basis of reduced values, the speculation having been excited and feverish.

There has been more activity in domestic produce, particularly in exportable breadstuffs and in cotton at firmer rates. Middling upland cotton closed buoyantly on Wednesday at 33@33½ cts. per lb. The stock of cotton now here is estimated at about 39,000 bales. The receipts at the port this week, have averaged about 1,670 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 2,234,000 bales, against 2,293,000 bales same time in 1867-8; exports, same time 1,381,000 bales, against 1,668,000 bales same time in 1867-'8; stock on hand at latest dates, 131,000 bales, against 126,000 bales same date 1868. Total crops of 1867-'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 12,937 pkgs., against 11,140 pkgs., same time last year. From Boston, 4,056 pkgs., against 5,836 pkgs. same time in 1868.

Foreign merchandise has been in less request, as a rule, at less buoyant prices. The total imports of foreign dry goods, last week, were $1,146,426, and the total amount marketed $1,124,683. The value of foreign merchandise imported last week, was $4,479,424—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,625,850, against $5,013,085 same week last year; total since July 1, 1868, $278,-500,524, against $231,565 889 in 1867-'8.

At the Live Stock markets, this week, Beeves have been in less demand, at from 10@16½c., per lb.; week's receipts, 6,701. Milch cows, very dull at from $40@$110 each, receipts, 67. Veal calves in fair request at from 5@11½c. per lb.; receipts, 1,965. Sheep and lambs active and firmer at from 4½@8c., per lb.,; receipts, 23,467. Swine in more demand at from 9@9⅞c. per lb.,; receipts, 25,-454.

There has been more activity in ocean freights, and rates have shown more firmness. For Liverpool we quote flour at 1s. 6d. by sail, and 1s. 9d.@2s. by steamer, per bbl.; grain at 5½@6d. by sail, and 6d.@6½d. by steamer, per bushel; cotton at $\frac{5}{32}$d by sail, and ¼d. by steamer, per lb.; and heavy goods 15s.@30s. by sail, and 20s. @35s. by steamer, per ton. Total number of vessels in port on Wednesday, 498.

The New York exports, exclusive of specie, for the week ending June 15, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2.359,561	$4,353,482
Prev. reported	78,044,960	75,181,940
Since January 1,	$80,404,521	$79,535,422

The imports for the week ending June 12, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,206,766	$1,146,426
Gen. merchandise	3,806,319	4,479,424
Total for the week	$5,013,085	$5,625,850
Previously reported	106,003,135	140,338,004
Since January 1	$111,016,220	$145,963,584

The balance in the Sub-Treasury on Wednesday was $83,834,735 95.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New Jersey Central 2d mort., 100; Toledo, Wabash and Western consol. bonds, 83; Galena and Chicago 1st mort., 100; Chicago and Milwaukee 1st mort., 91; Toledo, Peoria and Warsaw 1st mort., E. D., 85; do., W. D., 85; Peninsular 1st mort., 96; Ohio and Mississippi consol. bonds, 86; St. Louis and Iron Mt. 1st mort., 85; Dubuque and Sioux City R. R., 106½; New York and New Haven R. ☞ Proposals are invited for the construction of 165 miles of the Memphis, El Paso and Pacific Railroad—15 miles of which are between Jefferson and Paris, Texas, and 150 miles extending westward from Paris to Palo Pinto county. Work upon the first 15 miles to be completed by March, 1870, and upon the remainder by October 1, 1870 The office of the company in New York is at 66 Exchange Place, where bids will be received until the 1st of September. Profiles, maps, plans, etc, can be examined after the 15th of August. Specifications will be furnished after the 1st of August. See Advertisement.

☞ The directors of the Bridgefield, Conn., and Port Chester, N. Y., Railroad Company have appointed S. N. Haight, Esq., engineer in chief, and decided to have a final survey of the route made and the maps prepared. When these are completed the work will immediately be placed under contract, and pushed as vigorously as possible.

☞ EIGHT PER CENT. FIRST MORTGAGE BONDS, GUARANTEED BY THE STATE OF ALABAMA. PRINCIPAL AND INTEREST PAYABLE IN GOLD. The undersigned offer for sale the second installment of

ALABAMA AND CHATTANOOGA RAILROAD BONDS,

and call attention to the following facts:

1. The mortgage is limited to $16,000 per mile, issued only upon road built and equipped.

2. The road develops a section unsurpassingly rich in iron, coal, manufacturing facilities, and cotton, besides shortening the distance between New York and New Orleans 216 miles, and forming the shortest route possible between the two cities.

3. Since our last advertisement a donation of about 2,000,000 acres of land contiguous to the road has been confirmed to the Company by the United States Government, worth more than the entire amount of the first mortgage.

4. In the last month twenty miles of road have been finished, making seventy miles in operation, and the whole is under contract to be completed in twelve months.

5. These bonds are guaranteed by the State of Alabama, whose entire debt is less than $5,000,000, whose interest has always been promptly met, and whose Eight per Cent. Currency Bonds are now selling above par.

6. Both principal and interest are payable in gold.

7. The present price is par and accrued interest in currency, the right being reserved to advance the price.

8. Ten thousand Five-twenties will purchase twelve of these bonds. The annual interest upon the $10,000 Five-twenties will be $600 gold.

The annual interest upon $12,000 bonds will be $960 gold. We confidently recommend these securities as the best and cheapest investment now on the market.

SOUTTER & CO., No. 53 William st.,
HENRY CLEWS & CO. No. 32 Wall st.

Chicago and Northwestern Railway.

The following is a comparative statement of the earnings of this road for the fiscal years ending May 31, 1868 and 1869:

	1867-8.	1868-9.
Passenger	$3,573,031 47	$3,992,313 52
Freight	8,266,809 40	9,295,494 37
Express	464,495 57	316,912 35
Mail	172,605 90	175,822 46
Miscellaneous	137,994 12	163,290 21
Total	$12,614,846 46	$13,942,832 91

This shows an increase in passenger earnings of $419,282 05; in freight $1,028,684 97; in mail, $3,216 56; and in miscellaneous $25,296 09; with a decrease in express of $148,493 32—making the total increase $1,327,986 45.

Great Western (Ca.) Railway.

The gross traffic earnings of the Great Western Railway of Canada, for the month of April, 1869, were $368,827 73; the working expenses, including renewals, $211,346 93—and the net earnings $157,480 80. For the three months ending April 30, 1869, the earnings were $969,785 99; the expenses, $611,175 58—and the net earnings, $356,610 41. This shows an increase in earnings over the corresponding three months of 1868 of $54,410 48, and in expenses of $62,818 87—making the decerease in net earnings $8,406 39.

☞ The rails on the new railroad from Valley Stream, on the South Side Railroad of Long Island, to Rockaway, have been laid for four miles. The road will be completed to Rockaway the 4th of July.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of May, were:

ENTERED FOR CONSUMPTION.

1869	88,131,658

From Herapath's Railway Journal.

Railway Economy.--The Locomotive.

We showed in our first article that the very satisfactory progress made during the last thirty years in economizing fuel in the locomotive engine, is due principally to improvements introduced in that part of the engine devoted to generating the steam, that is to say, in the construction of the boiler and furnace, and parts connected with them. This result has been brought about by providing the requisite amount of heating surface, having the fire-box and tube surface and flue area so judiciously proportioned and arranged as to absorb as large an amount of the heat generated as possible, adapting the furnace to burn coal by so modifying its contruction as to admit an increased supply of oxygen to mingle with the volatile gases of the coal, and likewise to raise them to the sufficiently high temperature necessary to effect their combustion before they could escape into the smoke-box, by which not only has the combustion been more perfect, but the heat resulting therefrom has been more fully utilized, at the same time the higher evaporation due to coal as compared with coke has been secured, resulting also in still greater economy from the less cost of the former. In addition to these a further saving has been effected by transferring some portion of the heat which must inevitably find its way into the smoke-box to the feed water on its passage into the boiler.

Although these have been the common objects sought after and accomplished to a more or less extent by those who have devoted themselves to the subject, it is curious to notice how various have been the means employed by different locomotive engineers who have introduced improvements. This, no doubt, is to be in part accounted for by the situation of a line, and to the characteristic qualities of the coal most easily and cheaply procurable, and to which the modifications in the furnace had to be adopted. The necessity also of converting existing engines, originally made for burning coke, into coal burning engines, with a view to save expense, had its influence doubtless with some, and has in such cases entailed a certain sacrifice in efficiency.

The means that have been chiefly employed to effect the object of coal burning are extended fire grate surface, so as to have a thinner fire and afford a larger area for the passage of the air; and stepping or inclining the grate at a considerable angle, so that the coal being introduced close to the fire door, may gradually travel forwards as it parts with its gases and becomes incandescent, and thus ignite the gases that pass over it from the fresh fuel; making a double fire box with the same object; the application of a combustion chamber with or without fire-bricks, which become heated and ignite the gaseous products as they pass through or over them; and combined with these, various plans for admitting the requisite supply of air above the fuel, either by deflecting it as it passes through the fire door, or by introducing it through tubes or air passages.

The first attempt to burn coal in the modern locomotive engine was made so far back as 1837 by Messrs. Gray and Chanter, and the plan was adopted in the existing coke burning boilers. Those gentlemen divided the fire-box into two compartments, one for coal and the other for coke, and admitted air above the fuel through tubes in the sides of the fire-box. They were also the first to apply a steam jet in the chimney to maintain the draught when the engine was at rest and the blast off. In 1845 Mr. Dewrance also introduced a somewhat similar arrangement. He divided the fire-box into two parts, one of which formed the furnace, and the other what was termed the combustion chamber. It was not, however, until eight or ten years after this that the question of coal burning was taken up in earnest by engineers generally, and that any great progress was made. About the year 1853 Mr. McConnell, who was then locomotive engineer of the London and North Western Railway, introduced his system, the main features of which consisted in giving an increased area of fire grate in order that the coal might burn with moderate intensity, and that plenty of air might pass into the fire-box to consume the gases, the combustion of which was further promoted by additional air introduced through tubes in the front and sides of the fire-box; increased capacity was given to the fire-box by extending it some distance into the barrel of the boiler, thus forming a combustion chamber in which the gases might become mixed with the oxygen of the air and ignited before passing into the tubes. The fire box was also divided longitudinally into two compartments having separate fire doors to provide for alternate firing. This plan with good management was found to be tolerably effective in preventing smoke, and fairly economical. Considering that it was to some extent the pioneer of those that followed, the results obtained by it were very creditable, the consumption of coal per ton mile being about .3 lb. The chief defect in this system appears to be the want of some means to raise the temperature of the volatile gases after they have escaped from the coal. The other requisites, as respects the due admission of air, are well provided for.

The next system of coal burning was invented by Mr. Beattie, of the London and South Western Railway, and was introduced about the year 1855. In Mr. Beattie's boiler an increased grate area is provided, as well as a combustion chamber, which, as in Mr. McConnell's, extends into the barrel of the boiler. The fire-box is divided transversely into two compartments by an inclined water space diaphragm, and both compartments are arched over with fire tiles, leaving narrow spaces between them. Perforated fire bricks are also placed in the combustion chamber at some distance in front of the tubes. These fire bricks and tiles supply the want alluded to in Mr. McConnell's boiler. They soon become red hot from being exposed to the incandescent fuel, and when fresh coal is put on the fire, and gaseous products escape, they become ignited by coming in contact with the heated bricks; these also serve to break and mix together the gases with the air, and in this manner assist in promoting combustion. The necessary quantity of oxygen is obtained by admitting air through small apertures in the fire doors as well as through tubes in the back of the fire-box, and dampers are employed in the ash pans by which the quantity of air admitted through the fire grate may be adjusted to the greatest nicety. An auxiliary steam jet is also employed in the chimney to stimulate the draught and prevent smoke when the engine is at rest, and the blast is consequently not available for this purpose. This system is found to work admirably, and is certainly one of the most economical at present known. With the further improvements Mr. Beattie has added for heating the feed water it is probably the most economical plan in use, the average consumption of coal per ton mile being about .2lb. without the feed water heating apparatus, and with it about .17lb.; on some occasions it has been brought down as low as .12lb.

The next plan of note was that of Mr. Cudworth, the locomotive engineer of the South Eastern railway, which was introduced on that line in 1857. In this we have an increased fire-grate area, and the fire-box divided by a longitudinal diaphragm into two compartments forming two furnaces with separate fire-doors, which unite in the front of the tube-plate. There is no combustion chamber, nor are there any fire-bricks or tiles as in Mr. Beattie's furnace, but the fire-grate is placed at a considerable inclination, sloping down from the fire-door. The fresh coal is charged close to the doorway, and as it parts with its gases it gradually slides down, so that by the time it arrives at the lower or back end of the grate it becomes an incandescent mass of coke, the heat from which is sufficient to ignite the gases which pass over it from the fresh coal, and the requisite quantity of air to effect their combustion is supplied through an aperture in front of the lower end of the grate, and is regulated by means of a valve or damper; the double furnaces are fired alternately, which facilitates the combustion of the gases. An auxi-

liary steam jet in the chimney is also employed to create a draught when the engine is not at work. This plan, with careful attention to the firing, is tolerably effectual in preventing smoke, and it certainly has the merit of simplicity. In economy it nearly approaches Mr. Beattie's plan, the average consumption of coal per ton mile being about ·22 lb. It is not improbable that some kind of deflecting diaphragm or other means might be added with advantage to this arrangement, to bring the gaseous products which must naturally collect at the upper part of the fire box down into closer contact with the incandescent fuel at the lower end of the grate, or else a fire-brick heat reservoir at the upper part of the fire-box to thoroughly heat and ignite the gases before they pass into the tubes.

These three plans necessitate either new engines or a considerable alteration in the fire-box end of of the boiler. In order to save this expense several proposals were made to adapt the ordinary fire box to burn coal. In 1856 Messrs. Dubs and Douglas applied a deflecting feather proceeding from the back of the fire-box towards the tube plate, to cause the gaseous products of the coal to descend on to the incandescent fuel and thus become ignited, and Mr. Dubs, in connection with Mr. Evans, in 1857 added to this a moveable inclined grate, which could be raised or lowered at will, for the proper management of the fire.

In 1857 Mr. Yarrow introduced on the Scottish North Eastern railway a flat arch of fire-brick in the interior of the ordinary fire-box. This sprung from the two sides of the fire-box, but was placed at a considerable inclination, the lower side commencing from the tube plates just under the lowest row of tubes, projecting upwards until within eight or ten inches of the roof of the fire box, and rather more than half-way across; tubes were also provided in the tube plate under the arch as well as in the fire-door for the admission of air. The effect of this arrangement would be that the gases instead of finding their way direct into the tubes would be deflected, and have to pass round this brick arch, which would act much in the same manner as the fire-bridge of an ordinary land boiler, but more effectually, from becoming heated to a high temperature, and the gases coming into close contact with it, being at the same time supplied with a fresh dose of oxygen from the air rushing in through the air tubes, would be ignited. Considering that this was simply a modification the fire box originally designed to burn coke, the results were very satisfactory. The consumption of coal per ton mile was about ·32 lb. A very similar plan was introduced by Mr. Jenkins on the Lancashire and Yorkshire railway, but in place of a fire-brick arch he employed a curved deflector of cast iron similarly placed, but perforated near its outer edge with numerous holes. He also employed air tubes at the front of the fire-box under the fire-door, as well as at the back under the tubes. His arrangement gave a result nearly similar to Mr. Yarrow's, and he obtained a rather higher duty from coal than from coke.

In 1857 Mr. D. K. Clark devised a system of forcing air into the fire box through air tubes placed at the sides by fine steam jets directed from the outside and passing through the air tubes, which acting in a similar way to the blast pipe of the engine, caused currents of air to rush into the fire box with great force. The orifice of the jets is but 1-16th inch in diameter, the air tubes 1¼ in. This simple arrangement was found to completely prevent smoke without any other appliance. It has been at work satisfactorily on several lines, and has been adopted on all the locomotive stock on the Great North of Scotland railway. Whether the steam which is introduced into the fire-box performs any office beyond the more mechanical one of drawing the air, in along with it in producing any new chemical combination which would facilitate the combustion of the volatile gases, does not seem to have been investigated. It would, however, to some extent warm the air, and perhaps make good the loss from the use of the steam in this manner; and it is supposed that the steam has some power to precipitate the carbonaceous particles which remain unconsumed: at any rate the plan seems to be very economical, the average performance of several engines on the Great North of Scotland railway being under ·2 lb. of coal per ton mile. There is one advantage possessed by this plan over most others, viz., that by the use of these steam jets when the engine is in a station the smoke can be prevented, as they act in a more direct manner than a jet in the chimney.

In 1858 Mr. Wilson introduced a system of air tubes which extended from the fire-box right under the boiler to outside the front of the smoke-box. This arrangement would partly effect the object of Mr. Clark's steam jets when the engine was running, since the air would then be driven through these tubes into the fire-box with considerable force. Mr. Ramsbotham, of the London and North Western railway, also about the same time provided two small doors in front of the fire-box, under the barrel of the boiler with regulating valves for the admission of air above the fuel, and just above these openings he placed an arched fire-brick deflector, something similar to that of Mr. Jarrow. It was fixed in the same position at the front of the fire-box against the tube plate, just below the tubes, but instead of inclining upwards, it projected backwards in nearly a horizontal direction, if anything sloping a trifle downwards, but it did not extend quite so far across the fire-box. Messrs. Lee and Jaques, on the East Lancashire railway, also introduced a somewhat similar arrangement as regards the projecting fire-brick arch, but they combined with this a deflector fixed to the top of the fire-door.

This deflector projected into the fire box sloping downwards, the door itself being underhung and provided with a valve for the admission of air, the opening and closing of which was regulated by a sector. The air being drawn in through the valve in the fire door, would by means of the deflector be directed downwards, and mix with the gases, and their combustion be effected by impinging on the incandescent fuel, and the brick arch fixed against the plate. About the same time Mr. Sinclair introduced a plan, proposed by Mr. Frodsham, on the Great Eastern railway, in which a deflecting plate over the fire door was employed, but the brick arch was omitted, and in place thereof two steam jets were introduced, one on each side, into the front part of the fire-box, impinging downwards upon the fuel. Mr. Douglas, on the Birkenhead railway, employed a deflector with the same object, but he combined with it an inclined fire grate of larger area, which involved a longer fire box, and of course necessitated an alteration in the boiler or the construction of new engines.

Some other modifications of the above plans are to be met with, but those we have described embrace the chief varieties of any note that have been practically tested or introduced. They illustrate in what a variety of ways different minds set to work to accomplish the same object. It will be noted that these various plans, differing greatly as they do from each other in the arrangement and construction of the parts, are all based on the same principle, the object to accomplish being to supply and mix with the volatile gases the requisite amount of air, and to bring them when thus mixed up to a sufficiently high temperature to effect their combustion. To accomplish this thoroughly an artificial draught seems indispensable to them all, created either by the blast pipe, or when this is not at work by a steam jet in the chimney or else in the fire-box. There is but one opinion as to the necessity of creating by some means or other this draught, but as to the other arrangements adopted by various engineers opinions differ. One thinks a fire-door deflector all that is requisite, while another considers that more air than is necessary for perfect combustion is by its means introduced into the fire-box, and a loss in evaporative power caused thereby, and urges the expediency of placing ample means at the will of the engine driver to regulate the admission of air; some think heat reservoirs in the shape of fire brick arches, deflectors or diaphragms useless, and that the fuel itself, if sufficient air is mixed with the gases, will do all that is requisite to ignite and consume them. Some condemn the use of combustion chambers, others consider them essential in giving the gases time to ignite before passing into the tubes. In fact although all are agreed as to what is required to be done, there is a great difference of opinion as to the best means of doing it. This difference of opinion is, however, not only inevitable but desirable. It creates a wholesome rivalry, and promotes the advancement of science. It is by each striving to do his best and surpass his competitors that new ideas come to light, and these in their turn become turned to account and improved upon by others, and in doing which fresh offshoots are developed which form a basis for new investigations, resulting often in improvements having a widely different aim from that which originally called them forth. It is thus that we go on improving and adding to our store of knowledge, and now we have this satisfaction, that, thanks to the invention of printing, to the freedom of discussion, and the general readiness and desire to exchange ideas, knowledge once gained is secured from loss. In ancient times, when knowledge was handed down by oral tradition or at best disseminated by the tedious process of manuscript, progress was not only slow, but many valuable facts and arts were lost for ever; and civilized nations have in some instances retrograded almost to barbarism, but this can never be the case now. We must go on increasing in knowledge, and if in knowledge then in power, and in that most important of all, the power of subduing nature and turning the gifts of Providence to our use. It is by this that the increasing population can alone be adequately provided for. It is therefore the duty of every man to contribute to the best of his ability to the general advancement, and it must, we think, be admitted that during the last thirty years our locomotive engineers have not been behindhand in performing their part. We have seen the consumption of coal for a given amount of work performed reduced by something like 70 per cent., and this with a higher speed and greater security from accident. There is, however, yet much more to be done and fresh efforts will have to be made. It is important that these efforts should be directed into the right channel. We are now approaching perfection in the method of using fuel for converting water into steam. There is here certainly not so great a margin for improvement as there was 20 years ago, but there is, nevertheless, room for improvement even in this department, but, as we stated in our last article, there is much greater room for improvement in the methods of using the steam when produced, and therefore without neglecting the former, our efforts should be now devoted to the latter, and if by so doing we succeed in promoting as great economy as that effected during the last thirty years, we shall have reason for congratulation.

☞ The West Chester *Record* is informed by one of the Directors of the Delaware and Pennsylvania Railroad that the Pennsylvania Railroad Company have agreed to aid them in building their road, and that a small additional subscription to the capital stock will insure the speedy completion of this important work. The road will connect with the Pennsylvania Railroad at or near Parkesburg, and run *via* Buck Run, Avondale and Newark to Delaware City.

☞ At the recent annual meeting of the Rome, Watertown and Ogdensburg Railroad Co., the former board of directors were re-elected, the following officers were also unanimously re-elected, to wit: W. C. Pierrepont, President; Marcellus Massey, Vice President; J. A. Lawyer, Secretary and Treasurer. The company (see advertisement) will pay a semi-annual dividend of 5 per cent., free, on the 15th July.

Journal of Railroad Law.

RAILROAD—TRESPASS BY ANIMALS ON TRACK—NEGLIGENCE.

The late action of Fisher *vs.* The Farmers' Loan and Trust Company (21 Wis., 73,) was one to recover damages for the killing of two colts by a train upon the Racine and Mississippi Railroad, through the alleged negligence of the defendant, then holding and operating the road. The cause was tried by a referee, who found as facts, that the colts, while in the possession of one Hays, without his fault or negligence, strayed upon the track from an adjoining pasture, through a fence which defendant was bound to maintain; that said fence was in good condition, and defendant in no way chargeable with negligence for failure to keep it in good repair, the defect in it through which the colts had escaped on to said track being merely temporary and unknown to the defendant; that the colts, while so upon the track, were injured by defendant's train, and that said train was negligently operated and run, and the injury was caused solely by such negligence. As matter of law, therefore, the referee held that the plaintiff was entitled to recover. Exceptions were duly filed by the defendant, and cross motions made by plaintiff, for a confirmation of the report, and by defendant for a review and rehearing; and the Court confirmed the report, and rendered judgment accordingly, from which the defendant appealed.

The opinion of the Court was delivered by

COLE, J.—This cause was tried before a referee, and therefore it becomes our duty, under section 16, chap. 264, laws of 1860, to examine the testimony and to decide questions of fact according to the weight of evidence. It is very obvious that this statute has changed the practice in this particular; since, before its adoption, it was a familiar and well settled rule that the appellate Court would not disturb the finding of a referee or a judge in common law actions upon questions of fact, upon mere preponderance of testimony. But the law now requires, in cases tried by the Court or before a referee, that this Court should review questions of fact as well as of law, decided by the Court or referee, where proper exceptions have been taken. See the case o. Snyder *vs.* Wright, 13 Wis., 689.

Upon the evidence, we are of the opinion that the plaintiffs cannot recover. In the first place it is clear that under the circumstances the company was liable only for such injuries as were occasioned by the *gross* negligence of its servants. The colts had escaped out of a pasture adjoining the railroad track on to the track of the road, where they were hit by the train. The referee finds (and we think the finding is in accordance with the proofs in the case upon this point,) that the fence was in a good and proper condition, and that the company was in no way chargeable with negligence for failure to keep the same in good repair. This circumstance distinguishes the case from Dunnigan *vs.* The Chicago and Northwestern R. R. Co., 18 Wis., 28, and Brown *vs.* the Mil. and Prairie du Chien R. R. Co., (*ante* p. 39.) But where the company erects and maintains proper fences and cattle guards along its road—keeps them in good condition and repair—and cattle escape from the enclosure adjoining the road, and stray upon the track they then become trespassers, and the law charges the owner with negligence although he may not be guilty of any actual carelessness in suffering them to escape. And where the negligence of the owner directly co-operates with the negligence of the agents of the company to produce the injury, then no recovery can be had, unless in cases where such agents are guilty of gross carelessness or wilful and wanton misconduct. Stucke *vs.* the Milwaukee and Miss. R. R. Co., 9 Wis., 202. In this case, while there may be some evidence of negligence on the part of the agents of the company in managing the train, yet there is nothing which proof of rashness or wantonness of conduct on their part, or that they did not employ the usual means to prevent injury. When the colts were some distance from the train, the whistle was blown and the brakes put on. The train had a competent number of brakemen, who promptly set the brakes when the alarm was given; and the track was sanded. The ordinary means were used to stop the train before it reached the colts. But it was a freight train on a descending grade, and these means proved ineffectual to stop the train in time. It is said that the engineer, if attentive to his duties, must have seen the colts a great distance ahead, and he should have earlier taken steps to stop the train. It is true, the accident occurred in the afternoon of a clear day in September, and where it appears the colts might have been seen by the engineer on the approaching train at a distance of two or three miles. But the engineer must necessarily exercise some discretion as to when measures must be taken to prevent a collision; and although he may misjudge as to the efficiency and success of these measures, and as to his power to control the train, yet we think it too strict a rule to say the company is liable if an injury occurs in consequence of this error of judgment. Besides the engineer might have seen the witness Westinghouse driving the colts from the track, and have so supposed that the colts would be out of danger before the train reached them. In the exercise of a high degree of care and diligence on the part of those operating the train, the injury would undoubtedly have been avoided; but as the negligence of the plaintiffs concurred to produce the result, no recovery can be had upon the facts established by the evidence.

By the Court.—The judgment of the Circuit Court is reversed, and the cause remanded with directions to give judgment for the defendant.

Chesapeake and Ohio Canal.

During the month of May the amount of tonnage on the Chesapeake and Ohio Canal was eighty five thousand tons, yielding a revenue of nearly fifty thousand dollars, being an increase of thirty thousand tons, and nearly twenty thousand dollars over the month of May of last year. This is the largest business done on the canal in any one month since its construction. The Cumberland Valley (Pa.) Railroad, now completed to Hagerstown, is engaged in condemning land for an extension of the road to Williamsport, Md., connecting with the canal—a distance of six miles only—and when this important connection is made the anthracite coal of Pennsylvania will be brought to the canal in large quantities and furnished along the entire line at much lower rates than at present, nearly the entire supply having now to be brought from Philadelphia. In return, the Cumberland Valley Railroad will carry into Pennsylvania our soft coal taken down by the canal. The Western Maryland Railroad, to be completed from Baltimore to Hagerstown, has had under consideration the extension of the road to Williamsport, and in case the Cumberland Valley Road declines to extend its road, will connect with Williamsport. Thus the connection with the Pennsylvania coal fields may be regarded as a fixed fact to be accomplished before the close of the summer.—*Cumberland Civilian.*

☞ The Flushing Railroad Company is busily engaged in grading the new route between Winfield and Hunter's Point, and north of the track of the Long Island Railroad Company. That part between Woodside and Dutch Kills is nearly ready for the rails. Work on the College Point and Flushing Railroad is pushed forward rapidly, and the contractor is engaged in driving the spiles across the Flushing meadows, at which place it will intersect the New York and Flushing Railroad.

☞ The Sag Harbor Branch of the Long Island Railroad is going forward finely. Immense quantities of ties have been discharged at Hunter's Point from several schooners within the past week, and are daily shipped east over the Long Island Railroad. They are of superior size and quality.

☞ The preliminary surveys of the Kalamazoo and South Haven (Mich.) Railroad are now being made. As soon as the final location is decided upon grading will be commenced and the work pushed with vigor with a view of having the road in running order this season.

☞ The Sherbrooke, Eastern Townships and Kennebec Railway Company was recently organized by the election of a board of directors with J. G. Roberston Esq., as President, and R. D. Morkill Vice President.

☞ Reports from Lake Superior are to the effect that the production of iron ore is larger than ever before, and that there is a greatly improved feeling in the copper region.

☞ The Branch Railroad from Manchester to Cheneyville, Conn., was opened on the 8th inst.

☞ The directors of the Southern Central Railroad Company in Auburn, New York, have resolved to issue $150,000 first mortgage bonds, and complete the entire road at once from the Pennsylvania State line to Lake Ontario.

☞ The Wheeling *Intelligencer* says the "proposition of certain capitalists to put $12,000,000 in the Chesapeake and Ohio Railroad, so as to complete and equip it, has been accepted, and work has been actively begun on the Western division, from Scarey Creek to Ceredo."

☞ Some two or three months ago the first railway in Greece between Athens and the Piraens, was opened for traffic. It runs from the port of Athens to the Greek capital only, and is about six miles long.

☞ Some of the corporators of the Perth Amboy and Elizabeth Port Railroad say that their charter is so formed that they can run their road to suit themselves, and wherever they please, and they therefore, think of running a spur to Rahway to connect with their main road. They propose to rush the building of their road right through.

☞ The Keystone Bridge Company, of Pittsburg, have contracted to build the new wrought iron bridge on the Boston, Hartford and Erie road at Middletown, Conn. It will be 1,200 feet span, and will cost $176,000.

Special Agents of the Post Office Department.

The Postmaster General authorizes the statement, for the information of railway companies, that under the recent reorganization of the special agents' service of the Post Office Department no commissions will be issued except to persons actually employed. The number will of course be limited; therefore all commissions signed by Postmaster General Creswell should be duly respected. All other commissions are inoperative and void.

☞ The following gentlemen have been elected directors of the Tebo and Neosho Railroad for the ensuing year: Morgan A. Taylor, N. G. Elliott, J. R. Estell, Harvey Bunce, John L. O'Bryan, Cyrus Newkirk, A. C. Marvin J. R. Barrett Wm. Jennings, Robert Allen, R. H. Melton, P. A. La Due, C. I. Robords, S. R. Gordon, W. A. Shannon.

☞ The net profit of the Great Western Railway Company of Canada for the three months ending April 30, 1869, available for dividend (after deducting interest charges, loss by exchange, &c.,) is $81,710 78, against $79,191 45, in the corresponding period of 1868.

☞ The directors of the New York Central Railroad Company have declared a dividend of four per cent. cash, on the stock and scrip, equal together to $7 20 per share of the stock. A meeting of the stockholders is called for Wednesday, June 30.

☞ Railroad fares in the East Indies amount to about 4.7 cents a mile. The rate for first class passengers from Calcutta to Delhi, a distance of 1,015 miles, is $48, and for second class passengers $24.

☞ The management of the New York Central Railroad has established a new office, that of General Track Inspector and Roadmaster, and has appointed Mr. R. A. Augur, of Batavia to that place.

☞ The branch railroad connecting Cooperstown with the Susquehanna road is nearly completed. It is expected that trains will commence running on the 1st of July.

☞ The Cherry Valley Railroad is progressing finely. It is expected the cars will be running at least as far as Sharon Springs by the last of August.

☞ A recent report on the German railways by the Vienna Board of Trade gives the information that there are 13,639 English miles open for public traffic.

☞ The traffic receipts of the European and North American Railway for the month of May, 1869, were $17,190 73; for the month of May, 1868, $14,746 54—an increase of $2,444 17.

☞ The earnings of the Pacific Railroad of Missouri for the month of May, 1869, were $263,208 43, against $256,562 92 in May, 1868—an increase of $6,645 51.

☞ On Thursday the new line *via* the Camden and Amboy Railroad and the Delaware Bay Railroad to Long Branch was formally opened.

☞ Messrs. Willis, Phelps & Co., of Springfield, Mass., have contracted to construct and equip the Philadelphia and Washington Railroad from Buffalo, N. Y., to the Pennsylvania coal regions, 125 miles, for $3,000,000. The work will be commenced next month.

☞ Work is being pushed forward with great activity on the Lebanon Springs Railroad, in order to get it in readiness for the Summer passenger travel.

TO RAILROAD CONTRACTORS.

Memphis, El Paso and Pacific RAILROAD COMPANY.

Office of the Chief Engineer,
Memphis, El Paso and Pacific Railroad Company,
66 Exchange Place,
NEW YORK, June 8th, 1869.

SEALED PROPOSALS will be received at the above Office, until **September 1st, 1869,** when Contracts will be awarded, for the GRUBBING and CLEARING, GRADING, MASONRY, BRIDGING, BALLASTING, CROSS TIES and TRACKLAYING of the following portions of said Railroad:

FIRST—The last Fifteen miles on the First Division of One Hundred and Fifty Miles, between Jefferson and Paris, Texas, commencing Eight miles east and extending Seven miles west of the town of Clarksville, in Red River County.

SECOND—One Hundred and Fifty miles, embracing the Second Division, commencing at Paris and extending westward, to Palo Pinto County.

Specifications, Profiles, Maps and Plans can be examined after the FIFTEENTH OF AUGUST, 1869, at the ENGINEER'S OFFICE, in NEW YORK or JEFFERSON.

Proposals must conform to the specification which will be furnished upon application at either of the above places after August 1st, 1869.

Evidence of ability to complete contracts will be required and a percentage retained of estimates until each section of five miles is finished.

Work upon the First Division must be completed by March 1st, 1870.

The Second Division must be finished by October 1st, 1870.

Every facility will be furnished those wishing to inspect the ground on the line of the road, by application in person at the Engineer's Office in Jefferson.

J. M. DANIEL, Engineer in Chief,
Memphis, El Paso and Pacific R. R. Comp'y.

ROME, WATERTOWN AND OGDENSBURG RAILROAD.—VICE PRESIDENT'S OFFICE, No. 12 College Place, New York, June 12th, 1869—This Company will pay a semi-annual dividend of FIVE (5) per cent., free, on and after the 15th July, to stockholders of record at this date. Transfer books will remain closed from date till the 1st July. Stock registered in New York will be paid at the Mercantile Bank for 60 days. All other at Watertown.

3t25 J. A. LAWYER, Treasurer.

FOR SALE OR HIRE.

4 SECOND HAND PASSENGER CARS, 4 feet 8½ inch gauge. Two seat 60; two 48 persons.

JACKSON & SHARP,
Delaware Car Works,
4t25 **Wilmington, Del.**

To Contractors.

SEALED PROPOSALS will be received by the undersigned until THURSDAY, July 1st, at the office of the ELIZABETH AND PADUCAH RAILROAD COMPANY, in Elizabeth, Hardin county, Kentucky, for the GRADUATION, TRESTLING, BRIDGE and CULVERT MASONRY, including 5,000 cubic yards of Bridge Masonry at Green river, on 40 miles of said railroad, between the 52d section and the town of Greenville, in Muhlenburg county. The work can be reached by steamboat from the Ohio river, to South Carrollton and Rockport, on Green river, or by rail to Bowling Green, and from thence by steamboat to Rockport. Specifications and profiles of the work can be seen at the Company's office in Elizabethtown on and after June 15th.

GEORGE MACLEOD,
Chief Engineer.

Elizabethtown, Ky., May 29, 1869.

EDWARD J. ETTING,

105 Walnut St., Philadelphia,

MANUFACTURERS' AGENT FOR THE SALE OF AMERICAN AND FOREIGN

RAILROAD IRON

Of every Size, Weight and Pattern.

For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

☞ Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FOR SALE.

THE JERSEY CITY LOCOMOTIVE WORKS CO —in order to close their concern—offer for sale all the Machinery, Tools and Engineering Plant, situated at their Works, corner of Morgan and Steuben Streets, Jersey City.

The machinery was procured from the best Manufacturers and is in perfect order. A descriptive Catalogue, with price list, will be forwarded upon application to the Company's Agent,

WM. S. AUCHINCLOSS,
Jersey City, N. J.

WILLIAMS, PAGE & CO.'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

Centre Lamps for High Roof Cars.

SIDE LAMPS AND SALOON LAMPS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**

The Light is very strong and brilliant, **lighting up the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers.** These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

The Saloon and Water Closet Lamp is the same form as the Side Lamp, but about half the size.

Manufactured and for sale by

WILLIAMS, PAGE & CO.,
91 Water St., Boston, Mass.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Sale of Rolling Stock by the United States.

SEALED PROPOSALS will be received by the undersigned, at the office of Messrs. Bristow & Wharton, No. 154 Fourth street, Louisville, Ky., until 12 o'clock, noon, June 20th, 1869, for two Locomotive Engines, nine Box and one Stock Car.

DESCRIPTION OF THE PROPERTY.

No. of Engine.	Builder.	Diam. of Cylinder.	Length of Stroke.	Diam. of Driv. Wl.	Length of Flues.	Diam. of Flues.	Dim's Fire Box.			Motion.	Weight.	Gauge.	When Built.
							Leng'h	Brea'h	Depth.				
		Inch	Inch	Ft. In.	Ft. In.	Inch.	Inch	Inch.	Inch		Ton.	Feet.	
15	Moore & Richardson....	16	22	4 9	11 00	2	53	36	50	Link.	26	5	1859

Alabama and Chattanooga Railroad.

THE ALABAMA AND CHATTANOOGA RAILROAD COMPANY was organized in October, 1868, by the consolidation of the Northeast and Southwest Alabama Railroad Company with the Wills Valley Railroad Company.

These two latter companies were chartered and organized before the war, and commenced the construction of their respective roads, which were together to form a continuous line of railroad between Chattanooga, in the State of Tennessee, and Meridian, in the State of Mississippi, a distance of 300 miles, and supplying a wanting link in the almost air-line route between New York and New Orleans.

At the time of the consolidation and the date of the execution of the deed of trust under which these First Mortgage Bonds are issued, $3,270,000, at ante-war prices, or $3,270,000 in gold, had been expended upon the two roads. Forty-three miles were completed and equipped and 156 miles graded, and the road bed nearly ready for the superstructure.

The Alabama and Chattanooga Railroad Company also succeeds to the valuable grant of land conveyed to the two former companies from the United States Government, amounting to ten sections of land per mile for all the road lying within the State of Alabama. These lands are located on each side of the road and within six miles from it, amounting to 1,900,800 acres, and comprise tracts of the most valuable iron and coal and cotton lands upon the continent.

The company is not only free from all debt, but with abundant resources in hand to meet any future contingency; the whole enterprise being in the hands of an association of Boston capitalists, of undoubted responsibility, with ample means to push the work to speediest completion. Over three thousand men are now employed upon the road, and the number is soon to be increased to five thousand. Seventy miles are already completed; the whole is under contract and will be finished, so as to make through connection, in about twelve months.

When the entire line is constructed, it will shorten the distance between New York and New Orleans more than two hundred miles, and form the shortest route possible to construct between the two cities. Of the value of the road when completed there is and can be but one opinion. It has long been acknowledged to be one of the most important lines and connections in the entire South. It can have in fact no superior, if indeed equal, south of the Potomac. This statement is not at random, but most thoroughly considered. Aside from its almost necessary monopoly of through travel and freights between New York and New Orleans, the road develops inexhaustible coal fields, of a quality superior to any yet discovered south of the Ohio, and from which all the markets of the Gulf must necessarily be supplied; it opens illimitable deposits of the richest hematite iron ore yet discovered on the continent, in a country with every possible manufacturing facility; and in its southern section it traverses the most productive cotton districts of Alabama and Mississippi.

The bonds now offered are a first mortgage upon the entire road, franchise, &c., limited to $16,000 per mile, bearing eight per cent. interest, payable semi-annually, in New York and Boston, in January and July, and both principal and interest payable in coin.

They are also endorsed by the State of Alabama, but such endorsement can only be secured as fast as the road in sections shall be "finished, equipped and completed" as a "first class road." The provisions of the law on this point are of the most stringent character, imposing individual liability, and a forfeiture to the State of the road, rights and privileges of the charter, in case said endorsement should ever be obtained fraudulently or contrary to said provisions.

At the expiration of five years from the date of the first endorsement, the company are obliged to set aside annually an amount equal to two per cent. of all the bonds endorsed for said company by the State, which amount is to be invested in Alabama State Bonds or in said endorsed bonds, and be delived over to the Governor of the State and held by him as a *Sinking Fund* for the payment and redemption of said endorsed bonds when they become due.

These bonds then are a first lien of $16,000 per mile on a road "finished, equipped and completed, as a first class road," upon which $10,000 per mile, in gold, had been expended before the lien was created, and upon which such additional sum must be expended as shall be necessary to "construct, furnish and equip, a first class road." They are a first lien upon a road whose present receipts exceed all accruing interest, and whose receipts, when completed, both from through and local business, cannot be inferior per mile to those of any other road in the South.

To these considerations is to be added the important fact that the immense tracts of valuable lands belonging to the company can be sold in open market, as fast as the road is constructed, for a sum greater than the entire amount of the First Mortgage Bonds which the company can issue.

The above-mentioned facts alone would, in our judgment, make these bonds a perfectly safe and reliable investment.

But, in addition to the intrinsic value of the security as above stated, these bonds bear the endorsement and great seal of the State of Alabama, whose credit has always stood high and always remained untarnished, whose entire State debt is less than $5,000,000, and whose 8 per cent. currency bonds are now selling at 102 to 104.

Such facts show the character of the securities now offered. We unhesitatingly recommend them to all seeking an unquestionably reliable investment.

We are authorized to offer a limited number of these bonds at par and accrued interest in currency, the right being reserved to advance the price at any future time.

Their superior value as an investment will be apparent by comparing the income derived from them with that derived from Government securities. Ten thousand 5-20's, at present prices, will buy twelve thousand of these bonds. The annual interest upon the 10,000 5-20's will be $600 gold. The annual interest upon these bonds will be $960 gold.

The first installment of $400,000 of these bonds were all taken within three days after they were put upon the market. Subscribers to this issue will be served in the order of application.

SOUTTER & CO., 53 *William St.*,
HENRY CLEWS & CO., 32 *Wall St.*

P. S. As showing the character of the road constructed, we append an extract from a letter written by Governor Smith to the President of the company:

EXECUTIVE DEPARTMENT,
Montgomery, Ala., May 2, 1869.

TO THE PRESIDENT OF ALA. & CHAT. R.R. Co.:

Dear Sir—Since I saw you I have been over the line of your railroad, for the purpose of inspecting it, in obedience to the act of our Legislature, requiring me, as Governor, to endorse your bonds, upon the conditions therein contained. I passed from Chattanooga over the road to two miles below Trenton. I found the superstructure to be unsurpassed by any I have ever seen. In this opinion I am sustained by some of the best railroad men in Tennessee and Georgia, who accompanied me on my tour of inspection.

* * * * * * * * *

I am, very respectfully,
W. H. SMITH,
Governor of Alabama.

The officers and directors of the Alabama and Chattanooga Railroad Company are as follows:

President.—D. N. STANTON, Boston, Mass.

Vice President.—R. M. PATTON, Montgomery, Ala.

Directors.—D. N. Stanton, Francis Dane, I. T. Burr, John M. Courtenay, John Demerett, Wm. Claflin, S. A. Carlton, John C. Stanton, and Lewis Rice, Boston, Mass.; Robert Jemison and R. M. Patton, Ala.; and Wm. P. Rathburn, Tenn.

Treasurer.—I. T. BURR.

Secretary.—A. F. THAYER.

Gen'l Sup't.—J. C. STANTON.

Bessemer Steel Axles.

The attention of Iron Masters and Railroad Men is invited to a tabular statement of tests lately made by Messrs. ALGERNON and PERCIVAL ROBERTS, at their establishment, the "Pencoyd Iron Works," near Norristown, Pa., published in the May issue of the *Journal of the Franklin Institute*, page 290. These gentlemen had undertaken the manufacture, for the Pennsylvania Central Railroad, of Bessemer Steel Axles, guaranteed to stand the test of five blows from a ram weighing 1,640 pounds, and falling twenty feet, the axle being reversed after each blow. To secure this test, each axle is made four feet longer than it is required to be in use, so that a trial piece of this length may be cut off and subjected to the stated number of blows. Wherever the trial piece fails, the corresponding axle is rejected. This method of testing is severe and expensive, yet it seems to be the only one which will insure absolute reliability with a material like this, where uniformity in the product of manufacture has not yet been secured. The tables, themselves, need no explanation, as they speak for themselves, and are so arranged that their various relations are evident on mere inspection.

New Jersey Railroads.

ANNUAL REPORT OF THE UNITED COMPANIES.

At a meeting of the stockholders of the Camden and Amboy Railroad and Transportation Company, in the City of Camden, on the 28th of April, 1869, the General President read the following report, which, on motion, was approved, and ordered to be printed:

To the Stockholders of the United Delaware and Raritan Canal Company, Camden and Amboy Railroad and Transportation Company, and New Jersey Railroad and Transportation Company:

The United Companies, including the Philadelphia and Trenton, own the following property:

1. Sixty-five miles of canal, connecting the Delaware with the New York waters, and forming part of the chain of inland navigation from the Chesapeake to Long Island Sound, and to the Northern lakes; and also forming the main water outlet from the Schuylkill and Lehigh coal fields to New York. It is navigated by vessels carrying as high as 250 tons.

2. Two main lines of railroad, forming two routes between New York and Philadelphia, one of which connects with the roads leading south and west from Philadelphia; the other with the roads through Southern New Jersey. These lines and their branches consist of 165 miles of railroad, of which 104 miles are double and 61 single track. Connected with these are about 60 miles of sidings and terminal tracks.

3. Terminal, station, wharf, and ferry property, shops, dwellings for employees, and other real estate outside of right of way, for the present or future use of the different routes, worth now upwards of six millions, though they cost very much less. The necessity for this arises from the termini of the routes being in the great cities, where property is very dear; from reaching more than one point in each of those cities; from another set of termini of the railroads, where the traffic passes between rail and ferry; and from the extensive accommodations required at the important points through which the lines pass.

4. Rolling and floating stock. This includes upwards of thirty steamboats, used for passenger, freight and ferry purposes, and for towing to and from the canal.

5. A controlling interest in 260 miles of auxiliary railroads, of which 35 miles are also leased, and in bridges, ferries, horse railroads, &c., used in connection with the main lines.

They also lease and operate 31 miles of other railroad, including the "Connecting Railroad" to West Philadelphia, and the line completed last year from Camden, by way of Pemberton, to Hightstown. They thus own, operate, or control 65 miles of canal, and 456 miles of railroad, and, including sidings, &c., 630 miles of track. In this case, as in other short lines between great cities, the apparatus of transportation consists largely in station accommodation and equipment. Its magnitude is not measured by length of line.

The cost of the companies' investment, not including materials, cash, &c., on hand, nor the stock of one company held by its partners, was, on the first of January, a little less than thirty and a half millions; of which sixteen and three-quarter millions was paid for by stock, a little over thirteen millions by debt, and the rest out of the earnings. To purchase the real estate, and to construct the works at present prices, would cost several millions more than this amount.

The receipts of the four companies in 1868, after throwing out amounts received by either company from its partners, were $7,830,525 09—not far short of eight millions.

The number of passengers taken on the trains, including commuters, was upwards of six millions; of whom over 600,000 were carried through from city to city. The passenger receipts of the four companies amounted to $3,629,338 34. The increase, both in number of passengers and in receipts, taking a long series of years, has averaged five per cent. per annum; of course, as in all other cases, rising above that average during the war and in years of excitement, and falling below it during periods of depression. This rate, if it continues, will give a present annual increase of passenger receipts of $180,000.

This additional passenger business will add but little to the expenses. The additional trains placed upon the roads last year, to give full accommodation to the public and stimulate travel, and not yet filled up, will fully accommodate it. The whole number of passenger trains now on the time tables of the roads operated directly by these companies is more than a hundred per day; of which twenty-four, or twelve each way, run through from city to city.

The tonnage moved on the railroads during the year was upwards of a million, of which nearly four hundred thousand was carried through from city to city. The freights amounted to $2,392,017 98.

The tonnage has of late years, on an average, increased fifteen per cent. per annum, or a little more than doubled every five years. Owing to the more rapid increase of low-classed tonnage, the freights do not increase so rapidly. Their general average has been a little more than twelve and a half per cent. per annum, doubling in six years. At that rate the increase of freights should be $300,000. The removal of the transit duties which dammed back the freight, and other causes hereafter referred to, should increase this amount. The increase of expenses may be two thirds of the increase of freights.

The freight expenses are large in proportion to the receipts, for the reason that the handling, ferriage and other expenses, independent of distance, are often, owing to the position of the route, with a ferry and terminus in a great city at each end, necessarily more than the expense dependent on distance. This fixed cost being added both to the freight proper and to the expense due to distance, very much diminishes the per centage of excess of the former over the latter. On long lines these fixed expenses are but a small part of the whole; in these short lines, a large part.

The increase of tonnage and removal of transit duties will now justify a cheap freight system, separate from the fast freight, (as coal is,) by which much expense can be saved; and the new terminus at Harsimus, when made, will save ferriage to New York, and expensive handling and accommodations there.

The tonnage of the canal in 1868 was over two and a half millions; the receipts, $912,107 77. Its increase is very irregular, stopping when new coal outlets are made, and after a while rising suddenly. It may be averaged at seven per cent. per annum, which would give $65,000 increase, with almost no increase of expenses.

The receipts of the companies are large and increasing. The great effort is, to diminish expenses by rigid economy and by money-saving improvements.

During the last year, besides the expenses of new trains and the working of fifty miles of new road—the business of which is only partially developed—extensive renewals of bridges, steamboats, rails, &c., far more than belonged to the year, and the utter failure of the peach crop, for which extensive preparations were made,* has considerably reduced the apparent net gain. It was best for the stockholders to put their work in a high state of efficiency, ready for the expected period of activity, rather than make a more flattering exhibit of net profits.

When, during periods of depression, the receipts fall below the normal line of increase, they commonly rise suddenly to or above that line when business revives. The increase this year will depend on the general business activity, of which these works are a thermometer.

The companies are in possession of a location between the two great cities of the continent—on the shortest practicable route between the commercial centre and the whole South and South-west—on one of the great highways to the West and North-west—over which an immense traffic must soon pass—from which, in two or three years the receipts will probably be ten millions of dollars per annum. The combination in their hands, of a canal and two lines of railroad, giving the best means for carrying each kind of traffic; their three termini at eligible points in each of the great cities; their connection with all the roads radiating from Philadelphia; the branches that feed their main lines; and the possession of the best facilities along their lines to secure the local business; give them great advantages in addition to those of their general location. If any railroad anywhere is profitable, theirs should be so.

But, to avail themselves of all these advantages, the companies must fully occupy the ground now in their possession; complete, and, when necessary, increase their facilities to meet the increasing traffic. Not to do so, would be like allowing a valuable farm to lie idle, or half idle, to save the cost of plows. But besides the direct gain from providing ample facilities, the geographical position of these companies' works will not permit them safely to consider theirs as merely local roads. If they do not prepare to take all the business that comes from far and near, somebody else, that will prepare, will take the increase, and part of the present business over the same ground.

The growing tendency to consolidate separate links of railroad into long chains, will soon bring under one control a continuous line of nearly 1,000 miles from Philadelphia to St. Louis; with perhaps as many miles more branching from it. Under the same tendency, the long lines converging to Philadelphia and to Baltimore may seek separate outlets to New York, which, in some cases, would not add more than five or ten per cent. to their mileage of road, though it would add vastly more than that to their investment. Such separate outlets, if made, would not only divert the business brought by those lines from the works of the United Companies, but would also compete for their other business. It is therefore their true policy to make it the interest of those lines to continue always to use the works of these companies as a common trunk; and this only requires capacity to take their increasing traffic on remunerative terms.

In pursuance of this policy, or this necessity, a large increase of capacity has been created since the consolidation (and made more important by the consolidation) in additional tracks, wharf and station room, and rolling and floating equipment. Capability for still larger increase, when necessary, has been obtained by securing, while it could be had, room for expansion.

* The peach freights in 1867 approached two hundred thousand dollars; last year almost nothing; they promise this year to be larger than in 1867.

Several serious difficulties that formerly stood in the way of the companies' prosperity have recently been removed. The main upper line of railroad has been straightened and all double tracked. That line has been connected with the roads leading South and West. Its separate fragments have been united in one interest and under one management. The transit duties—sometimes prohibitory, generally obstructive to traffic—have been abolished. The companies may now safely improve in front of their lands on tide water, under an irrepealable grant from the State; and the companies have secured the best site on the west bank of the Hudson for a great terminal depot—essential to their future business. Each of these adds value to the rest. Without each of them their operations would be embarrassed. The road to solid prosperity is now fully opened.

The situation of the companies' railroads invites a very large freight traffic. But the transit duties by rail, which were fifteen cents per ton between the Delaware and Raritan and 27 between the Delaware and Jersey City—that is, from a quarter to half a cent per ton per mile—prevented the extensive carriage of low priced property by rail. To carry such property economically on these roads, it must be carried in large quantities, separate from fast freight; and to get such quantities requires low rates. Increase of transit duties from increase of quantities combined with low rates would have left no profits. Owing to the higher tax to Jersey City, no freight was sent that way if it could be avoided; and until lately little preparation for it was made there. But these duties are now abolished, and the Companies' State taxation commuted at not quite $300,000 per annum. This gives them the free use of their own works. Their policy should now be, by moderate, though paying, rates, to stimulate every branch of freight transportation. The traffic between the great cities, at the ends of the route, is capable of indefinite increase.

The companies' works, all terminating on, and at other points coming in contact with, tide water—where interchange from canal to open river, and from rail to water carriage is, or may be, required—made it proper to secure a considerable extent of water front, to be improved when wanted for use. Of late, embarrassing doubts have arisen about the right to reclaim outside of high water mark—the State claiming the title to all lands under tide water. The companies, in order safely to improve along these lands when necessary, have recently purchased the right to do so from the State.

The union of the New Jersey Railroad Company with the other companies, and the abolition of transit duties, make it advantageous to the combined interest to send much additional traffic by way of Jersey City, and to secure ample accommodations for that traffic on the waters of the Hudson River. The accommodations required are not merely for a system of local roads extending one or two hundred miles, but for lines extending thousands of miles, seeking outlet over this road.

The New Jersey Railroad Company already had an extensive frontage on the river, but this, though very valuable for passenger, ferry, steamship, and other purposes, could not be made to accommodate a large freight business.

Harsimus Cove, less than half a mile north of the Jersey City ferry, and immediately south of the Erie terminus—directly opposite the business part of the city of New York, the only unoccupied space for two or three miles along the river front, seemed reserved by Providence for this purpose. The companies bought seventy acres of it, fronting 1,300 feet on the river, and extending inland nearly (at one point quite) half a mile from the bulk head line. This may not be as large a tract as some of the neighboring railroad companies have, but it can be made more valuable than any other.

The objects and advantages of this project are—

First.—It will give room—which must be had somewhere—for the rapid increase of freight traffic. If these companies do not provide such room, that traffic will force open new channels alongside their own. Some of the increase may be carried advantageously by way of Amboy, but much of it must, to avoid delay and expense, go direct to the Hudson River.

Owing to the opening, by the consolidation, of a new freight route over the New Jersey Railroad; to the improved connections South and West; the opening of new branches; the rapidly increasing manufactures along the line; and especially the abolition of transit duties; the tonnage, instead of doubling in five years, as heretofore, will probably double in three or four years. It is now rather more than a million of tons, of which 600,000 tons reach the waters of the Hudson River. The increase could not be economically disposed of on the present ground.

The requisite amount of eligible room, considering the cost of getting to it, could have been obtained nowhere else at less expense. There is no other suitable and central spot unoccupied.

Additional tracks and rolling stock can at any time be added when wanted. With an extension of the signal system now in use on these roads, the number of trains over the same track can be greatly multiplied. But room for deposit must be provided beforehand.

Second.—After business becomes established at Harsimus, the railroad freights on a very large class of articles will be as good to that point as to the other side of the Hudson. The saving to the company of ferriage, of wharf rent in New York, and the less cost of handling at Harsimus, will amount at present prices to half a dollar a ton. This on 600,000 tons will be $300,000 per annum—enough to pay the interest on the whole investment.

The great drawback to the profit of the freight business, as already pointed out, is the heavy ferriage and terminal expense. Harsimus will save it where now heaviest.

The lower part of the city of New York is the counting house of the continent. There is not room for all the storage that will soon be required; it is already seeking the opposite shores of the waters that environ the city. It will be most valuable where rail and water carriage can be made to meet; and this will be on the west bank of the Hudson.

Want of wharfage room in New York is also driving the shipping across the river. Already three important steamship lines are on the west side of the river, one of which—the Cunard—occupies a part of these companies' property at Jersey City. When the wharves and ship canals at Harsimus are completed, it will be at least as desirable a point for steam and other shipping as any on the river. It must become an important commercial depot.

New York is not one point, but many. Transportation from one point to another (as in or about any great city) often costs as much as fifty or a hundred miles of rail transportation. Hence, to a great degree, terminus controls route. Shipping, lighterage, ferry, cartage, storage and rail all meet at this one point, and an immense saving will be effected in passing goods from one to another. That saving must inure both to the benefit of these companies and their customers.

Third.—This terminus will protect the companies' business. The first two miles of any great railroad from the Hudson River westward, including such extensive terminal facilities, as the roads terminating there are making, would cost as much as two hundred miles of ordinary railroad through a level country. Connecting lines can therefore well afford to pay for such an outlet and such facilities as are here provided; either specifically for the accommodation, or by sending their traffic over the route on fair terms. They cannot afford to go elsewhere, for they cannot elsewhere find facilities so complete. This is far better than paper contracts, or, if such a thing were to be thought of, than legislative guaranties.

Fourth.—The railroad passes through a large

city, and occupies the centre of it, without interference with or by streets.

Fifth.—The wharf and ground rents where storehouses will be built by connecting railroad companies, by transporters, by steamship lines, and by warehousemen, will be very large. This was not the object of the enterprise, but will yield a very great incidental profit. Harsimus is not a real estate speculation, but a railroad necessity. Nevertheless, one, two or three hundred thousand dollars a year, incidentally gained, will be very acceptable.

When the storage system becomes fully established in New York, the value of this point will be greatly increased, as goods arriving either from abroad or from the interior, even when destined for the city, will be stored till used.

Sixth.—Railroad lines approaching Jersey City from other directions, can get an outlet here for which they can afford to pay a very large amount, rather than go to the expense of making an independent one. Already parties are applying, whose business, if taken, is expected to yield, in two or three years, $100,000 per annum. The companies can get this incidental gain, without injury to their own business.

It is not proposed to go on immediately with the Harsimus improvement. For some time, by the help of other improvements now in progress, the traffic can be accommodated elsewhere; and however confidently its rapid increase may be looked for, it is thought best to wait till it is certain; and when the improvement is begun, it is proposed to go on with it only as fast as it can be brought into profitable use; and it is hoped that the price of labor and materials will hereafter become more moderate. The whole work may not be executed in some years.

But the Companies have taken warning from the serious evils so often suffered by railroad companies from neglect to secure room for their growing business while it is possible to get it.

Other improvements may be deferred; but land in the right place must be got before it is otherwise appropriated.

If this property had not been secured when it was, it would probably have fallen into the hands of a competing company already interested in a large tract, of which this was a part, and who insisted on and got their share in land. Notwithstanding the unexpectedly large award of half a million to the State for its grant, the property would doubtless now sell for much more than it cost.* But the loss to the companies by any sale of this property would be irreparable. The abolition of transit duties greatly increases the value of it by giving free access to it.

The high speeds now necessary for some of the passenger trains on the upper line require that all curvature should be as easy as possible. A mile radius has been or will be attained, whenever possible, without too great cost. The increase of safety and saving in wear of machinery will amply repay the expense.

At Newark a new bridge is under construction across the Passaic, and a detour in the line will be avoided, which will save five minutes in the time of the fast trains. If their whole time of passage remains the same, this will save, in wear of track and machinery, fifteen or twenty thousand dollars per annum.

New wharves have been built near Jersey City ferry to occupy fully the whole valuable frontage on the Hudson at that point and give room for the present freight business going there.

In any improvements the Companies may make, safety and efficiency only will be considered; nothing expended for fine work or unnecessary excellence. Of course, in passenger accomodations, the ordinary regard to appearance will be had.

The great cities form natural termini of these works, and forbid any indefinite expansion or distant investments or entanglements other than mere working arrangements. The only expansion that should be made is in breadth and base, so as to increase solidity. These works are a funnel—to be enlarged in diameter when necessary, but not in length.

A prosperous railroad is never finished. As the business increases, equipment must increase, and the greater the posperity, the greater the expenditure. Of course, this expenditure should not be made till necessary to increase traffic, or save an annual expense exceeding its interest. An increase of ten per cent. on the business of these Companies would give at present rates over three-quarters of a million increase of receipts, and a quarter of a million increase of net profits. This would not, as heretofore, be attended with increased State taxation. This increase of business would require increased investment in rolling and floating stock, and other accommodations dependent on amount of business, of half a million. The dividend of ten per cent. on this would be one-fifth of the increase in net profits.

Some other expenditures on the railroads besides Harsimus, not proportional to amount of business, will be required to perfect the lines and secure room for future enlargement.

An Act of the Legislature of New Jersey has been obtained, authorizing the increase of the stock of the Companies in New Jersey sixty per cent. It was thought best to get authority for so large an increase in order to avoid the necessity of making such an application for many years to come, if ever. When the money may be wanted and the stock issued, will depend on the Companies' prosperity. If the business does not increase, further investment will stop. It is now under consideration to issue scrip on stock to the extent of ten or twenty per cent. on the present stock of the four Companies, to be offered pro rata to the stockholders.

During the past year the directors have been called to lament the death of three of their colleagues, all prominent members of the board. One of these was the venerable James Parker, for half a century one of the eminent public men of New Jersey,—an active advocate, in concert with Neilson, Simpson and others, for the construction of the canal, long before it was actually undertaken,—an efficient sustainer of the bold hand of Stockton in carrying it through. He was one of the original directors of the Canal Company, continued a director for almost forty years, and for many years was chairman of the Joint Board.

Another was Edwin A. Stevens, one of those remarkable brothers, who projected and constructed the Camden and Amboy Railroad, and risked their fortune in it, while most men wondered at their temerity. Their more remarkable father, who, in 1803, built and run an experimental steamboat, propelled by a screw, or "circular scull," as he called it, with proportions very like the best now in use, predicted in 1812, that wagons would be driven across New Jersey by steam, at the rate of twenty miles an hour; and if he had found any support would have attempted to make such steam wagons. The father lived a generation too early. The dawn of the present age enabled the sons to carry out his ideas and their own. Mr. Stevens was a director of the Camden and Amboy Company from its organization in 1830 till his death in 1868; and from 1856 till 1867 was president of that Company.

The other was John L. McKnight, who for many years was a director of the Camden and Amboy Company, and, since the consolidation, a member of the Executive Committee. No man felt a deeper interest in, or acted with a more single eye to, the welfare of the Company, and no man counseled more wisely how to promote it.

By order of the Joint Board.

ASHBEL WELCH,
General President of the United Companies.

*From the published statement of real estate sales, it appears that a neighboring railroad company have just bought a tract of eleven or twelve acres of the same kind of property as Harsimus, half a mile further north, fronting 260 feet on the river,—certainly no better situated,—for $550,000. This is some three and a half times as much per acre as Harsimus Cove.

The receipts and expenses of the United Companies and of the Philadelphia and Trenton Railroad Company, in 1868, not including receipts by one of the companies from another, were as follows:

RECEIPTS—RAILROAD.		
From passengers, United Companies		$2,778,483 00
From passengers, Philadelphia and Trenton Railroad Company		850,855 34
		$3,629,338 34
Freights, United Co.'s	$2,294,210 85	
Freights, Philadelphia and Trenton Railroad Company	97,807 13	
		2,392,017 98
Mails, United Co.'s	$31,112 87	
Mails, Philadelphia & Trenton R. R. Co.	10,125 00	
		41,237 87
Miscellaneous, United Companies	$46,574 66	
Miscellaneous, Philadelphia and Trenton Railroad Company.	4,455 61	
		51,030 27
Total railroad receipts		$6,113,624 46
EXPENSES—RAILROAD.		
For railroad, United Companies	$3,276,210 46	
Railroad, Philadelphia and Trenton, not including paid Camden and Amboy for cars, &c.	483,712 00	
Steamboat	216,464 74	
		4,076,387 20
Net receipts railroad business		$2,037,237 26
Receipts Delaware and Raritan Canal	$912,107 77	
Expenses Delaware & Raritan Canal	325,560 56	
Net receipts canal business		586,547 21
Receipts steam towing	$499,358 37	
Exp'nses steam towing	432,257 33	
Net receipts steam towing		67,101 04
Receipts, miscellan'us, auxiliary, &c.	$373,934 49	
Deduct dividends of one company from another	68,500 00	
		305,434 49
Toal net receipts		$2,996,320 00
RECAPITULATION.		
Gross receipts:		
Railroad		$6,113,624 46
Canal		912,107 77
Steam towing		499,358 37
Miscellaneous, auxiliary, &c.		305,434 49
Total gross receipts		$7,830,525 09
Expenses:		
Railroad	$4,076,387 20	
Canal	325,560 56	
Steam towing	432,257 33	
Total expenses		4,834,205 09
Net receipts		$2,996,320 00
Taxes and transit duties, United Companies	$418,452 86	
Taxes, Philadelphia and Trenton Railroad Co.	50,428 86	
		$468,881 72
Interest, United Co.'s	$753,689 48	
Interest, Philadelphia & Trenton Railroad Co.	12,519 00	
		766,208 48
General expenses		125,005 47
Profits carried to undivided earn'gs.		$1,636,224 33

The expenditures for construction and investment during the year 1867 and 1868, were as follows:

Delaware and Raritan Canal including an additional outlet lock at New Brunswick, extension of wharves, real estate, &c.	$199,143 42
Real estate, for railroad purposes	343,234 81
Harsimus Cove property and Right of Way to it	685,528 37
Wharves at Jersey City, depots and buildings	413,046 05
Extension of shops and machinery	106,198 32
Increased value of steel rails, replacing iron, and increase in iron rails	232,267 60
New ferry boats at Jersey City, new freight steamboat and new tugs	324,930 14
Locomotives	185,504 18
Cars	267,571 17
Grading and bridging for new tracks	60,428 31
Other expenditures on the main lines	214,953 10
Investment in auxiliary works, including preparations for a large increase of coal traffic on the Belvidere Delaware Railroad, increase of West Jersey, and of Camden & Burlington County Railroad and other stocks, and payment of a loan of $200,000, &c	989,888 29
	$4,022,693 76

The railroad lines owned, operated, or controled by the United Companies, are as follows:

1. Owned directly by the companies:

	Miles.
Philadelphia and Trenton, (Kensington to Trenton, Delaware Branch,) all double track	26.6
Trenton to Jersey City, all double track	57.1
Jamesburg to Monmouth Junction	5.5
Camden to Amboy, 20 miles double track	61.2
Bordentown to Trenton	6.1
Monmouth Junction to Kingston	4
Princeton Branch	3
Other branches	1.5
Total	165.0

2. Roads in which the companies have a controlling interest:

	Miles.
Rocky Hill to Kingston	2.5
Burlington to Mount Holly	7.1
Mount Holly to Junction of Camden and Amboy Railroad, near Camden	16.5
Pemberton to Mount Holly	5.9
Vincentown Branch	3
West Jersey to Bridgeton	37
West Jersey, Millville to Glassboro	22
Cape May and Millville	41
Salem Branch	17
Freehold and Jamesburg	11.5
Millstone	6.6
Perth Amboy and Woodbridge	6.4
Belvidere Delaware	68.7
Flemington Branch	11.4
Total	259.6

3. Other leased roads:

	Miles.
Connecting railroad	6.8
Pemberton and Hightstown	24.5
Total	31.3

The rolling stock consists of: 128 locomotives, 193 passenger, 40 baggage and mail, 612 house and stock, and 478 platform, marl and lime cars.

The floating stock is as follows: 3 passenger, 12 ferry, 4 freight, and 14 towing steamboats. 5 freight barges, (three of very large size,) 10 car floats, carrying eight to ten freight cars, 20 schooners, 21 coal barges, and 77 canal boats.

In addition to the above, each auxiliary has an equipment of its own, including on the Belvidere roads, over five hundred eight-wheeled coal cars.

CONDENSED BALANCE SHEET *of the United Companies, including the Philadelphia and Trenton Railroad Company January 1st, 1869.*

COST OF PROPERTY.

Delaware and Raritan Canal and equipment		$4,580,394 70
Camden and Amboy R.R. branches, real estate and equipment, including steamboats		11,221,696 63
New Jersey Railroad, real estate and equipment		7,341,277 93
Philadelphia and Trenton Railroad, including real estate		1,704,267 37
Total owned directly by companies		$24,847,636 63
Interest in auxiliary works, viz:		
By Delaware and Raritan, and Camden and Amboy Railroad and Transportation Company Stocks, not including Philadelphia and Trenton stock	$2,713,015 00	
Bonds and advances	1,482,573 77	
By New Jersey Railroad & Transportation Company st'ks	921,170 00	
Bonds and advances	294,109 88	
By Philadelphia and Trenton Railroad Company stocks	161,455 56	
Total, not including $765,000, stock of one company held by the others		5,572,324 21
Total stocks	$3,795,640 56	
Bonds, &c.	1,830,683 65	
Unappropriated material on hand		320,288 81
Cash on hand		864,924 83
		$31,605,174 48

This does not include the amount payable to the State of New Jersey for the Harsimus grant, which had not yet gone into the books on the 1st January.

LIABILITIES.

Stock of the Camden and Amboy Railroad and Transportation Co.		$5,000,000 00
Stock of the Delaware and Raritan Canal Company		4,999,968 75
Stock of the New Jersey Railroad and Transportation Company		6,250,000 00
Stock of the Philadelphia and Trenton Railroad Company		1,259,120 00
Total stock on the books		$17,509,088 75
Deduct stock of one company held by another		765,000 00
Total in hands of stockholders		$16,744,088 75
Funded debt, viz:		
Delaware and Raritan Canal and Camden and Amboy Railroad and Transp. Companies	$9,865,645 00	
New Jersey Railroad and Transportation Company	1,004,000 00	
Special bonds	655,900 00	
Other indebtedness	1,560,734 90	
Total indebtedness		13,086,279 90
Sinking fund and suspense account New Jersey Railroad		293,974 21
Undivided earnings out of which the Jan. dividend was declared, viz:		
Delaware and Raritan Canal, and Camden and Amboy Railroad and Transp. Companies	$728,431 13	
New Jersey Railroad & Transportation Co.	112,236 61	
Philadelphia and Trenton Railroad Co	640,163 88	
Not including amount payable to the State, as before mentioned		1,480,831 62
		$31,605,174 48

The dividend paid to stockholders out of the above, and United States tax, was $878,003 25. The rest of the undivided earnings have been used in construction.

The Permanent Loans of the United Companies, included in the above statement, were, on the 1st Jan. as follows:

LOANS OUTSTANDING—CAMDEN AND AMBOY.

English debt, £337,250@$4.84		$1,632,290 00
Extra dividend loan overdue		2,195 00
Loan due in 1870		323,220 00
" 1875		675,000 00
" 1883		1,700,000 00
" 1889		867,000 00
Consolidated loan due 1889		4,665,940 00
		$9,865,645 00

New Jersey Railroad and Transportation Company:

Bonds due 1875	$300,000 00	
" 1878	450,000 00	
" State of N. Jersey	100,000 00	
New Loan United Co's.	154,000 00	
		1,004,000 00
		$10,869,645 00

Since the 1st of January, a six per cent. sterling loan of £369,200, equal to $1,846,000, payable, in 1894, with a sinking fund, has been negotiated in London.

New York and Albany Railroad.

At a recent meeting of the Board of Directors, it was determined to prosecute this enterprize with the necessary zeal and energy to effect its speedy accomplishment. The President was directed to secure the services of John H. McFarland, Esqr., of Salem, Washington County, who has had large experience and success in enterprises of this character. This the President has done, and Mr. McFarland will, in a few days, commence the work of increasing the subscription to the stock of the road.

A very perfect survey of the road has already been made under the supervision of Mr. Wentz, one of the most accomplished civil engineers in the country. If the citizens of Albany and those residing along the line of the road, will at once and without delay respond to the call for subscriptions, fifty-two miles of the road, from this city to Kingston, can be put under contract in the month of September next; and when completed, there will be a continuous line of railway, on the west side of the river, from Albany to Jersey City.—*Albany Journal.*

☞ The Belfast and Moosehead Lake Railroad has been leased to the Maine Central Railroad Company for the term of fifty years. The lease provides that if the Belfast and Moosehead Railroad is built to Burnham, the Maine Central Company shall pay six per cent. per annum on a cost of $800,000; if built to Newport, the amount to be paid is 5½ per cent. on the cost, which is not to exceed $1,000,000. The lease has been signed by the directors and ratified by the stockholders of both companies.

☞ The Albany *Journal* says a meeting has been held to organize a company to construct a railroad from Schuylerville to Mechanicsville. It is also proposed to build a road from Saratoga Springs to Schuylerville, there connect with the Champlain canal, and ultimately form a connecnection with the Troy and Boston road at Union Village.

☞ John F. Barnard has been appointed Superintendent of the Missouri Valley Railroad, vice Col. A. G. Gower, resigned.
